West Virginia Purchasing Division
Ms. Jessica L. Hovanec
2019 Washington Street, East
Charleston, WV 25305-0130

Ms. Hovanec,

Pickering Associates is pleased to submit this proposal for providing Architectural/Engineering services for the Expansion and Upgrades of the Mountain Transit Authority Facility project located in Summersville, W.Va. Pickering Associates is a premier all-inclusive A/E Firm located in West Virginia and Ohio and headquartered in Parkersburg, W.Va. We feel confident our design team is uniquely qualified to assist you with this project.

Our understanding is that your project includes an expansion and upgrades of the current MTA facility as well as recommendations for a parking lot expansion and exterior renovations. Pickering Associates has designed many renovation and expansion projects including renovations to occupied structures. We would start the process with a walk-thru of the facility with you and identify items to be addressed as well as any changes you may want to make to the existing spaces.

Pickering Associates provides full A/E services in-house including cost estimating and construction administration to complete the scope of your project and has had the opportunity to provide professional services to hundreds of clients throughout our history. The following proposal outlines our technical expertise, management, staff capabilities and experience for providing high-quality engineering and architectural services.

Our team has extensive experience with renovation projects with government agencies, and we are aware of the challenges, concerns and issues that will need to be addressed throughout design and construction. We believe that our previous experience, qualified design team, and familiarity with and proximity to Summersville sets us apart, making our full-service firm an excellent choice for your project. Our approach to your project will demonstrate our procedure for communication, our strict adherence to schedules and budget, and our reputation for excellent quality service that results in accurate construction documents.

I look forward to personally discussing our qualifications to complete this project on time, within budget and exceeding the standards of any firm you may have worked with previously.

Respectfully submitted,

A handwritten signature in black ink, reading "Pamela Wean", is positioned above the printed name.

Pamela Wean, AIA
Project Architect & Branch Manager

ABOUT THE COMPANY

Founded in 1988, Pickering Associates has been providing architectural, engineering and surveying services throughout West Virginia and Ohio for the past thirty years.

Our company is the product of three generations and more than 75 years of construction experience. This experience plus state-of-the-art engineering practices create a full-service, multi-discipline, architectural, engineering and surveying firm serving a wide range of needs and featuring innovative, customized solutions. Our highly qualified staff includes licensed professional engineers, professional surveyors, licensed architects, designers, and drafters as well as support personnel.

The disciplines we cover include architecture, surveying, project management, civil engineering, structural engineering, mechanical engineering, electrical engineering, process engineering, automation and control, and construction administration. Pickering Associates specializes in the above listed disciplines with education, government, healthcare, industrial, oil & gas and private sector clients.

**WE ARE
COMMITTED TO THE
PROFESSIONAL
DEVELOPMENT AND
TECHNICAL
ADVANCEMENT OF
OUR EMPLOYEES.**

ABOUT THE PEOPLE

In choosing Pickering Associates, your project will be performed to your specifications with frequent meetings and communication to keep you up-to-date on the status of the project. Our sole focus is your full satisfaction with the completed quality installation.

Successfully executing more than 10,000 projects in our history, Pickering has built a wealth of experience gaining insight into what works for each of our client types. Those lessons learned add substance to our work and provide our clients with unparalleled value.

Our objective is to partner with our clients improving their performance, flexibility, life-cycle cost, sustainability and ultimate well-being.

PROJECT APPROACH

The goals and objectives of the project are as follows:

Goal/Objective 1:

Develop plans and specifications for the Building Expansion. Plans should include: additional offices, a training room, restrooms, driver's room, parts supply room, and new LED lighting. Perform an assessment of the current parking lot and provide recommendations for expansion. Develop plans and specifications for Exterior Renovations including relocation of the existing downspouts, landscaping and site design. Plans will include an utility relocations both interior and exterior.

Pickering Associates offers Surveying, Civil, Architectural, Structural Plumbing, Mechanical and Electrical design services all under one roof. Under the supervision of Pam Wean, Project Manager, our team of professionals will utilize our extensive experience to design the expansion of the Mountain Transit Authority facility including the parking lot and exterior renovations.

Our approach to your project will start with a kick-off meeting to gather information from all stakeholders to determine the project expectations, programming requirements, schedule, and budget. It is extremely important to spend time with you and your staff to fully understand the project, which will allow us to be more efficient in completing the schematic design phase for this project and then progress us to the next phases of design, allowing us to meet your anticipated design schedule.

Our entire team will then conduct a thorough site evaluation of the site, including measuring and photographing to establish existing conditions. We will schedule the evaluations at your convenience so not to disrupt activities. The results of these evaluations will be incorporated into a schematic design to address the requested goals of the project. At this time, we will involve the authorities-having-jurisdiction during the schematic design to make certain that we address all concerns that they

may have, thus reducing costly changes during design and/or construction. We will provide you and all stakeholders with weekly written updates throughout the project so all parties are aware of the status of design, budget and schedule.

Goal/Objective 2:

Develop Environmental documentation to comply with the National Environmental Protection Act, (NEPA) to allow Federal Transit Administration to approve funding requested by the State to perform this project.

Pickering Associates' survey team and civil engineering departments have a wealth of experience working with agencies such as the United States Army Corps of Engineers, the United States Fish and Wildlife Service, the State Historic Preservation Office, WVDEP and the Ohio Environmental Protection Agency (OEPA) during layout design and permit assistance. They will coordinate with the Transit Authority to provide all the necessary EPA documents to you and the appropriate local authorities as required for your project.

Goal/Objective 3:

Develop bidding documents for both the interior expansion project and exterior renovations, including parking lot expansion.

Once the Owner has approved the design development phase, Pickering will prepare detailed working drawings, thus progressing into the construction document phase of the project. During this time, final drawings and specifications will be produced for the project. These documents will be used for bidding the project to contractors. These drawings and specifications will become part of the construction contract and include all necessary information to ensure that the project will be constructed as conceived by the Owner and design team. Renderings and/or a physical 3D model can also be prepared (if desired by the client) to accurately portray the final design and to use as a marketing tool.

Pickering Associates can handle the bidding & negotiation phase of the project with our experienced in-house construction administration team. We have systems in place, and are equipped to electronically distribute the bidding documents to contractors and equipment suppliers interested in bidding the project, as well as produce hard copies as required. We will assist in contacting contractors to get interest in bidding the project, answer requests for information during the bidding process, assemble addendums, schedule, coordinate and lead a pre-bid meeting, and assist the owner with bid opening and contractor evaluation. Some recent projects we have provided bidding documents and support include the WV DNR new District 6 Office project and North Bend State Park Lodge renovations.

Goal/Objective 4:

Provide Construction Contract Administration Services with competent professionals that ensures the project is constructed and functions as designed.

Pickering has a complete construction administration department with many years of experience that will be involved throughout your project. Our team will be involved during design to become familiar with the project scope of work, and to provide valuable feedback for

constructability. This helps minimize questions and issues during bidding, as well as create clear instructions and improved communication during the construction phase.

A dedicated construction administrator will also manage and oversee all aspects of construction to ensure that the completed project is in accordance with the design documents and intent of the project. He will see you through project closeout and follow up during the warranty period as necessary.

Pickering Associates has provided construction administration for the majority of the projects outlined in this Expression of Interest. We feel it is a critical part of managing the scope, costs and construction time of any project.

We are confident that we can meet all of the design needs for the interior expansion project and exterior renovations for the Mountain Transit Authority Facility. We have completed several projects over the years that are similar to your project in size, scope, and complexity. The design team that we have assembled for your project is competent, knowledgeable, and has the experience to provide you with a well-designed and quality project. Your proposed project team includes the following design professionals:

Pam Wean, AIA - Project Manager and Lead Architect

Mark Moore, PE – Electrical Engineer

Jeff Hosek, PE – Mechanical Engineer/HVAC Design

David Boggs, PE – Mechanical Engineer/Plumbing Design

Eric Smith, PE – Structural Engineer

Spencer Kimble, PE - Civil Engineering

Sean Simon, AIA – Construction Administrator

Bill Showalter – Surveying

Each team member's qualifications and experience is outlined in the individual team resumes included in this Expression of Interest.

WHAT FULL SERVICE MEANS

PUBLIC BUILDINGS

For owners and designers, public buildings present a unique set of challenges and opportunities in an effort to maintain, renovate and expand services provided within the facility as well as service a wide range of individuals all with different needs and abilities. While some projects allow a design team to start from the ground up, many building projects involve the adaptive reuse of an existing facility or an addition in order to facilitate the owner's continued demand for growth. It is also important for owners to find a team with the depth of experience in dealing within the restrictions of limited budgets, governing regulations, multiple phase oversight and approving agencies.

Public buildings also present a unique design for the team selected for a project by the fact that potentially every component of the design will be subjected to an expanded range of users that are normally not present during the design phase. Pickering throughout the years has been able to engage with many organizations to provide design and consultant services on multiple projects including dormitory upgrades and renovations, office facilities, lodges, and conference centers.

Our depth of experience and staffing provides owners with the knowledge and resources to execute their projects effectively. We understand and execute projects to create facilities which meet ADA compliance, greater occupancy safety through knowledgeable design practices and the use of technology, while providing our clients with scheduled phase-gate review points for proper oversight and approval, concise project management to maintain budget and schedule oversight and assistance throughout the review and approval process with governing agencies. Our

expertise includes several different methods of project delivery including D-B, D-B-B and CMR.

OUR PLEDGE

With the selection of Pickering Associates, your organization gains the full depth of our organization. Projects are scheduled out through all phases of delivery by our resource manager and the project manager, assigning the necessary resources to perform to the schedule necessary for that project and highlight major milestones that need to be met. With more than 50 professionals on staff, you can be confident that Pickering Associates has the resources to meet your project schedule.

Because we are a full-service firm, we are able to provide a better coordinated project than firms who are required to use outside consultants. We organize regular in-house project team coordination meetings throughout the design phases of a project to discuss and resolve any issues or concerns that may arise during design.

We feel that this face-to-face coordination with our design team is more effective and efficient than coordinating via email or over the phone like many firms using consultants are required to do.

Our close coordination efforts have proven valuable in many cases where the design schedule is accelerated and/or where there is equipment in the project that requires the effort and coordination of several disciplines.

Pickering's commitment goes beyond the final design stage. Our team continues to work with you during project bidding, construction and final walk-through.

We hold pre-bid meetings, answer all the bidder's questions and help evaluate each bid received so you can select the contractors best suited for your project. Our architects and engineers answers questions during construction to eliminate delays due to uncertainty. We inspect construction workmanship to make sure you receive the highest quality installation and to ensure that all work conforms to the bid documents. We tour the site with you to compile a punch list of outstanding tasks that need attention before the contractor leaves the site and work with the contractors to ensure all of the punch list items are resolved. Finally, we incorporate all changes to the drawings resulting from construction to create as-builts, so you have an accurate depiction of the project for your records.

By working with Pickering Associates you will see that teamwork is the spirit and foundation of our organization. We acknowledge the importance of a quick turn-around and excellent quality services which our administrative procedures, overall organization and depth of experience are poised to provide you. As reflected in our resumes and company experience, we are uniquely qualified to offer the professional services required and to ensure that your vision becomes a reality.

WHAT'S THE BIM IDEA?

Pickering Associates "IDEA" is our Integrated Design Execution Approach.

Integrated - we want our clients, contractors and end users engaged in the process of design. When the right people are involved, accessing the best information, good decisions are made.

Design Execution- refers to how we develop and optimize your project. We focus on the questions that have the most impact. We assign the right staff with the right tools.

Our Approach- recognizes that projects are constantly changing and evolving as the project progresses. We tailor a plan for the project objective, maintain and monitor it so it remains optimized to achieve project goals, faster.

Pickering Associates' Integrated Design Execution Approach - our "IDEA", is a big deal, and will help your project be successful.

Building Information Modeling is a process that aligns to all aspects of our "IDEA". It is integrated, allowing easy access to project information. The software we use help understand the proposed design, coordinate, and identify the critical problems that need answers. Most importantly, Building Information Modeling is a process that fits with our Approach. Allowing the project team to evolve seamlessly as more information is available and new stakeholders are brought onto the team.

Efficient visual communication and an in-depth design understanding are the greatest assets that BIM brings to the table at Pickering Associates. The composite model allows our team to accelerate project development and simplify conversations during design reviews. Having the capability to visualize all of the design models together in a single review session aides both inter- and

intra-department collaboration with all project stakeholders like never before. Capturing all client and designer comments and feedback within a 3D model live during a review session saves countless hours of paging through "redlines" generated from traditional 2D physical paper reviews. The added capacity to search and export reports of these digital comments allows our team to capture and track design communications more efficiently than ever before.

Pickering Associates has invested in state-of-the-art 3D Scanning technologies to more quickly and accurately document existing site conditions. This helps our design teams capture existing site data in more detail and in a format the blends well with our 3D modeling and BIM work flows.

This tool allows us to send a small scanning team into an existing building/space and digitize the as-built conditions of the area in three dimensions, including detailed color photographs throughout the scanned area for design teams to reference throughout the project. This data capture implementation is safer and more efficient for our designers. It reduces the time and equipment needed for traditional hand-measuring that our industry has been accustomed to throughout the years. Granting our designers the ability to measure from a 360 degree image or point cloud with higher accuracy and faster than field measurements.

Building Information Modeling is a process that starts at integrating the team, provides access to project information, incorporates tools to understand design execution, and allows teams to focus on what matters most for the project. It perfectly complements Pickering's Integrated Design Execution Approach, and we can't wait to show you BIM and our "IDEA"s!

Meigs County Commission has requested Pickering Associates to provide design drawings and a bid package for the new Transportation Hub. The building will be a one-story pre-engineered metal building (PEMB) of approximately 15,430 square feet. There will be vehicle bays in the middle with office areas at each end. The building will be located on the old Veteran's Hospital site. Pickering Associates will also handle the public bidding process as well as limited construction administration.

Pickering Associates worked with the West Virginia Division of Natural Resources (WVDNR) to preform Architectural and Engineering design services for developing a 64-acre site along Emerson Avenue in Parkersburg, W.Va. The WVDNR decided to relocate their existing District 6 office operations to a new location that would better accommodate their current space needs. The project consisted of complete site development and Design for 2 new building structures, an office building and a lab/storage building.

The new office building was designed for Wildlife, Law Enforcement and DEP relocation. The building was 8,966 SF and included 28 offices, a large conference/meeting room, public entrance/lobby, restrooms, staff areas, and miscellaneous support spaces. The storage building was designed as a metal building structure with an 18'-8" eave height. It included 7,827 SF of space and consisted of areas for a fish lab, a game workroom, a shop area, a walk-in evidence freezer, and five bays for equipment and vehicle storage. The buildings were designed to meet the functional programming and needs for District 6 as well as considerations for future growth. The exterior design included materials that were easy to maintain and colors that fit within the DNR's outdoor image. Pickering also coordinated all utilities to the new site, a new entrance and road off Emerson Avenue, a new address to the site, and site grading and retaining walls for the challenging site. The project construction began in the spring of 2021 and be complete early 2022.

Pickering Associates worked with the West Virginia Division of Natural Resources (WVDNR) to perform design services for redecorating and renovating the North Bend State Park Lodge in Cairo, West Virginia. The project includes replacement of the existing membrane roofing system (approximately 16,000 SF), total ADA upgrades, modifications to improve the exterior facade and landscaping, as well as design of a pergola structure at the existing outdoor dining area.

Interior improvements include: Window replacement and addition of new window locations, door replacement and access control, new flooring throughout the building, toilet room upgrades, wall and ceiling finish replacement, plumbing fixture replacement, water heater replacement, new LED lighting throughout, addition of a fire alarm system, replacement of kitchen hood system, replacement of PTAC units in guest rooms, new mechanical system in dining room and lobby areas to replace existing PTAC units, add HVAC/fresh air to existing corridor spaces, addition of a standby generator, and material, color & furniture selection.

Virtually every interior and exterior feature will be replaced or improved to create a comfortable and modern lodge.

This project was completed in two phases.

Phase 1 was to inspect and evaluate the exterior walls, columns, porches, downspouts, gutters and roofs for the main house, kitchen addition and garage addition. Pickering Associates used a drone equipped with a camera in order to obtain pictures of brick masonry walls for review and inspection. Pickering also performed a 3D scan of the main flat roof to determine the extent of the center low as well as a thermal camera and 3D scan of the inside to determine the source of the interior leaks. After the evaluation was complete a report was issued to the owner with the findings and a detailed cost estimate for the repairs.

Phase 2 included the design documents for the exterior renovations and re-roofing of the building. Pickering submitted the project for review by WV State Historic Preservation Office. The Project was approved by SHPO. In addition, Pickering presented the project to the Capitol Building Commission; the CBC also approved the project.

Pickering Associates also provided Construction Administration for owner, including weekly site visits and reports.

The Washington County Commissioners are renovating existing buildings at 202 and 204 Davis Avenue in Marietta, Ohio for consolidation of offices for Washington County Department of Job and Family Services and the County's Children Services Board. The building at 202 Davis Avenue is a one-story wood structure with approximately 5,825 SF of space. The building at 204 Davis Avenue is a two-story brick structure with approximately 16,420 SF of space on the lower level and 17,490 SF on the first floor for a total building area of 33,910 SF.

Anticipated renovations for the 202 Davis Avenue building include a new ADA entrance and access ramp, development of new ADA parking spaces, office modifications, and new ADA accessible restrooms. Alternates will also be designed and included for replacement of all first-floor interior finishes and replacement of light fixtures with new LED fixtures.

The renovations for the 204 Davis Avenue building include build-out of approximately 3,080 SF of existing unfinished shell-space on the lower level for additional offices, modifications to the upper level for additional offices, a new metal roof, redesign of the current HVAC systems, New LED lighting, kitchen renovations and overall interior finish upgrades.

Pickering had previously completed a consolidation study for the client to understand the building programming, layout, and a preliminary estimate of probable construction costs for the project. The project budget is approximately \$1M.

The Eastern Millwright Regional Council partnered with Pickering Associates to renovate approximately 2,800 SF of office and classroom space in their existing facility in Parkersburg, W.Va.

The existing building was a pre-manufactured metal building structure and renovations included reconfiguring the existing space to incorporate a reception/waiting area, three offices, a conference room for approximately twelve people, a staff breakroom/kitchenette, ADA restrooms, and storage. The classroom area was modified to include one classroom, ADA restroom(s), and a student lunch area. New interior finishes were incorporated in the renovation and a new HVAC unit(s) was provided for the space.

Minor exterior renovations included the addition of a new entrance canopy at the main entrance, adding a new door to be used as the main entrance to the office area, addition of exterior windows in the office/classroom areas, and new entrance pads and sidewalks that meet ADA requirements.

Upgrades to the exterior materials of the office portion of the building included new metal siding and adding a stone/brick accent.

The Parkersburg and Wood County Library hired Pickering Associates to perform renovations to their Emerson Branch location. The existing building is a two-story structure that was built circa 1976.

Various updates and renovations were made to the facility including a new public entrance (canopy and vestibule) on the Northeast side of the building. The new entrance provides a better public access into the building. Project also included interior modifications on the upper level to accommodate the new entrance. In addition, Pickering also designed a new children's area to the library. This area allows for the children to explore and have a section all to their own. Additional upgrades made to the facility included a new circulation desk/office area, minor site/parking lot modifications as required for new entrance, upper level HVAC modifications to the existing HVAC system, new acoustical ceilings and lighting for the upper level of the building, and minor lower level renovations to include removal of low wall in stack area and the addition of a new staff desk.

DWIGHT NEELY, PROGRAM ADMINISTRATOR
ODOT STATEWIDE FACILITIES OPERATIONS
P) (614) 466- 4108
E) DWIGHT.NEELY@DOT.OHIO.GOV

Pickering Associates worked with the Ohio Department of Transportation and OFCC on Full-Service Maintenance Facilities in Washington, Vinton, and Monroe Counties in Southeastern Ohio. These facilities included a truck storage building with an administrative section and a mechanical services section, cold storage, salt storage and material storage structures, an 8,000 gallon above ground fuel storage tank, a vehicle wash bay, a decanting area, and a brine/calcium system. Two of the projects were located at existing DOT sites and included demolition of existing structures, the third site was a new build. Also included in these projects was the renovation of an existing maintenance building to be converted into the District's testing lab facility.

These projects required that a Program of Requirements (POR) be developed in close conjunction with ODOT to determine the requirements for each facility. The facilities required site circulation for all types and sizes of trucks and equipment, to ensure maneuverability throughout the site. The projects included separate bid packages for each structure to aid in the permitting process. Additionally, the sites required a secure utility fence surrounding the entire property and the installation of two automated gates and two man gates at each site for entrance onto the facility. Our team provided full architectural, mechanical, electrical, plumbing, structural, and civil engineering design as well as environmental engineering, surveying, and construction administration services. We managed the construction photography services and quality assurance & testing services during construction.

Pickering Associates worked closely with Thomas & Marker Construction, the owner representative for United Church Homes, on renovating the existing parking area for Harmar Place Rehabilitation and Extended Care Facility in Marietta, Ohio.

Pickering Associates Civil Team worked closely with the clients on the design of the parking renovations, including developing existing condition plans, demolition plans, site layouts, grading and utility plans. In addition to these plans, the project also required the design of stormwater management practices, where a stormwater pond was used for water quality purposes. Site lighting and all associated underground conduit/cabling was designed within the scope of the project. The package also included site-specific details in regards to pavement, curbing and other stormwater utilities for the new area.

Camden Clark Medical Center hired Pickering Associates to reconstruct a portion of the hospital's North Tower Parking Lot. This project included transforming a former United Bank lot into a new parking section, as well as improving the overall flow of traffic throughout the hospital property and restructuring the parking layout. The team also coordinated with the West Virginia DOH to set up traffic flow patterns going in and out of the parking space. This project was meant as a phased approach to renovate the entire lot. When costs allow, the remaining lot will be reworked.

The design required site layout, grading and drainage layout, site utilities, and traffic control plans in coordination with local municipals. Overall limit of disturbance for the project was 51,948sf (1.19 Acres). Pickering's electrical team was able to design the site lighting for the new parking extension. During construction, Pickering Associates assisted the Client by being their construction representative to answer contractor questions and assist with site observations.

A private vendor in the downtown Parkersburg area hired Pickering's services to conduct demolition on an existing building, in order to make space for construction of a new parking lot. Project included the expertise of our Civil team including, site layout, grading and drainage, utilities, sediment and erosion control.

The team also assisted the client in receiving all the necessary approvals for the project, including demolition and building removal. The project was proposed at \$7,700.00, however the team was able to complete the project under budget with the actual cost totaling \$5,837.40.

Pickering Associates was hired by Park Center LLC to repair the parking lot for the American National University located in the Park Shopping Plaza in Parkersburg, West Virginia. The existing concrete parking lot was cracked and did not drain properly.

The project included repairing the cracked concrete of the existing lot before resurfacing with asphalt. Repairs and adjustments to the catch basins and drainage were also incorporated. The team provided all the design development and surveying services for the project. The project scope included topographic surveying of the project area, above and below the ground for utility maintenance. Additionally, the team developed the site grading and drainage, as well as overseeing all of the bidding and contracting requirements.

During construction, additional scope was requested from Pickering to assist with site lighting upgrades.

BID FORM – SUBMITTED WITH BID

**CERTIFICATION OF PRIMARY PARTICIPANT REGARDING
DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS**

The Primary Participant (applicant for an FTA grant or cooperative agreement, or potential contractor for a major third party contract),

Pickering Associates (COMPANY NAME) certifies to the best of its knowledge and belief, that it and its principals:

1. Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;
2. Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property.
3. Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (2) of this certification; and
4. Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

If the primary participant (applicant for an FTA grant, or cooperative agreement, or potential third party contractor) is unable to certify to any of the statements in this certification, the participant shall attach an explanation to this certification.)

THE PRIMARY PARTICIPANT (APPLICANT FOR AN FTA GRANT OR COOPERATIVE AGREEMENT, OR POTENTIAL CONTRACTOR FOR A MAJOR THIRD PARTY CONTRACT),

Traci Stotts, AIA / VP of Marketing, CERTIFIES OR AFFIRMS THE TRUTHFULNESS AND ACCURACY OF THE CONTENTS OF THE STATEMENTS SUBMITTED ON OR WITH THIS CERTIFICATION AND UNDERSTANDS THAT THE PROVISIONS OF 31 U.S.C. SECTIONS 3801 ET SEQ. ARE APPLICABLE THERETO.

BID FORM #2
BID FORM – SUBMITTED WITH BID

CERTIFICATION OF RESTRICTIONS ON LOBBYING

The undersigned (Vendor, Contractor) certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid by or on behalf of the undersigned, to any person for influence or attempt to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress regarding the award of a Federal grant, loan (including a line of credit), cooperative agreement, loan guarantee, or loan insurance, or the extension, continuation, renewal, amendment, or modification of any Federal grant, loan (including a line of credit), cooperative agreement, loan guarantee, or loan insurance.
2. If any funds other than Federal appropriated funds have been or will be paid to any person to influence or attempt to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or any employee of a Member of Congress in connection with any application for a Federal grant, loan (including a line of credit), cooperative agreement, loan guarantee, or loan insurance, the undersigned assures that it will complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," Rev. 7-97; and
3. The undersigned understands that the language of this certification shall be included in the award documents for all sub awards at all tiers (including subcontracts, sub grants, sub agreements, and contracts under grants, loans (including a line of credit), cooperative agreements, loan guarantees, and loan insurance.

Undersigned understands that this certification is a material representation of fact upon which reliance is placed by the Federal government and that submission of this certification is a prerequisite for providing a Federal grant, loan (including a line of credit), cooperative agreement, loan guarantee, or loan insurance for a transaction covered by 31 U.S.C. 1352. The undersigned also understands that any person who fails to file a required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

The (Vendor, Contractor) Traci Stotts, certifies or affirms the truthfulness and accuracy of each statement of its certification and disclosure, if any. In addition, the (Vendor, Contractor) understands and agrees that the provisions of 31 U.S.C. §§ 3801, et seq., apply to this certification and disclosure.

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.
