1. COVER LETTER

June 10, 2020

Attn: Melissa Pettrey

Department of Administration
Purchasing Division
2019 Washington Street East
Charleston, WV 25305

Introduction

Technostaff LLC d.b.a HonorVet Technologies (HonorVet) is pleased to submit this response to **Request for Quotation: Supplemental Staffing for Microsoft Application Development, RFQ # ST02000000002**. HonorVet believes strongly that it can provide a supportive environment where great things can be accomplished collaboratively to ensure the success of the **West Virginia State Treasurer's Office (STO)**.

Our Understanding

HonorVet understands that STO is soliciting proposals for professional firms to fulfil the Division's needs for technology and other staff augmentation services, including recruitment, temporary job categories and IT job categories.

Our Proposal

HonorVet is committed to delivering staffing solutions that meet our clients' standards of excellence by maintaining quality along with quantity & instil the confidence to receive our clients' repeat business.

About Us

Founded in 2015, *HonorVet Technologies is a Service-Disabled Veteran-Owned, Economically disadvantaged- Small Business*. HonorVet is an executive firm dedicated to the ethical, timely and successful placement of top-tiered talent providing creative solutions to help *West Virginia State Treasurer's Office* achieve their organizational goals. *HonorVet is headquartered in Fairfield, NJ*, servicing nationwide clients with active contracts in more than 30 States. Backed by a highly experienced team of military veterans and industry professionals with over 100+ years of proven cumulative experience, *HonorVet has grown exponentially to cross \$12M revenue in the last 3 years*. HonorVet is known for its quality services to its clients' and we thrive to exceed our clients' expectations. Our team is efficient with meeting clients' goals before the deadline. Our recruiters are highly trained professionals equipped with the expertise to analyse and understand the client's requirement and select candidates accordingly. We are best oriented in the field of IT Management and consulting, Administrative and Clerical Services, Finance, Healthcare and Clinical Services.

HonorVet is a Professional Services focused staffing company, whose goal is to help lower the unemployment rate in diversity by partnering with businesses to meet their temporary and long-term staffing needs. Our purpose is to create technology-enhanced services, improve people lives and ultimately lower the underemployment of our veterans.

HonorVet is a certified *Service-Disabled Veteran-Owned Small Business (SDVOSB)* by the *U.S. Department of Veterans Affairs* and accredited by the *National Veteran Business Development Council (NVBDC)*.

HonorVet has successfully achieved its mission of helping veterans' transition into civilian workplaces including staff augmentation, SOW based tasks and Internal Hires for project work.

We understand the importance of effective and timely delivery of contracts to the Division within the allocated budget. We help our clients achieve this by providing highly skilled & capable resources with a proven ability to understand the client's needs and requirements quickly and meet client expectations with minimal interference and rework at competitive rates.

In Summary

HonorVet is in the business to satisfy our client's need and objectives with single, unified, all-inclusive complete services solutions. We can provide cost-effective service & support allowing you to get the best from HonorVet. We have all the resources required (including but not limited to) i.e. experienced manpower, infrastructure, tools & technology, effective recruitment process, skill tests, screening, and background check process. We will also utilize an extensive database of qualified candidates to meet STO's goals.

Our response accurately addresses all requirements identified in the RFQ. HonorVet team acknowledges and agrees to all STO's rules and procedures, terms and conditions, and specified rights and terms.

If you have any questions or further requests regarding our proposed solution, or if we can be of assistance to you in any way, please do not hesitate to contact me at (973) 521-8929 or send an e-mail to Procurement@HonorVetTech.com.

Sincerely,

A handwritten signature in blue ink, appearing to read "Rajeev Sharma", is written over a horizontal line.

Rajeev Sharma

3. COMPANY PROFILE

Technostaff, LLC dba HonorVet Technologies is a certified Service-Disabled Veteran-Owned Small Business headquartered in Fairfield, NJ, servicing nationwide clients with active contracts in more than 30 states since 2015. Backed by a strong team of seasoned leaders and experienced professionals with a combined experience of more than 100+ years, HonorVet has grown exponentially to cross \$12M revenue in the last 3 years. HonorVet is known for its quality services to its clients and we thrive ourselves to exceed clients' expectations. Under the skilled guidance of experts with vast experience in IT, Administrative, Financial/Accounting, Legal, Clerical, HR, Technical, and specific staffing projects, HonorVet has taken a progressive step as a committed team with a state of the art infrastructure and best practices, ensuring the timely delivery of our recruitment solutions to our customers' satisfaction. At HonorVet, we strive not just to deliver cutting-edge recruitment solutions, but also ensure that our services add value to our customers. Our experience in providing various staffing models such as Temp to Hire, Contract and permanent staffing offer the flexibility to serve our client with the best suitable model for their business.

HonorVet is a nationwide staffing company with over 150+ contract employees located in 30+ states and various industries. We have recruited for many IT categories to serve the diverse needs of our clients. Our placements include but not limited to IT, Administrative, Professional, Technical, Legal, Human resource, Scientific and Education. HonorVet brings a successful track record of managing its long-term contracts and contract vehicle with various state agencies & commercial clients. Repetitive business from our long-term clients is significantly contributing to our revenue generation. Our tailored approach will help us partner and retain our clients for decades to come.

Recruitment & Temp Staffing

Permanent Recruitment: HonorVet's specialized approach and in-depth domain expertise strongly position it to supply the most suitable candidates who fit your job requirements. This combined with our methodical industry research and extensive talent network enables us to locate not only active but also passive candidates who are not otherwise available in the job market, providing a regular supply of quality talent for future projects or temp staffing needs. We greatly understand the concept of permanent recruitment; therefore, our experienced consultants consider candidates' skills, cultural preferences, attitudes, ambitions, and a host of other factors which are vital to the process.

Contract & Contract-to-Hire Staffing: We are equally skilled at managing one-off recruitment solutions as well as fulfilling demands over an entire project life cycle, across several technologies, applications, and consulting skills. We have a rich database consisting of over 400,000 candidates, refined by recruiters who consistently deliver the best candidates quickly. We are continuously expanding our talent database attracting new candidates through internet advertising, referrals, search and selection. Given our industry expertise and leadership position in the market, HonorVet is best placed to offer recruitment, staffing, and outsourcing solutions to suit the needs of any organization. HonorVet's team consists of experienced industry professionals and have expertise working on all types of skills and job titles.

4. UNDERSTANDING & EXPERIENCE
4.1 Understanding for Web and Desktop Applications

HonorVet understands that STO (State Treasurer’s Office) will be implementing a new source code control system utilizing GitHub Enterprise server on-premises. HonorVet will fulfill the requirements of two best individuals for Supplemental staffing services for Microsoft Application Development. HonorVet understands that the goal and objective for the STO are to fix a variety of legacy web and desktop applications that need to be reviewed for compliance with modern software development standards and compliance with modern security standards. STO objective is to work on a code repository solution because a number of developers that have worked in the Agency over the past 10-20 years, these applications may not have source code available. HonorVet will help STO to recreate all source code from scratch so that the functionality of the application can develop.

4.2 Experience in IT Staff Augmentation

HonorVet provides IT staffing and recruitment services with an array of solutions for our public and local sector clients nationwide. HonorVet’s team has a proven track record of years of successful performance in providing the IT Staffing services to the public and local sector similar in size and scope as to STO’s project. As an IT staffing and recruitment firm, we provide services for various staffing and recruitment service opportunities in a wide range of IT functional disciplines. This capability stems from the thoughtful investment into long-term strategic management plans, which guides and governs the actions of the core team at HonorVet.

HonorVet’s infrastructure is backed by highly dedicated and result oriented professionals. With more than 110+ highly skilled professionals, HonorVet provides a full spectrum of technology services ranging from business and IT Staffing, consulting to managing IT projects. HonorVet ensures its commitment to satisfy all STO requests by following these principles:

- Understanding **STO’s** needs.
- Verifying that staffing services meet **STO’s** requirements.
- Making provisions of quality assessment & training for accepting market challenges.
- Monitoring, benchmarking and continuously improvising its business products and services, organization, and employees' performance.

HonorVet consists of experienced industry professionals and has expertise working on all types of skills and job titles such as Software Developer, Web Developer, Application Developer and Source Code Control System. HonorVet has a blend of resources under various domains including IT, Legal, Accounting, Non-IT, Professional, Admin and Clinical / Medical Professionals with niche skills to provide the STO with high-quality solutions. HonorVet manpower has the experience of working on a variety of projects of varying degree of complexity and is constantly trained to maintain excellence.

HonorVet believes in long term relationships and is serving IT contracts for a long time. Our candidates work to their core abilities to cover every duty assigned to them and help our clients in project completions. This has given us opportunities to stay with our clients for longer duration averaging out each IT position from 8-10months. Below mentioned are some of our most recent clients and placements in the Information Technology domain similar to the requirement of **STO**.

5. HONORVET'S CAPABILITIES

5.1 Capability

HonorVet Technologies is a Technology-driven company that provides the reach of a large staffing organization with the feel of a specialized, boutique provider. HonorVet deals in temporary staffing services, contract to hire staffing services, permanent staffing services and IT consulting services, Banking Finance, and Health Care etc. Unlike most of our competitors, we focus on niche recruitment and staffing. This focused vision, combined with our industry expertise and proven search methodology, uniquely positions us to provide high-quality resources with quick turnaround time. Furthermore, our status as a Service-Disabled Veteran-Owned Small Business (SDVOSB) allows our clients to meet their diversity initiatives or objectives. HonorVet Technologies provides clients with optimal placements by combining human interactions and experience with data-driven findings of candidates.

HonorVet provides staffing services nationwide with an active network of local employment agencies possessing in-house local candidates. HonorVet is strongly positioned to service the staffing requirements under this contract from its State of West Virginia office, backed with below competencies:

- We have partnered with Monster, Career Builder, Dice, Indeed and ZipRecruiter and other leading portals to find the right talent for your business.
- We assess each candidate personally with the appropriate skill tests to ensure the quality and sustainability of the resource.

- We have collaborations with reputed Universities to enlist fresh talents and qualified part-time assistants.
- Our team reaches the best-fit candidates via phone, email and messaging immediately.
- We filter the right candidates who can start immediately.
- Weekly orientations of prospective candidates are conducted by our dedicated representatives to maintain an “on-call” list of skilled and available candidates.
- We take full accountability of Candidate Retention, Payroll Management, Attendance Monitoring, Employee Relations, Terminations, and Reporting.

5.2 Sourcing Tools

- **AI and Cloud-Based Applicant Tracking System (ATS) Tool (JobDiva) and Web Portals:** HonorVet Uses JobDiva as its applicant tracking system. A few highlighted features are:
 - **Cloud-Based System for 24/7 seamless connectivity and service:** Our applicant tracking system is cloud-based which allows our recruitment teams to interact nationwide with each other and communicate with consultants and clients in real-time.
 - **Artificial Intelligence (AI) based Automated Agents to reduce TAT:** Automated Agents are set up within the ATS system that constantly searches both our internal database as well as external database systems for candidates with skills that match the needs required on our most important programs. This process reduces Turn-Around-Time (TAT) on every requirement.
 - **Detailed Skills Inventories for Quality Matching:** Each candidate within our system has a detailed skills inventory associated with their profile. Our software parses this information directly from candidate resumes into the database. With this information, we can match a candidate’s skills directly to the requirements.
 - **Automated Postings:** As we enter client job requirements into our system, they are automatically posted to the internet for potential job seekers.
 - **Instant Communication:** Our system is equipped with a feature that allows our recruitment team to perform broad or narrow searches and then instantly contact each candidate with a personalized email.
- **Job Boards:** HonorVet also uses a combination of several leading job portals/boards, major news publications, and other industry and skill-specific databases to source the candidates and advertise our open positions locally and/or nationally. Such web portals include Career Builder, Monster, ZipRecruiter, LinkedIn premium Recruiter and many more.
- **Million+ Internal Resume Database for Nationwide and Diverse skills candidates:** HonorVet maintains a robust, company-wide proprietary candidate database, in its internal database system accessible through ATS. HonorVet’s database is comprised of professionals from diverse backgrounds and domains. Currently, our candidate database has over 400,000 resumes and continues to populate daily from entry-level to an executive-level ranging from manual labor to IT professionals to cover diverse industries. Resumes are automatically entered into our database for categorization by profession, education, certification, pay rate, GPA, years of experience, special skills, location, testing scores, licensing, and availability, etc.
- **Nationwide Network of Local Employment Agencies and Sub Contractors:** We have registered our company with several local employment agencies throughout the US to take advantage of the local pool of skilled resources.

- Developed reusable angular components that are presentation and containers using Change Detection.
- Created reusable directives in Angular 4.
- Design and development of Middle tier/Data access layer/Business Components using C#/SQL Server
- Development of automatic tests with Selenium.
- Development of verifications and validations in code with JUnit
- Design of test cases and TERs (Test execution Records)
- Configuration and installation of windows and Linux servers.
- Bug fixing windows edge testing
- Modified Stored Procedures, Views and Functions according to Change Request/Bug

Environment and Tools: C#, .Net, ASP.Net, MVC, GIT, Jira, LINQ, Entity Framework, JavaScript, AngularJS 1.5, Angular4, Telerik Kendo UI controls, NUnit, Selenium, Windows.

Employer: Cognizant/Global HITSS (Mexico City)

Aug 2016 – Jan 2017

Project #1

Project: Special Negotiations

Project Description: Web application that manages the cell phone plans gathered for companies in order to keep track when a contract is going to expire and triggers warning email to the executive that has assigned the contract so that she manages a good plan in order to keep the contract or even better improve the benefits to give a good service to customer. (Telcel).

Project #2

Project: Prizes for distributors

Project Description: Web application that manages incentives to the distributors of cell phone, incentives are type and amount of prizes, the application calculates in accordance with the amount of sales, either by money or by products or brand the price distributor deserves. Manages a catalog of incentives for types that can be any kind of products.(Telcel).

Responsibilities

- Gathering requirements from users, business analysts and perform analysis, design, application implementation, testing and deployment of application.
- Worked on commercial platform for ERP to control the multination distribution channel of products (Bimbo).
- Development of Autocomplete functionality for input of the name of company so that get only data that contains in its name the text typed on input text box from a catalog of about 15,000.
- Carryon deployment for in capacity of the main programmer.
- Developed Angular JS services, custom directives and views and organized using MVC pattern.
- Created custom directives and filters using AngularJS built-in \$http service from controller through dependency injection.
- Database Design with SQL Server, Database programming of Stored Procedures.
- Perform bug fixing Stored Procedures, also bug fixing web site.
- Created unit test plan and developed test cases; coordinated defect management, debugging and fix validation testing during system and user acceptance testing (UAT) phases.
- Participated in ITIL training
- Deploy the application in IIS, into Production and post deployment validation
- Document technical specifications and used code generation tool to create class code for several entities.

Environment and Tools: .NET Framework 4.5, C#, ASP .NET, LINQ, SQL Server, HTML5, CSS3, JQuery, JavaScript, AngularJS, ITIL, Power-Point.

Client: Grupo Blue (Mexico City)

May 2015 – Aug 2016

Position: Senior C#.Net Developer

Project #1

Project: Dashboard

Project Description: Provides statistical data regarding partners of loyalty program, it helps customer to get information of the behaviour of the loyalty program like new partners, redeem, accrual, provides an order tracker module to manage the orders.

Project #2

Project: Mobile Club Lumen

Project Description: The application was built for a loyalty program of Lumen stationery store that allows register partner, update partner's info, check past two years balance and display Barcode ID.

Project #3

Project: Coupon Manager

Project Description: This application controls the process to publish new coupons for loyalty program's partners, allows register detailed data like expiration, terms & conditions regarding coupons that will be displayed on the coupon's module.

Project #4

Project: Data Validator

Project Description: This application validates data of sales which issued to update the accrual of partner's points. These files are provided by stores in accordance with layout.

Project #5

Project: Red M Loyalty Program

Project Description: Manages the loyalty program, loads info of sales per store, accruals points in accordance with business rules, shows coupons, allows partners buy products and place orders which are paid by means of points, shows balance of partners.

Responsibilities

- Perform functional analysis of existing module & new requirements.
- Built, tested and deployed scalable, highly available and modular software products and worked on MVC, ASP.Net and desktop applications.
- Designed and developed ASP.NET Applications for Web API and websites using MVC-RESTful, Entity, Windows Applications
- Worked on database programming of Stored Procedures of existing & new requirements.
- Created complex custom Grid functions to manage and manipulate data as required for the functionality.
- Proficiency in building responsive and mobile optimized websites using Bootstrap.
- Developed Web API for apps and window services creation of sub-domains in various websites
- JQuery Implementation for client side sorting and validations Implemented LINQ for querying, sorting, filtering
- User Interface design and development using HTML, CSS, .Net Web Implementation of ASP.NET security mechanism.
- Database Design with SQL Server
- Wrote T-SQL Statements, Stored Procedures, Triggers, Functions, and Sequences to access data from database.
- Experience in source code management, automated tests and requirements management using TFS (Team Foundation Server)
- Work in Agile environments and empowered to take the task and work accordingly.
- Wrote NUnit Tests and Integration test for the MVC controllers and views to have good code coverage.

Environment and Tools: C#, .NET Framework 4.5, Java, ASP .NET, LINQ, SQL Server, AJAX, JQuery, Android Studio2, Windows.

Client: Infotec (Mexico City)

Aug 2014 – May 2015

Position: Senior C#.Net Developer

Project #1: Coverages' ETL

Project Description: Reads data from excel regarding new coverage' packages, creates scripts to persist on database to setting back bone system of car insurance (GNP Insurance)

Project #2: Alarm Button

Project Description: Function button in POS app to send an alarm to a police web service (Starbucks, Burger King)

Project #3: Survey Manager

Project Description: Manages setting up of surveys, questions can be open, or option answered (Starbucks, Burger King)

Project #3: License Monitor

Project Description: On windows OS, reads reged its file looks for keys of particular applications and create a file that is place by means of FTP on a server. (Starbucks, Burger King)

Project #4: Patent's System

Project Description: Manages the flow of Industry's Patent to have control of the status of requests.

Project #5

Promotional Activities: Manages the schedule of activities to promote patent department.

Responsibilities

- Deeply driven web application and desktop application development, implementation and maintenance of business application
- Analyze, design, implement and integrate functional requirements in the solutions using SDLC
- Assist programmers to understand coding and functionality of each module in detail for the project related to functional and technical perspectives.
- Research how to communicate POS with web service.
- Research POS Programming
- Programming button and function for UI.
- Involved in taking daily backup of database, daily back up of code from client TFS
- Involved in UI screen development using WPF, MVVM pattern
- Developed and optimized the stored procedures to pull data from multiple tables across multiple databases.
- Developed and maintained XML based Web application.

Environment and Tools: .NET Framework 4.5, C#, C for Micros POS 3700, EPPLus, ASP.NET MVC 5, C#, JQuery, LINQ, Entity Framework, FTP, Web Services, Windows.

Client: ITS (Mexico City)

Jul 2013 – Jul 2014

Position: Senior .NET Developer

Project #1: Life System

Project Description: Manages the full process of life insurance policies for (Zurich).

Project #2: Car Insurance Quoter

Project Description: Connects to different Insurance companies and get a quote of each to show users so that they can have that info.

Responsibilities

- Served as the onsite coordinator for offshore and senior developer and was involved in application maintenance and support.
- Improve performance of stored procedure of monthly process regarding validity
- Development of module to input data of particular policies to be canceled
- Implemented Routing, URL, Security, Action Filter techniques for application development.
- Created a custom roles-based security and authentication interface based on user registration.
- Responsible for research and implementation of security standards and security documentation for the development team.
- Providing post implementation support for any issue or defect after release.

Environment and Tools: C#, .Net Framework 4.5, ASP.NET, NUnit, JQuery, LINQ, Entity Framework.

Client: Infosys(Mexico City)

Jun 2012 – Jun 2013

Position: C#.Net Developer

Project Description: Worked on Several Applications and processes: Applications that help to business operation in regular basis (Pfizer Peru).

Responsibilities:

- Understand Applications function
- Designed and developed User Interfaces for adding new printing product screen.
- Design and code the business layer using C#. Developed data layer using ADO.Net
- Prepare test plans, test cases and test scripts for testing the application.
- Design User Interfaces using ASP.Net and Java Script.
- Development of the Import and Export functionality for the project.
- Developed the functionality of adding new users, updating passwords and deleting account for the Site Users.
- Used SSIS to migrate files from legacy systems that were already in the system to a SQL server destination tables.
- Conduct meetings for knowledge transference and perform KT to offshore team
- Provided Application Support L2

Environment and Tools: .NET Framework 3, ASP.NET, VB6, C#, SQL Server, SSIS.

Client: Hildebrando (Mexico City)

Dec 2010 – May 2012

Position: .Net Developer/Android

Project Description: SICOAE: Manages the electricity's billing for each office around the country, manage security for region and office, where a region can have one or more offices so a region user has access to info of the offices belonging to region. (Telmex)

Responsibilities

- Perform Analysis and Migration of legacy application
- Design solution and development of web applications
- Designed and developed Inform Learning System tool using ASP.NET, C#.NET, WCF Services.
- Used HTML, CSS for web page design and JavaScript for client-side validations.
- Created error handling APIs to handle various custom exception handlers.
- Learn android programming
- Worked on Mobile Application for car insurance users (Esurance).
- Development of UI.

Environment and Tools: .Net Framework 3.5, ASP NET, Android Studio, Java, Web forms, SQL Server 2008, C#, JavaScript, Ajax Control Tool Kit, Telerik Controls

Client: Softtek (Mexico City)

Mar 2010 – Nov 2010

Position: .Net Developer/Business Analyst

Project#1: Walmart

Project Description: Billing of services' Payment, allows cashier to process the payment for electricity, taxes, telephone in supermarket.

Project#2: Montemex

Project Description: Pawn Shop System: Manages the process paw of jewellery and others.

Project#3: RiteAid

Project Description: Drug Store System: Manages the process of warehouse of products of pharmacy.

Responsibilities:

- Change billing process in order to update government requirement taxes.
- Analysis of new requirement

- Development of process and printing billing
- Change billing process in order to update government requirement taxes.
- Analysis of new requirement
- Development of process and printing billing
- Transcription of programs from Informix to C# ASP.NET.
- Transcription of queries from Informix to SQL
- Development of UI for catalogues
- Understand Use Case documents.
- Create technical documents from Use Case.

Environment and Tools: .NET Framework 2/3.5, ASP NET, C#, Crystal Reports, SQL Server 2008, Scrum, Enterprise Library, Windows.

6.2.2 Candidate Resumes: Milinda Patel

Summary

- **Microsoft Professional with Over Fourteen years** of strong professional .Net development experience in various application based on Object-oriented, Client-server, N-tier architecture, web, and window-based technologies.
- Experience with **AGILE** software development methodology and **SCRUM** Framework.
- Played roles across the solution life cycle from requirement to deployment of successful production release with key technical contributions. Possess deep technical background in designing, developing, and implementing software solutions and integration solutions. Lead development, testing, product launch activities for various products.
- Extensive working experience in Object Oriented programming (OOP) Concept, Design Pattern, SOLID Principle, developing and maintaining application **ASP.NET, MVC 4/5 Razor, C#, VB.NET, Net Core 2.0/3.1 .NET Framework 4.7/4.6/4.5/4.0/3.5/3.0/2.0, Microsoft Visual Studio 2019/2017/2015/2012/2010/2008/2005/2003/2002, ADO.NET , AJAX, VB6.0, VC++.**
- Experience in developing User Interface using **XML, XSLT, JSON, HTML, HTML5, CSS, AJAX, JavaScript, Angular 6/4/2, Knockout-JS, Bootstrap, Telerik Controls, jQuery.** Strong Experience in **LINQ to SQL, LINQ to XML, LINQ to Objects, Entity Framework** in retrieving data from different data sources and Azure DevOps.
- Experience in handling various data sources like MS SQL Server, Oracle, MS Access, and XML Data Source. Strong abilities to create stored procedures, Views, trigger, and user defined functions using Oracle 12c/11g/10g/9i, Microsoft SQL Server 2018/2012/2008/2005/2000 and MS Access. Extensive experience using SQL Server Integrated Service (**SSIS**) and SQL Reporting Services (**SSRS**).
- Designing, developing and Implementing of **Windows Communication Foundation (WCF), Web Services Using ASP.NET, Web API (RESTful Development/architecture).** Experience working with Microsoft Azure Cloud based system.
- Performed **UNIT testing** using frameworks such as NUNIT, MS TEST and perform Test Driven Development. Worked on Mock and Automation test using Selenium.
- Used Team Foundation Server (**TFS**), **GIT**, Visual Source Safe (**VSS**) for source safe and version controls.
- A good team player with excellent technical, communication and interpersonal skills and capable of taking up responsibilities independently and collaboratively in teams. Motivated and determined to deliver productive high quality, complete deliverables within deadlines with minimal supervision.

Technical Skills

- **Languages/Technologies:** C# .NET, VB.NET, ASP.NET, T-SQL, PL-SQL, DLL, .Net Framework 4.6/4.5/4.0/3.5/3.0/2.0, ADO.NET, AJAX, Web Services, WinForms, Web API, WCF, ASP.NET MVC 4.0/5.0, AJAX toolkit ,Entity Framework, LINQ, HTML, CSS, XML, JavaScript, jQuery, ASP, Angular JS, Angular 2/4/6, Bootstrap, JSON and VBScript, VB6.0, VC++.
- **Database:** SQL Server 2000/2005/2008/2012/2018, Oracle 9i/10g/11g/12c, MS-Access
- **Reporting Tools:** Seagate Crystal Report 8/9, SQL Server Reporting Service (SSRS), Oracle report builder, Active report 9.
- **Other Tools:** Telerik Control. NUnit, Team Foundation Server (TFS)., Git, JIRA, Kanban, Microsoft Office, Azure DevOps.

Professional Experience

Client: Mobikasa Inc/NYC Campaign Finance Board, New York

Dec 2019- Present

Position: Senior Net developer

Project: FACTS- Statement Review

Eco System is based on Single Sign on Application. And FACTS – Statement review is part of Eco System. This Application is Gate keeper for Documents, Submitted by Candidate for Election Campaigns. Application also support Auditing submissions, review the Documents, Generates Number of Reports for submission.

- Worked with the **SCRUM** framework of the **AGILE** methodology during the Software Development Life Cycle Which Involved in multiple phases of the project such as requirements gathering, analysis, and design, coding, testing and maintaining the software
- Design and Developed the application using .Net **framework 4.7/4.8, MVC5, .Net Core 2.0/3.1, Entity Framework, C#, LINQ, HTML5, Bootstraps, SQL developer, Server 2019/2017, and Web API** service for creating Application.
- Designing modules using **HTML, CSS3, AJAX, HTML5, JavaScript, Bootstrap** to style and format all the applications pages and views. Worked with JavaScript, jQuery, and JavaScript Design Pattern to create a dynamic and attractive web interface.
- Worked with .Net core 2.0/3.1 to develop application from scratch, worked on deploying the applications to the various Environments. Implements Dependency injection, Parallel Processing, actively working on SOLID principle.
- Worked with **Angular 6 TypeScript version 2.7** to create a dynamic and attractive web interface. Worked on Angular reactive forms to implement complex forms and performed the validation using form builder in **Angular 6**. Worked ON Component, modules, services, Routing, templates, directives, services, and dependency injection. Worked with **Angular CLI** for creating components, Services, pipes, Directives.
- Implemented application using **MVC 5.0 Razor**. Actively worked on Routing, controllers, Actions, Filters, Selector, Data Model, Validation, Razor, Web API, Data Annotations, Model Binding, Helpers etc.
- Worked with **Rest Web API** to expose the data for Web clients as well as Mobile clients. Worked with **Filters** to provide **Cross-Cutting Features** such as logging, exception handling, performance measurement, authentication, and authorization. Implemented Security using OAuth, Token etc. worked on WCF service. Worked with **JSON** for data exchange between client and server.
- Created Relational Database, tables, Stored Procedures in **SQL-Server 2018**.
- implemented the DAL using the **Entity Framework Database-first and Code-first Approach**. Used **LINQ** to Entities to Connect to the Database and perform all the database transactions. Created Repository Pattern.
- Worked Salesforce app cloud, Service cloud and force.com for create application. Azure Cloud and DevOps consultant with concentrations on Azure **IAAS / PAAS and SAAS**.

- Created and consumed Web API services on Azure to implement HTTP requests. CI/CD experience with GIT. Set up multiple versions of my library that target different versions of the .NET Framework in **NuGet** Gallery.
- Developed test-driven development (TDD) strategy guiding use of the NUnit unit testing framework. Prepared test cases and performed unit testing and Integration Testing.

Environment: Net Framework 4.7, MVC5, Entity Framework, C#, JavaScript, jQuery, Angular 6 Bootstrap, AJAX, HTML5, LINQ, jQuery, JSON, SQL developer, GIT, Azure DevOps, Postman.

Client: Office of the State Courts Administrator, Tallahassee, FL

April 2018 – Nov-2019

Position: Senior .Net developer

Project: The Senior Judge application, Dispute Resolution Center

This application handles the payment of money to those Senior Judges eligible for payment of their work. The Supreme Court Administrator monitors and maintains the Senior Judge program by updating/entering Judges Information for payment of Judges. The OSCA Budget Services enters and maintains the budget allocations by court. The court administrators and Senior Judges enter and submit work hours by date. The OSCA Human Resources approves/rejects submissions for payment. The Staff Login page is used by Court Administrators staff, Supreme Court staff, Budget Services staff, and Human resources staff.

The Dispute Resolution Center application provides a mechanism to track accreditation/certification and continuing education for Mediators. There are required Continuing Mediator Education (CME) credits that Mediators must complete and keep current. The OSCA is charged with maintaining and enforcing the Mediator educational requirements as well as keeping permanent records of educational credits for Mediators.

- Worked with the **SCRUM** framework of the **AGILE** methodology during the Software Development Life Cycle Which Involved in multiple phases of the project such as requirements gathering, analysis, and design, coding, testing, and maintaining the software
- Managed project development through progress tracking and status reporting, a monitor project planning and prioritize resources among multiple projects. Monitored application software system to ensure proper execution and performance.
- Design and Developed the application using **.Net framework 4.5/4.6/4.7, MVC5, .Net Core 2.0, Entity Framework, C#, LINQ, HTML5, Bootstraps, Angular 2/4/6, Oracle PL/SQL, Oracle SQL developer, Toads, Server 2012, WCF service and Web API** service for creating Application.
- Designing modules using **HTML, CSS3, AJAX, HTML5, JavaScript, Bootstrap** to style and format all the applications pages and views. Used **jQuery** to perform different tasks e.g. **manipulate DOM, events** etc.
- Worked with **Angular 6 TypeScript version 2.7** to create a dynamic and attractive web interface. Worked on Angular reactive forms to implement complex forms and performed the validation using form builder in **Angular 6**. Worked ON Component, modules, services, Routing, templates, directives, services, and dependency injection to create a **Single Page App (SPA)** Worked with **Angular CLI** for creating components, Services, pipes, Directives.
- Worked with **.Net core 2.0/2.2** to develop application from scratch, worked on deploying the applications to the various Environments. Implements Dependency injection, Parallel Processing, actively working on SOLID principle.
- Implemented application using **MVC 5.0 Razor**. Actively worked on Routing, controllers, Actions, Filters, Selector, Data Model, Validation, Razor, Web API, Data Annotations, Model Binding, Helpers etc.
- Worked with **Rest Web API** to expose the data for Web clients as well as Mobile clients. Worked with **Filters** to provide **Cross-Cutting Features** such as logging, exception handling,

performance measurement, authentication, and authorization. Implemented Security using OAuth, Token etc. worked on WCF service. Worked with **JSON** for data exchange between client and server.

- Created Relational Database, tables, Stored Procedures, packages, Views, functions in **Oracle 12c/10g** and **SQL-Server 2015/2012**. Used Oracle SQL developer and Toad tool for maintain environmental database
- Experience working with Microsoft Azure Cloud based IAAS, PAAS and SAAS. Created a virtual Network on Windows Azure to connect all servers and applications on this platform. Created and consumed Web API services on Azure to implement HTTP requests. CI/CD experience with GIT, Jenkins, Artifactory or other similar tools.
- Implemented the DAL using the **Entity Framework Database-first and Code-first Approach**. Used **LINQ** to Entities to Connect to the Database and perform all the database transactions. Created Repository Pattern.
- Worked on Microsoft Team Foundation Serve for version control and individual task status.
- Support the creation of training materials relevant to the approved client business processes, application Supports, Deployments and Co-ordinate with QA team to determine and develop test approaches and methods for testing according to application complexity and test requirements. Developed test-driven development (TDD) strategy guiding use of the NUnit unit testing framework. Prepared test cases and performed unit testing and Integration Testing.

Environment: Net Framework 4.6/4.5, MVC5, Entity Framework, C#, JavaScript, jQuery, Bootstrap, Angular 4/6, AJAX, HTML5, LINQ, jQuery, JSON, IIS 10.0, Oracle PL/SQL, SQL developer, Toad, SQL Server 2012, Team Foundation Server.

Client: CMA, Latham NY

Nov 2017–March 2018

Position: Senior .Net developer

Project: NJ WIC System, Vendor Web

NJ WIC System contains two applications New Jersey WOW (WIC) and Vendor Web. The New Jersey Supplemental Nutrition Program for Women Infants and Children is commonly known as WIC. WIC is a successful public health nutrition program that provides wholesome food, nutrition education and community support for income eligible women who are pregnant and post-partum, infants, and children up to five years old. WIC System contains Clinic, nutrition, Farmer Market, Vendor Module. Within clinic, participant can get their package or check based on their eligibility. Nutrition Module contains information about Package, food item and sub item. The Vendor portal module will be able to access Vendor Web Administration tools to review Expression of Interest submissions, vendor applications, and price surveys, issue invitations to apply, accept or reject the application or price survey, and control certain features of the Vendor Web system.

- Worked with the SCRUM framework of the AGILE methodology And Implemented application using Visual Studio 2015 /2017, .Net framework 4.5/4.6, MVC5, Entity Framework, ASP.Net, C#, LINQ, HTML5, jQuery, JavaScript, Bootstrap, Knockout JS, Oracle11g, PL/SQL, Oracle SQL developer, Toad, SQL Server 2012, WCF REST Service. Writing Knockout-JS code for developing rich and responsive websites and event driven programming. Designing modules using HTML, CSS3, AJAX, HTML5, JavaScript, Bootstrap to style and format all the applications pages and views. Used jQuery/ Knockout-JS to perform different tasks e.g. manipulate DOM, events, validation, service call.
- Created tables, Stored Procedures, packages, User-define function in Oracle 11g using PL/SQL. Used Oracle report builder and Active report 9 to design Reports.
- Worked on Microsoft Team Foundation Serve for version control and individual task status. Worked with QA team to determine and develop test approaches and methods for testing according to application complexity and test requirements.

- Developed test-driven development (TDD) strategy guiding use of the NUnit unit testing framework. Prepared test cases and performed unit testing.

Environment: Visual Studio 2015 /2017, Net Framework 4.6/4.5MVC5, Entity Framework, C#, VB.Net, JavaScript, jQuery, Bootstrap, Knockout JS, AJAX, J, HTML5, LINQ, jQuery, JSON, IIS 10.0, Oracle11g, PL/SQL, SQL developer, Toad, SQL Server 2012, Oracle Report Builder, Active Reports, Team Foundation Server (TFS)

Client: Department of Health and Mental Hygiene-Long Island City, NY May 2017–Oct 2017
Senior .Net/MVC/Angular JS developer

Project: OTPS Accrual Subsystem

The OTPS Accrual Subsystem (OAS) application allows the collaboration of the offices responsible for accrual oversight, primarily with Fiscal Management (FM) as well as Office of Budget Administration (OBA), and the Programs whose purchase commitments are accrued. The primary goal of creating OAS was to streamline Fiscal Management’s accrual business processes and to increase transparency through on-demand reporting. Manual tracking of accruals was replaced by electronic tracking of all data elements of an accrual including the FMS Document, payment voucher data, and transaction audit histories for submission, clearances, disallowance, decreases and reallocation to an accrual. Fiscal Management can automatically create submission and clearance reports for the Comptroller.

- Worked on projects to implement OTPS Accrual Subsystem application using software development life cycle. Worked on OOP concept.
- Used **MVC5, C#, LINQ, HTML5, JavaScript, Bootstrap, jQuery, SQL Server 2012/2008 R2 for creating Application.** Used Web API for creating **RESTFUL** services.
- Experience writing Angular.js code for developing Single page applications (SPA), used several in built language core directives, expressions, and modules. Extensive experience with AngularJS, creating custom directives, decorators, and Implemented Angular Service calls using Angular Factory. Used Web API for creating Restful services. Extensive experience on modern front-end template frameworks for JavaScript including Bootstrap, **jQuery, AngularJS.**
- Created stored procedures, trigger and user defined functions, Views using Microsoft **SQL Server 2012.**
- Worked on tracking the defects in HP Quality Center to tracking the defects, requirements, use cases. Co-ordination with Project, Operations and Logistic teams for smooth implementation. Worked on Microsoft Team Foundation Serve for version control and individual task status. Developed test-driven development (TDD) strategy guiding use of the NUnit unit testing framework.

Environment: Visual Studio 2012/2015, Net Framework 4.5, Visual studio 2013, MVC 5, WEB API, Angular JS 1/2, ASP.Net, C#, ADO.Net, AJAX, JavaScript, HTML5, LINQ, jQuery, JSON, IIS 10.0, SQL Server 2012/2008 R2, Team Foundation Server.

Client: New York State Insurance Fund (NYSIF), Albany, NY Oct 2015–April-2017

Position: Senior .Net Developer

Project: IME System Refresh

The purpose of this project is to modernize **Medical Evaluation.** Create an IME evaluation system to allow NYSIF to evaluation contracted IMEs and provide more efficient reporting on IME companies and IME physicians based on past performance. NYSIF needs to rotate the assignments to the IME companies. To successfully do this on a Statewide basis, an automated rotation system is required.

Adding alerts, diaries, new interactive lists, and other flags to reduce errors, miscommunication and resolve late exams.

- Worked on projects to implement IME evaluation system using software development life cycle (SDLC) in Scrum environment. Managed project development through progress tracking and status reporting, a monitor project planning and prioritize resources among multiple projects. Monitored application software system to ensure proper execution and performance.
- Used VS 2010 /2012, .Net framework 4.0/4.5, MVC 4, C#, ADO.Net, ORACLE 10g, PL/SQL, jQuery, Bootstrap, JavaScript, JSON AngularJS to design applications. Created Stored Procedure, Views, User define Functions, Packages using Oracle 10g PL/SQL.
- Worked on creating and tracking the defects in HP Quality Center and Blueprint. Used Blueprint manages requirements, use cases, diagrams, user interface mockups and glossary and other project related artifacts. Co-ordinate with a QA team to ensure development is properly covering defined requirements. Developed test-driven development (TDD) strategy guiding use of the NUnit unit testing framework

Environment: Visual Studio.NET 2010 /2012, Net Framework 4.0/4.5, MVC 4, ASP.Net, C#, ADO.Net, AJAX, JavaScript, HTML, LINQ, jQuery, JSON, Internet IIS 10.0, Oracle 10, PL/SQL, Team Foundation Server (TFS)

Client: Council on Postsecondary Education (CPE), Frankfort, KY **Dec 2012–Oct 2015**

Position: Senior .Net Developer

Project: Kentucky Postsecondary Education Data System (KPEDS), General Education Development (GED), (Kentucky adult Education Reporting Service (KAERS))

KPEDS is Single sign on (SSO) Application, is a property of access control of multiple related, but independent software systems. With this property a user logs in once and gains access to all systems without being prompted to log in again at each of them. **KPEDS** have many individual applications like -KATS (**KPEDS** administrative tracking System), Program Modification, KPPES, and Program Review. **GED** is application Keep record for User's GED test result. User can request their record using this system in Kentucky. **KAERS** Application manages users, staffs, providers, and reports. Provider can offer Many courses and user can keep tracking information about class and courses.

- Worked on multiple stand-alone web applications using Object-Oriented Principles and n-tier architecture in Agile Scrum environment. Managed project development through progress tracking. Monitored applications to ensure proper execution and performance. Worked the application to support on different device, platform and with browser compatibilities.
- Used VS 2010 /2012, .Net framework 4.0/4.5, MVC RAZOR 4/3, ASP.NET, Entity Framework 4, C#, ADO.NET, SQL server 2008 JavaScript, AJAX, jQuery, JSON, Bootstrap, Angular JS for creating application. Used Web API for creating Restful and WCF SOAP based web services to data exchange between clients and server. Created tables, Stored Procedures, User-define functions Views, SSIS Packages to evaluate text, excel file and generate report using SQL Server 2008. Created Stored Procedure, Views, User define Functions, Packages using Oracle 10g PL/SQL.
- Worked with QA team to determine and develop test approaches and methods for testing according to application complexity and test requirements. Participate in Bug solving, testing and production support for each application.

Environment: Visual Studio.NET 2010 /2012, Net Framework 4.0/4.5, ASP.NET, ASP. MVC Razor 4, Entity Framework4, C#, WCF, ADO.NET, AJAX, JavaScript, JSON, XML, HTML, Angular JS, jQuery, LINQ, IIS 6.0, SQL Server 2008, T-SQL, Oracle 10g PL/SQL, SSIS, Team Foundation Server (TFS), SCRUM tool.

Client: Heartland Payment Systems, Jeffersonville, IN**April 2012–Nov 2012****Position: Senior .Net Developer****Project: Activity Team merchant Platform as a service (PaaS)**

This project Application provides debit, credit, prepaid card processing, online payments, check processing, and payroll services, it also includes batches /transaction information, call logging, account maintenance, sales organization. This is all done using web-based and window-based application like servicing, portfolio manager and Enterprise.

- Worked on Project to implement Activity Team project developing a merchant Platform as a service (PaaS) using the **Agile Scrum** methodology and implement using **.Net framework 4.0, ASP.NET, .Net MVC 4 Razor, C#, ADO. NET, Entity Framework 4, SQL server 2008, css3, JavaScript, jQuery, AJAX** for creating N-Tier Architecture system. Create **WCF SOAP** based web services for data exchange between clients and server.
- Created Relational Database table, Stored Procedure, View in **SQL Server 2008**. Coding for various Modules, Error Handling, Modification and Testing, Bug solving of the change requests.
- Work with a QA team to ensure development is properly covering defined requirements. Participate in production support.

Environment: Visual Studio 2010, Net Framework 4.0, ASP.NET, MVC Razor 4, Entity Framework 4, C#, WCF, ADO.NET, AJAX, JavaScript, JSON, XML, HTML, LINQ, jQuery, CSS3, IIS 6.0, SQL Server 2008, T-SQL, Visual Studio.NET 2010 IDE, Team Foundation Server (TFS), SCRUM Tool Rally Dev.

Client: Education Management Solutions Inc. Exton, PA**April 2011–April 2012****Position: Senior .Net Developer****Project: Saturn**

Application based on medical simulated teaching and learning for medical schools, universities, nursing schools, hospitals. This application based on healthcare and Medicaid domain. This application manages online learning, testing, evaluation, training, storing audio-video recording of learning materials. This application for different kind user like learners, user, faculties, standardized patients, it helps learner to online learning and check score. Faculty can create, evaluate online teaching materials, and test. Standardized patient can take online learning.

- Worked on Project to implement Saturn system using **Agile Scrum** methodology. development of application with full Software Development Life Cycle (**SDLC**) to design application using Visual Studio.NET 2010, **.Net framework 4.0, ASP.NET, C#, ADO.NET, XML, LINQ, AJAX, JavaScript, HTML, LINQ, jQuery**.
- Used Silverlight Layout Panels and Control Templates for Customization. Create **WCF SOAP** based web services for data exchange between clients and server.
- Created stored procedures, trigger and user defined functions, View using **Microsoft SQL 2008**.
- Work with a QA team to ensure development is properly covering defined requirements.

Environment: Visual Studio.NET 2010, Net Framework 4.0, ASP.NET, C#, WCF, Silverlight, ADO.NET, AJAX, JavaScript, T-SQL, XML, XSLT, HTML, LINQ, jQuery, JSON, Internet Information Services (IIS) 6.0, Microsoft Visio, SQL Server 2008/2005, Visual Studio.NET 2010 IDE and Team Foundation Server (TFS) 2008.

Client: Tech Data Corporation, Clearwater, FL**Feb 2010–April 2011****Position: Senior .Net Developer****Project: Portal- new.techdata.com**

Leading technology companies including Apple, Cisco, Hewlett-Packard, IBM, Lenovo, McAfee, Microsoft, Sony, Symantec and VMware-along with hundreds of others-depend on Tech Data to bring their products to market. Resellers can purchase thousands of products from hundreds of the world's leading hardware and software producers.**new.techdata.com** is company's website which introduces company's services, shopping cart, product detail, producer's detail, and Product deal, this application based on E-commerce application and based on shopping cart.

- Follow the Agile scrum and SDLC to design application using C# and .Net framework 3.5, ASP.NET, C#, ADO.NET, XML, AJAX, JavaScript, HTML, LINQ, jQuery, SQL Server 2008. Designed WCF Service and Consume in application.
- Created stored procedures, View, trigger and user defined functions using Microsoft SQL Server 2008.
- Worked on Microsoft Team Foundation Serve for version control and individual task status. Error Handling, Modification and Testing, Bug solving of the change requests.

Environment: Net Framework 3.x, ASP.NET, C#, WCF, Silverlight, Expression Blend, ADO.NET, AJAX, JavaScript, XML, XSLT, HTML, LINQ, jQuery, IIS, SQL Server 2008, T-SQL, Visual Studio.NET 2008 IDE, Crystal Reports XI and Team Foundation Server (TFS) 2008, SCRUM tool Kanban.

Client: Navkar Software Gujarat, India

March 2008–Jan 2010

Position: .Net Developer

Project: CMS (Content management system)

Content management system (CMS) is a web product which is designed to customize a web page dynamically. It is provided with 9 different page layouts for designing a webpage; page layout describes the appearance of web page. Total generation of web page dynamically occurs by passing from Content Author (CA), Language Editor (LE) and Web master.

- Worked on Project to implement CMS (Content management system) using Software Development Life Cycle (SDLC).
- Design application **Using .NET Framework ,3.5, ASP.Net C#, LINQ, HTML, JavaScript, and AJAX jQuery** and **WCF Service**.
- Created stored procedures, trigger and user defined functions, View using **Microsoft SQL 2008/2005**. Coding for various Modules, Error Handling, Modification and Testing. And work with a QA team to ensure development is properly covering defined requirements.

Environment: .Net Framework 3.5, C#, ASP.NET, ADO.NET, LINQ, WCF, WPF, JavaScript, jQuery, XHTML, HTML, XML, XSL, XSLT, XSD, T-SQL, SQL Server2005/2008, Crystal Report, TFS, IIS (6.0).

Client: The IT World Gujarat, India

Aug 2007–Feb 2008

Position: .Net Developer

Project: Satya group Shopping cart, The IT world's Website.

This application is basically a shopping card application where any customer can purchase the desired product Application maintain account information, order status, view cart, view save list, deliver product at customer house. Administrator of the site can manage all the data like customer, product, hot feature products and many more.

The IT world's Website This application is basically introducing our company's services. Any client can direct order for that according to the requirement. Client registration, Comment, feedback management, quotations; administrator of the site can manage all the data.

- Worked on the multiple projects to implement Satya group Shopping cart and The IT world's Website System.
- Designed and Developed different modules using **ASP.Net, C#. ADO.NET, HTML JavaScript.**
- Created stored procedures, trigger and user defined functions using Microsoft SQL Server 2005.

Environment: Net Framework 3.5, C#, Asp.Net, ADO.Net, LINQ, WCF, SOA, XSL, XHTML, HTML, XML & XSLT, XSD, T-SQL, SQL server 2005, SSIS, Web Services, Visual Source Safe 6.0, IIS.

Client: Design Point Vision India Pvt. Ltd, Gujrat, India

July 2006–July 2007

Position: Software Developer

Project: AutoDCR

This Software is working for AutoCAD drawing. This Software Checks Rules and Regulation for Architecture's Drawing. This Software follows AUDA's Rules. Support Auto Zooming Facility. According to an Architecture drawing it generate Report like Failed, Check and Project Report.

- Worked on the project to implement AutoDCR System. Developing application according to the AUDA's and Architecture's Drawing Rules and Regulations. Involved in every aspect of software development life cycle. Used **VC++ MFC Based Application** for creating GUI, class, **Multithreading, serialization.** Created stored procedures, trigger, functions, packages using in **Oracle 8i PL/SQL.**
- Support the creation of test plans and training materials relevant to the approved client business processes.

Environment: Visual 6.0, Visual C++, MFC, XSL, XML, Oracle 8i PL/SQL, AutoCAD, ObjectARX.

Client: Infoniums India

Aug 2005–July 2006

Position: Software Developer

Project: Stock Management

Product Maintains Stock of Cello's Product. Contain daily Selling Detail, Transaction, and Daily Report. Contain all information about Product that is Available for selling. Authorize user can use only. Automatic Label Printing

- Worked on the project to implement Stock Management System. Worked on application design, code, implementation, testing & UAT. Design application Using .Net 2.0, ADO.Net VB.NET, C#, JavaScript client-side script.
- Created stored procedures, trigger and user defined functions using Microsoft SQL Server 2000. Involved in Production support, bug fixing and Testing.

Environment: ASP.NET 1.0/2.0, Classic ASP, CSS, XML, XSL, HTML, Crystal Reports, JavaScript, HTML, SQL Server 2000.

Education

Bachelor of Science (B.S.) in Computer Science/Engineering (Hemchandracharya North Gujarat University) in 2005

Professional Certifications

Certified ScrumMaster® (CSM®)

6.3 Contract Manager

REQUEST FOR QUOTATION Supplemental Staffing for Microsoft Application Development

10. VENDOR DEFAULT:

10.1. The following shall be considered a vendor default under this Contract.

10.1.1. Failure to perform Contract Services in accordance with the requirements contained herein.

10.1.2. Failure to comply with other specifications and requirements contained herein.

Award will be based on the total cost of Year 1 for both individuals.

Total Cost for Supplemental Staff (a+b)

\$342,000.00

6.5 Purchasing Affidavit

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

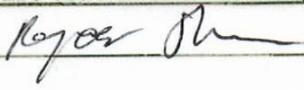

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an Individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (*W. Va. Code §61-5-3*) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.
