PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

Attn: David H. Pauline

RE: CEOI 0603 ADJ2200000010
Williamstown AASF #1 Taxiway and Apron Repairs

Dear Mr. David H. Pauline,

Alpha Associates, Incorporated is pleased to submit our qualifications to provide architectural and engineering to design services to develop construction documents to provide concrete apron and taxiway repairs at the Williamstown AASF#1 Flight Facility in Williamstown, WV. Alpha's past experience with similar projects make us a perfect teaming partner.

Since 1969, Alpha has partnered with numerous Federal, State, and local governments including the WVANG to provide engineering services for projects around West Virginia, including several projects at Camp Dawson and the Parkersburg Armory. In addition to our experience with the Guard, Alpha has performed numerous projects for airport facilities in the state of West Virginia. We have worked for the Air Guard in Martinsburg completing several repairs to the large hangers.

Design Team

Alpha is a West Virginia owned and operated architectural and engineering design firm with locations in Morgantown and Martinsburg. Our professional staff includes architects, civil and structural engineers, surveyors, cost estimators, field service representatives, landscape designers, interior designers, and technicians. We are well equipped to effectively and efficiently manage and produce your proposed project. Alpha's in-house combination of Civil and Structural engineering will prove to be beneficial to your project.

Project Understanding

The West Virginia Army National Guard is looking to partner with a firm to design and develop construction documents to provide concrete apron and taxiway repairs at the Williamstown AASF#1 flight facility in Williamstown, WV. If selected, Alpha will provide a construction design, assistance in competitive bidding for the construction work, and construction administration once a construction contract is awarded.

Summary

The Alpha Team is looking forward to building upon an already successful relationship with the West Virginia Army National Guard and the State of West Virginia by providing exceptional service. Our dedicated team of professionals will make your project a priority. If you would like to further discuss this upcoming project, please contact me at (304) 296-8216 ext. 102.

Sincerely,

ALPHA ASSOCIATES, INCORPORATED

STATEMENT OF QUALIFICATIONS.

Alpha Associates, Incorporated is a West Virginia-based architectural and engineering design firm that provides services in the areas of architectural design, interior design, construction administration, civil engineering, structural engineering, landscape design, project management, and surveying. Our clients benefit from our unique combination of extensive design and construction experience, advanced technological tools, dedicated principals, and highly skilled staff members.

Since 1969, Alpha has had provided architectural and engineering design services for clients throughout the state of West Virginia. We have worked with many organizations as well as local, state and federal governments on numerous building projects, including additions, renovations and new construction. Our work is diverse and includes clients in historical renovations, commercial, educational and governmental facilities, developers and private organizations. In this proposal, you will find examples that showcase the Alpha Team's exceptional project experience on similar type facilities.

Alpha has the knowledge and understanding in design and construction to complete this project seamlessly from the initial project inspections to the development of plans. The Alpha team will be your expert for this project.

Alpha's philosophy has always been to provide exemplary services for fair fees. We have always believed that the best way to succeed as a business is to go above and beyond the basic requirements of our contracts and do everything necessary to successfully complete the given project. What is best for the client is inevitably best for us too.

Everyone at Alpha, from the President to the administrative staff, all work towards the goal of completing successful projects. Our principals are involved with projects from the earliest stages right through final completion and beyond. They will consistently update you on your project by using effective communication tools to manage the projects and all the involved parties. Our skilled staff of twenty-one (21) architects, engineers, surveyors and administrative personnel all work diligently towards producing drawings and specifications that will deliver our clients successful projects, completed on time and within budget.

Alpha has thrived for over 52 years because we are a professional organization dedicated to providing superior architectural and engineering design services to our clients. While our staff is large enough to handle any size project, we are also small enough to give each and every one of our projects the individual attention to detail that will make them successful projects for our clients.

THINK ALPHA FIRST.

STAFF PLANNING

TO BE ASSIGNED TO YOUR PROJECT.

All work to be performed for the Williamstown AASF #1 Taxiway and Apron repairs will be managed out of Alpha's Morgantown office. In addition to your dedicated Project Team, Alpha's staff of 21 includes engineers, architects, architectural designers, technicians, and support staff that are available to assist with any potential project needs.

SCHEDULE AND BUDGET.

Alpha Associates, Incorporated has an excellent track record of producing projects on time and within the Owner's budget. Many A/E firms can claim the same successes, but the determining factor is the tools the firms utilize to achieve the budgets, both in regard to funds and time. Alpha utilizes a number of tools, both traditional and modern to exceed our clients' expectations.

A project schedule is a dynamic, ever changing entity. Your project schedule depends on many factors including:

- Preferred construction method
- Changes to project scope
- Unique construction elements

The Alpha Team has an excellent track record of meeting project deadlines. Alpha recently completed construction on a project in Morgantown that went from design to completion in just over 12 months. This project was completed for a private developer and had a construction cost in excess of \$20 million.

Successful project management depends upon consensus regarding work efforts, milestones and goals. The team has found the development of detailed work plans, which delineate tasks and deliverables for each project phase, in concert with the client and full project team, is the most effective means of establishing expectations about efforts required by the respective disciplines. In addition to guiding the efforts of the design team, The work plan sets forth specific time frames and decision points for Owner and user reviews, comments and approvals.

Developing an overall project schedule is a critical task that must take into account many factors: building type, owner's desire for occupancy, scope of work and level of documentation, whether contract(s) is bid or negotiated, available fee, and prior experiences on similar projects. Once the design process begins, a very detailed, realistic project schedule can be developed and communicated to all involved.

In a world where "time is money", the schedule of a project is almost as important as controlling the cost. Alpha works diligently to control the budget of a project. The best way to control the cost of a project is to avoid the "scope creep" that can occur.

Alpha's in house cost estimators, combined with an excellent relationship with contractors throughout the area, will provide the client with the most accurate estimates early in the design process. The Alpha estimators begin at the schematic design phase of the project and develop a line item estimate of probable construction costs that can be carried through each of the project phases. At each phase the project estimate is updated to include a more detailed estimate in order that the accuracy can be enhanced. During these updated estimates, specific increases or decreases can be identified allowing the owner to make informed decisions moving forward on important budget issues for the project.

Many projects employ the use of alternatives to control the budget through obtaining actual contractor pricing during the bid process. This allows flexibility for the owner in determining the costs of portions of the project that may be optional and critical for budget control.

CAPACITY AND SOFTWARE.

OUR CAPABILITIES

Alpha Associates, Incorporated is prepared to commit staff and resources to the West Virginia Division of Natural Resources. Alpha has the qualified and experienced personnel, administrative support, along with the production equipment and resources to ensure the successful completion of this project. We are confident in our ability to provide the WVDNR with a committed and dependable design team. Our multidisciplinary design team is prepared to meet and exceed the expectations of the State by committing any resources necessary to meet the project schedule.

USING THE LATEST SOFTWARE

The project team incorporates the latest computer and software capabilities required to complete the working drawings and specifications for this project. Our cost accounting system is top-of-the-line and we have the ability to differentiate fees according to task. We have secure e-mail and internet capability to allow efficient transfer of information between Alpha and the client. We currently have the latest editions of the following software:

- AutoCAD 22
 - REVIT (Editions up to 2022)
 - Civil 3D
 - RISA 3D
 - RISA Floor
 - RISA Foundation
 - MathCAD
 - DJI Phantom 4 RTK Drone
 - Autodesk Suite
 - Enercalc
 - AutoTURN
 - TopCon GR5 GPS System
 - TopCon Total Station with Reflectorless Capabilities
 - Carlson Surveyor & Data Collector

SUMMARY

Mr. Luttrell has worked with Alpha Associates, Inc. since 1996. He is the chief structural engineer on all projects at Alpha. Before coming to Alpha, Mr. Luttrell's graduate work resulted in several contributions to the cold-formed steel deck industry. His new method of analysis for non-uniform loads on composite concrete and cold formed steel decks has been made a permanent part of the Steel Deck Institute's design manual. Mr. Luttrell also worked on projects that involved pre-stressed timber bridge research with WVU Constructed Facilities Center. Since coming to Alpha, Mr. Luttrell has had significant involvement in the effort to begin utilizing modern composite materials in practical bridge applications.

SUMMARY

Mr. Echard joined Alpha Associates, Inc. in early 2016 with a strong belief that his clients deserve intelligent, performance-based and value-oriented solutions. Drawing on experience working across in the United States, Europe, and the Middle-East, Mr. Echard returned to West Virginia to provide world-class service in a historically underserved region while making positive contributions to the future growth of his home state. Mr. Echard places a large value on the collaborative work process, believing that a building's form and function are derived from many contexts. Mr. Echard's office is located in the corporate office in Morgantown, WV.

CASEY SMITH

AIA ASSOC.; ARCHITECTURAL DESIGNER

☎ 304-296-8216 | 800-640-8216

✉ casey.smith@thinkalphafirst.com

SUMMARY

Mr. Smith has been employed with Alpha Associates, Inc since 2016. He has worked on several architectural projects including multi-million dollar projects and public sector clients. Mr. Smith came to Alpha with an impressive background in educational, commercial, and local government facilities. He has offered assistance in project management, using his background to further improve the quality of each project he is involved with. Mr. Smith has been an incredible asset to Alpha Associates and proves to be an asset in each of his projects.

- Martinsburg Queen St. Underpass; Martinsburg, WV

AIRPORT EXPERIENCE

Runway Safety Area

Alpha Associates, Inc. did the original feasibility study for the Safety Area. There were several options for runway safety enhancements for Hart Field. Alpha has completed the design for Phase 1 and Phase 2 and is in the process of designing Phase 3. Some of the scope of the design phase of the project consists of: The design of an 1100' x 500' embankment consisting of approximately 3,000,000 cubic yards of material. The design shall be in accordance with pertinent FAA Advisory Circulars. The acquisition of all necessary permits including stormwater, NPDES, West Virginia Water Quality State 401 Certification and the U.S. Army Corp of Engineers 404 permit.

Taxiway Extension

This project incorporated a unique solution to taxiway extension project. During the design phase, it was discovered that undocumented landfill material was used previously in this location, a portion of which was removed and disposed of in a certified landfill. The remaining material was bridged with geotextile and engineered backfill. The length of the asphalt taxiway is 2057 feet (626.97 m) with a typical width of 75 ft (22.86 m) and a width of 150 ft (45.72 m) at the holding bay near the connection to runway 36. The project also contains new signage and drainage.

Runway 18/36 Rehabilitation

Alpha Associates, Inc. and the Morgantown Municipal Airport have a long-standing relationship. Recent projects include the Rehabilitation of Runway 18/36 completed in late 2000. This project consisted of milling the entire runway surface (5200 ft), repair of approximately three miles of pavement cracks, overlaying the surface with asphalt and painting of pavement markings.

Signage and Lighting

The Morgantown Municipal Airport was tasked to update their taxiway and runway signage and pavement markings to revised standards. Alpha Associates, Inc. provided design services for the replacement of all lighted edge signs and runway identifiers with new frangible units. This provided for

replacement of fading surface panels as well as any aging electrical connections to the regulators. Additionally, updated markings included provisions within FAA Advisory Circular AC150/5340 "Standards for Airport Markings" for inclusion of surface painted location signs.

Perimeter Fence Project

Alpha Associates, Incorporated provided surveying and consulting services for this project at the Morgantown Municipal Airport. This project was an 8-foot high fence around the perimeter of the Airport property with all necessary access gates.

Ramp Pavement Rehabilitation and Deicing Containment Facility

Alpha Associates, Inc. recent projects for the Morgantown Municipal Airport include the Ramp Pavement Rehabilitation and Deicing Containment Facility in late 2005. Alpha provided concept drawings, design drawings, specifications, construction administration, project inspections and bidding documents.

Air Rescue and Fire Fighting Building

Alpha Associates, Incorporated completed the design of the latest building at the Morgantown Municipal Airport. The building serves as an Air Rescue and Fire Fighting Building that houses two fire trucks and equipment with additional space for offices and a training center.

Maintenance Building

Alpha Associates, Incorporated designed and provided construction administration for the Hart Field Maintenance Building. The building provides garage and storage for the airport's snow-blowing and lawn-cutting machines. This project features six high-bay areas with one maintenance/repair pit.

Procurement Services

As part of Alpha's Open End Term Contract with the Morgantown Municipal Airport, we have provided procurement services for a wide variety of equipment. Including: High tech radio system, Air Rescue and Fire Fighting Vehicle, Snow Removal Equipment, Video Surveillance System, Keygate

Security System, All Terrain Vehicle, Service Trucks, and FOD Removal Equipment. Alpha's engineers researched the equipment options, prepared the specifications, managed the bidding process and assisted the Airport with the awarding of contracts.

Terminal Addition and Renovation

Alpha's staff provided programming, space planning, interior design and full-time construction administration services for a 10,000 square foot addition to the existing terminal originally constructed in 1993. Also included in this project was the design of a new terminal entrance and elevator tower.

Restaurant Renovations/Terminal Improvements

Alpha's designed the renovation and expansion of the airport restaurant along with improvements to the circulation from the North terminal to the South Terminal. The toilet rooms in the South terminal were completely renovated with new fixtures, new interior walls, new ceramic tile, and casework. The North terminal passenger departure and passenger waiting areas have new interior partitions, new finishes and new furniture.

Parking Lot Redesign and Expansion

Alpha provided design services for the parking lot at the Morgantown Municipal Airport. This project provided for 246 vehicles. Alpha's staff provided engineering design specifications, bidding and construction documents and construction administration services.

Agent Services

Alpha Associates, Incorporated assisted the Morgantown Municipal Airport during the development of the Facilities Master Plan update. Alpha's role during this process included assisting the client with administrative duties, information gathering and distribution and overall project management. Alpha also provided assistance in updating the MGW Airport Certification Manual (ACM) utilized by the airport staff and emergency response members.

MORGANTOWN MUNICIPAL AIRPORT RUNWAY SAFETY AREA

Morgantown, WV; 2007

Alpha Associates, Incorporated did the original feasibility study for the Safety Area. There were several options for runway safety enhancements for Hart Field. The feasibility study looked at the logistics of each alternative as well as life cycle costing, NAVAID relocation and long term airport utilization. It was determined that a conventional embankment would be designed for the southern approach over runway 18/36.

The project was broken down into 3 phases that included the following scope of work:

1. The design of an 1100' x 500' embankment consisting of approximately 3,000,000 cubic yards of material.
2. The design of the relocated access road, which serves the western side of the property.
3. The relocation of the Localizer and other pertinent NAVAIDS in accordance with FAA Order 6750.16C.
4. The design of storm water handling facilities.
5. The acquisition of all necessary permits including stormwater, NPDES, West Virginia Water Quality State 401 Certification and the U.S. Army Corp of Engineers 404 permit.

MORGANTOWN MUNICIPAL AIRPORT MAINTENANCE BUILDING

Morgantown, WV; 2005

Alpha Associates, Incorporated designed and provided construction administration for the Hart Field Maintenance Building. The building provides garage and storage for the airport's snow-blowing and lawn-cutting machines. This project features six high-bay areas with one maintenance/repair pit. The balance of the area consists of auxiliary spaces such as dry and liquid storage, overhead crane hoist with access to a storage mezzanine.

The building was constructed using split face block and metal panels over a pre-engineered steel rigid frame metal building.
