Table of Contents

1. Executive Summary

Advanced Analytical Systems, Inc. (hereafter referred as "AASI"), founded in 2013 in Virginia, is an Information Technology Consulting and Staff Augmentation Services company helps its clients in aligning the right strategy, people, processes, and technology to improve performance at all operational levels. At AASI, we empower client success at every stage of the organizational lifecycle. Our Performance Delivery Solutions help our clients strengthen business and mission outcomes, drive operational effectiveness, and achieve integrated learning and performance management. We are an unconventional technical staffing agency, and our partnership model focuses on your unique needs-supporting short-term, seasonal, or temporary IT staffing agencies requirements, providing contract-to-hire talent for project-based support with the option to hire the contractors as permanent employees, or finding the

Transparency

We emphasize trust and transparency throughout all elements of the staffing process by keeping open lines of communication

Responsiveness

Whether you're looking for a long-term fit or need someone to start the next day, we always operate with a high sense of urgency and discretion

CORE VALUES

Accountability

Since day one, we're dedicated to building long-term relationships and do everything we can to ensure that everyone we work with is educated about the factors that affect their careers

Entrepreneurship

We've always felt that the sky's the limit. Whether that applies to new strategies for our clients or the growth potential of our internal employees, our entrepreneurial spirit is the foundation for our success

permanent top talent your company needs today. Our IT staffing services cover Contract Staffing with onsite, offsite, and offshore (IT staff outsourcing) services. Being one among the most reputed IT staffing companies in the industry, we offer a wide range of temporary staffing services including IT staff augmentation companies, temporary staffing companies, IT temporary staffing, technology staffing companies, or technical staffing solutions, and IT contract staffing.

Advanced Analytical Systems, Inc. is one of the nation's leading providers of Technology and Workforce Solutions. We serve companies across the nation. We have been providing innovative solutions and quality temporary labor across different industries for the past 6+ years. Our success can be attributed to our honest and flexible approach, as well as a client-oriented philosophy, where we always make it right. We have a thriving culture, born from employees that bring creativity, integrity, innovation, and a high level of energy to the job each day. We know that these attributes are important in a service company and that our clients benefit immensely from culture. We humbly acknowledge that this way of doing business has helped us enjoy much national recognition for growth and achievement in our field.

Advanced Analytical Systems, Inc. focuses on providing high-tech solutions to its clients. We are strategically positioned to easily accommodate all our customers. At Advanced Analytical Systems, Inc. (), we pride ourselves in our ability to provide quality talent. We have a proven ability to find, attract and retain similar talent across the country for our clients. Advanced Analytical Systems, Inc. has emerged as a full-service staffing firm, and can provide resources for areas like IT support, Database administration, Application development, Infrastructure support, Admin/ Clerical, Call Center, Engineering, Human Resources, Finance/Accounting, Managerial, Telecom/ Wireless and several others. We have different internal teams focused on each category and have been successful in working with clients to fill their needs across these categories.

> *OUR MISSION -* **To make the best possible match between people and companies, building lasting relationships on our foundational belief that people are what move companies forward.**

We offer expertise in Business & Mission Support, Technology Optimization and Learning & Performance Management. We have experience providing services to commercial agencies who are further serving government agencies through our resources. We help our clients meet the challenges faced because of legislative changes, constituent demands, technology advancements, and economic trends. We are familiar with current issues, landscapes, and trades-offs and have a wealth of experience in finding creative and customized solutions.

AASI's recruitment process ensures that positions are filled rapidly with highly qualified professionals that fit well into AASI's organization and will fit with State of West Virginia project teams. As a fast growing and innovative organization, our focus is to acquire the best and the brightest staff to support our clients' business needs. We also maintain alliances with multiple staffing organizations and professional IT and consulting companies to augment our recruiting efforts when needed. Whenever possible, AASI utilizes local subcontractors to supplement our recruiting pool. These alliances make it possible for us to have extensive reach-back capability as well as being able to fill requests for niche competencies required on work orders.

AASI believes in transparent communication between our team and client. For each project, there is an assigned Accounts Manager responsible for client service delivery. They are responsible for ensuring all day-to-day items needing communications are addressed. AASI empowers its project managers to make appropriate decisions for the project, while keeping the client and ASSI's management informed.

IT Temporary Staffing Challenges

High demand for technical talent has created a market where companies are competing for top candidates, struggling to balance budget with salary and benefits to attract top candidates. A staffing partner with deep knowledge of your target market can help improve your competitive advantage and find the right offer for the right candidate.

Business agility often requires scaling technical talent on little notice to meet changing business needs, and it may not be cost-effective to hire regular full-time employees for a limited-time project. With an IT staffing agency like AASI, companies can expand their network of available candidates for full-time, contract to hire, temporary staffing, and consultant roles. With a pool of 6+ experienced IT recruiters, we are equipped to find the best fit options for the requirements. We ensure quality in finding top talent to meet your specific needs. We present you reviewed list of best candidates who match your requirements screened through our robust qualification process. We utilize a referral-based sourcing strategy and leveraging our enormous technology network build in last two decades of IT services and solutions. Our commitment is to bring the best match for the requirements. With this genuine intention we drive the relationship and ensure performance and retention.

Strategic Partner for IT Temporary Staffing

Partnering with AASI can save your company time and money, overcoming IT staffing challenges to meet your company's strategic objectives and respond to business needs. Our exceptional IT staffing team understands the challenges organizations face in scalability and recruiting technical talent and can apply their expertise to find the best staffing solution for you. is one of the most recognized and awarded staffing agencies with over four decades of experience placing technical, financial, creative, and administrative talent. Our IT staffing division specializes in placing top talent for technology positions across all fields of expertise.

Why Choose Advanced Analytical Systems, Inc. for Your Staffing requirements?

Hiring a contractor from AASI is a great way to expand your business without overloading your current staff and capital budgets. We can find and place the key hires you need to help your business succeed! We can even establish an entire team around a specific capability, if that's what a client need. Our expert recruitment and screening processes ensure that we find the very best people with the skill sets and experience that make them the ideal fit for your specific needs. We do what many staffing firms are unable to: we find and hire the very best candidates for the job quickly. Our goal is to deliver quality professional services to our clients, while earning confidence through the proper assignment of people. We meet our goals with the following approach:

➢ **Time** – Our recruitment team partner with you throughout the recruitment process. We work with a well-established network of industry professionals. Therefore, by utilizing these resources, we can help streamline your staffing requirements.

➢ **Cultural Assessment** – Our Account Managers work directly with you, and your board, to understand the unique needs specific to your organization. We do this to determine the specific attributes needed to enhance your organization's value proposition.

➢ **Pulled Resources** – We work with an extensive professional network. Therefore, we can access industry connections to produce a highly customized search process.

- ➢ **Qualification** – We investigate all candidates thoroughly. All candidates are qualified using internal procedures. Furthermore, we utilize third-party reporting to gather additional background information. As a result, the organizations we work with can avoid the cost of a bad hire.
- ➢ **Video Interview** – We present candidates through a video platform. This process seeks to mitigate time constraints from an organizational perspective, as well as a candidate perspective.
- ➢ **Continued Service** – Upon placement, our Account Manager maintain contact with your organization to provide any needed support

2. About Advanced Analytical Systems, Inc.
2.1. About us

Advanced Analytical is a US-based software and application development company specializing in providing businesses worldwide with custom technology solutions. As a mobile and web-based application development company with over 2,800 skilled software developers, Advanced Analytical combines technological expertise, specific domain experience, and a passion for excellence to deliver enterprise-grade solutions. We provide industry leading, highly skilled resources for all our engagements. We have specialists we bring to all our engagements, strategy, business analysis, and technology. When it comes to technology and implementations, we have specialists with the right skills to solve project-specific business and technology problems.

Leverage the potential of new-age tech, cloud, and user experience strategies to empower your business with future-ready applications that match the business and market requirements and stimulate business growth and expansion.

Advanced Analytical Application Development services enable organizations with design and development of scalable software systems and applications. Our approach is built on deep audit of customers' business needs and technology landscape which leads to best-suited outcomes for our customers. Every application developed follows the stringent process that includes gathering requirements, designing MVP, coding, QA, implementation of changes, and debugging.

Services We Provide for Web App Development
We at Advanced Analytical provide the best-in-class Web App Development Services created using the latest technology as per the industry standard within the budget limits given to us by our clients.
Our services include:
- E-learning
- Educational
- E-commerce
- CMS Services
- Customer Portal
- Admin Portal
- Enterprise Portals
- Custom Web Application Development

Why Us?
We work with commitment and on-time delivery. With us, you can leverage from the following benefits
- Sincere, experienced, and dedicated team
- Use of latest and flexible Agile development model
- UI/UX expertise, building user friendly applications
- Quality standards & adherence to best coding guidelines
- Proper use of patterns on frontend, unified code style for JavaScript, clean code, and APIs
- Supple engagement models – fixed cost, part-time hiring, full-time hiring, etc.
- QA, Presentation, load & stress testing before delivery
- Scalable infrastructure support for your business necessities
- Use of Version Control Systems to manage and document changes to source code over time.

How AASI Team can help you?
As a Web application development company, we are equipped to develop highly secured, robust, and innovative solutions. We also promise:
- **Simplicity:** We choose tools that will simplify processes & increase efficiency. Simple sites load faster, are easy to use and are easy to maintain.
- **Dedicated Project Managers**: Our developers, designers and testers are led by experienced dedicated project managers, aware of their team's responsibilities & skills. They ensure on-time project deliveries.
- **Agile development**: We follow agile software development methodology which ensures complete transparency and status updates/ reviews at regular intervals.

- **Full commitment**: We believe in keeping our customers forever and ensure their satisfaction. We trust our relationship will go a long way because we don't just try to recognize your business, rather take honest interest in it and genuinely want you to reach your full potential. In each project we work on we personally invest ourselves.
- **Business-oriented software**: We customize every bit of your application as per your business needs while concentrating on your organization's objectives and benefits. We listen to your thoughts, strategies, purposes, and objectives for your business and then recommend the best solution to fit.
- **Extended Support**: Our technical team will ensure there are no issues during or after project completion. In case you face any issue, we are just a tap away.
- **Under One Roof**: We like to keep everything under one roof to make it easier for our customers, whether it's website or graphic design, system development or custom programming.
- **Coding on your budget**: We promise phenomenal quality at reasonable costs. We also share the detailed budget, so you can recognize precisely, what you are paying for.

2.2. Services we deliver

Our Application services include app development, support, cloud migration, modernization, integration, security management, and more. In IT since 2013, AASI brings all-around services to turn your enterprise applications into max profit. Our concept of application services is outlined in the following points:

- **We use modern technologies and approaches.** We eagerly utilize and constantly develop our competencies in IoT, big data, machine learning, AI, image analysis, AR, DevOps/ Continuous Delivery (CD), and don't shun proven and long-trusted techs.
- **We know how to deal with complex enterprise IT landscapes** that have evolved for decades. For 32 years, we've been accumulating the experience from multiple projects and learned the tricks to tame the systems of various nature and architectural patterns.
- **We are flexible in terms of cooperation**. We are ready to cooperate with third-party vendors and together deliver business value to the customers. If the customer's needs and priorities change, we can adjust the responsibility scope on the go and adapt service timelines to the new context.
- **We focus on TCO of the solutions we deliver and manage.** We analyze how to optimize operational, maintenance, and other costs during a solution's life cycle.
- **We've established reliable, disciplined processes.** We have ISO 9001 certified quality management, ISO 27001 certified information security management.

Application Services We Offer: AASI offers the following set of application services for midsized and big enterprises with:

- **Application development:** We design and deliver web, mobile and cloud business applications of different complexity and for various needs. In the process, we pay special attention to their flexibility, security, speed and integration potential. The success of our software comes from:
  - **The actual value to business:** We thoroughly study all critical business needs and the future application context, make appropriate architecture and technology choices to build the solution that answers the specific requirements of your business.
  - **Stable work and undemanding support:** We write loose-coupled and readable code to keep it easy to test, maintain, and upgrade.
  - **High quality and timely releases:** We aren't just ISO 9001-certified - we have our own Quality Management System that streamlines our software development processes and allows us to provide reliable solutions within the established deadline.
  - **Agile delivery of new features:** We employ DevOps, Continuous Delivery and Continuous Integration practices, automated testing and deployment tools. Thus, we ensure constant delivery of releasable solution (implementing new features as often as 1-2 times a week), without system freezes and with reduced code errors.
- **Application management:** We can take responsibility for the management of your applications ensuring its increased business flexibility and optimized IT costs. With latest process management practices, our team will maintain and monitor your application servers and databases taking care of

their enhanced performance, sustainability, stability and keeping them in sync with current business needs. The list of our application management services includes but is not limited to:

- **Remote application monitoring and performance management:** We take over the continuous remote diagnostics of your critical applications. We identify problems, share with you the detailed info on the causes of found issues and provide recommendations on the needed improvements. We track application performance, transaction integrity, data consistency, message queue exceeds, server failures.

- **Remote application support:** We help you to treat a wide spectrum of problems and incidents, manage modifications (from minor enhancements to app changes) and configurations, and advise you on beneficial app optimization activities to address new evolving needs.

- **Help Desk:** Our 24/7 help desk can become a single point of contact for application users, the help desk agents will receive all inbound service requests and incident reports through any preferred communication channel (e-mail, phone, chat, a ticket management system, and more) and:
  - o Provide info about applications and their usage.
  - o Estimate the problem and solve simple cases directly (L1 support) or escalate more serious problems to technical experts (L2/L3 support).
  - o Create a knowledge base and an FAQ section for users' self-help.
  - o Gather users' feedback for a development team.

- **Design and implementation of the Continuous Delivery (CD) pipeline:** We design and implement the CD pipeline to connect development, testing and deployment of your application and automate them. This enables you to leverage multiple DevOps/CD values and deliver new app features quickly and efficiently.

- **Application modernization:** Our team implements modernization of legacy applications to increase their efficiency and incorporate them better into a modern enterprise IT strategy. We support a wide range of 'revival' activities and scale them according to your business needs.
  - **Re-hosting –** moving an entire application from the on-premises or the old cloud infrastructure to the new cloud without significant modifications and changes in code.
  - **Re-platforming –** moving a part or an entire application to the cloud with small optimizations and upgrades to leverage such cloud capabilities as automated performance scaling and improved resilience.
  - **Re-architecting –** changing an application's architecture and design to make it more scalable, flexible, and integration-friendly or to allow for simplified app maintenance and streamlined testing and deployment of further upgrades.
  - **Re-engineering –** redesigning certain application components, updating certain aspects (e.g., performance, functionality) or introducing new elements to an already existing system.
  - **Re-coding –** rewriting legacy applications on PowerBuilder, Delphi, VB, C++, etc. and outdated versions of Java, .NET, PHP and Python with modern technologies and tools.

  To make modernization smooth and truly beneficial, we:
  - Closely cooperate with the customer (IT department, other concerned employees) and third-party vendors to get comprehensive info on the application under modernization.
  - Meticulously extract business requirements from existing software applications.
  - Analyze the infrastructure, identify all code dependencies and component integrations.

- **Application integration:** We can transform multiple independent applications of your IT environment into one coherently working system allowing for its increased efficiency and user convenience. To make integration successful, we address our experience in integrating systems and applications of various complexity, scale and technology stacks and:

  Select an integration pattern that answers the current needs and a future strategy of your business: We have a strong record in various integration approaches – point-to-point service-oriented architecture (SOA), enterprise service bus (ESB), shared database (for specific cases) – and can make up an integration solution that allows for your maximum profit.

> **Pay due attention to specific integration risks:** We make sure the integrated system offers appropriate response time, security level, data quality.
>
> **Cover the end-to-end integration process:** We design integration architecture, implement the solution, modernize your legacy applications to allow their smooth work in the new environment, provide a comprehensive testing coverage at the system and component level, as well as offer further integration and support services.

- **Application Security Services:** Our security experts can assist enterprises in making their applications resistant to security threats.
  - Being ISO 27001-certified, we adhere to all security principles and help you stay compliant with strict industry-specific security requirements, such as HIPAA, GDPR, PCI DSS, etc.
  - We help you to compile security requirements as well as recommend a resilient app design pattern that will be able to address potential security risks.
  - We implement continuous security monitoring to make sure your applications remain protected and reliable and timely identify the need for security upgrade to answer ever-evolving cyberthreats.
  - We investigate security flaws of your application employing white box (with code audit) testing or black box testing (without access to application code) and provide a report with recommendations on overcoming found vulnerabilities.
- **Application testing:** We perform comprehensive manual and automated testing (vital for Continuous Delivery) for every stage of the application life cycle (implementation, deployment, support and evolution) to timely identify potential risks and verify that your enterprise solutions work correctly and correspond to the established quality requirements. We ensure comprehensive checking of your application with multiple types of testing, including:
  - Functional testing
  - Performance testing
  - Usability testing
  - Integration testing
  - Compatibility testing

We provide detailed reports on identified defects and recommend on best remediation activities.

- **We get it right, every time!**
  Our app developers' team has Lots of experience in the industry and expertise in all aspects of application development. We develop your app with utmost care and make sure to cover all the bases for a flawless product.

2.2.2.Approach

AASI understand that West Virginia Purchasing Division on behalf of West Virginia Offices of the Insurance Commissioner (OIC) is seeking qualified vendor for Application Development staffing services. At Advanced Analytical, we have knowledge and competencies to ensure that the client's applications are running efficiently with the help of proficient maintenance services.

We have analyzed that Application Maintenance is a significant element in achieving productivity and streamlining business process. Our application development services primarily cater to the following domains:

- **Application Re-engineering:** Legacy applications are an asset to any organization, but at the same time, are a challenge to the programmers and maintenance engineers. Advanced Analytical application re-engineering services help organizations transform legacy applications through various methods to make them more relevant to current technological environments and at same time, retain their value.
- **Application Migration & Integration:** Our Application Migration and Integration services help organizations optimize their IT environments for higher productivity and improved performance. Our best-in-class solutions help in the seamless integration of your business applications, infrastructure, data and systems to make them work in sync with one another.
- **Application Support:** Our application support services help enterprises identify and find solutions for issues cropping up within the many components of complex business systems. We work to ensure that your world class systems consistently deliver value and add to your organization's efficiency.

Our Application Development Process: At Advanced Analytical, our process is defined by our expert team of coders and developers. From developing full stack applications to cleaning up an existing GUI for better user-friendliness, our programmers are one of the main reasons why we are a premier destination for offsite desktop application development services. Our application development process involves following steps:

- **Project Kick off/ Requirement Gathering Sessions with key Project Stakeholders:** We sit together with the client to understand their application development requirements and analyze the feasibility of the project. Based upon our understanding of the project, we suggest a list of enhancements based upon our current capabilities and experience, which then helps us to draw the final project outline with our clients.
- **Software Design:** Once final project requirements and key objectives are ironed out, we will begin designing software architecture based upon your inputs. During this stage, we also finalize the process roadmap.
- **Building the Team:** The project commences with us assigning an experienced team of developers who fit the project requirements. A dedicated project manager is also assigned to take care of all your recurring questions. The development team then begins working on the pre-designed architecture.
- **QA and Testing:** The project, once completed, goes through several rounds of QA and testing to ensure its working correctly and can undertake all necessary functions easily.
- **Project Delivery:** The application is suitably developed as per the project demands and is delivered to the client along with all required documentation and source code. Based upon our prior agreement, we also begin with the maintenance and update delivery period.
- **Application Maintenance and entire management**
- Advanced Analytical works with County to understand your business and develop customized maintenance solutions to maximize application availability, agility, and compatibility. This results in lower costs with greater ROI, less risk, and a faster response to market opportunities.

3. Proposed Resume
Gerardo Camou - Data Base Administrator
Professional Summary

- IT professional with more than 15+ years of experience developing and delivering Web applications, Windows/Desktop applications and SCADA Application all these solutions based on Microsoft technologies. I have carried out several .Net roles as a Technical Leader, Lead Developer, Software Manager, Software Architect, Software Engineer, Software Analyst and IIot Specialist.
- Experience as a Technical Applications Professional with strong experience developing enterprise solutions using C#, .NET Frameworks, .NET Core, ASP.Net MVC, Web Forms, Win Forms, Rest API, WCF, Entity Framework, ADO.NET, LINQ, MS SQL Server, SCADA.
- Familiar with modern development operations such as cloud computing in Azure (DevOps, Web App, Storage and Functions), continuous integration and continuous delivery.
- Strong experience and knowledge on frontend UI development, on tools and frameworks commonly used to build modern and reactive web applications such as HTML 5, CSS, JavaScript, Typescript, React JS, jQuery, Ajax, XML, Bootstrap.
- Hands-on experience developing Web and Windows Services, Web APIs, and Restful Services to communicate modern business applications with legacy ones using different protocols and technologies like .NET CORE, and NodeJS micro services and REST APIs, SOAP, WCF, Web API, XML and JSON. Also have experience using legacy technologies like .NET Remoting, COM+, MSMQ.
- As a .NET Technical Lead have experience on each activity of the SDLC such as requirements gathering and analysis with uses cases and user stories, and design using several UML diagrams, unit testing with N-Unit, MOQ and Visual Studio and Continuous Delivery using TFS.
- Experience Web development in HTML, ASP.net, JavaScript, CSS, C# & Internet Information Services (IIS). Experience in coding for systems in Visual Studio
- Experience working and incorporating best practices and tools from Waterfall and Agile methodologies such as SCRUM, TDD. Hold expertise in debugging code.
- Preparation of code changes document and consistently throughout the developmental process
- Worked in the teams with other developers to define new features of the application.
- Experience in preparing coding, testing, and integration with existing systems.
- Experience creating and delivering customized reports by using SQL SERVER Reporting Services (SSRS) and writing very complex SQL SERVER. Experience on automating and scheduling server-side Tasks and Jobs by using SQL SERVER Integration Services (SSIS).
- Hands-on experience on OO developing and design using design patterns such as Singleton, Abstract Factory and Factory Method, Dependency Injection, Memento, SOLID and DRY principles, Data Structures, Algorithms, etc.
- Worked on a quite wide variety of projects, including Insurance, Financial Services, Retail, ERP and Government sectors. Have excellent inter-personnel and communication skills.
- Define communication protocol. Creating and developing devices, sensors and software Identify relevant assets monitoring. Researching, creating, testing and documenting IoT solutions. Create strategy to compression & historization data. Define cloud infrastructure Define modeling data science. Designing, coding, and testing features of IoT devices providing solutions to issues related to the connection of networks and platforms.
- As Software architect need to Evaluate, identifying and developing software solutions. Leading software development projects. Documenting and recording every aspect of an application or software. Training and overseeing the activities of the members of the development team. Planning, tracking, and scheduling software deliverables. Locating and directing solutions for critical challenges involving software and hardware interface. Looking for problems within software systems and resolving the issues. Developing good working relationships with other employees, such as Marketing Managers, Product Managers, Programmers and Engineers
- As Full Stack Development have experience Build dynamic, visually attractive, end-to-end, and innovative software product/apps including front-end and back-end. Able to design the user experience, user interaction, responsive design, and complete architecture. Able to work with databases, servers, APIs, version control systems, and third-party apps. Provide insights on continuous improvement and add/remove functionality as per needs

- Strong communication and analytical skills and faster Learning and adaptation to cutting edge technologies. Self-motivated, able to set effective priorities to achieve immediate and Long-term goals and meet operational deadlines.

Education:
- Bachelor's Degree in Computer Science - Universidad de Sonora, Hermosillo, México

Technical Skills:

Primary Profile	Software Engineer, Software Architect, Project Manager
Secondary Profile	Senior .Net Developer & Analyst
Design Patterns	Singleton, Factory, MVC for Mobile, Observer, Adapter, among other
Operating Systems	Desktop - Windows Embedded CE 5, Windows XP, Windows Vista, Windows 7, Windows 10 Web - Windows Server 2000, 2003, 2008 2012R2 Device - Windows Embedded CE 5, Windows Mobile 4, Windows Mobile 5, Windows Mobile Standard 6, Windows Mobile Professional 6, Windows Mobile Standard 6.5, Windows Mobile Professional 6.5
Programming Languages	C#, VB .Net, Java scripts, Asp .Net, LINQ, XML, XAML, Java, C++, C. among others.
Databases	SQL-Server 2000 / 2005/ 2008/ 2012, MySQL, SQLCE, Oracle 9i / 9.2 / 10g, PostgreSQL, PL/SQL.
Tools	Entity Framework, Dev Express, MVC, WPF, WCF, WSSF, Active Directory Membership Provider, Enterprise library.
Technologies	Integration Package Service (SSIS), Infragistics (Net Advantage for ASP.NET), Telerik, Dev Express, Blackberry Web Plug-in for Microsoft Visual Studio, Documentum de EMC, GPRS, SAP Business One SDK Tools, Symbol Mobility Development Kit v1.4 for .NET, My Direct .NET
IDE	Visual Studio 5.0 / 6.0 / .NET 2003 / .NET 2005 / .NET 2008 / .NET 2010 / .NET 2012/ .NET 2013/ .NET 2015, Borland C++, Builder 6.0, Borland Developer Studio 2006, Embedded Visual Basic 3.0, Genesis64

Employment History:
Arte Digital, FAME Inc., San Diego, CA, MX – Sep 2020 - Present
Software Architect
- Leading the design and develop effort on a variety of projects in a highly collaborative, dynamic environment. Design creative solutions to real market problems. Oversee and support the coaching and training of team members.
- Collaborating with team members to determine best practices and requirements for software
- Oversight and approval of all final code and products before formal launch
- improving business software processes and interactions, troubleshoot coding problems quickly and efficiently.
- Production support with the client to resolve issues or create new features.
- Creating technical flow diagrams and present to product and development teams to ensure most efficient and valuable path is taken to deliver project.
- Creating instance and implement new instance to incoming clients
- Coding review and mentoring to team members. Leading study group to keep fresh the best practices and recommendations by different authors or programmers' gurus
- Managing deploys release with CI/CD Azure. Collaborating with project managers to select ambitiously, but realistic coding milestones on pre-release software project development.
- Revising, modularizing, and updating old code bases to modern development standards, reducing operating costs and improving functionality.

Environment: Visual Studio Code, SQL Server 2019, C#, ASP .NET MVC, JavaScript, jQuery, Bootstrap, CSS 3, HTML5, Azure DevOps.

HEXAWARE – E&Y, Monterrey, Mexico – Mar 2019-Sep 2020
Full Stack Software Engineer

- Development UI & API components for web applications, working side-by- side with other engineers on architecture, integration, and maintenance of the applications to keep up with micro-service platform.
- Designed tools for systems to meet business needs. Participated in all aspects of agile software development including design, implementation, and deployment
- Architected and provided guidance on building end-to-end systems optimized for speed and scale
- Worked primarily in C#, React, and JavaScript. Engaged with inspiring designers and front-end engineers, and collaborate with leading back-end engineers as we create reliable APIs
- Collaborated across time zones via Teams, GitHub comments, documents, and frequent video conferences. Understood design principles and a detailed knowledge of database architectures
- Delivered technical visualization of proposed application architecture to your technical lead

Environment: Visual Studio 2019, Visual Studio Code, SQL Server 2019, C#, ReactJs, JavaScript, CSS3, HTML5, jQuery, Redux, Material UI, REST API, Azure DevOps.

FAMA, Monterrey, Mexico - Aug 2016 – Mar 2019
Expert on Control Software
- Development coordinator, software architect and requirement analysis for SCADA Systems using Genesis64. Led key projects with R&D to support business goals.
- Understood customer expectations on to-be manufactured products.
- Determined and executed improved technologies used by suppliers, competitors, and customers.
- Developed research programs incorporating current developments to improve existing products and study the potential of new products. Supported Director to hire and develop R&D personnel.
- Transferred new technologies, products, and manufacturing processes into and out of the company.
- Researched, designed, and evaluated materials, assemblies, processes, and equipment.
- Suggested training tools to enhance employee performance and skill development.
- Monitored team metrics and objectives ensuring meeting of goals.
- Documented all phases of research and development. Established and maintained testing procedures for assessing raw materials, in-process, and finished products.
- Over saw complex research projects, analyze results, and provide recommendations based on findings.
- Assessed the scope of research projects and ensure they are on time and within budget.
- Be present at industry conferences on research topics of interest.

Environment: Genesis64, Visual Studio 2015, SQL Server 2012, C#, C++

Intellego – Cadena Comercial OXXO, Monterrey, México - Feb 2015 – Aug 2015
Software Engineer, Senior .Net Developer & Analyst
- Software Engineer, Senior .Net Development & Requirement Analysis for planning and development modules of renovation technology project and integration data.
- Development Solution to Integration Data Information between SQL Servers to Database.
- Planned, cared and mitigation of incidents on production
- Developed coordinated, performance for SQL Server 2012.
- Maintained and enhancement for internal project.
- Identifying business requirements and requirements of the stakeholders on the project
- Designed the entire system based on the received requirements
- Choose the system architecture and each individual component of this system at a high level.
- Choose the technologies for the implementation of each component and connections between the components.

Environment: Visual Studio 2013/ 2015, Team Foundation 2013/ 2015, SQL Server 2012, Framework 4.5, C#, XML, Jobs, Stored Procedure, Trigger, Function, Views, Tables Creation and ER Models, Project Manager, Scrum.

E-Software – ABA Seguros, Monterrey, Mexico - Jun 2013 – Feb 2015
Software Engineer, Software Architect, Senior .Net Developer & Analyst
- Software Engineer, Software Architect & Requirement Analysis for planning and development modules of renovation technology project.
- Development coordinator, Service Programming (WSSF), performance for SQL Server 2008.
- Maintained and enhanced for internal project.
- Supported team members with technical challenges while following best practice methods
- Contributed ideas and experience to new development solutions

- Provided support in development processes and techniques
- Developed specialist knowledge of database concepts and data modelling techniques.
- Analyzing data requirements to establish, adapt and maintain data models.
- Close cooperation with development team and business to carry out builds and testing.

Environment: Visual Studio 2012, Team Foundation 2012, SQL Server 2008, Framework 4.5, C#, XML, LINQ, WSSF, WCF, Jobs, Stored Procedure, Trigger, Function, Views, Tables Creation and ER Models, Project Manager.

E-Software – Praxair, Monterrey, Mexico - Mar 2013 – Jun 2013

Software Engineer, Software Architect, Senior .Net Developer & Analyst
- Creating & designing Front – End and architecture mobile.
- Planned construction Front-End & designer database model
- Coordinated with the Technical Director on current programming tasks.
- Collaborated with other programmers to design and implement features.
- Quickly produced well-organized, optimized, and documented source code.
- Created and document software tools required by artists or other developers.
- Debugged existing source code and polish feature sets.
- Contributed to technical design documentation.
- Worked independently when required.
- Continuously learn and improve skills.
- Attention to detail is essential and all tasks must be carried out to the highest standard.

Environment: Visual Studio 2010, Compact Framework 3.5, C#, SQL Server 2008, WCF, XML, LINQ, Entity Framework, Design Patterns MVC For Mobile.

Sahuro Consulting Group – ABA Seguros, Monterrey, México – Jun 2011 – Mar 2013

Senior .Net Developer & Analyst
- Created and designing modules for Ajustes Mobil Project.
- Designed new strategies for communication services.
- Designed sync strategies for database mobile to SQL server.
- Integration Services programmer.
- Software development and requirement analysis for AjusteMovil and ServicioAjuste. Integration Package Service Programming, Tuning and performance for SQL Service 2008. Maintenance and enhancements for internal projects.

Environment: Visual Studio 2008, Visual Studio 2005, Team Foundation 2005, SQL Server 2008 y SQL Server 2005, SSIS, Compact Framework 3.5, C#, XML, Visual Basic 5.0, WCF, WPF, MVC, Web Service, Jobs, Stored Procedure, Trigger, Function, Views, Tables Creation and ER Models, Project Manager.

Sahuro Consulting Group – Fidex, Monterrey, México – Apr 2011 – Jun 2011

Senior .Net Developer
- Maintenance and support for new modules for internal portal.
- Maintenance and support on the design and creation of new models for Fidex's Internal Portal.

Environment: Visual Studio 2008, Framework 3.5, C#, Telerik, SQL Server 2008, 3 levels of programming, WCF, Web Service, XML, java scripts, LINQ, Jobs, Trigger, Function, Stored Procedure, Views, Tables Creation and ER Models.

Sahuro Consulting Group – Frisa, Monterrey, México – Apr 2011 – Jun 2011

Software Architect, Senior .Net Developer & Analyst
- Creating and designing replications structure for database process.
- Architecture and Data base administrator support to replication to 2 levels (Central and three subscribers) development and maintenance of SIM modules.

Sahuro Consulting Group – Metalsa, Monterrey, México – Feb 2011 – Feb 2011

Developer
- Created and designed portal web demo for mobile browsers
- BETA – Portal development for Blackberry (RIM) platform

Environment: Visual Studio 2008, Framework 3.5, C#, Blackberry Web Plug-in for Microsoft Visual Studio, XML, Java scripts, Jobs, Trigger, Function, Stored Procedure, Views, Tables Creation and ER Models.

CDSI de México – Carrier, Monterrey, México – Aug 2010 – Feb 2011

Software Architect & Senior .Net Developer

- Created and designed portal web for purchase and delivery orders.
- Architecture planning and development of migration portal.

Environment: Visual Studio 2008, Framework 3.5, C#, Dev Express, SQL Server 2008, Active Directory Membership Provider, XML, UML, Java scripts, Entity Framework, MPV, MVC, WCF, WPF, LINQ, SQL Compare – Redgate, Web Service, Jobs, Trigger, Function, Stored Procedure, Views, Tables Creation and ER Models.

Mimo Software Solution – Confidential, Monterrey, México – Aug 2010 – Jun 2010

Senior .Net Developer
- Mobile portal for device BlackBerry and smart device with Windows Mobile.
- Mobile Portal Planning, Design and Development (BlackBerry y Windows Mobile Standard 6.5).

Environment: Visual Studio 2008, Framework 3.5, C#, SQL Server 2000, Jobs, Trigger, Function, Stored Procedure, Views, Tables Creation and ER Models, Blackberry Web Plug-in for Microsoft Visual Studio, Web Service, XML, Java scripts.

Mimo Software Solution – Internal, Monterrey, Mexico – Apr 2010 – Jun 2010

Senior .Net Developer
- Developer Front – End for electronic invoice project.
- Electronic invoice billing portal development.

Environment: Visual Studio 2010, Framework 4.0, C#, Telerik, SQL Server 2008, Entity Framework, XML, LINQ, Java scripts, Web Service, Jobs, Trigger, Function, Stored Procedure, Views, Tables Creation and ER Models.

Mimo Software Solution – Internal, Monterrey, Mexico – Mar 2010-Apr 2010

Senior .Net Developer
- Developer Front – End & Back – End for time control project.
- Time Control Portal Development.

Environment: Visual Studio 2008, Framework 3.5, C#, SQL Server 2008, Telerik, XML, LINQ, Java scripts, Web Service, Windows Service, Jobs, Trigger, Function, Stored Procedure, Views, Tables Creation and ER Models.

Mimo Software Solution – Confidential, Monterrey, Mexico – Jan 2009 – Mar 2010

Senior .Net Developer
- Developer Front – End & Back – End for portal web project.
- Portal development and Documentum modules management.
-

Sorteo Tec – Internal, Monterrey, Mexico – Mar 2008-Dec 2008

Senior .Net Developer
- Developer & maintenance modules on Sorteo Movil project and design strategies for sync information between devices application to database server.
- Sorteo Mobile Application Development, Analyst and Design.
-

Net Shore de México – Confidential, Hermosillo, Sonora – Feb 2008 – Mar 2008

Junior .Net Developer
- Developer Front – End & Back – End for portal web project.

Pacific Soft – Internal, Hermosillo, Sonora – Sep 2006 – Sep 2007

Junior .Net Developer, Architect & Analyst
- Planning, creating & designing products for Pacific Soft.
- Development, Architect and Analyst.

TxTec – STPS, Hermosillo, Sonora – Dec 2005-Jan 2006

Junior .Net Developer
- Developer Front – End & Back – End for portal web project.
