Joshua Simacek

Summary

Experienced Software Engineer with a demonstrated history of working in the management consulting industry. Skilled in Windows Server, Java, .NET Framework, C#, and Visual Studio. Strong engineering professional with a Bachelor's Degree focused in Mathematics and Computer Science from Averett University.

Experience

Consulting Software Engineer

Leggo Tek

Feb 2018 - Present

- Install and maintain web servers
- Use MS SQL Server, ASP.Net, and JQuery to create accounting applications, inventory management, and job queuing systems
- Provide IT troubleshooting services including troubleshooting websites, pcs, and mobile devices
- Provide consulting services for how to implement solutions for various company needs, including telephony, networking, security, asset management, and technical support
- Maintain web domains with GoDaddy,

Application Developer

apexanalytix

Oct 2017 - Feb 2018 (5 months)

- Write SQL Queries and Stored Procedures
- Write Linq Queries
- Use Entity Framework, ADO.Net
- Use ASP.Net MVC to develop C# Server Code
- Use Telerik Kendo UI to develop User Interfaces
- Use Team Foundation Version Control
- Use IBM Watson API, developed API to use custom dictionary and serialize data into SQL Server database
- Worked in Agile environment
- Implemented Automated Deployment

Software Engineer

ICF

Jul 2014 - Feb 2018 (3 years 8 months)

- Installed SQL Server
- Database Design and Architecture
- Write SQL Queries and Stored Procedures
- Write Linq Queries
- Use Entity Framework, Linq to SQL, Linq to Objects, and Linq to Entities

Use ADO.Net

- Setup and Configured IIS for ASP.Net Applications
- Use ASP.Net MVC to develop and architect C# server code
- User SingalR for real time communication between the client and server
- Develop UI with JQuery and Bootstrap
- Develop internal C# libraries
- Develop and deploy NuGet Feeds using Visual Studio Team Services
- Develop internal Javascript/JQuery libraries and plugins
- Set up and maintain GIT Repositories
- Perform repository gatekeeper responsibilities
- Work from a Team Foundation Server Backlog in an Agile environment
- Write and maintain Unit Tests
- Perform QA, Troubleshooting, and Maintenance
- Use Powershell to automate tasks and setup alerts
- Work with Cisco CVP Unified Call Studio to develop IVR applications.
- Write SQL Queries for interaction with MS SQL databases within an IVR application

- Use Java to create custom CVP java elements and classes to interact with MS SQL Databases and perform http requests from an IVR application

IT Intern

Infinity Global

Sep 2013 - May 2014 (9 months)

- Provided first-line computer support for an office of 50 local employees, as well as 7 employees in Europe
- Manage IT equipment and software licensing inventory
- Installed new software releases and system upgrades, and resolved software related problems
- Maintained hosted Exchange server contact information, including creating and deleting users, and administering distribution lists and shared mailboxes
- Performed project leadership role within a group of 7 interns, organizing and leading meetings, managing inventory, tracking consumption data, and restocking supplies
- Initiated remote support sessions using GoToAssist software
- Tracked and responded to help desk tickets using Request Tracker software
- Responsible for telephone moves, adds, and changes
- Configured computer workstations, utilizing docking technology and multiple monitors
- Maintained Bizhub office printer, including administrative management of scan-to-email function and color vs black and white copy usage

Education

Averett University

Bachelor's Degree, Mathematics and Computer Science

2011 - 2014

Patrick Henry Community College Associate's Degree, General Studies 2009- 2011

Skills

ASP.NET MVC • Microsoft SQL Server • jQuery • Problem Solving • JavaScript • C# • Mathematics • Visual Studio • C++ • Java

Resumes submitted to Client are confidential and for Client use only. Client agrees that Vitaver and Associates, Inc. ("VA") is a representative of all Candidates for which resumes are submitted to Client by VA. Accordingly, The Client agrees that, absent a previous Agreement executed by Client and VA, any Candidates submitted to Client by VA is hired either directly or indirectly within 180 days of receipt of resume, Client agrees to pay VA a 20% of the employee's annual first year salary, including guaranteed bonuses as a finder's fee.

Danduboyina Sheela

Summary:

- .NET Developer experience with a passion for software development especially and in-depth knowledge of OOP
- Over 8 years of experience in Design, Development, Implementation of Web Applications, Windows Applications and Client-Server in multiple Platforms.
- Experience in developing web-centric applications using HTML/DHTML, XML, XAML, JavaScript, CSS and IIS, developing applications using the ASP.NET MVC, ADO.NET Entity Framework, Angular JS, Angular 6.0, SQL Azur.
- Strong understanding of Object-Oriented Analysis and Design, extensively worked on OOPS concepts Abstraction, Encapsulation, Inheritance, and Polymorphism, .Net Technology and Database concepts.
- Have Experience working with .NET features like Events & Delegates, Generics, Abstract Classes, Interfaces, Serialization.
- Proficiency in .NET technologies including .NET Framework, Net Core,, C#, ASP.NET (Web Forms), VB.NET and Win Forms, WPF (MVVM), Splunk, Microsoft Azure Cloud Computing,
- Proficient in creating and consuming Services and Endpoints using WCF, Good knowledge of REST Web API. Implement security features like Authentication, Authorization, and WCF security
- Good Knowledge on Telerik/kendo Controls, XAML, Prism, MVVM.
- Hands on experience in Migration of Asp.Net application to Angular 1.X.
- Client side scripting Environment: Angular 2.0/6.0/7.0, AngularJS 1.X, Typescript, Javascript, JQuery
- Experience in AngularJS structural framework for dynamic web apps.
- Experience in Session Management techniques like Sessions, Cookies and View State.
- Experience in design and development of SQL Server databases& Stored Procedures using SQL Server, T-SQL.
- Experience in developing web application using Telerik Rad Controls.
- Familiar in updating, accessing and version controlling the code using Team Foundation Server(TFS)
- Involved in the iterative process of development in Agile and Scrum environment.
- Has the ability to understand and transform complex business requirements into software, ensuring applications are delivered on time, to specification, are scalable, performance optimized and maintainable.
- Involved in providing actively L2, L3 support which involves prioritization, minor enhancements, break fix activities, problem management, and stability analysis.
- Experience of non-Microsoft .NET technologies including jQuery, Angular 6.0, N Unit and Oracle.
- Involved in Test driven development Unit testing, tuning, performance and bug fixing of the system.
- Good management skills demonstrated proficiency in leading and mentoring individuals to maximize levels of productivity, while forming cohesive team environment.

Technical Skills:

- Languages: C#.NET, VB.NET, SQL, TSQL, C++, C
- Operating Systems: Windows 2000, 2003, 7,8,10, XP, Vista
- Database: RDBMS, MS SQL Server 2017,2014,2012,2008r2,2008,T-SQL,Oracle9i,Pervasive SQL ,PostgreSQL.
- Web Technologies: MVC ASP.NET 3.0,.NET CORE 1.0 ,.NET3.5, 4.0, 4.5.1, XML Web Services, OAuth, WCF, WPF, WEB API, MVVM,Angular 11
- Markup Languages: HTML, HTML5, XHTML, DHTML, LINQ
- Scripting Languages: JavaScript, jQuery, Ajax, CSS, CSS3 , HTML/ DHTML, HTML 5, XHTML, XAML, Expression Blend 3.0/4, Angular 6.0, Bootstrap, Node JS, KnockOut JS.
- Xml Technologies: XML, XSL, XSLT, XPATH, SOAP, WSDL, UDDI, Web Services , IIS 5.0/6.0/7,
- IDE MS Visual Studio. Net 2008, 2010, 2012, 2013, 2015 , 2017, 2019
- Reporting Tools: Crystal Reports, SQL Server Reporting Services, Office Web Components , MS Visio, MS

- Project Management, MS Office, Macromedia Dreamweaver, Re Sharper
- Version Control MS Visual Source Safe (VSS), MS Team Foundation Server (TFS), Tortoise SVN, GitHub. Integration.

Professional Experience:

Consultant, Bank of America, TX, Plano

December 2020 – till date.

Banks Online

Banks Online routes the invoices to the correct team for approval provides Organized queues, alerts, and audit keep the approval process on track Once approved, you can initiate payments We work with your suppliers to process and follow up on payments via virtual card, enhanced ACH and check, according to the suppliers' saved preferences

Responsibilities:

- Developed web application using ASP.NET MVC 5, C#
- Worked on Visual Studio.Net CORE Framework to implement Business Logic.
- Used Auto Mapper for mapping various objects- domain to view model and vice versa.
- Consuming APIs to provide real-time updates in the web application.
- Created rich, easy-to-use Views, Partial Views using Scaffolding Templates and Razor View Engine.
- Responsible for designing MVC pattern webpages.
- Implemented UI design using HTML and CSS.
- Developed using CSS3, JAVASCRIPT, and JQUERY.
- Created Layout Views using CSS/jQuery for Razor Engine to give a consistent look to header element.
- Developed Data Models by Model First approach using Entity Framework 4.0 to enable strongly-typed LINQ queries.
- Created and optimized views for user interactions using objects of HTML Helper class, Custom Helpers and JavaScript/jQuery. Extensively used jQuery Ajax calls for communicating between client and server.
- Implement Presentation layer in ASP.NET using MVC views, Partial Views, strongly typed Views, Razor view engine.
- Debugged MVC code involving Models, Views and Controllers and informed the core development team of specific issues in the individual elements.
- Developed various Controllers with Action Methods returning varied action results like File Content, Script Execution, JSON Data, URL Redirection and HTTP Status.
- Created Angular directives for Grid,Date Picker and other Custom Controls.
- Designed and implemented the Core components for the application, which included a Data Access Layer(DAL) and Business Logic layer(BLL).
- Created templates for the UI View in HTML 5,CSS 3 and Angular Directives
- Responsible for the Development activities, coordinating Business Team
- Delivering new functionalities, integrations and analyzing its impacts
- Effectively managed project work by securing the source code, versioning, work item tracking, reporting and build using Visual Studio Team Foundation Server.
- Deploying Web Application onto IIS 8.0 for testing the Application on a weekly basis ,
- Used GIT,TFS for version control and manage team's tasks.
- Implemented Unit Testing
- Worked closely with testing team and fixed bugs.
- Used Angular to achieve two-way data binding.
- Tested the application in different Environments Regression, QA,Production.

Environment: .NET 2017,Framework 4.8, Oracle, Source Controls (TFS, GIT) ASP.NET MVC (5.0), C#.NET, Web Forms, Web Services, Windows 10 professional, Angular-UI,karma,Microsoft Azure Cloud Computing , .NET Core ,Microsoft Visio, Bootstrap,CSS, HTML, DHTML, XML, AJAX, jQuery, Entity Framework, RESTful service, Web API,Node Js,TypeScript, Javascript,Angular 6.0, Angular CLI .

Consultant, ThomsonReuters,TX,Carrolton

April 2019 – Nov 2020.

ONE SOURCE GLOBAL TRADE - OGT

One Source Global Trade (OGT) Simplify the entire global trade management process with trade compliance information and facilitation tools that automate routine tasks, compliance confidence, and save time. ONESOURCE Global Classification gives access to global trade information for planning, research, compliance, monitoring, and post-entry review while also providing artificial intelligence tools to increase efficiency. With software, able to spend less time and effort on redundant, manual processes and more time on value-added activities

Responsibilities:

- Participated in gathering Business Requirements by attending regular project meetings with the client.
- Identify user stories and break them down into logical tasks and estimate them.
- Tested the Webapi Services using Postman Automation Testing.
- Created Collection classes, Environments, Global Variables for Postman Automation Testing.
- Used the Newman Command Line Tool for testing the WebAPI Services.
- Transitioned software development efforts to a test-driven development (TDD) process, which brought QA testing in on the front-end of the development cycle for gains in code quality, software functionality and programmer productivity.
- Played an active role in all stages - requirements gathering, analysis, design, development, debugging, performance-tuning and testing.
- Created application structure based on Angular Style Guide and Best Practices.
- Used Angular-CLI for initializing and project setup with Scaffolding features.
- Created Single Page Application structure with the help of Angular Router Module.
- Conducted formal and informal product design reviews throughout the software development lifecycle to provide input on functional requirements, product designs, schedules and potential issues. Leveraged developer background to communicate effectively with software design team, quickly gaining their respect and becoming a valued, “go-to” team member on challenging test cases.
- Working with new angular 6.0 directives like ng-for, and different filters for data formatting.
- Worked with **Angular 6.0** Modules, Components, Directives, Templates, Styles, Observable Collections
- Spearheaded adoption of Responsive web design principles.

Environment: .NET 2017, Framework 4.8, Oracle, Source Controls (TFS, GIT) ASP.NET MVC (5.0), C#.NET, Web Forms, Web Services, Windows 10 professional, Angular-UI, karma, Microsoft Azure Cloud Computing, .NET Core, Microsoft Visio, Bootstrap, CSS, HTML, DHTML, XML, AJAX, jQuery, Entity Framework, RESTful service, Web API, Node Js, TypeScript, Javascript, Angular 6.0, Angular CLI.

Verizon, Las Colinas, TX Irving Infosys, Technology Analyst

May 2018 – April 2019.

National Common Ordering Gateway - NCOG

The National Common Ordering System provides centralized gateway security, customers and employees can use a variety of access options—including wireless and broadband—to securely connect and collaborate anytime, virtually anywhere. And it’s all backed by our decades of experience securing customer networks around the world. Secure Gateway Service lets you combine the secure reach and broad capacity of our private networks with the convenience of the public internet to help mobile employees and remote locations collaborate and communicate better.

Responsibilities:

- Consume REST API for save and retrieve data from third party using C#, JSON and XML.
- Experience in implementing error handling, trouble shooting, and exception management, tracing and logging features.
- Responsible for Production Hotfixes.
- Developed Restful service using WCF framework and used Angular Js for getting data
- Implemented Logging (log4net), exception mechanism for this project.
- Involved in L3 team support providing the code changes and database schema changes.
- Designed and implemented the Core components for the application, which included a Data Access

Layer(DAL) and Business Logic layer(BLL).

- Built numerous C# UI components and business modules.
- Designed and implemented WebAPI to support single page application.
- Responsible for developing and/or maintaining Web and Windows Application projects.
- Implement new features in HTML5, CSS, JavaScript, ASP.NET, C#, and SQL.
- Used Microservices to develop low-latency applications for business systems
- Building web application using Template Toolkit, jQuery and Bootstrap.

Environment: .NET 2012/2010/2015, Framework (4.0/3.5), ASP.NET MVC (5.0), C#.NET (3.5), ADO.NET, Entity Framework, Splunk Enterprise, AJAX, Win Forms, Web Forms, Micro Services, jQuery, JavaScript, XML, HTML, SQL Server 2012/2008 R2, Bit bucket, Windows 10 professional, PostgreSQL.

Toyota Head Quarters, Plano, Texas, Infosys, Technology Analyst

March 2017 – April '18.

Dealer Daily

Toyota's Dealer Daily is a large, Windows-based virtual private network (VPN) that links the dealers' management systems to Toyota headquarters or to other business units around the clock. Dealer Daily lets dealers order parts, download sales and other company information, file warranty claims and manage financing and insurance for customer's online, Dealer Daily helps in saving millions in printing and distribution costs. Toyota aimed to modernize the Dealer Daily application, and make it consistent with processes followed by dealers across North America. An onsite-offshore model was adopted to execute this project.

Responsibilities:

- API is secured using the popular OAuth 2.0 standard and communicates with client.
- End and ensuring existing integrations are working efficiently
- Developed Rest Web Api Asynchronous CRUD operations using the HTTP Verbs
- Used Rabbit MQ for Message Queue, Task Parallel Library.
- Estimate the new Enhancements
- Designed and implemented the Core components for the application, which included a data access layer and an error logging component.
- Fully involved in UAT testing phase to support client.

Environment: .NET 2015, Framework (4.0), ASP.NET MVC (5.0), C#.NET (3.5), ADO.NET, Entity Framework, ASP.NET Core, .Net Core 1.0 Framework IIS7.5, WCF, AJAX, Win Forms, Web Forms, Web Services, jQuery, JavaScript, XML, HTML, SQL Server 2012/2008 R2, Bit bucket, Windows 10 professional, Rabbit MQ, Oracle ,React JS, Javascript,

Microsoft, Wipro Technologies, India, Senior Systems Engineer

November 2014 - March '17.

Entitlement Services

Entitlement services is one of Microsoft web API service to provide the services to downstream partners who is consuming this service. Microsoft products (XBOX, Surface etc.) Purchased by customers to call the different API calls available in Entitlement service. Entitlement service will support based type offerings given to customers on respective products purchased. Offerings are based on PPI (Pay per Incident support) and PPX (Pay per package i.e. multiple incident supports) types. The status will be Unused, Reserved, Reopen, Expired, Unauthorized, Refunded, Returned, No Charge, Suspended etc.) Calls. It calls different type of API's to authenticate and validate the request to process based on different type of parameters provided.

Responsibilities:

- Designed and developed various abstract classes, interfaces, classes to construct the business logic using C#
- Reworked on a part of the GUIs to improve interface without affecting the performance of the application.
- Created, Performed DML operations on Rest Services using ASP.NET Web API and C#.
- Developed Dependency Injection design of Controller layer.
- Implementing the data access layer using Entity Framework Code First approach and writing queries using LINQ to Entity for data retrieval.
- Participated in Change Requirements and Bug fixing & Code Reviews

- Maintained database integrity by verifying data within relevant tables in the database and applied relevant data fixes based on investigation done
- Designed WCF Service Contract for validating the user input validations
- Used Angular JS to achieve Two-way data binding, data validation.
- Angular Service created for direct connection to Web API using \$http module
- Used Microsoft Team Foundation Server for the purpose of version Control and source code maintenance needs.
- Worked on Web API Media Type Formatting and Web API Content Negotiation.
- Using fiddler to test ASP NET Web API token-based authentication.
- Extensively used HTTP GET, PUT, POST, DELETE
- Used Jasmine as testing framework and Karma as test runner to perform unit testing.

Environment: .NET Framework 4.5, Visual Studio 2013, Web API/REST, C#, Fiddler, ASP.NET MVC, WCF, SQL Server 2014, Angular JS 1.5, Mongo DB, HTML5, CSS3, JSON, KnockOut JS, jQuery, 2.0, Ajax, Entity Framework, LINQ, Agile Methodology, Microsoft Azure Cloud Computing, Javascript .

S2K, Davis ware Inc, Hyderabad, India, Silverlight Developer.

August 2012 - July '14.

The S2K Consists of Modules like, Purchase Orders, System Options, Agreements, Equipment, Customers, Work Orders of Employees, Employees, Bill Accts, Tax Authority's, Sales Tax Details, Pricing List, Accounts, Updating, Miscellaneous Items, customer Areas, Problem Details, Rate Sheet Details, Sales Lead Disposition Details.

Responsibilities:

- Involved in gathering business and technical requirements from both formal and sessions informal
- Used MVVM Architecture, Third Party Telerik Rad Controls.
- Used Fluent Validations for validating the form data and Value Converters that implements the simple interface IValueConverter
- Developed & maintained Web Forms with C# .NET, to create application and to insert records into database.
- Handling Front end and back end using XAML, C#, WCF Services, SQL services.
- Followed the N-Tier Pattern, separating the business, presentation and data models.
- Created SELECT, UPDATE and INSERT queries to update and insert the data using SQL Server 2008R2
- Write Functions and Stored Procedures for database operations
- Developed and used User controls and Custom controls in the application.
- Involved in debugging, bug fixing & QA support
- Developed and used User controls and Custom controls in the application.
- Extensively used Web controls such as Rad Grid view and custom Templates to populate the records for presentation layer
- Extensively used Data Adapter and Dataset to access database.
- Involved in Documentation, Unit Testing.
- I also took part in the meetings weekly review meetings with managers and understood various process plans, business process, and functionality in detail.
- Participated in meetings with Business users and with other project teams to ensure that the volatile business requirements reflect in the project development.

Environment: .NET Framework 3.5, Visual Studio .NET 2010, WPF, Silver Light5.0, Telerik Rad Controls C#, ADO.NET, Team Foundation Server, SQL Server 2008 R2, LINQ,

e soft Consulting Limited, Hyderabad, India

December 2011 - June '12.

Software Engineer

Pondicherry Police Recruitment & Promotion Board

Society Website of Puducherry police recruitment contains information regarding the Posts.

Displays Notifications of Vacancies/Posts, Application Details. There is a provision for applying

Online for any post, can view Hall Tickets, Exam Dates and Results.

Responsibilities:

- Documentation.
- Use JavaScript for Client Validation.
- Implemented Custom Error Handling to handle exceptions
- Develop web pages using HTML and ASP.NET.

Environment: Visual Studio .Net, ASP.NET, C#, ADO.NET, SQL Server 2005, HTML, Java Script, XML, CSS, Web Services.

Ram Informatics Limited, Hyderabad, India

July 2009 – November’11

Application Engineer

Smart Banker

Reserve Bank of India is India's Central Bank. It makes monetary policy, regulates banks, the external sector, and the fixed income and currency markets. RBI employees developed one Society called RBI Employees Co-Operative Credit Society

Responsibilities:

- Maintained the good relationship with client and gathered the requirements.
- Involved in handling various activities of the project like information gathering, analyzing the information gathered, documenting the functional or business requirements.
- Involved in the development of dynamic ASPX web pages, retrieved data using ADO.Net with C#.
- Performed Forms Based Authentication and ensured Role Based Authorization.
- Performed client side and server side validation form validations using Java script and ASP.NET validation controls respectively
- Utilized application blocks of Microsoft Enterprise Library and extended their functionalities
- Implemented Custom Error Handling to handle exceptions
- Environment: Visual Studio .Net, ASP.NET, C#, ADO.NET, SQL Server 2005, HTML, Java Script, XML, CSS, Web Services.

Education:

Sri Venkateshwara University, India

- Bachelor of Technology
