C. QUALIFICATIONS

1. Training, Credentials and Experience

Training

US Ecology is committed to providing a safe work environment and promoting safe practices for all our team members, contractors and the public in the communities where we operate. We expect all team members to be committed to Health and Safety and seek to proactively prevent illnesses, injuries, damage and loss resulting from our operations and actions.

- Provide outstanding safety and health protection to our team members through effective management systems and employee involvement.
- Supply the necessary resources, including professional safety expertise, equipment, and infrastructure to ensure a safe work environment.
- Correct, in a timely manner, all hazards identified through self-inspections, employee reports, accident investigations or other means.
- Proactively identify potential hazards associated with waste and the waste treatment process, prior to acceptance.
- Provide ample supervision, knowledge, direction, instruction and training to ensure the safety of our team members.
- Promote employee participation in creating a safe work environment and reporting unsafe work conditions properly and immediately, as well as set the expectation for team members to stop work when safety may be in question.
- Use the results of inspections and accident investigations to improve the safety management system and make this information available to our team members upon request, and
- Pursue, achieve and maintain safety programs that are consistent with the values of OSHA's Voluntary Protection Program.

Experience

US Ecology responds to environmental concerns with an efficient and professional approach. We are prepared to collect waste from the locations specified and transport and dispose of the waste according to applicable state and federal regulations.

All US Ecology field chemists are fully trained and certified and have the knowledge and experience to complete projects in a safe and cost-effective manner. Our chemists will manage your hazardous waste disposal project from start to finish:

- Trained field chemists take a complete inventory of the materials to be discarded
- Chemically compatible materials are collected, identified and packaged together
- Chemicals are profiled, labeled and manifested
- All materials are transported in DOT approved containers and permitted trucks

At the TSDF, the chemicals are handled using the latest and best-demonstrated available technology. These methods include Fuel Blending, Neutralization, Incineration and Landfill.

US Ecology also operates a state-of-the-art de-packing facility for the consolidation of certain flammable solvents. The de-pack booth is in an area permitted for hazardous waste storage. Lab pack quantities of flammable waste are consolidated for fuel blending.

Our services under this contract include, but are not limited to:

- Mobilization and demobilization
- Preparations prior to arrival at the job site
- Transportation of personnel, equipment and supplies to and from the job site
- Set-up and removal of necessary equipment
- Field characterization
- Lab-packing/over-packing
- Transportation of the hazardous waste
- Preparation of the manifest
- Decontamination of equipment
- Cleanup of the job site

The State of West Virginia can expect the highest level of service from US Ecology. We provide staff that is trained in all applicable state, federal and local laws and regulations to perform services lawfully and competently. US Ecology's fleet is fully licensed and insured to meet your waste transportation needs. The team will be fully equipped with all required PPE, supplies, hardware, software and any other necessary items to complete the required services in a timely manner.
