| Project1: | AGILE SCRUM TEAMRESOURCES |
| Duration: | 17 April - Till now |
| Role performed on Project: | vTech was successfully able to contribute to the development of MD THINK, and delivered multiple services such as, Application Development and Designing Services, SME and Training Support and Database Management Support. Sharing vTech's services using cloud-based technologies was very cost-efficient because it eliminated the need for creating these services for each application. The result was a transformational ground-breaking technology program that modernized service delivery to the citizens of Maryland. The streamlined and simple UI created a positive experience, serving Maryland's citizens more effectively to achieve better outcomes |
| Explanation of work performed using Skillsets in 4.1.1 | vTech provided design recommendations based on long-term IT strategy of the MD THINK project. vTech designed responsive web application user interfaces using JavaScript/CSS/HTML5/JQuery and a prototype based on requirements. vTech also created mobile and cross-browser compatible and responsive front-end interfaces using latest frameworks like Bootstrap or Angular. vTech worked with the client's Applications Development team to make sure that the components comply with UI/UX guidelines and standards. We collaborated with other team members and department stakeholders, including Business Analysis, UI Engineering, and Client Support to conduct user-research, user-testing, A/B testing, rapid prototyping, heuristic analysis, usability and accessibility concerns |
| Project 2: | Application Development Services |
| Duration: | 17 November - till now |
| Role performed on Project: | vTech Senior Application Developer was responsible for designing, development, delivery and enhancement of Client-Server/Web-Based/Cloud-Based/Mobile Software Applications using application software development languages/environments such as .NET/ASP/Visual C# etc. Also provided mentorship and technical advice to a team of Application/Reports/Query Developer |
| Explanation of work performed using Skillsets in 4.1.1 | Perform design, development, testing and implementation of software using VB.NET/C#,MVC, ASP.Net, Entity Framework, CSS, JQuery, HTML5, JavaScript, AJAX, and XML. Design effective user interfaces employ source code repository chick in processes (Team Foundation server) |
| Project 3: | Application and website services |
| Duration: | October 2014 - March 2016 |

| | |
|--|--|
| Role performed on Project: | vTech's team of professionals performed extensive software testing and stringent quality checks as per the QC guidelines to ensure an error free as well as optimum final product to the user. Our consultant also tested the applications and websites on different web browsers to ensure a standard user experience for the clients across all platforms. |
| Explanation of work performed using Skillsets in 4.1.1 | was responsible for developing the web based software using computer programming languages such as VB.net, C# and MSSQL. |
| Project 4: | Application Database Services |
| Duration: | April 2015-Till now |
| Role performed on Project: | vTech's team worked with on-site team on development and implementation of highly complex internet and intranet applications database modeling tools and/or database interactions. Also evaluated systems specifications for client area web site requirements and determined and implemented the most efficient and cost-effective software/package solution. |
| Explanation of work performed using Skillsets in 4.1.1 | Was responsible for work on more diverse platforms using advanced knowledge of web technologies, including C++, .NET/C#, Java, Java Script, HTML, CGI, XML, Perl, ASP, multimedia applications, |

Debugging Code for existing systems within Microsoft Visual Studio 2013. Documenting code changes consistently throughout the development process

Previous Project: Application development Services

Project Start Date: October 2015

Date Completed: Till Date

Project Description: vTech developed and supported existing applications of department of disability services vTech successfully completed the project by including everything from back-end to client-side code using optimal and efficient technologies, frameworks, and patterns. We were Responsible to design and develop their applications. Provided problem solving, solution design, and high-quality coding Designed effective user interfaces. Employed source code repository chick in processes (Team Foundation server).

Contractor's Role:

Performed design, development, testing and implementation of software using VB.NET/C#,

- MVC, ASP.Net, Entity Framework, CSS, JQuery, HTML5, JavaScript, AJAX, and XM.
- Skillsets Utilized: Our team was responsible to do the following tasks but not limited to:
- developing ASP.NET MVC applications
- Working in MSSQL Server
- Writing test cases and debugging

Location: Phoenix AZ

Project URL:

- Web Developer
- .Net Developer

STATE OF ARIZONA

vTech solution Inc. has been providing, application development, database management and consultancy Services to the State of Maine Government on behalf of Knowledge Services. Through a contract that was initiated on April 2013 and is still continued till date, we have placed more than 10 techno-functional professional for our client in various IT Professional positions including:

IT Professional positions includes but not limited to following:

- Mainframe Systems Programmer
- Application Support Specialist
- SharePoint Administrator
- Web Developer
- Programming 2
- Imaging Specialist

Type of tasks performed by our staff includes but not limited to following:

- Our staff (Mainframe Systems Programmer – 6 months) supported State of Arizona in installing and upgrading a z/OS environment to z/OS V2.2, customizing, problem determining, performance analysis tuning, capacity planning, and WLM for the IBM mainframe zSeries z/OS Systems, hardware systems & peripherals, zSeries based ISV (Independent Software Vendor) software, and zSeries network communications.
- Our staff (Web Developer – 6 months) supported State of Arizona by designing, preparing, testing and debugging web program coding for business applications along with reviewing codes, compiling structured programs, creating all required SDM technical documents, functional Specifications, design documents etc.
- Our staff (Application Support Specialist – 12 months) has provided technical support State of Arizona ADE Information Technology Division including one-to-one training to end users regarding systems functionality to audiences with varying levels of computer experience, answers general "how-to" questions for a variety of ADE applications, such as password support and troubleshooting content issues and updates and maintains logs of customer support issues within ADE systems.
- Our staff (Programming 2 – 6 months) supported State of Arizona in performing installation, configuration, maintenance and support of Mainframe Communications platform.
- Our Staff (SharePoint Administrator – 6 months) provided support to the Grants Management Division of the Arizona Department of Education by gather business requirements and enhancements for the division SharePoint site. Serve as the subject matter expert on SharePoint for Division users. Our staff also supported in collecting business requirements, conducting analysis, and translating it into technical solutions.
- Our Staff (Imaging Specialist – 3 months) have installed Windows operating systems (including Windows 10 and Windows 7; both 32 and 64 bit), large variety of software packages and created and updated installation instructions using a combination of screen captures and text to create an easy-to-follow OneNote document for others to follow. Resolve technical issues related to OS and software installations with minimal assistance.

Maryland Department of Human Services

Maryland Department of Human Services (DHS) released this TORFP to procure agile development resources with required skill sets and team that will be utilized as part of the MDTHINK modernization activities and platform which will be new platform for the health and human services for which department want to create a data system that can support a more integrated, client-centric approach to health and human services delivery and management and require human resources for the same.

We have provided following IT Professionals in MDTHINK project:

- Data Analyst / SQL Developer
- ForgeRock Engineer
- Project Manager (Agile Team Lead)
- Product Administrator (Business Rules Engine-Corticon)
- Full Stack Java Developer (System Integration Specialist)
- Organizational Change Management (OCM) Consultant (Subject Matter Expert)
- Qlik Developer
- Help Desk Support
- Database Administrator

DC DEPARTMENT OF HUMAN SERVICES

vTech designed, developed, delivered and enhanced Client-Server/Web-Based/Cloud-Based/Mobile Software Applications for under Application Support Division I (ASD I) of the Office of Information Systems (OIS) in direct support of the TANF 2.0 CATCH Application redesign. vTech provided D.C. Department of Human Services with implementation and management of business-aligned IT services, ensuring the application platform was of high quality, defect-free and adheres to industry standards for development, testing and deployment methodologies.

vTech helped OIS to design, develop and deploy applications that support users on the case and program management especially with CATCH application. Our team of professionals provided mentorship and technical advice, Provided strategic advice to the lead, management, and customers of the OIS. vTech evaluated, designed, and implemented programming standards as they relate to the TANF 2.0 CATCH application and infrastructure. We monitored and did performance analysis to troubleshoot and isolate application performance issues.

STATE OF LOUISIANA

vTech, with its team showed experience and expertise in providing web development services to the department using technologies like ASP.NET and SQL Server for the DOC Modernization project. We provided designs, codes, compiles, tests, debugs and documents for new and existing web applications. We provided maintenance and support of existing application. vTech participated in all necessary team meetings and design sessions in accordance with Scrum ceremonies with the department's stakeholders. After the completing the project successfully we provided technical knowledge transfer, training, documentation, mentorship and guidance to OTS and DOC staff for all requested work.

We successfully implemented the product using ASP.NET Core, Entity Framework Core, VueJS, Bootstrap, SSIS, IIS, Scrum Methodology, Distributed Design Systems (SOA/Microservices), DevOps Practices (CI/CD) environment.

STATE OF NORTH CAROLINA DEPARTMENT OF HEALTH

vTech was a part of NC FAST, our team of professionals assisted in design requirements development, code development on java platform, Joint Application Development (JAD) sessions, functional design and life cycle management for the implementation of NC FAST. Areas of focus included business and workflow process modeling, and business reengineering using Cúram. These activities involved the use of COTS Cúram Enterprise Framework Components, Cúram Intelligent Evidence Gathering (IEG2), Cúram Express Rules for Triage (CERT), Oracle, use of XML technology in Cúram, Cúram Evidence Framework, Subversion, and WebSphere.

vTech designed, developed and deployed application that supports users on the client assessments & case and program management applications especially with DHS's TCA, SNAP E&T Assessment, etc. applications. Provided mentorship and technical advice to a team of Application/Reports/Query developers. Our team provided strategic advice to the lead, management, and customers of the OIS and Implemented programming standards that support a secure and defect-free application.

Our Quality Assurance / Quality Control team ensured that the application remains secure and defect-free. Evaluated, designed, and implemented accepted programming standards as they relate to the TCA and

SNAP E&T application and infrastructure. Defined and documented processes to be used by all application developers on the team.

vTech successfully developed and supported existing applications of the state. Our team performed all the tasks from back-end to client-side code, using optimal and efficient technologies, frameworks, and patterns. They provided problem-solving, solution design, and high-quality coding and performed design, development, testing and implementation of software using VB.NET/C#, MVC, ASP.Net, Entity Framework, CSS, JQuery, HTML5, JavaScript, AJAX, and XML. Designed effective user interfaces. Employed source code repository check in processes (Team Foundation server).
