RE: Maintenance and Repair for (5) State of WV Helicopters AVN2100000001

Summit Helicopters, Inc. would like to take the time to thank you for allowing us the opportunity to provide pricing for the support of West Virginia's current fleet of Bell Helicopters. Summit has a long history of supporting Bell airframes as both an operator and maintainer, which affords us the ability to better understand the State's needs and requirements and ultimately provide the best support possible. Additionally, the close proximity of Summit Helicopters' location, which is less than 100 nm's from Charleston, allows us to provide the quickest support of any other approved Bell facility in the area. Summit Helicopters has been in business since 1980 and was named an FAA Repair Station and Bell Customer Service Facility in 1985. Over the last 35 years Summit has had the opportunity to support many large state and local government aircraft operators throughout the United States to include the New York State Police, City of New York Police Department, Nassau County PD, Fairfax County PD, Virginia State Police, City of Virginia Beach & Metro Nashville Police Department, just to name a few. Summit is made up of a team of 65 employees dedicated to supporting our customers worldwide. We currently have a staff of 16 A&P Mechanics with an average of over 16 years of experience maintaining Bell aircraft ranging from the 206, 407, 429 all the way to the 412. We will provide a roster of A&P mechanics and experience as required. We also employ a team of avionics technicians to support the modern-day requirements of our police customers. The roster of avionics techs will also be provided upon request.

Summit is a full-service component repair and overhaul facility approved by both the FAA and Bell. We perform in house maintenance and overhaul on all rotating components found on the Bell 206 and 407 series aircraft to include but not limited to transmissions, rotor heads and tail rotor gearboxes. Any items that we do not have the capability to repair in house will be sent out to approved vendors that have passed our quality checklist. Additionally, prior to sending items to any outside vendor we will get the State's approval on the company that will be used. A list of proposed companies will be provided upon request by the State but a few examples of ones that we use on a regular basis include Keystone Turbine Services or Standard Aero for engine maintenance, HAS or Fortner Accessory Service Company for hydraulics and Air Dallas Instruments for avionics repair.
