West Virginia Department of Environmental Protection Office of AML&R c/o Joseph E. Hager, III Department of Administration, Purchasing Division 2019 Washington Street, East Charleston, WV 25305

Dear Mr. Hager,

E.L. Robinson Engineering (ELR) is pleased to have the opportunity to submit our Statement of Qualifications to provide the West Virginia Department of Environmental Protection AML with design services for the **Sullivan Refuse and Clogged Stream Project**.

ELR has completed plans and specifications for numerous reclamation projects for WVDEP-AML for over 20 years in addition to several projects with ODNR and Maryland AML. We have included descriptions of our project experience later in this proposal.

The ELR staff has combined experience in the design of more than 280 AML projects.

The Charleston office has:

- A. Fourteen (14) registered professional engineers (civil or mining), one (1) geologist, three (3) landscape architects, six (6) engineers in training as well as several CADD technicians that may be used on these projects.
- B. ELR Corporate experience in designing one hundred thirty-six (136) abandoned mine land remediation projects. Personal experience on approximately two hundred eighty (280) AML projects. This number does not include surveying/mapping/drilling projects.
- E.L. Robinson Engineering has grown from 13 employees in 1996 to nearly 200 employees today. Throughout this growth period, we have continued to meet project deadlines while providing a high quality engineering product. Our office location in Charleston is centrally and conveniently located in respect to the WVDEP offices and the referenced project areas.

We at E.L. Robinson Engineering look forward to serving your agency under this contract. If you have any questions or need clarification, please feel free to contact me at (304) 776-7473.

Sincerely,

Eric J. Coberly, P.E.

Project Manager

E.L. Robinson Engineering

## Proposal for Sullivan Refuse and Clogged Stream

#### **Understanding of Project Requirements**

E.L. Robinson Engineering fully understands the requirements for the **Sullivan Refuse and Clogged Stream Project** and is committed to giving the WVDEP Office of Abandoned Mine Lands and Reclamation the time and attention that is necessary for this project. Professional services may include: civil, structural; geological; surveying and mapping; preparation of all necessary permit applications; construction monitoring and other services that may be required.

### Firm's Capacity

E.L. Robinson Engineering approaches all engineering projects with the same attention to detail and fiscal responsibility to ensure the client receives the most cost effective plan, design and operationally functional project possible. Our approach truly makes the WVDEP-AML engineering staff an integral part in the design of the project. We want to make sure that the review staff is comfortable with the design concept before the project is submitted for review. During this process, we evaluate all technical alternatives to determine the most

cost effective plan and technically acceptable project for the WVDEP-AML staff.

ELR has nearly 200 professionals on staff including many individuals experienced in mine reclamation. This capacity allows for the development of innovative and alternative methods to address complex issues involved in reclamation projects of this nature. Our QA/QC process also allows for a different perspective to be brought to the project before submission to the client and for review. ELR has the capacity to take this project from conception to completion with a wide variety of experienced professionals with in-house staff for planning, design, permitting, bidding and construction monitoring.

Our company will work diligently to deliver the highest quality, cost effective solution that the WVDEP-AML deserves. We have extensive knowledge in mine reclamation and are currently working with the WVDEP-AML on similar projects. We have an excellent understanding of the requirements for this type of project and a good working relationship with NEPA permitting and regulatory agencies.

### WHAT WE'LL DO.

E.L. Robinson is familiar with the various project areas associated with the **Sullivan Refuse and Clogging Stream Project** and the desired design services for which you are seeking.

Further, ELR understands the scope of services includes the following tasks:

- Perform site and geotechnical investigations
- Design temporary and permanent access or accesses for construction and future maintenance
- Design to repair or replace existing drainage structures/ systems
- Design to mitigate AMD drainage
- Design of drainage conveyances, including drainage channels, underdrains, and/or other controls to safely convey water off-site
- Condition and revegetate all disturbed areas

We are anxious to become an extension of your staff by providing prompt planning, design and construction monitoring services as needed. We interact with the various review and permitting agencies. As you will see from our resumes, we are uniquely diversified to provide the quality engineering services for which you seek.

E.L. Robinson will work closely with the WVDEP-AML and all regulatory and permitting agencies to complete this project. We feel that our extensive knowledge and experience in the planning and design of similar projects are significant assets in developing a cost-effective solution to your reclamation project.

# CAPABILITIES

Over the past 40 years, E.L. Robinson Engineering has focused its efforts on delivering quality projects to our clients and building strong relationships based on trust and partnership. We believe building lasting relationships with our clients is key to delivering exceptional service for many years to come.

E.L. Robinson provides WVDEP-AML with the capabilities, expertise and resources of one of the top-notched civil engineering firms in the region. Our offices are staffed with professionals experienced in AML reclamation mapping, permitting, design and construction monitoring. Further, we are very familiar with the requirements of the permitting and regulatory agencies which expedites the completion of projects.

As part of our commitment to quality, E.L. Robinson realizes that every project, client and location is very different. As a result, we look at each project independently to determine the most feasible and functional solution. Specifically, we look at ways we can maximize the project benefit and minimize the construction cost while at the same time completing projects on time and within budget. We have demonstrated abilities in developing practical and cost-effective reclamation and improvement projects and are dedicated to meeting project schedules and budgets.

### Such demonstrations can be seen in our prior work on our most recent reclamation projects including:

- Maryland Shallmar Landslide Emergency
- Maryland Scenic Railroad Landslide
- Red Warrior Gob & Slide
- North Matewan (Akers) Landslide
- Branchland (Blankenship) Landslide
- Coburns Creek Landslide
- Sauls Run Landslide
- Missouri Fork Landslide
- Worthington (Hess) Landslide
- Copen Road Landslide
- Dans Branch (Dillon) Landslide
- Pendleton Creek Highwall
- Maryland Barton Mine Pool
- Glen Alum Complex
- Carson One Special Reclamation Project
- Vickers Branch (Butcher) Drainage
- Sugarcamp Run Burning Refuse Phase II

- Craigmoor (Strader) Landslide Emergency
- Maryland G&S Landslide Study
- Sauls Run (Bennett) Landslide
- West Milford (Chapman) Landslide
- Roderfield (Simpson) Landslide
- Scotch Hill Mine Fire
- Mammoth (Shamblin) Landslide
- Delbarton (Curry) Landslide
- · Big Creek (Surgoine) Landslide
- Crooked Run (Davis) Landslide
- Procious (Doughty) Landslide
- Rivesville (Parker) Landslide
- Bridgeport (Ridgeway) Landslide
- North Matewan (Ross) Landslide
- Summerlee Refuse Phase II
- Weston (Williams) Landslide
- Smithers Landslide

#### Geotechnical/Soil Analysis

Performed geotechnical analysis on 135 projects over the past 20 years. These project involved slope stability, mine pool locations and mine subsidence.

**US 35 Design Build:** Utilized provided core boring data, coordinated drilling of over 100 additional core borings to design 7.5 miles of 4 lane highway in Putnam County, West Virginia. This included the foundation designs of bridge piers and abutments for 2 bridges carrying the 4 lane roadway over a major stream and an existing roadway.

**WVDOT-District 2 Mingo County:** Solicited core borings, provided field personnel to log core samples, designed 4 pile retaining walls for landslides effecting existing roadways. Including analyzing piling, lagging and other aspects of each wall. Developed plans with profile, traffic control, estimated quantities, drainage controls, etc. in a bid package suitable for WVDOT to solicit bids.

**WVDOT-District 2 Logan County:** Solicited core borings, provided field personnel to log core samples, designed 5 pile retaining walls for landslides effecting existing roadways. Including analyzing piling, lagging and other aspects of each wall. Developed plans with profile, traffic control, estimated quantities, drainage controls, etc. in a bid package suitable for WVDOT to solicit bids.

**WVDOT-District 2 Lincoln County:** Solicited core borings, provided field personnel to log core samples, designed 14 pile retaining walls for landslides effecting existing roadways. Including analyzing piling, lagging and other aspects of each wall. Developed plans with profile, traffic control, estimated quantities, drainage controls, etc. in a bid package suitable for WVDOT to solicit bids.

**WVDOT Cottageville Bridge:** Solicited bids from drilling contractors, coordinated drilling for a bridge replacement in Jackson and Mason County, West Virginia. The geotechnical testing performed consisted of five hydrometer analysis and rock core compression testing. The design included pile foundations for the piers and abutments, sonar analysis of the creek channel as it relates to the soil materials and slope stability analysis for each abutment.

**WVDEP-AML Dans Branch:** Performed geotechnical investigation of an AML emergency landslide. Performed core borings and geotechnical testing of soil samples obtained from the borings. Designed pile retaining wall to support embankment and existing home below pre-law mining.

**Dempsey Bottom Beam Spam:** The subsurface investigation consisted of 6 test borings, all of which encountered bedrock. Four of the core borings were located at the site of the two proposed abutments, while the other two were drilled at the site of the proposed retaining wall. Hollow stem augers were utilized to drill the holes through the overburden. The Standard Penetration Test method utilizing split-spoon sampler was also used to sample the overburden soils.

**Guyandotte River Bridge:** ELR performed geotechnical design including future mine subsidence remediation for this bridge. During the design process a check of the mining records determined the presence of a coal seam in the vicinity of the bridge. After review of the mine maps and additional drilling, presence of mine voids was confirmed. Using the depths from the ground surface to the mine level a limit of grout protection was developed. The grouting program developed included some down hole camera work and confirmation borings to confirm the grout effectiveness. Grouting of the mine void eliminated the possibility of future mine subsidence in the vicinity of the substructure and allowed the bridge to be supported on conventional caissons.

### Hydraulics/Hydrology

E.L. Robinson has worked with various clients, both private firms and public entities, in developing hydrology and hydraulics studies to determine effects that developments would have on floodplains and how they might adversely affect the surrounding communities.

### ERIC COBERLY, PE

### **Project Manager**

#### Professional overview

Mr. Coberly has decades of experience as an infrastructure and civil engineer. His extensive experience as a Project Manager in various engineering disciplines includes site development, infrastructure planning, water, sewer, geotechnical analysis, abandoned mine reclamation, building construction, active surface mining, insurance investigations, and various post mining land use projects.

Additionally, Mr. Coberly served as the Chief for the West Virginia Department of Environmental Protection Abandoned Mine Lands Division for more than 4 years. In this position he was responsible for managing and directing all operations. Mr. Coberly has spent his career working to better the State of West Virginia in both the private and public sectors.

### **ED ROBINSON**

### President

#### Professional overview

In 1978, Mr. Robinson founded E.L. Robinson Engineering with only four employees. Under his leadership, ELR has grown exponentially to what it is today – a highly diversified engineering and surveying firm with 170 full time, experienced professionals and support personnel. ELR, which was a small surveying firm at its inception, now offers a complete range of services, including construction management, transportation engineering, utilities engineering, geotechnical engineering, surveying and technology, land planning and landscape architecture, bridge and structural engineering, and site development. Mr. Robinson is committed to quality engineering services and complete customer service. He recognizes the importance of every client he has interacted with and every staff member he has invested in. From holding sole ownership, Mr. Robinson converted ELR to an employee owned company through the Employee Stock Ownership Plan (ESOP).

### SHAWN KELLY, PE

### **Project Engineer**

#### **Professional overview**

Shawn Kelly, PE, brings over 20 years of experience to E.L. Robinson. His knowledge of site development has taken him all across West Virginia, working for both public and private clients. Mr. Kelly's understanding of drainage calculating, stormwater management plans, and site development planning have helped improve countless places in the state. Mr. Kelly has experience in the development of erosion and sediment control design. He has provided his expertise for the design of roadway drainage and erosion and sediment control for the roads around the complex. Shawn has vast experience working with the WV Department of Transportation, Division of Highways and WV Department of Environmental Protection to successfully permit many projects throughout the state.

### TIM CART, PE

### Project Engineer

#### Professional overview

Mr. Cart has decades of experience providing engineering consultant services to clients in public and private sectors along with state and federal agencies. He has served as Project Engineer on numerous geotechnical investigations including highways, bridges, industrial sites, buildings and site development projects.

Mr. Cart has been the lead engineer for the design of structures including garage maintenance facilities, 911 centers, student resident housing additions, building renovations including additions of elevations and stairways. The projects vary in complexity to single story slab on grade structures to multi-story buildings.

Additionally, Mr. Cart has also provided clients with evaluation of existing structures to determine the modifications required for proposed changes in the structural loading. He has worked with architects and the Fire Marshal's office to provide structures designed to the latest code requirements.

### MARK MCGETTIGAN, PE

### **Project Engineer**

#### **Professional overview**

Mr. McGettigan has decades of experience in providing consulting engineering services. He has worked on numerous land development and commercial building construction projects where his duties included procuring all necessary permits to designing potable water, sanitary sewer and storm sewer connections to development lots and commercial properties.

Mr. McGettigan has also served as project manager for numerous water and wastewater projects throughout West Virginia. He has secured funding, designed, obtained permitting and managed the construction for numerous water and sanitary sewer projects totaling well over \$60,000,000. Further, he has successfully worked on or managed numerous Phase I and Phase II ground water quality investigations and feasibility studies and reclamation projects for the West Virginia Department of Environmental Protection Abandoned Mine Lands program.

### KENNETH KINDER, PE

### **Project Engineer**

#### **Professional overview**

Mr. Kinder has experience in many facets of civil engineering. Mr. Kinder began his career as a staff engineer where he became proficient in the designing of projects and project management assistance. He has worked on an array of projects including civil site design, erosion and sediment control, stormwater management, hydraulic modeling, floodplain permitting, wastewater treatment, water treatment and distribution, geotechnical solutions, surface and underground coal permitting, limestone quarry permitting and solid waste landfill design. Mr. Kinder then moved into the role of Project Manager and served as an Office Leader while employed with a previous firm. Since joining ELR, Mr. Kinder has taken on the role of Project Manager on several noteable projects.

### RICH WATTS, PG

### **Project Geologist**

#### Professional overview

Mr. Watts has four decades of experience in providing consulting services as a senior geologist. He has also served as project manager on numerous projects.

Mr. Watts is primarily an engineering geologist whose range of project experience has encompassed numerous projects concerning geologic investigation, rock and soils engineering, landslides, abandoned mine land reclamation, forensic damage investigations, hydrogeology and the coal industry.

Mr. Watts' AML experience includes over 100 projects spanning more than 33 years. He has served as both Project Manager and Designer for these projects. Further, he is proficient in field reconnaissance and drilling.

He has performed hundreds of slope stability analyses for landslides and other projects involving the design of stable slopes. In addition, he has performed numerous studies involving landslide prediction to aid clients in land use and safety planning. Projects involving rock slope stability have included high rock cuts for surface mining operations and highways.

His geotechnical experience has included numerous projects involving soils, foundations, landfills and damage studies. These projects have encompassed such areas as pile driving, caisson installation, earth fill placement, subsurface exploration, site reconnaissance, grout and concrete placement and quality control.

### **BRANDON ASBURY, EI**

### **Project Engineer**

#### Professional overview

Brandon is an engineer-in-training with experience in design and permitting for several site development projects in West Virginia. Mr. Asbury has manufactured information pertaining to design and calculated information used for hydrology, site grading and permitting (including NPDES). He has experience in sizing drainage structures such as drainage ditches, ponds, sediment basins, sediment traps, standpipes and outlet pipes. Mr. Asbury has implemented these calculations and information into the permitting phase of the project. He has also assisted in calculating quantities, and construction cost estimates in several projects ranging between 2-200 acre sites.

### **GARY WORKMAN**

### **Project Designer**

#### Professional overview

Mr. Workman has more than 3 decades of experience as an Auto CAD designer with an emphasis on infrastructure and mine reclamation projects. He has experience specifically in the design of several abandoned mine land reclamation projects. These projects include large refuse pile grading, design of drainage structures, retaining wall design, permitting (including NPDES, USACOE, Highway Department), and construction cost estimates. Additionally, Mr. Workman has assisted in the completion of waterline feasibility studies in various areas. Mr. Workman has worked on waterline extensions and sewer collection systems that have provided service to many residential and industrial customers.

### TOM RAYBURN, PS

### Surveying Manager

#### Professional overview

Mr. Rayburn currently serves as Manager of Surveying for E.L. Robinson Engineering and has more than four decades of design surveying and construction surveying experience. His responsibilities include management of surveying and control for various design projects, including highways, buildings, and bridges. In addition, Mr. Rayburn manages and performs work consisting of courthouse research for property ownership resolution for the above mentioned project types. This includes preparation of property resolution maps, deed descriptions for property acquisitions required for project plan preparation. Mr. Rayburn has experience in Geodetic Control Surveys. 3D Laser Scanning, Photogrammetric Control, Topographic Surveys, Cemetery Surveys, Boundary Surveys, Construction Stakeout, Subdivision Surveys, along with Hydrographic surveys of river and lake bottoms. A few of the more notable surveying projects performed by ELR under the supervision of Mr. Rayburn, have been the Blennerhassett Bridge Project, 11 continuous miles of Corridor H design surveys. GPS Control for the West Virginia Statewide Mapping and Addressing PSD Project, 3D Laser Scan and mapping of the CAMC Parking Garage partial collapse, and 3D Laser Scanning of I64/I77 Retaining Wall for Monitoring.

#### Registrations

Registered Professional Surveyor in West Virginia, Kentucky, Virginia, North Carolina and South Carolina

Current Secretary for the West Virginia Board of Professional Surveyors

Member of National Society of Professional Surveyors

### **HEATHER WOODS-SHAFFER**

### **Construction Inspection Manager**

#### Professional overview

Mrs. Woods-Shaffer has experience in all phases of construction projects. Mrs. Woods-Shaffer has managed numerous WV highway and bridge projects throughout the state and has extensive knowledge in all aspects of the construction process. For nearly 15 years, she has worked as E.L. Robinson's Construction Inspection Manager/Safety Officer. As the Construction Inspection Manager her duties include the management of all construction inspection operations; estimation, preparation and securing of construction inspection and material testing projects throughout the State of West Virginia; assignment of personnel, preparation of invoices for reimbursement, coordination and communication between field inspectors, designers, contractors and clients; approval of sub contractor and vendor invoices, material and cost tracking; and ensuring that ELR has a core group of inspectors capable of handling all future assignments.

Further, Mrs. Woods-Shaffer serves as ELR's Safety Officer. Her duties include the evaluation and monitoring of safety protocols and guidelines associated with ELR's day to day construction/oil and gas operations; orientation and education of new construction hires regarding ELR's safety policies along with planning and facilitating required annual occupational health and safety training programs for all employees; selecting, ordering and training employees on the appropriate PPE use and care; and conducting accident and incident investigations, along with reporting accident statistics, running OSHA audits and providing corrective action recommendations.

## STATE OF WEST VIRGINIA Purchasing Division

## **PURCHASING AFFIDAVIT**

**CONSTRUCTION CONTRACTS:** Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

**ALL CONTRACTS:** Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

**EXCEPTION:** The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

### **DEFINITIONS:**

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

**AFFIRMATION:** By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of aw for false swearing (*W. Va. Code* §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, hat neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

| [  | J | Attachment of pre-bid sign-in sheet                      |
| [  | ] | Correction of error                                      |
| ſ  | l | Other  |

## **Description of Modification to Solicitation:**

Applicable Addendum Category:

Addendum issued to publish and distribute the attached documentation to the vendor community.

1. To publish agency responses to all vendor submitted questions

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

## **Terms and Conditions:**

- 1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.
- 2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

## ATTACHMENT A

## RFI: Questions from vendors for CEOI DEP22\*08 Sullivan Refuse and Clogged Stream

- Q.1. Where will it be located?
- **A.1.** This project area is in Raleigh County.
- Q.2. Can a location map of the site be provided?
- A.2. A location map will not be provided to limit visitation.
- Q.3. Will mapping be provided, or will it need to be generated?
- A.3. WVDEP will provide updated mapping.
- Q.4. Will the WVDEP handle the Right of Access and Construction Access for these projects?
- A.4. WVDEP will handle all realty rights of entry.
- **Q.5.** Will there be any water treatment requirements? If so, can water quality and flow data be provided?
- A.5. Water treatment will not be required for this project.
- **Q.6.** Can a copy of the AML Inventory PAD for the site be provided?
- **A.7.** An AML Inventory PAD will not be provided.
- Q.7. Are there any maps, (location, google) or project specific information that can be provided, for the referenced project?
- **A.7.** This project area consists of collapsed draining portals, open portals, coal refuse areas, and stream impairments.
- Q.8. Are firms allowed to visit the sites prior to EOI submission?
- A.8. WVDEP requests that firms not visit this site.
