

NOTICE

Please note that this bid from Ascent Consulting and Engineering LLC for CEIO_DEP2200000003 was received at the Purchasing Division office prior to the established bid opening date and time on September 15, 2021, but was not read at the public opening because of technical difficulties.

A handwritten signature in black ink, appearing to read "Guy Nisbet", is written over a solid horizontal line.

Guy Nisbet

Assistant Purchasing Director

The following documentation is an electronically-submitted vendor response to an advertised solicitation from the *West Virginia Purchasing Bulletin* within the Vendor Self-Service portal at ***wvOASIS.gov***. As part of the State of West Virginia's procurement process, and to maintain the transparency of the bid-opening process, this documentation submitted online is publicly posted by the West Virginia Purchasing Division at ***WVPurchasing.gov*** with any other vendor responses to this solicitation submitted to the Purchasing Division in hard copy format.

1 EXPRESSION OF INTEREST

Ascent Consulting and Engineering, LLC (Ascent) presents an Expression of Interest (EOI) to participate in the request released by the **WVDEP-DLR-AML**. In accordance with the proposed EOI, Ascent is interested in providing engineering services for the design of **Group B Projects which include JD Miller RAMP Site Project, Kuhns Run Park Portals Project, Long Run #3 Project, and the Steadman-Erickson Maintenance Project**. Ascent is fully equipped and locally positioned to provide the design services for each; including but not limited to (as may be applicable to each project):

- Perform Site and Geotechnical Investigations
- Design temporary and permanent access or accesses for construction and future maintenance.
- Design to repair drainageway through exposed and heavily scoured refuse to convey runoff.
- Design to mitigate exposed refuse.
- Locate onsite borrow material to cover exposed refuse.
- Design to stabilize landslides.
- Design multiple portal seals and regrades.
- Design to repair subsidence features.
- Design of highwall reclamation.
- Design to repair or replace existing drainage structures/systems.
- Design to mitigate AMD drainage, including possible horizontal borings.
- Design reclamation of exposed mine spoil and refuse.
- Design of drainage conveyances, including drainage channels, underdrains, and/or other controls to safely convey water off-site.
- Condition and revegetate all disturbed areas.
- Obtain required permits as determined at the Pre-Design Meeting.

Ascent Consulting and Engineering, LLC (Ascent) is a Small Business headquartered in Clarksburg, West Virginia. Collectively, our management team has over 50 years of related experience. Ascent is equipped with a team of professionals, who are experts in their fields and have a comprehensive understanding of construction, engineering, environmental, and best management practices. Ascent has built a network of reliable subcontractors and will pull out all stops for the successful completion of this project! Ascent also maintains an AASHTO accredited materials testing laboratory and provides construction management and inspection services. ***A true full-service firm!***

The **Ascent Team** stands out because of our core competencies that match the requirements of this solicitation:

- **Locally owned and operated.**
- **Experience working highly complex engineering design services projects.**
- **Fully licensed and insured.**
- **Direct project experience and strong references.**
- **Substantial experience with managing hundreds of projects and task orders simultaneously.**
- **An intimate understanding of state and federal standards for safety, and quality.**
- **Ability to determine the most efficient and cost-effective solutions that meet project goals.**
- **The Ascent Team has significant project experience in over 15 states.**
- **The Ascent Team can quickly respond to any Task Order that may be issued through this contract, wherever services are needed.**

Ascent sincerely thanks the **WVDEP-DLR-AML** for this unique and exciting opportunity. We greatly appreciate the opportunity to showcase our Team.

2 KEY PERSONNEL

Leadership and staffing are the most important quality of the company of each associate. Ascent's strategy and competitive advantage is founded on providing the most professional, technically competent, and highly trained leaders for each client. The Ascent Team brings industry leading leadership to the project because our core foundational principle within our strategy is knowing and applying servant leadership principles. Team Ascent has assembled a team with extensive project planning experience. Our staffing plan approach is a systematic process ensuring we bring the **right-sized team** with the **right skills and knowledge** to any project. Our team will bring transparency, innovation, and adaptability to solve problems and provide solutions for the **WVDEP-DLR-AML Projects**. All key personnel will have the required training and certifications. Ascent's structure is underscored by a knowledgeable and responsive organization. Our staffing plan embodies clear lines of authority, responsibility, and communications. Detailed resumes are contained in **ATTACHMENT C**.

Project Management Personnel: Below is a listing of management personnel who would be assigned to the **WVDEP-DLR-AML Projects**.

Jeff Knepper will be the Project Manager and Lead Liaison for Ascent services. Jeff Knepper is a Licensed Remediation Specialist (LRS) and former program manager for the West Virginia Department of Environmental Protection with over 24 years of experience. He worked with the Division of Water and Waste Management to review, develop and approve groundwater protection and remediation plans. He has worked closely with the WV Voluntary Remediation Program (VRP) and spent significant time negotiating as a regulator and consultant for remedial activities for the WVDEP and the EPA.

Mike Nestor will be a subject matter expert for site development and conceptual plans. Mike Nestor has 18 years of experience with complex site development and plan concepts and serves as the Managing Member of Ascent Consulting and Engineering, LLC. He holds a Professional Engineering license in WV, PA, OH, VA and MD. His engineering and consulting experience has focused on major land development projects and concept designs.

Amanda Wright will be a subject matter expert while providing overall project management and guidance. Amanda Wright has over 17 years' experience managing large scale and complex environmental projects throughout WV, OH, & PA. Amanda currently serves as a Senior Project Manager at Ascent Consulting and Engineering, LLC.

Support Personnel: Below is a listing of support personnel who could be assigned to the **WVDEP-DLR-AML Projects**.

Devon Shrewsbury: B.S.E.T Civil Engineering – Bluefield State College, B.S. Civil Engineering – West Virginia University; Experienced Project Engineer with over 10 years of experience in engineering plan production, stormwater management design and technical reports.

Keith Axton: B.S. Civil Engineering Technology – Fairmont State University, 2015. Project Engineer with 5 years of experience with storm sewer designs, lot and road grading and AutoCAD civil 3D designs.

Megan Wagner: B.S Environmental Science – California University of Pennsylvania, 2014. Environmental Scientist with over 6 years of experience in environmental assessments, regulatory compliance permitting and technical reports.

3 PROJECT METHODOLOGY

Team Ascent will use our **proven management methodology**, as noted in **Figure 1**, and tools to provide **engineering services** for the **WVDEP-DLR-AML**. Ascent strongly believes that clear communication and expectations are at the core of every successful project. We will encourage a kickoff meeting with your staff and our design team at the onset of the project for discussion about existing conditions, project goals, availability of funds, site operations, and perceived challenges, etc. This meeting allows us to fully understand the project and to tailor our approach and communication to that of your liking.

We do not look to reinvent the wheel at Ascent. Instead, it is our goal to support the overall vision by providing a third-party professional conditions review, using our experienced team to offer valuable suggestions, looking for efficient ways to accomplish the project goals, and executing a plan that is easily understood, constructed, and ultimately fixes the problem.

During the initial planning phase, it is imperative to clearly identify project specifics, goals, and schedule, while adhering to a standard operating procedure. As outlined in the scope provided, it is understood that the following projects and goals have previously been identified by the **WVDEP-DLR-AML**.

PROJECT LOCATIONS

Project 1: JD Miller RAMP Site is located off County Route 25 east of Wheeling and north of Triadelphia in Ohio County, WV, and is for the repair and replacement of existing reclamation features and facilities and mitigation of failing structures and grading.

Project 2: Kuhns Run Park Portals is located southwest of Fairmont, WV and west of White Hall, WV. The project is for the mitigation of dangerous impoundments, chronic AMD drainage, subsidence depressions, collapsed and draining portals, and grading.

Project 3: Long Run #3 is located northeast of Simpson, WV. The project is for the mitigation of open and collapsed portals, dangerous highwall, chronic AMD drainage, and grading.

Project 4: Steadman-Erickson Maintenance Project consists of two (2) previously constructed AML sites located in Wheeling, WV. Site 1 is Steadman AMD site located off Edgington Lane and Site 2 is Erickson Mine Maintenance. Both projects are for the repair and replacement of existing reclamation features and facilities and mitigation of failing structures and grading.

GOALS

- Develop construction plans and technical specifications to stabilize the landslide, and design new drainage features and structures if the existing structures are unable to be repaired or replaced.
- Design plans and develop specifications to control any associated water with the site.
- Design plans and develop specifications for limits of disturbance, storm water control and erosion and sediment prevention. All disturbed areas are to be regraded and revegetated.
- Design plans and develop specifications for all conditions encountered on the project sites.

SCHEDULE

In addition to developing a project budget during the kickoff meeting, Ascent will communicate with **WVDEP-DLR-AML** to set expectations for the complete delivery of project plans, permits, and ultimately the construction of the project. The design team will work backwards from the ultimate delivery date and schedule milestone events in order to get the project completed on time. Careful consideration is put into construction schedules and permitting as well as time needed for completion of project plans, surveying, Geotechnical investigations and more. Every effort is made to give contractors a reasonable timetable to complete the construction of each project and each project is evaluated for sensitivity of final delivery. Contracts are drafted with liquidated damages to help ensure contractors are held accountable once agreements are in place.

PROCEDURE

At a minimum, Ascent facilitates projects according to the following procedure:

Project Kickoff Meeting

- Sets expectations for scope, budget, schedule, communication procedure, etc.
- Informs team with respect to subconsultants and other outside factors.
- Review of site history and preferred plan.
- Discuss preferences and limitations to site access and other important items.
- Develops “action items” and delivery dates based on various decision points.

Conceptual Layout and Preliminary Cost Estimation

- During this process, various items are completed concurrently such as concept design, base mapping, and ground survey.
- On a conceptual level, Ascent will prepare recommendations for project implementation along with preliminary construction cost estimates. The intent of this phase is to find the “most bang for your buck”.
- After the concepts have been presented to and discussed with the stakeholders, Ascent will move forward with the design of the preferred alternative(s).
- Permit requirements will be evaluated and drafted during this phase.

Plan Production

- After budgets, feasibility, land acquisitions, etc. are confirmed, Ascent will begin assembling final design plans and specifications for construction as well as permit submittals.
- The Ascent Project Manager will provide a weekly email update to the **WVDEP-DLR-AML** outlining work completed, the schedule ahead, and any changes. Significant changes or new information found that is anticipated to require project adjustments will be brought to the **WVDEP-DLR-AML** immediately. Initial contact in this instance is always a phone call, followed by a recap email and in some cases, face to face meetings if representatives are available. Project budgets and schedules are re-evaluated at milestones (typically at 30%, 60%, and 90% completion).

- Finally, the design will be evaluated for long term sustainability to reduce or eliminate maintenance after construction is complete. The plan will be devised in a way that fixes the problem at hand yet minimizes disturbance to the existing landscape. The team assembled for this project has extensive experience in civil site design, compliance, construction management, remediation, hydrology/hydraulics, drainage design, permitting, as well as many other relevant project tasks.

Construction Management and Project Inspection

The project manager in charge will also serve as the Project Manager throughout construction. He will help to identify the proper field personnel to inspect the project, will speak to the inspector daily, and will attend contractor/progress meetings throughout the duration of the project. He will review and submit daily reports to ownership and notify the Client immediately if any problems arise. The Project Manager will also review/approve pay applications submitted by the contractor.

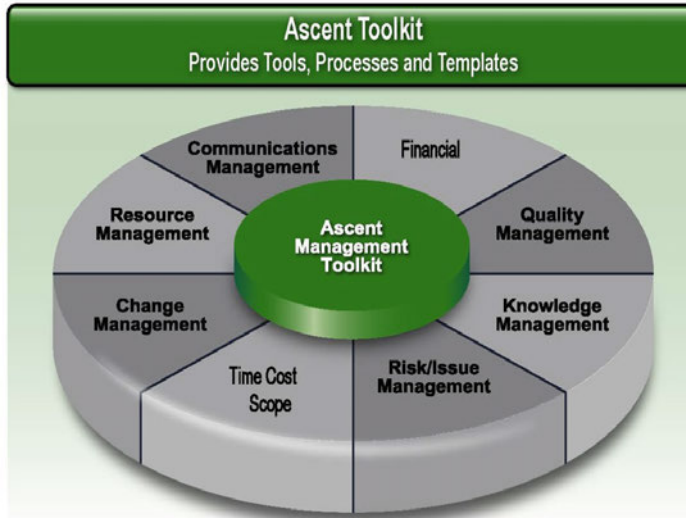

Project Finalization

Ascent will constantly evaluate progress to ensure that the project is on schedule and that pay applications are consistent with the work completed.

Figure 1- Ascent Team Management Methodology

The primary objectives of the management framework / processes are:

- **Time, Cost and Scope** – Cost, schedule, and quality control are key components of the Ascent Team’s

management approach. This module is primarily concerned with defining and controlling the project; tracking, modifying, and controlling the steps for realizing the anticipated project benefits; and providing a structure to manage change. We will use cost, schedule, and quality performance measures agreed to during the kickoff meeting to monitor progress.

- **Communications and Reporting:** Ascent understands communication is a key to success for this effort, and good communication will deliver key messages to stakeholders and other team members. This includes status of activities, schedule, and informational awareness on the project and/or task, as well as reporting on a weekly, monthly, or contract basis.

- **Financials:** Ascent utilizes resource planning, cost estimating based on effort, cost budgeting and cost control

processes to ensure that the project is completed within the approved budget. Projects are tracked financially, and billing activities are monitored and controlled along with the collection processes.

- **Quality Management:** All studies for the project will be performed to the industry standard to adhere to proven guidelines. The reports that are generated are peer reviewed internally as a quality control measure.
- **Resource Management:** Our resource management approach ensures that pre-planning, scheduling, and the allocation of Ascent’s resources will maximize efficiency for the Brownfield Environmental Assessment and Planning project.
- **Change Management:** Ascent’s change management approach is to first stop and pause to understand what is driving the change. Once this is understood, it is communicated directly to the client so that a clear path forward can be developed.
- **Knowledge Management:** Our knowledge management process includes collecting, organizing, clarifying, and disseminating information and knowledge throughout an organization and our customers. Ascent has developed and maintains an in-house SharePoint knowledge management site. This knowledge management site is used to house project specific documentation including workflows for routing and approvals.
- **Risk / Issue Management:** Our risk management approach is to reduce the variation in expected project results, including cost, schedule, and performance. Risk management begins with the development of our Risk Management Plan that will continue throughout the life of the project with active participation by all stakeholders. Our PM will manage the Risk Plan, which will contain a description of the risk, the risk category, the risk impact assessment, the risk ranking and urgency, the originator, and the name of the assigned manager/staff member. All problems and issues associated with project performance or related issues will be identified, qualified, and documented in the form of action items, assigned to a responsible individual, entered our Quality Control database, and tracked to resolution. We will employ our rapid issue escalation process via daily stand-up meetings and weekly status reports from our key personnel staff. The Project Manager will ensure that any adverse trends are analyzed for root causes and that appropriate corrective actions are taken.

10. HAS THIS JOINT-VENTURE WORKED TOGETHER BEFORE? N/A <input type="checkbox"/> YES <input type="checkbox"/> NO																																									

12. A. Is your firm's personnel experienced in Abandoned Mine Lands Remediation/Mine Reclamation Engineering?

☒ YES Description and Number of Projects: Performed design for various projects dealing with mine seepage and ground instability. Coordinated drilling/monitoring activities, designed wet mine seals, drainage conveyances, E&S measures, and slip repairs, etc. Approximately 5 or 6 projects completed. Specifically, Mr. Nestor was heavily involved in the Anglins Run, Roaring Creek and Leon Street projects as well as several others.

B. Is your firm experienced in Soil Analysis?

☒ YES Description and Number of Projects: Ascent staff is experienced with identifying hydric soils applicable to wetlands and subsequent permitting needs. Ascent is also experienced with reading boring logs and coordinating with Geotechnical Engineers in order to apply information to practical designs. Ascent personnel has provided such services on dozens of projects. Ascent's Environmental Division Manager is a certified Geologist.

NO

C. Is your firm experienced in hydrology and hydraulics?

☒ YES Description and Number of Projects: Ascent personnel performs pre and post watershed analyses on a variety of projects. We have completed drainage studies for municipalities, private development projects, and AML projects. We have also performed stream analyses for bridge replacement projects and development in flood prone areas. This type of work is performed in nearly every project Ascent works on and has been completed in hundreds of projects.

D. Does your firm produce its own Aerial Photography and Develop Contour Mapping?

YES Description and Number of Projects:

☒ NO Ascent works with subconsultants to identify the most cost-effective way of producing design worthy mapping. We have purchased mapping that was already developed, produced mapping with drone flights, and utilized Brandon Rumbaugh Solutions in order to develop survey mapping from "boots on the ground" survey. Each project is analyzed and mapping production is selected based on the appropriate level of accuracy and cost efficiency.

E. Is your firm experienced in domestic waterline design? (Include any experience your firm has in evaluation of aquifer degradation as a result of mining.)

☒ YES Description and Number of Projects: Ascent is experienced with the design and layout of potable water systems for commercial and residential development projects. We have completed dozens of mainline extensions and/or replacement projects, however we do not have experience in aquifer degradation.

NO

F. Is your firm experienced in Acid Mine Drainage
Evaluation and Abatement Design?

YES Description and Number of Projects: Ascent Personnel has developed several projects dealing with evaluation of Acid Mine Drainage and design of conveyance/treatment systems. Approximately 5 or 6 projects completed. In addition, Jeff Knepper (Ascent) has extensive experience in Acid Mine drainage treatment both on the consulting side as well as the Regulatory side.

ND Paper Slip, repair of slip along Monongahela River, Marion County	ND Paper 702 AFR Drive Fairmont, WV 26554	\$500,000	2020	YES

18. COMPLETED WORK WITHIN LAST 5 YEARS ON WHICH YOUR FIRM HAS BEEN A SUB-CONSULTANT TO OTHER FIRMS (INDICATE PHASE OF WORK FOR WHICH YOUR FIRM WAS RESPONSIBLE)

PROJECT NAME, TYPE AND LOCATION	NAME AND ADDRESS OF OWNER	ESTIMATED CONSTRUCTION COST OF YOUR FIRM'S PORTION	YEAR	CONSTRUCTED (YES OR NO)	FIRM ASSOCIATED WITH
Clay Battelle Health Center	Unknown Ascent was a subconsultant to the Architect	\$150,000	2020	YES	Desmone Architecture
WVU Hospitals Rehab Center	WVU Hospitals	\$500,000	2019	NO	Paradigm Architecture

19. Use this space to provide any additional information or description of resources supporting your firm's qualifications to perform work for the West Virginia Abandoned Mine Lands Program. Ascent has assembled a team of senior level design professionals that have a wide variety of experience in the industry. Our size allows us to communicate effectively internally as well as with our clientele, often producing innovative ideas helping to avoid pitfalls that larger firms fall into with inexperienced designers and ineffective communication. Our design personnel specialize in earthwork and drainage which is very well suited for this project and we have close relationships with valued subs that make Geotechnical and Survey project components seamless with the rest of our operations.

20. The foregoing is a statement of facts.

JEFFREY KNEPPER, CPG, LRS

SUMMARY

Mr. Knepper has 20 years of experience working on complex environmental and regulatory projects specializing in environmental/regulatory compliance, remediation, permitting, and aboveground storage Tank (AST) services. Mr. Knepper is adept at developing practical and innovative solutions to challenging environmental issues often faced by oil and gas and other industrial clients. His track record in regulatory compliance, permitting, soil and groundwater remediation, and environmental impacts make him a key team member on projects. Mr. Knepper is a certified professional geologist and a WV licensed remediation specialist. Mr. Knepper is an experienced AST inspector with over 1,000 completed inspections in various states including: WV, PA, OH, KY, WI, MI, VA and NY.

EXPERIENCE

ENVIRONMENTAL INVESTIGATIONS

CPFilms, Industrial Facility, Fieldale, VA – Mr. Knepper performed nature and extent and site characterization studies for volatile organic compounds. He developed corrective action plans, installed groundwater monitoring wells and performed statistical analyses on results.

Federal Mogul, Industrial Facility, Winchester, VA – Mr. Knepper performed groundwater sampling and statistical analyses on results to determine the cause of upgradient groundwater contamination. Mr. Knepper received a commendation from the Virginia Department of Environmental Quality for exemplary sampling methods and techniques.

U.S. Silica, Berkeley Springs, WV – Mr. Knepper led the field operations team at an emergency spill cleanup for chemicals which included: sulfuric acid, caustic soda and petroleum sulfonate from aboveground storage tanks. Mr. Knepper's full knowledge of the WVDEP regulations for tanks and site cleanup proved invaluable in minimizing potential contamination and receiving high praise from the WVDEP.

ENVIRONMENTAL REGULATORY AND COMPLIANCE

Dominion Energy Transmission, Bridgeport, WV – Mr. Knepper developed a permitting guide to monitor permit conditions, permit expirations and regulatory deadlines. This guide encompassed all of Dominion's permits. It helped to mainstream and organize permits regardless of personnel responsibilities and turnover.

American Electric Power, Mountaineer Plant, New Haven, WV – Mr. Knepper developed the first Carbon Capture and Sequestration (CCS) permit in WV and the United States. The permit was issued prior to the Environmental Protection Agency releasing the regulations for the newly established class VI rules which now govern CCS.

UNDERGROUND INJECTION CONTROL

Mr. Knepper has over 10 years of experience working with underground injection control projects. He was the state-wide Environmental Resources Program Manager for WV handling all permitting and compliance approvals for mining facilities working closely with various mining companies including: Wolf Run Mining, Greenbrier Minerals, Independence Coal, Brooks Run Mining, Mid-Vol Coal Sales, Pinnacle Mining, ICG-Beckley, LLC and many more. Mr. Knepper has also provided this knowledge to the consulting realm as an alternative to existing permits or lack of efficiency in current treatment options.

Vesuvius, Globe Mine, Newell, WV – Mr. Knepper led a team to renew a NPDES permit at an old clay mine. The facility had been violation for many years because of the high concentration of iron. Mr. Knepper was instrumental in renewing the NPDES permit and providing an alternative to help bring the facility back into compliance with the WVDEP.

HYDROGEOLOGY

Georgia Pacific, Industrial Facility – Martinsville, VA - Mr. Knepper performed groundwater sampling and statistical analyses on volatile organic compounds, metals and semi-volatile organic compounds from groundwater samples.

Scott County, Gate City, VA – Mr. Knepper performed site characterization studies on volatile organic compounds contaminating multiple sites. Mr. Knepper prepared corrective action plans and nature and extent studies. He also performed groundwater statistics that were used by the VDEQ as a model for how to perform the various investigations and studies.

Patrick County, Stuart, VA – Mr. Knepper helped design and manage a gas extraction system for the County. He also was instrumental in the approval of a corrective action plan from the VDEQ for vinyl chloride contamination. Mr. Knepper developed alternatives the State of Virginia now uses to evaluate nature and extent studies and site characterization reports.

MICHAEL NESTOR, PE

SUMMARY

Mr. Nestor is a Civil Engineer registered professionally in WV and serves as the Managing Member of Ascent Consulting and Engineering, LLC. He has over 16 years of consulting experience focusing on land development projects and stormwater management in WV, MD, and PA. His expertise allows him to guide projects from concept to completion by understanding the goals/vision of the project, effectively communicating with the project team, and paying careful attention to the details. Mr. Nestor will be responsible for leading and client communication on this project.

EXPERIENCE

ASCENT CONSULTING AND ENGINEERING, (CLARKSBURG, WV)

Mr. Nestor is the founding/managing member of Ascent. He is responsible for the day to day operations of the firm and Quality Assurance/Control. In addition, Mike serves as the Engineering Division Manager, working with Engineers, CAD Techs, etc. to ensure projects include practical and efficient designs, and are delivered in a timely manner.

THE THRASHER GROUP, (BRIDGEPORT, WV)

Throughout Mr. Nestor's employment with The Thrasher Group, he served in a variety of roles ranging from Staff Engineer up to Site Group Division Manager. This allowed him to work on teams for a wide variety of projects and in a range of capacities.

BUSINESS AND INDUSTRIAL PARKS

Designed and permitted the sites for multiple commercial and industrial properties ranging from major development projects such as the White Oaks Business Park and West Ridge Development to individual development sites for commercial and retail uses.

ROADS/SIDEWALKS

Designed and managed various roadway projects ranging from new road builds to maintenance and improvement projects.

STORMWATER MANAGEMENT

Designed numerous stormwater management facilities and developed stormwater management programs for compliance to the State of WV's MS4 Program in several communities.

amanda@ascentconsultingengineers.com

SUMMARY

Ms. Amanda Wright is a Senior Project Manager and Lead Liaison for Ascent services. Amanda Wright has nearly 20 years of experience within leadership roles, risk assessment, environmental compliance, permitting, safety, and project management. She has been involved in numerous commercial, residential, and energy infrastructure projects located within WV, PA, TN, OH, KY, and VA. E.g., land development, ASTs, impoundments, well pads, access roads, roadway repairs, gathering lines, and water and gas pipeline projects.

EXPERIENCE

DIEFFENBAUCH & HRITZ

Director, Regulatory Compliance

Key member of the organization & heavily involved in all aspects of the firm's day to day operations. Managed regulatory, permitting, and environmental compliance activities associated with all projects. Responsible for coordinating environmental, survey, and geotechnical services, as well as, supervising engineering design and permitting for a wide range of clients.

RICE ENERGY

Permitting & Regulatory Compliance Manager

Managed engineering, permitting, and environmental compliance activities associated with all projects for Rice Energy. Managed the regulatory & compliance team within PA & OH, encompassing the following aspects: surface permitting, surface use permitting, site & roadway compliance, & sub-surface permitting. Heavily involved with each project beginning with the inception through construction and reclamation. Direct point of contact for all regulatory matters and was the lead on all zoning and surface use permitting from a local, state, and federal level.

CONSOL ENERGY

Manager-Gas Permitting-Southern Region

Managed the southern permitting team within the southern region (WV, OH, PA, KY, VA, & TN) which included engineering, permitting, and environmental compliance activities associated with all projects for CONSOL including JV partners Noble, Antero, & DTI. Managed the regulatory & compliance team, encompassing the following aspects: surface permitting, surface use permitting, site & roadway compliance, & sub-surface permitting. Heavily involved with each project beginning with the initial kick off project feasibility through construction and reclamation. Direct point of contact for all regulatory matters and was the lead on all zoning and surface use permitting from a local, state, and federal level.

DEVON SHREWSBURY, PROJECT ENGINEER

SUMMARY

Devon is an experienced Project Engineer at Ascent. Her background is in engineering plan production, stormwater management design, environmental permitting, technical reports, and more. Her ability to prepare and design multiple aspects of a project as well as her great communication with our clients and team allows Devon to meet the needs of everyone involved. Mrs. Shrewsbury has exposure to a wide variety of project types and is astute in keeping projects in line with budgets and schedules. She has an outstanding ability to work with regulatory agencies which provides efficient designs and timely approvals.

EXPERIENCE

ASCENT CONSULTING & ENGINEERING, (CLARKSBURG, WV)

Mrs. Shrewsbury is responsible for leading design teams for the ultimate goal of project permitting and plan production. She uses her knowledge of civil engineering design practices and construction methods to guide her project teams to efficient and timely project completion. Devon is experienced in AutoCad Civil 3D, Stormwater Management Design, and the Hydraflow design suite of software. She prepares and reviews design computations and project cost estimates. Devon can take a client's project from start to completion and is an invaluable part of the Ascent Team.

ENTERPRISE, MORGANTOWN WV

This project consisted of the construction of a new Enterprise facility in Morgantown, WV. Devon was involved in the site design, preparation of construction documents, construction stormwater permitting through the WVDEP, and working with the contractor throughout the duration of construction.

I-79 RANDOLPH DEVELOPMENT

This project included a 5 acres pad development in Quiet Dell along I-79 for future development. completed the site design, prepared the construction documents, received permitting through the WVDEP, coordinated with the WVDOH for entrance permitting and right-of-way acquisition, and coordinated utility relocations throughout the site.

UHAUL, MORGANTOWN WV

This project consisted of the construction of a new Uhaul facility on Van Voorhis Road in Morgantown, WV. Devon was involved in the site design, preparation of construction documents, construction stormwater permitting through the WVDEP, and working with the contractor throughout the duration of construction.

KEITH AXTON, PROJECT ENGINEER

EDUCATION

Fairmont State College, Fairmont,
WV

Bachelor of Science Civil
Engineering Technology

YEARS EXPERIENCE

- 2 years
- 1 year at ACE

Email:
keith@ascentconsultingengineers.com

SUMMARY

Mr. Axton is a highly effective and trained project engineer capable of working independently with minimum supervision and committed to providing high quality service on every project. Keith is experienced in initial survey stakeout, survey As-Built for sites as well as estimate, bidding process and bidding software. Keith uses his knowledge and experience to communicate with our clients as well as everyone involved in the project process. Keith always takes the time to make sure projects are on time and on budget.

EXPERIENCE

ASCENT CONSULTING AND ENGINEERING (CLARKSBURG, WV)

Mr. Axton works as a design team leader at Ascent Consulting and Engineering. He is experienced in residential site development, construction plans, hydraulic modeling, and more. Keith has lead projects from start to finish of all sizes and is able to bring a wealth of knowledge to each project he works on.

THE TIMMONS GROUP, (Raleigh, NC)

During Mr. Axton's time at The Timmons Group he designed and permitted sites for multiple commercial and residential properties. Keith is also experienced in AutoCAD Civil 3D design, road and lot grading, as well as sewer design and storm impact analysis.

THE THRASHER GROUP

Mr. Axton was an intern before becoming a full-time project engineer where he was able to create construction plans, draw and interpret maps, diagrams and blueprints. Keith was responsible for storm sewer design, site layouts drainage analysis and more.

MEGAN WAGNER

ENVIRONMENTAL SCIENTIST

SUMMARY

Ms. Megan Wagner is an Environmental Scientist for Ascent services. Ms. Wagner has approximately 6 years of experience with data collection, report writing and GIS mapping for a variety of projects. Her experience includes stream and wetland delineations, soil assessments, infiltration testing, soil profiling, stream assessments and monitoring, BMP suitability reports, habitat assessments, permit writing, Phase 1 reporting, SWPPP, GPP, and SPCC plans, stormwater sampling, and GIS mapping/data processing. She has been involved in numerous projects located within WV, PA, and OH. The range of projects include, well pads, access roads, road upgrades, gathering lines, ASTs, impoundments, modifications, slip repairs, and water and gas pipeline projects.

EXPERIENCE

DIEFFENBAUCH & HRITZ

Environmental Scientist II, GIS Technician

Generated field work, data collection, and report writing for stream and wetland delineations. Completed nationwide permits and stream activity permits. Operated soil infiltration testing and subsurface evaluations for soil assessment reports. Performed rare, threatened, and endangered species studies and regulatory coordination, habitat assessment and plant relocation projects. Conducted stream assessment, monitoring, and macroinvertebrate surveys. Completed mapping, GIS, and GPS data with ArcGIS 10.6 and Trimble Geo 7x Units. Performed erosion and sediment control inspections.

SUTTON AVIAN RESEARCH CENTER

Survey Technician

Was responsible for collection of all field data on federally threatened Lesser Prairie Chicken. Performed habitat assessment based on vegetation and topography. Completed triangulation points for determined Leks. Utilized four-wheel drive on rough terrain/roads. Identified target species as well as multiple grassland birds.

ALLEGHENY WOOD PRODUCTS

Forestry Intern

Assisted forestry with research on the Blackwater Canyon Habitat Conservation Plan (HCP). Maximized research on Indiana bat, Northern long-eared bat, Virginia bat, and Cheat Mountain salamander for better understanding of endangered species present and to assist forestry on proposing a proper HCP to allow timber harvest on the Blackwater Canyon property.

SUMMARY

Eric Short is a Senior Civil Project Manager/Engineer. In his 16 years of consulting, he has worked on a variety of projects which include all types of development, transportation designs, stormwater management designs, site grading, and oil/natural gas facilities. His tasks involve the design and development of Demolition, Erosion and Sediment Control, Site, Grading, and Utility Plans along with creating details for site specific elements. Mr. Short is also an experienced highway designer with a background in the preparation of roadway construction, right-of-way, sign, and pavement marking plans. Other responsibilities include traffic studies, storm water and sanitary sewer design, and cost estimation.

Eric Short's expertise lies in taking detailed designs and translating them into easy to understand and executable documents. His ability to communicate effectively with contractors and stakeholders while using a commonsense design and approach to construction makes him a very effective Engineer and Manager.

EXPERIENCE

City of Ripley, Main Street Revitalization: This project was one of kind for us in that we took all of the existing overhead utility lines along Main Street and putting them underground in conduit. The project involved direct coordination with the utility companies to ensure they had the necessary number, size, and location of conduit. Beyond the utilities, the Main Street was designed with new sidewalks that incorporated brick pavers, hand railing, decorative street lights, and handicap ramps.

•**City of Grafton, Main Street Revitalization:** The project consisted of designing sidewalks that incorporated decorative street lights, benches, handicap ramps, and landscape islands.

•**Raleigh County Memorial Airport & Industrial Park:** Design of a 1,100 linear footroad extension, Drainage and Erosion and Sediment Control Plan.

•**Cambridge Place Business Park:** Complete Site Design Package, multiple tenant building and parking layout, utility extensions, and storm water system in accordance with the City of Bridgeport regulations.

•**Genesis Youth Crisis Center:** Complete Site Design Package, including approximately 35,000 cubic yards of earthwork, building and parking layout, utility extensions, and storm water management facilities.

ZACH ASSARO, PROJECT MANAGER

SUMMARY

Mr. Assaro is an Engineering Consultant/Manager and Member of Ascent Consulting and Engineering, LLC. He has 10 years of consulting experience focusing on land development projects and stormwater management in WV and PA. His expertise allows him to guide projects from concept to completion by understanding the goals/vision of the project, effectively communicating with the project team, and paying careful attention to the details. Mr. Assaro will be responsible for managing support staff and project details throughout this project.

EXPERIENCE

ASCENT CONSULTING AND ENGINEERING (CLARKSBURG, WV)

JENKINS SUBARU – ADDITION

Site plan development for the addition of a 10,000 sf office space in the parking lot of an existing dealership. The project consisted of layout to allow for circulation within the existing dealership, parking, utility connections, stormwater conveyance, and re-grading of the existing gravel parking lot.

THE VALE

Layout and engineering design for an upscale housing development in Bridgeport, WV. The community utilizes low impact development practices to provide 22 lots ranging in size from 1 to 7 acres. The project required substantial utility extensions and creativity in stormwater management controls as well as major roadway extensions throughout challenging terrain.

THE THRASHER GROUP (BRIDGEPORT, WV)

Throughout Mr. Assaro's employment with The Thrasher Group, he served in a variety of roles ranging from Staff Engineer up to Project Manager. Zach's primary role was value engineering. He worked closely with developers and contractors to develop efficient projects that were successful for ownership, designers, and contractors.

BUSINESS AND COMMERCIAL/RETAIL

Designed and permitted sites for multiple commercial properties including Hawthorn Suites, TGI Friday's, Generic Retail Centers, Shop N' Save, Dollar General, Kia, Audi, Subaru, and Ford Dealerships. Also served on Project Team as lead engineer for the Boy Scouts of America Welcome Center located on US Rt. 19 and various road improvement projects.

INDUSTRIAL PARK

Designed and managed America's Best Block factory. Throughout this experience, he handled foreign affairs and coordinated design among architects, engineers, planners, and ownership.

STORMWATER MANAGEMENT

Designed and managed multiple stormwater upgrades for municipalities such as the City of Bridgeport and Fayetteville, WV

- 1 ½ years at ACE

Email:
andy@ascentconsultingengineers.com

SUMMARY

Mr. Kincell manages the Ascent Field Services division. He is responsible for QA/QC and scheduling projects. Andy also oversees our materials testing laboratory. He has over 20 years of experience overseeing a full range of construction projects including buildings, large earthwork projects, utilities, road construction, bridges, etc.

EXPERIENCE

ASCENT CONSULTING & ENGINEERING, (CLARKSBURG, WV) Field Services/Business Development

Division Manager of the field service department and materials testing lab. Monitor testing of multiple projects, review reports, manage field services, and scheduling. Liaison between clients, contractors and sub consultants. Prepares budget, manages billing and compliance. Andy is responsible for the development and AASHTO accreditation for the ACE lab. Andy's role in developing the lab for Ascent has created jobs and growth for the entire company.

THE THRASHER ENGINEERING GROUP, (BRIDGEPORT, WV) Construction Services/Business Development 14yrs

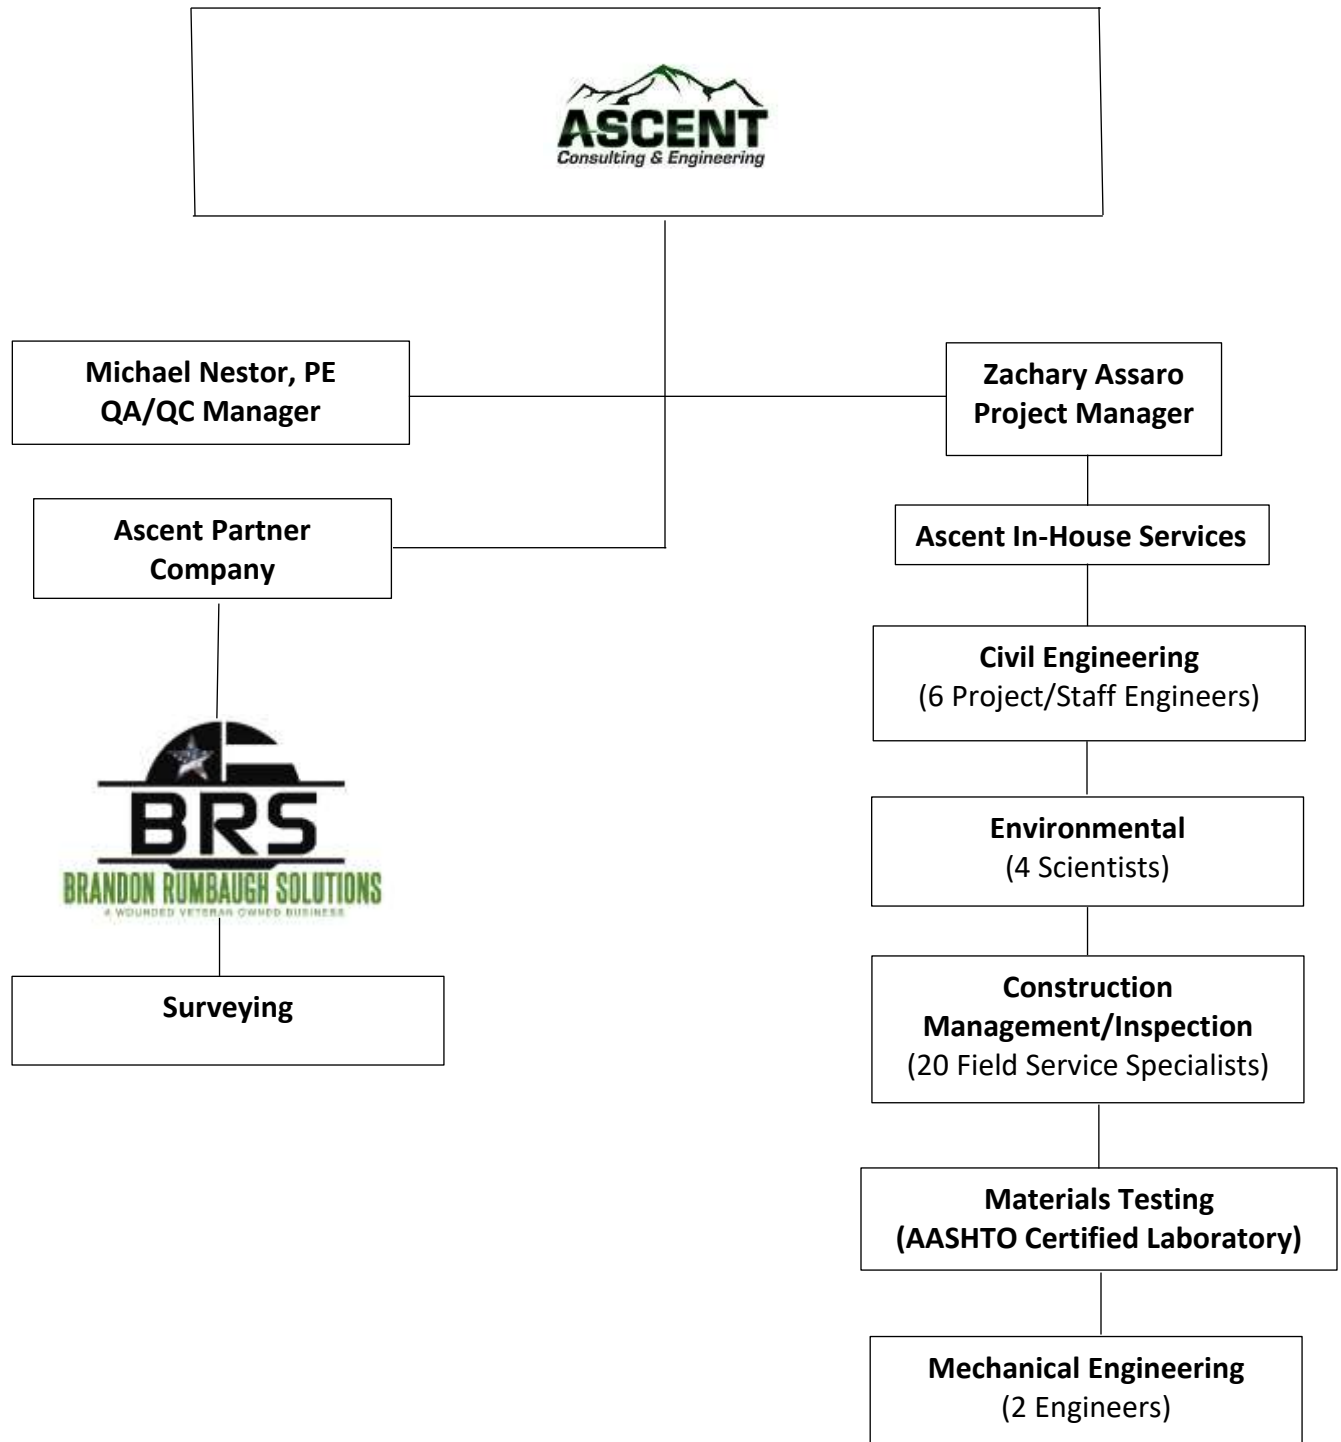

Management of three separate laboratories; one in Clarksburg, WV, one in Beckley, WV and the third in Canton, OH. Testing and maintenance on multiple projects at a time. Responsible to getting the lab AASHTO accreditation. Monitor testing of various construction materials in the lab, such as concrete, aggregate, and soil. Oversaw 75+ field technicians, lab managers and other construction managers. Prepare budgets and tracked projects to make sure they were within compliance. Compilation of results of tests into the proper reports for the contractor and West Virginia Department of Transportation. Maintenance and calibration of all testing equipment. Liaison between contractors, clients, and government agencies. Hiring and training of new employees. Managed the materials testing and inspections of the \$240M Biometric Building and Parking Garage project for the FBI.

WEST VIRGINIA UNIVERSITY Research Assistant

Research Assistant for Dr. Zaniewski, West Virginia University (head of asphalt department), and the West Virginia Department of Transportation. Assisted with a variety of research projects. Responsible for the supervision and training of graduate students on the use of research equipment and assisted them with research projects. Maintenance of testing equipment, which included running calibrations on the equipment, documenting any variances, reading schematics to diagnose and repair malfunctioning equipment, and correcting any problems found during the maintenance process. Ensured the adequate amount of testing equipment and supplies were available and ordered any additional materials required. Attended conferences to learn about new products and testing procedures.

ABANDONED MINE LANDS (AML) CONTRACTOR INFORMATION FORM

You must complete this form for your AML contracting officer to request an eligibility evaluation from the Office of Surface Mining Reclamation and Enforcement (OSMRE) to determine if you are eligible to receive an AML contract. This requirement applies to contractors and their sub-contractors and can be found under OSMRE's regulations at 30 CFR 874.16. **NOTE:** This form must be signed and **dated within 30 days** of submission to be considered for a current bid.

Part A: General Information *Consulting Firm

Business Name:	Ascent Consulting & Engineering
Tax ID #:	82-4069240
Address:	2361 Davisson Run Road, Suite 103
City, State, & Zip:	Clarksburg, WV 26301
Phone Number:	304-933-3463
Email Address:	amanda@ascentconsultingengineers.com

Part B: Obtain an Organizational Family Tree (OFT) from the Applicant Violator System (AVS)

If you plan to certify the existing AVS information or submit updates under Part C, you must include an OFT. To obtain an OFT, you may contact the AVS Office at 800-643-9748 or from the AVS website at: <https://avss.osmre.gov/>. Instructions for how to download an OFT from the AVS can be found at: <https://www.osmre.gov/programs/AVS/aml-instructions.pdf>.

Part C: Certifying and updating information in the AVS

Select only one of the following options, follow the instructions for that option, and sign and date below.

I, Michael R. Nestor, have express authority to certify that:
(Print Name)

- ☐ 1. Our business is in the AVS and is accurate, complete, and up-to-date. If you select this option, you must attach an Entity OFT from the AVS to this form. Do not complete Part D.
- ☐ 2. Our business is in the AVS but needs to be updated. If you select this option you must attach an Entity OFT from the AVS to this form. Use Part D to provide the missing or corrected information.
- ☒ 3. Our business is not in the AVS and needs to be added. Complete Part D.

Part D: OFT Information

Contractor's Business Name: Ascent Consulting & Engineering (Consulting Firm)

If the current Entity OFT information for your business is incomplete in the AVS, or if there is no information in the AVS for your business, you must provide all of the following information as it applies to your business. Please include additional copies of this page if the space below is not sufficient to capture all information.

- Every officer (President, Vice President, Secretary, Treasurer, etc.);
- All Directors, Partners, and Members;
- All persons performing a function similar to a Director;
- Every person or business that owns 10% or more of the voting stock in your business;
- Any other person(s) who has the ability to determine the manner in which the AML reclamation project is being conducted.
- **Please list an end date for any person no longer with your business.**

PAPERWORK REDUCTION STATEMENT

The Paperwork Reduction Act of 1995 (44 U.S.C 3501) requires us to inform you that: Federal Agencies may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid OMB control number. This information is necessary for all successful bidders prior to the distribution of AML funds, and is required to obtain a benefit.

Public reporting burden for this form is estimated to range from 15 minutes to one hour, with an average of 30 minutes per response, including time for reviewing instructions, gather and maintaining data, and completing and reviewing the form. You may direct comments regarding the burden estimate or any other aspect of this form to the Information Collection Clearance Officer, Office of Surface Mining Reclamation and Enforcement, 1849 C Street, NW, Room 4559, Washington, DC 20240.

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.
