WORK AS YOUR PARTNER

*RE: West Virginia Department of Environmental Protection - CEOI 0313 DEP2400000008
AML Contract North 4*

Dear Mr. Hager and Selection Committee Members:

The Thrasher Group, Inc. is pleased to present our qualifications to the West Virginia Department of Environmental Protection for the AML Contract North 3 consisting of the following projects:

- | | |
|---|---|
| » Beech Bottom Highwall | » Crafts Run Maintenance |
| » Bethany (Haizlett) DS, Highwall and AMD | » Logan Run Highwall |
| » Buffalo Creek Highwall | » Richard Mine Drainage Facility Upgrades |
| | » Wades Run Dangerous Embankment |

As a West Virginia-based company that has been serving the state for nearly 40 years, Thrasher understands the landscape of the area and has the ability to provide the necessary services to restore the safety of the communities where we live and work. We have a long history with this region of West Virginia, having worked on projects of a similar scope.

The Thrasher team has vast experience completing NEPA documentation, providing survey and mapping services, as well as construction inspection in the mountain state. Part of this experience comes from the numerous AMLER projects we have completed with the West Virginia Department of Environmental Protection (WVDEP). Our team will carry over the same successful approach and methodology used in our past WVDEP projects to ensure that this group of projects is completed to the highest quality of standards. With three offices scattered throughout northern West Virginia, our team is in close proximity to each project location — allowing us to easily be on-site to manage any project and handle any issues that may arise.

We appreciate the opportunity to continue our partnership with the WVDEP and look forward to further speaking with you about the needs for these projects.

Sincerely,
The Thrasher Group, Inc.

Richard Hovatter, PE
Principal and Project Manager

THRASHER'S GOT IT

COMPANY HISTORY

With a commitment to building business through “successful projects and repeat clientele,” H. Wood Thrasher, PE and the late Henry A. Thrasher, PE, formed Thrasher Engineering, Incorporated in Clarksburg, West Virginia in 1983. Since that time, the company — now known as The Thrasher Group, Inc. — has transformed into one of the Mid-Atlantic region’s largest full-service privately owned architectural and engineering firms.

Thrasher has grown from its original three employees to a current staff of over 300 and continues to prosper. Instilled in each employee is a commitment to maintaining the highest standards of professional service. Our team has the experience, knowledge, versatility, and integrity to get the job done. With a 39-year history of driving infrastructure development for public and private clients, we have a reputation of keeping our word and completing projects on time and on budget.

AML DESIGN

The Thrasher Group has provided design services to a number of Abandoned Mine Lands projects over the years. We are leaders in the industry, having completed projects for emergency repairs, using AML grants, and as part of the Abandoned Mine Lands Economic Revitalization project.

Our team has been a part of all types of AML work, including, but not limited to:

- » Highwalls
- » Portals
- » Slope Stabilization
- » Landslides
- » AMD Treatment
- » Refuse and Dump Improvements
- » Drainage Control
- » Burning Refuse Remediation

Drainage Design: All AML projects completed by Thrasher have required design of drainage structures. These have included vegetated, grouted, and riprap channels, as well as culverts and storm sewers. Drainage calculations are completed to properly size all conveyances.

Permitting: the permitting process can delay projects if they are not submitted correctly or in a timely manner. Thrasher takes pride in our ability to quickly obtain permits for our clients. We are able to utilize our excellent relationship with the WVDEP for NPDES permits as well as our relationship with the West Virginia Division of Highways for entrance and drainage permits. We are also experienced in obtaining Army Corp of Engineers permits from both the Pittsburgh and Huntington District Offices for stream bank restoration, wetland mitigation, and construction, linear transportation, and utility line projects, temporary construction access, and dewatering.

ENVIRONMENTAL SERVICES

In today's ever-changing regulatory landscape, compliance with federal and state environmental laws is critical to the success of projects. Compliance can often seem at odds with the project vision and financial constraints. The Thrasher team partners as a technical and regulatory advocate to overcome obstacles and guide our clients through complicated policies to achieve their goals. From initial investigations to final design, our environmental experts are there to assist in all facets of our clients' projects. Our team has developed relationships with academic consultants from multiple universities that are here to aid in specialized assessments.

Thrasher offers a range of environmental services, from abandoned mine land reclamation to stream and wetland delineations and everything in between. We have extensive experience with site assessments, permitting, and every aspect of environmental work that your project will encompass.

In addition, our team has a host of experience with Abandoned Mine Land (AML) projects and are familiar with the intricacies involved

Thrasher has completed more NEPA evaluations for AMLER projects than anyone in the state.

Environmental Services:

- > All Appropriate Inquiry (AAI)
- > Environmental Site Assessments
- > NEPA Compliance for Publicly Funded Projects
- > Ecological Studies
- > Brownfield Redevelopment
- > Industrial Hygiene and Demolition Planning
- > Underground Storage Tank (UST) Consulting Services
- > Wetland Delineation, Design, and Mitigation
- > Remediation Investigation, Feasibility Studies, and Design
- > Hydrogeologic and Geologic Investigations
- > Groundwater Monitoring
- > Sampling and Laboratory Analysis
- > Solid and Hazardous Waste Management
- > SPCC, GPP, SWPPP, GWPP, SWPPP Environmental Compliance
- > Coal Combustion Residuals Rule Compliance (CCR)
- > Stream Assessments, Design, and Mitigation
- > Erosion and Sediment Control Plans
- > Voluntary Remediation Program
- > Uniform Environmental
- > Covenants Act
- > CERCLA Preliminary Assessment
- > CERCLA Site Investigation

ENVIRONMENTAL PERMITTING

The Environmental Division of the Thrasher Group provides permitting, consulting, and assessment services to a multitude of clients spanning the Mid-Atlantic region. With a combined 40 years of permitting experience, Thrasher's Environmental Scientists, Permitting Leads, and Project Managers are able to take even the most complex and time restrictive projects and provide clients with cost effective and timely solutions.

Federal Permitting

- > National Historic Preservation Act - Section 106 Consultation
 - > *State Historic Preservation Office or Division of Culture and History*
- > Endangered Species Act - Section 7 and Section 9 Consultations
 - > *United States Fish and Wildlife Service*
- > Clean Water Act - Section 404 Permits
 - > *United States Army Corps of Engineers*

- > National Environmental Policy Act - Categorical Exclusions, Environmental Assessments, and Short Environmental Assessment Forms
 - > *United States Army Corps of Engineers; Federal Aviation Administration; Division of Transportation; and Federal Communications Commission*

State and Local Permitting

- > State Responsible Regulations of the Clean Water Act - Section 401 and 402 Permits
- > State Level Rare, Threatened, or Endangered Species Consultations
- > State Level Aquatic Resource Encroachment and Impact Permits
- > State Level Roadway Encroachment, Crossing, and Occupancy Permits
- > State Level Industrial Waste Discharge Permits
- > Local Level Floodplain or Building Permits

CONSTRUCTION ADMINISTRATION

Effective management of our projects ensures that both clients and contractors work in an efficient and safe manner. From pre-construction activities - such as bid conferences and surveys - to inspections, job progress reviews, and on through final completion, our goal is work that proceeds in accordance with plans and specifications.

At Thrasher, we inspect and manage a wide variety of projects designed by our firm in addition to projects for contractors and other designers. We have certified project representatives responsible for overseeing every element of design integrity. Our methods have earned the respect of not only our clients, but contractors and project owners alike.

Construction Inspection Services:

- > Construction Materials
- > Pipelines
- > Structural Steel & Concrete
- > Paving
- > Drainage
- > Embankments
- > Work Zone Safety & Traffic Control
- > Erosion and Soil Control

Quality Control and Assurance Methods:

- > Regularly Scheduled Planning and Progress Meetings
- > Engineering During Construction
- > Daily Logs and Progress Sheets
- > Cut Sheets
- > Quantity Tracking

Thrasher has an internal Quality Control Policy to ensure our projects move forward efficiently and effectively. The objectives of this policy are to continually improve the quality of the design and technical deliverables Thrasher provides to its internal and external clients.

This policy illustrates the basic requirements for quality control in our projects. It describes the methods for checking and reviewing product elements and client deliverables, and includes rigorous comprehensive written check-lists for each stage of the design process, document production, and construction activities.

The purpose of these QC methodologies is to reduce or eliminate the potential for errors, omissions, ambiguities, and inconsistencies.

The policy outlines three main areas:

- > **General**
Defines the purpose, intent and limitations, definitions, and implementation
- > **Project Management Procedures**
Presents required procedures specific to this practice that allow for the efficient and accurate management of projects
- > **Check and Final Review Procedures**
Presents required procedures specific to this practice that are used to insure technical accuracy of the work product

Budgeting

Construction estimating and budgeting is one of the most important parts of what Thrasher can provide you. Without accurate budgets, there is no tool to guide the design process and issues will be inevitable. By including cost estimating as a part of the project scope from day one, we are able to avoid issues before they arise and keep your project within a reasonable cost.

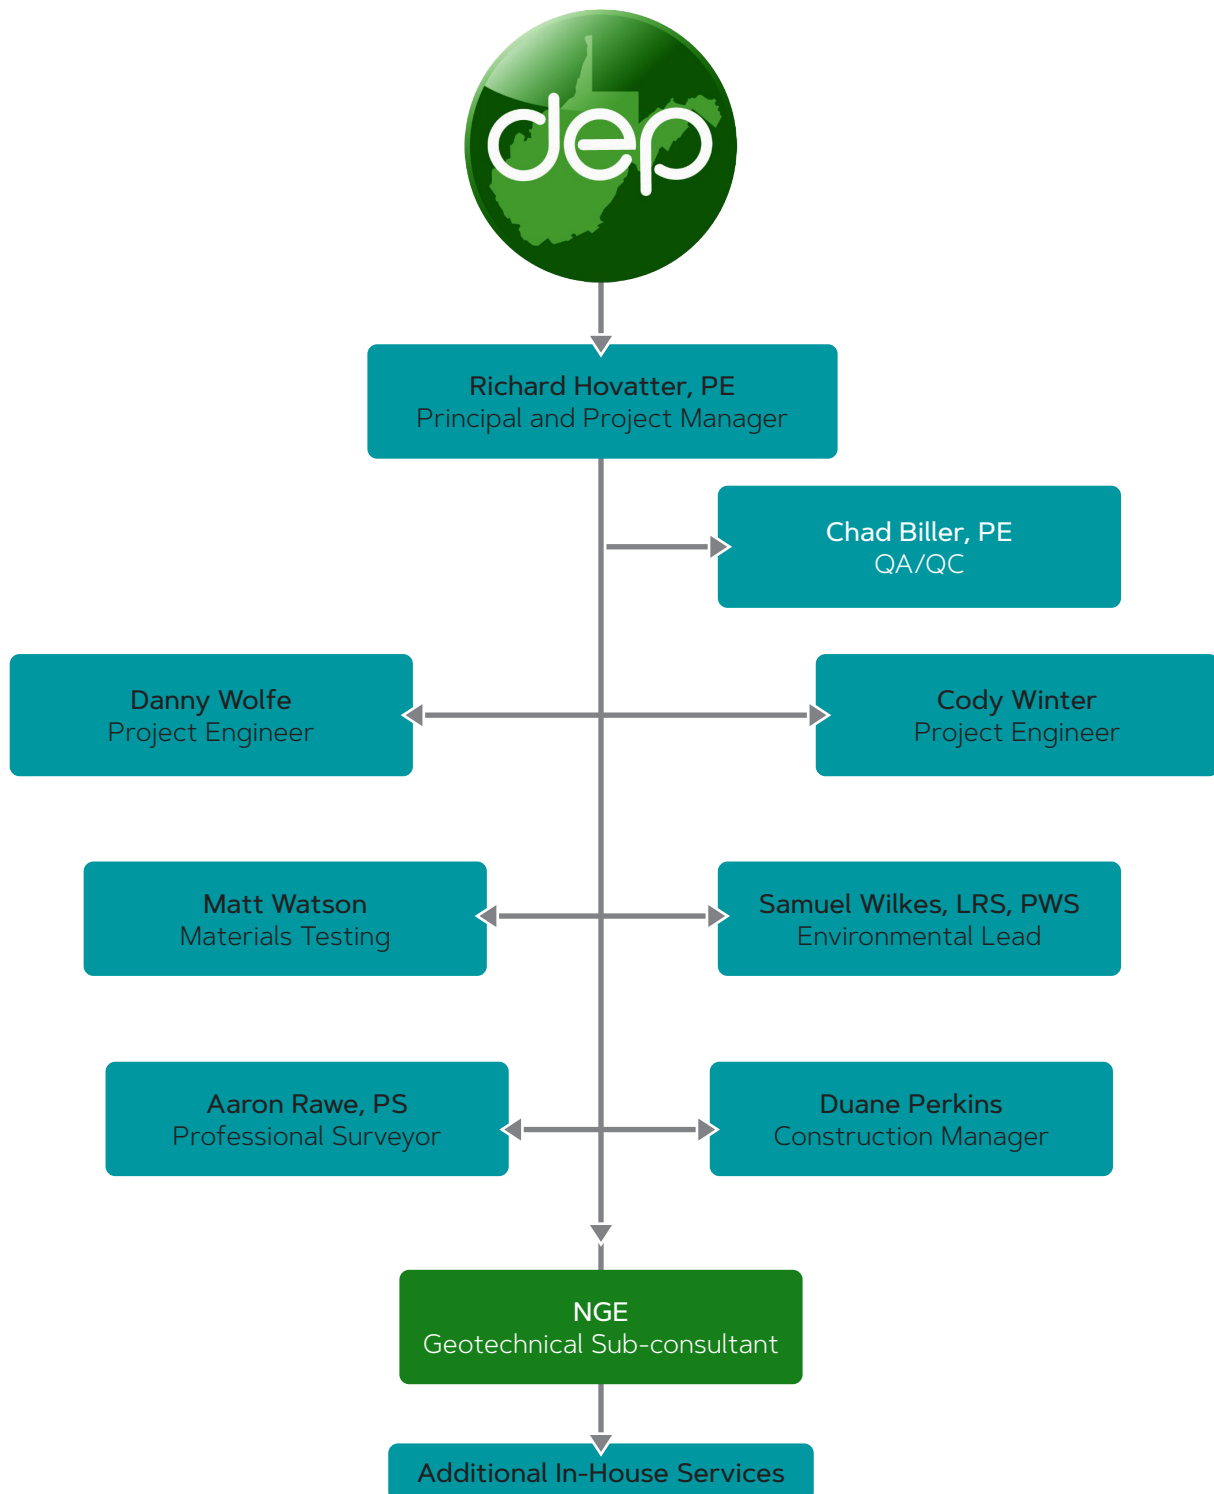

And our estimates go beyond the typical system - rather than simply providing cost per foot or lump sum price, Thrasher will provide contractor-grade estimates that look at every part of the project. We do detailed take-offs of materials and look at every man hour needed to complete a project and factor this in accordingly. Then, we use our thorough understanding of the local market and material costs to accurately design within your budget.

Scheduling

Thrasher realizes the importance of establishing and maintaining project schedules. Time means money and making sure we help you spend your money wisely is our number one goal. Because of this, our team puts an emphasis on ensuring project timetables are met and communication is upheld throughout the process.

To accomplish these goals, Thrasher utilizes scheduling to track every stage of a project - from design and bidding through construction completion. Keeping our owners up to speed with progress is always our priority and ensures occupancy and owner supplied equipment are scheduled accordingly.

RICHARD HOVATTER, PE

PRINCIPAL AND PROGRAM MANAGER

Certifications

- > Project Management Course Specialization
- > Leadership Development for Engineers - Rice University
- > Engineering Project Management - Rice University
- > OSHA 10 Hour Construction Worker Training
- > CPR and First-Aid

PROFESSIONAL OVERVIEW

Richard "RJ" Hovatter, PE, has spent most of his career working with private and public clients on various site development projects. His team of engineers are able to develop strategies to fit the needs of each client. RJ is well versed in site design, grading, storm water and erosion and sediment control plans. He has also managed over 35 Abandoned Mine Land Emergency and Abandoned Mine Land projects across West Virginia, Maryland, and Ohio. His experience provides clients with the reassurance that projects are inspected thoroughly.

PROFESSIONAL OVERVIEW

Chad Biller, PE has extensive experience in all aspects of civil engineering, but his primary emphasis lies in site development, transportation, and airport projects. Chad's expertise has made him a go-to source for the design and site layout of numerous residential and commercial sites all throughout the Mid-Atlantic region. His knowledge of site design in the mountainous terrain of West Virginia and the surrounding Appalachian basin is second to none.

As part of his role assisting our Land Development Market, Chad is responsible for the development of project design, production of project specifications and plans, bidding, quality assurance/quality control, and project monitoring. He brings a deep breadth of knowledge to the table, including creative problem solving skills, and decades of hands-on experience implementing unique project delivery methods individually tailored for his clients.

- > UTV Safety Training
- > FE Exam

PROFESSIONAL OVERVIEW

Cody Winter, EI currently serves as a Project Engineer in The Thrasher Group's Land Development Market. Cody has an impressive background in the site design of industrial parks with airport access, runway rehabilitations, taxiway lighting upgrades, tree clearing and earth work for approach and departure surfaces, site permitting, and commercial site layouts. Cody has a familiarity with FAA standards, and is working directly under Thrasher's aeronautical experts to learn permitting and regulatory standards. He effectively communicates with clients, project's contractors, and the project team regarding site designs generated in the AutoDesk Suite.

Prior to becoming a Project Engineer, Cody spent time working on various project sites as a Project Representative. His time in this role gave him invaluable experience and familiarity with the construction process – giving him the ability to recognize potential issues before they have the opportunity to manifest into construction sets backs.

him a unique perspective that proves especially valuable during the design phase of projects. Wade is able to utilize his field experience to ensure that projects are designed with safety, budgets, and accurate timelines in mind.

THOMAS MORGAN

ASST. PROJECT MANAGER | TEAM 4

PROFESSIONAL OVERVIEW

Thomas "TJ" Morgan currently serves as a Project Engineer in the Land Development Market for Thrasher. He has an extensive background in the design of storm networks, corporate and retail centers, road upgrades, well pads, pipelines, and access roads. TJ's main focus is assisting municipalities and private clients with stormwater systems by ensuring they are working effectively and efficiently. To make sure this happens, TJ directly coordinates between project managers, staff engineers, and any other employees and stakeholders involved.

TJ has a deep understanding of site layout, design, and permitting. He has hands-on experience and active involvement in the development of various site plans, grading plans, erosion and sediment control measures, stormwater network design, and project specifications. TJ spends much of his time analyzing existing and proposed conditions to modify or propose features and structures to properly convey surface runoff from varying storm events.

PROFESSIONAL OVERVIEW

Sam Wilkes, LRS, PWS is an Environmental Project Manager within Thrasher's Land Development Market. Sam is a Professional Wetland Scientist and a WVDEP certified Licensed Remediation Specialist. He brings over 23 years of consulting experience as a project manager and senior environmental scientist, providing technical support to watershed management, restoration, natural resource conservation, and hazardous materials programs. Sam is experienced at providing project oversight and managing field teams and contractors collecting wetland, stream quality, environmental media data, and general site condition data for site characterization. He regularly interacts with his clients and manages project budgets and staffing plans, while providing quality control review of project deliverables. Sam understands the importance of delivering projects on time and providing a proactive management style to his clients.

PROFESSIONAL OVERVIEW

Duane Perkins joined Thrasher in 1992 and currently serves as a Construction Manager for the firm. He is one of the longest employed managers at the firm. He has extensive field experience on numerous public utility pipelines, natural gas projects, wetland and grassland easement surveys, and highway work. He possesses a wide range of utility construction and field survey experience including an extensive knowledge of the Atlantic Coast Pipeline. He has his fair share of as-built experience as a Crew Chief, but most of his time has been in a management role.

Duane's responsibilities as Construction Manager include assigning duties to the crews, interaction, and coordination with the client and/or their representatives, checking the crews' field work and assisting the crews as needed. He is one of those supervisors that everyone holds in high regard. He is not afraid to do the work himself, and he treats everyone with respect. He enables his crews, through information, supplies, and support, to ensure they are working efficiently and in the best interest of the clients and their projects.

PROFESSIONAL OVERVIEW

Aaron Rawe serves as a Survey Project Manager for Thrasher working out of the Bridgeport office. Mr. Rawe's experience covers various aspects of surveying, including routing, as-builts, preliminary, construction stakeout and boundary of construction management. Mr. Rawe is experienced both in the field and orchestrating projects behind the scenes. Aaron brings over six years of pipeline and asset management experience to the team.

As part of his management role, Mr. Rawe also meets with project stakeholders, area residents, local utility companies, and the project engineers to ensure that schedules are being met and to regularly update all parties on construction status. Additionally, Mr. Rawe is progressively responsible for the coordination of field crews, data collection, site layouts, ALTA surveys, subsidence and topographic surveys.

Mr. Rawe also assists in the management of the Mapping Department here at Thrasher. He is responsible for the coordination between photogrammetrist and field crews in helping determine the placement of photo targets and items to be located for photo control. He helps process and QA, QC all data coming in from the field before delivering it to the photogrammetrist to use for the air trig of the projects.

PROFESSIONAL OVERVIEW

Matthew Watson joined the team full-time as a Project Representative working on various inspections including rebar, caisson, soil compaction, concrete, fire proofing, masonry, steel, and others.

He is very knowledgeable in all areas of soil, concrete and aggregate testing, in both field and laboratory environments. His vast experience has exposed him to a wide range of earthwork conditions refining his judgment on soil classifications. His hands-on experience is bolstered by his ability to conduct field and lab Proctors, Atterberg Limits, and Gradations. He also has the capability of completing mix designs. Matt has served as the Bridgeport Lab Supervisor since 2018 where he is responsible for maintaining the Bridgeport and Scott Depot's AASHTO and Army Corps of Engineers accreditations. He performs all lab testing, project management, and over sees Materials Testing Technicians.

Company Overview

NGE was founded in the fall of 2002 by Amy Veltri and John Nottingham, a management team with a combined forty years of industry experience. The family-based entrepreneurial spirit that defined NGE's beginnings remains evident in the innovative solutions we deliver to our loyal clients each and every day. Advances in engineering, science and technology, coupled with regulatory, legal, and compliance pressures create increasingly complex challenges for businesses. NGE strives to keep pace with these changes, with an eye to supporting our clients' changing needs.

NGE has grown into a dependable and flexible environmental and geotechnical consulting firm providing a wide range of professional services, including Environmental Consulting, Geotechnical Engineering and Environmental Construction / Remediation. With clients across the nation, NGE added a second office location in West Virginia in 2003, and seeks to grow in the future by providing consistent, quality service in a family-oriented atmosphere.

Since its inception, NGE has hired and retained the best and brightest talent in the industry. Our staff have relevant experience and qualifications to complete complex environmental and geotechnical projects. NGE's future is bright as we pursue a course of planned, measured growth to meet the challenge of expansion without diluting leadership or weakening the company's ability to perform. After establishing a solid foundation and longstanding reputation in the region and across the nation as an innovative, sophisticated, forward-thinking environmental and geotechnical consulting firm, we are proud of our roots and the progressive environment we have created for our dedicated employees.

NGE is an organization that is small enough to focus time on each client but with a depth in talent and resources to successfully complete large and complex projects. NGE provides superior environmental and geotechnical services at a manageable price. A family oriented work atmosphere has fostered the growth of NGE's staff with the best and brightest talent in the industry.

NGE has garnered a variety of certifications and awards over the years in the environmental and geotechnical consulting industry. These accomplishments and accolades bear testament to the impeccable standards that we strive to achieve at NGE. They help differentiate our company from our competitors and serve to distinguish our employees as the "best of the best."

The Thrasher Group's current workload will allow for immediate response to your needs. You will have specifically appointed team members located in our Bridgeport office, whose schedules will allow flexibility to enable them to fulfill all deliverables. In addition to these dedicated staff members, Thrasher has the ability to provide additional assistance as needed. The company boasts a staff of more than 300 people in four states, allowing us – if necessary – to pull more personnel to provide a timely response to your needs. This amount of available staff enables us to adjust workloads to ensure the resources needed to meet all project requirements and deadlines are made available, as well as to provide the depth of expertise needed to address any planning, engineering or other challenges which arise. Using a combination of technology and business acumen, Thrasher is better able to support all aspects of a project to the extent requested by our clients. By integrating the mapping, engineering, architectural, planning, surveying, environmental, construction monitoring and materials testing staff, we are able to provide a wealth of experienced talent, bringing the best minds and proven methods to every job.

SECTION .02

Projects and Goals

THRASHER

WVDEP AML Canyon Refuse

Client Contact:

Mr. Darren Bennett
101 Cambridge Place | Bridgeport, WV 26330
304-842-1900

The Canyon Refuse and Dump project was a site Thrasher worked on in Morgantown, WV. This project included a large scope, from mobilizing equipment to re-vegetating disturbed areas. To accomplish everything within the scope of this project, Thrasher prepared the site (including clearing and grubbing), constructed and installed support areas, and maintained access roads. Additionally, the team constructed and installed drainage control items to convey stormwater safely off-site through channels, culverts, and outlet protection. Thrasher also constructed and installed wet or modified mine seals, re-graded the refuse sites, backfilled highwalls, and ensured sediment control compliance with the approved NPDES permit.

WVDEP AML Lyons Landslide

Client Contact:

Mr. Gregory Smith, PE
101 Cambridge Place | Bridgeport, WV 26330
304-842-1900

The Lyons residence, located off of route 19 in Clarksburg, suffered a two-acre slide mass above and behind the residence. The mass was composed of strip mine spoil and natural slip-prone material. The Thrasher Group was hired to correct the landslide on the property within state timeframes.

To accomplish this task, Thrasher prepared the site by clearing and grubbing and then disposing of debris. The team then constructed a soldier pile and concrete lagging retaining wall with appurtenances to stabilize the slope above the existing residence and pond. Additionally, underdrains and channels were installed to carry water safely through or around the slip area. Thrasher also regraded the site to the lines and grades shown on the plans, revegetated disturbed areas, and made sure sediment control was in compliance with the approved NPDES permit.

WVDEP AML Nutter Run

Client Contact:

Eric Simpson, Northern Emergency Engineer
101 Cambridge Place | Bridgeport, WV 26330
304-842-1900

Nutter Run was the site of an emergency AML landslide. The Thrasher Group mobilized the necessary equipment and personnel to complete the project within state timeframes with a construction cost of \$954,750.

Some of the major steps of the project included the following: site preparation (clearing and grubbing, removing existing structures and debris), construction and installation of support areas, maintenance of access roads, construction and installation of drainage control items to convey stormwater off-site, backfilling highwalls, and re-vegetation of disturbed areas.

WVDEP AML

Owl Creek Highwall #2

Client Contact:

Mr. Gregory Smith, PE
101 Cambridge Place | Bridgeport, WV 26330
304-842-1900

This Morgantown, WV project involved three main sites which includes dangerous highwalls with heights between 20 and 70 feet, AMD water impoundments on highwall benches, exposed refuse on Booths Creek stream bank, open and collapsed portals, and existing non-functioning wet mine seal.

The scope of work included regrading the highwall bench and adjoining spoil piles to reclaim the highwalls, installing new or replacing the existing wet/modified mine seals for the portals producing AMD, and installing bate gates in the open portals. Additionally, Thrasher installed underdrains or seep collectors to eliminate ponding areas and construct conveyances to safely transport stormwater and mine water in and around the site. An Army Core of Engineers permit was applied for stream bank restoration/repair of Booths Creek and a temporary construction access across the stream. The project site covered a total area of 24.5 acres and reclamation included \pm 113,000 cubic yards of earthwork.

WVDEP AML Lambert's Run Site #7

Guardians of the West Fork
Mr. John Eleyette
830 Benoni Avenue | Fairmont, WV 26554
304-627-1019

This project located in Clarksburg, WV involved 3 wet-seal portals that drain into a 0.7 acre impoundment. The three portals discharge approximately 500 to 3,000

gallons per minute of iron laden water into the main stem of Lambert Run. This project is another in a series of projects aimed at removing Lambert Run (WV MW-16) from the state's 303(d) list of impaired watersheds. This is a project which will combat acid mine drainage emanating from three portals in the central region of the Lambert Run watershed.

Thrasher's plan for the project included, constructing, aeration channels and approximately 4 acres of aerobic wetlands to provide passive treatment of AMD. The proposed treatments have been designed to remove approximately 80% of the acid load.

WVDEP AML Ridgeway

Mr. Eric Simpson, Northern Emergency Engineer
101 Cambridge Place | Bridgeport, WV 26330
304-842-1900

Ridgeway, in Bridgeport, was the site of an AML emergency landslide that The Thrasher Group repaired. Our team engineered the design of the slip remediation and was responsible for all necessary materials to accomplish that design, from shop drawings to a detailed construction schedule. Thrasher provided all necessary materials and labor for this project. The final result of the project was 1 Soil Nail Wall ~36' and 6,300 cubic yards of Earthwork.

WVDEP AML Laurel Run #1

Client Contact:

Mr. Gregory Smith, PE
101 Cambridge Place | Bridgeport, WV 26330
304-842-1900

This project site consisted of seven sections of highwall that totaled approximately 5,700 feet in length and averaged 20 feet in height. There were three collapsed portals adjacent to one another discharging approximately 25 gpm. One open portal entrance measured 2 foot by 3 foot and had no known discharge associated with it. Approximately 230 feet of abandoned railroad tracks remained on the project site and they did not connect to any existing tracks. The project site covered a total area of six acres and suffered from a lack of vegetation and toeing into Laurel Run.

WVDEP AML **Owl Creek Highwall #2**

This Morgantown, WV project involved three main sites which includes dangerous highwalls with heights between 20 and 70 feet, AMD water impoundments on highwall benches, exposed refuse on Booths Creek stream bank, open and collapsed portals, and existing non-functioning wet mine seal.

The scope of work included regrading the highwall bench and adjoining spoil piles to reclaim the highwalls, installing new or replacing the existing wet/modified mine seals for the portals producing AMD, and installing bate gates in the open portals. Additionally, Thrasher installed underdrains or seep collectors to eliminate ponding areas and construct conveyances to safely transport stormwater and mine water in and around the site. An Army Core of Engineers permit was applied for stream bank restoration/repair of Booths Creek and a temporary construction access across the stream. The project site covered a total area of 24.5 acres and reclamation included \pm 113,000 cubic yards of earthwork.

WVDEP AML

Swamp Run Refuse #1

Client Contact:

Buckhannon River Watershed Association
112 Fayette Street | Buckhannon, WV 26201
304-472-3317

This project, located in Alton, WV, involved a large ferric iron “mushroom” that takes up approximately 0.87 acres. This was caused by acid mine drainage (AMD) emanating from an entombed refuse fill above an unnamed tributary of Swamp Run. The Swamp Run #1 passive AMD treatment system utilized open limestone channels channeling the toxic water to a forebay, which controls larger storm event flow and separates that flow between primary and secondary limestone leech beds. These beds are self-flushing with an automated inline water level control structure. The treated water from the leech beds will then discharge into flushing ponds for solids removal before being conveyed into a wetland finishing pool prior to being released back into the unnamed tributary.

The proposed treatments have been designed to remove approximately 80% of the acid load and should have a lifespan of 20 years.

A critical step in meeting your goals is first ensuring we understand them. Thrasher's team has thoroughly reviewed the Expression of Interest request and is confident in our ability to deliver the highest-quality solutions to your problems. We are capable of meeting each goal/objective you have outlined and feel strongly that you will be satisfied with the outcomes you receive.

In order to meet your expectations for these projects, it is necessary to have multiple teams to perform the work. We have identified four two-person teams that are available for these projects. These teams will work under RJ as a Program Manager and single point of contact to you. If selected, it is our intention to hire additional staff to further strengthen our resources.

Our team is prepared to complete all of the following services:

- > National Environmental Policy Act (NEPA) consultations and documentation
- > Public Participation
- > Infrastructure Investment Jobs Act (IIJA) compliance
- > Determine legal ownership of properties
- > Obtain exploratory and construction rights of entry
- > Provide legal documentation to substantiate legal ownership findings
- > Provide current mapping, perform survey and other related services
- > Perform Site and Geotechnical Investigations
- > Design temporary and permanent access or accesses for construction and future maintenance
- > Slope stabilization
- > Design multiple portal seals and regrades
- > Design reclamation of exposed coal refuse and mine spoil
- > Design of drainage conveyances, including drainage channels, underdrains, and/or other controls to safely convey water off-site
- > Design reclamation of underground mine fire
- > Construction quality assurance and quality control (QA/QC)
- > Provide resident project representative/inspector
- > Prepare daily construction activity logs summarizing activities
- > Provide engineering support and services throughout construction
- > Provide Engineers certification report

We understand your goals for the eight projects in this contract and will handle them in the following manner:

► GOAL/OBJECTIVE 2.1

The Thrasher Group will meet with the WVDEP on site to conduct a site walk through and identify areas in need of remediation and the type of remediation. Once completed, Thrasher will prepare a proposal and estimate for each project.

► GOAL/OBJECTIVE 2.2

The Thrasher Group will conduct an environmental assessment (EA) meeting the requirement of WVDEP-AML and OSMRE. This EA, will at a minimum, include correspondence and consideration to the US Fish and Wildlife Agency, the Army Corps of Engineers, Division of Natural Resources, State Historic Preservation Office, and other agencies necessary to meet the NEPA and IJA environmental requirements.

Thrasher will also develop plans and specifications in a manner that will comply with the IJA requirements. This may include, but is not limited to, American Iron and Steel requirements, disadvantaged business requirements and other necessary considerations.

The Thrasher Group will conduct a thorough record search to determine the legal ownership of any properties associated with the project. This may include tax record searches, deed research, property corner locations, legal title searches, owner interviews, and other necessary research. Thrasher will assist with any necessary right-of-way or easement preparation, deed verification, or other document preparation necessary to substantiate or acquire legal rights needed to complete the projects.

► GOAL/OBJECTIVE 2.3

The Thrasher Group will work with WVDEP-AML to develop a cost-effective approach to solve the issues related to these sites. Thrasher will develop plans and specifications for each project that will allow a contractor to efficiently complete the work. We will provide detailed plans to reclaim mine portals, drainage controls and systems, slope stabilization, coal refuse reclamation, stream restoration, subsidence repair, storm water and erosion and sediment control, regrade and revegetation, and all other conditions encountered on the project sites. Finally, we will provide specifications that will require contractors to meet the standard of WVDEP-AML. Standard WVDEP-AML specifications and other materials will be incorporated into the documents.

► GOAL/OBJECTIVE 2.4

The Thrasher Group will prepare and assist with the acquisition of all permits required to complete these projects. This may include, but is not limited to, NPDES stormwater construction permits, Army Corps of Engineers Nationwide or Individual Permits, and/or other necessary permits.

We will develop plans and specifications outlining the contractor requirements during construction and maintenance periods. These specifications will ensure that the permits are well maintained and meet the requirements for release. Thrasher will assist with the preparation of any documents needed to maintain or release the permits.

► GOAL/OBJECTIVE 2.5

The Thrasher Group will provide an experience resident project representative (RPR). The RPR will develop daily field activity reports that can be provided in real time or at preferred intervals. Project Managers and/or Professional Engineers will conduct site visits on a regular basis and at critical construction points to ensure quality construction and adherence to the plans and specifications.

Thrasher's in-house Materials Testing Division will provide necessary field representatives to ensure quality assurance and control specifications are being adhered to. Our lab and field personnel can conduct most all necessary material testing practices including but not limited to soil and stone compaction testing and analysis of materials, moisture content testing, concrete and/or grout testing, and many others.

Richard "RJ" Hovatter will be the Program Manager overseeing four two-person teams for these projects with Chad Biller providing quality control. They will be supported by a team of qualified staff to perform the necessary tasks such as survey, geotechnical engineering, design, permitting, and bid documents as required for a complete design set and project.

RJ will communicate with the AML team to determine the preferred timing for each project and will work with you to establish the most realistic and efficient schedule for all projects.

The general project approach we will follow for your project is outlined below:

Step 1 | Site Visit

Our assembled team of engineers and technicians will conduct a site visit. This group will evaluate the project conditions and identify and document potential problem areas. Thrasher will call the necessary utilities prior to being on-site to help identify any known utility locations. We will coordinate with your team and any identified stakeholders to take all the facts into consideration during this process.

Step 2 | Land Rights Acquisition

Thrasher will identify property owners within the project area. This will be completed through deed search. We will also reach out to property owners to obtain the needed permissions to be on property to design and construct the projects.

Step 3 | Survey

Thrasher will survey the sites for existing structures, utilities, topography, mine portals, and/or other identified items on site. Survey will include, but not limited to, drone, flight, and survey team.

Step 4 | Conceptual Design and Report

Thrasher will prepare a conceptual design for the project at hand. Where applicable, we will also provide design alternatives for consideration. We will then prepare a written report of the conceptual designs and outline any issues.

Step 5 | Construction Documents

Our team will provide design solutions and construction documents to the WVDEP-AML for the project. These plans will be carried forward to final design based upon the conceptual design report. In addition, with Thrasher's experience working on various similar projects, a construction safety and phasing plan, as required, will be developed and reviewed with the WVDEP-AML to ensure an efficient and safe project during construction.

We will complete the final design documents based upon comments received and conclusions throughout the design review process. Our field evaluations and design approach will specifically address these issues in the construction documents.

Step 6 | Cost Estimates

Our project team will provide itemized cost estimates at the following stages: conceptual design, preliminary design, and final design.

Step 7 | Bid Process

We will assist the WVDEP-AML in preparation of the bid documents, attend pre-bid meetings, and assist in issuance of addenda.

Step 8 | Construction Administration

The project team will review project submittals, attend project meetings, and provide a Resident Project Representative to inspect the construction being completed. The project team will also provide final punch list inspection at project completion.

Thrasher will also develop a program to keep your team abreast of potential construction issues.

Step 9 | Project Close Out

Upon completion of the project, the Thrasher team will review and comment or approve contractor's as-builts and final quantities. All permits will be closed/terminated at the completion of the warranty period.

SECTION .03

Required Forms

THRASHER

DESIGNATED CONTACT: Vendor appoints the individual identified in this Section as the Contract Administrator and the initial point of contact for matters relating to this Contract.

<p>*RPEs other than Civil and Mining must provide supporting documentation that qualifies them to supervise and perform this type of work.</p>									
10. HAS THIS JOINT-VENTURE WORKED TOGETHER BEFORE? <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO - Not Applicable									

11. OUTSIDE KEY CONSULTANTS/SUB-CONSULTANTS ANTICIPATED TO BE USED. Attach "AML Consultant Qualification Questionnaire".

[illegible]

12.	<p>A. Is your firm's personnel experienced in Abandoned Mine Lands Remediation/Mine Reclamation Engineering?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher performs engineering design services to the WV DEP for drainage, portal seals, highwall and other remediation projects, as well as water line and water treatment plant projects related to AML. Numerous projects involving land remediation, storm water drainage, slip repair, mass grading in relations to site development and highway projects are engineered by the firm on a regular basis.</p> <p>NO</p>
	<p>B. Is your firm experienced in Soil Analysis?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher maintains an AASHTO Certified materials testing lab at both the Bridgeport and Beckley offices. Soil analysis experience is specifically in gradation and classification.</p> <p>NO</p>
	<p>C. Is your firm experienced in hydrology and hydraulics?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Throughout the state, Thrasher has done planning and design of bridges for the West Virginia department of highways and the design of multiple private and municipal development projects located within floodplains. Thus, Thrasher has extensive experience in hydrology. We also have a vast amount of experience in hydraulic modeling for water and wastewater projects throughout West Virginia</p> <p>NO</p>
	<p>D. Does your firm produce its own Aerial Photography and Develop Contour Mapping?</p> <p><input checked="" type="checkbox"/> Description and Number of Projects: Thrasher acquires aerial imagery using in-house resources on smaller area projects. We own and operate three UAS (unmanned aerial systems) for a variety of imagery missions for projects up to approximately 500 acres. For large mapping projects, we use commercial flying service. Thrasher has three FAA Certified pilots. Thrasher has expertise and software in-house and routinely performs aero triangulation, planimetric compilation, surface modeling, contour mapping and digitally rectified imagery. Thrasher has mapped and flown hundreds of projects within the last year.</p> <p>NO</p>
	<p>E. Is your firm experienced in domestic waterline design? (Include any experience your firm has in evaluation of aquifer degradation as a result of mining.)</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher has designed more water line systems than any other West Virginia firm. Projects include new systems, extensions, and replacements of water line distribution systems, many of which have been affected by AML. Design of the projects includes lines, booster stations, water treatment plants, and storage facilities. Thrasher's analysis and design also includes improvements and alternatives for water sources deemed ground water under the direct effect of surface water.</p> <p>NO</p>
	<p>F. Is your firm experienced in Acid Mine Drainage Evaluation and Abatement Design?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher has been awarded and has successfully completed numerous reclamation projects for the WV DEP related specifically to acid mine drainage and abatement, as well as multiple passive treatment systems designed to watershed protection groups. The Charleston, WV branch of our company designed and award-winning water treatment plant for Martinka mines in Marion County, West Virginia to treat mine drainage.</p> <p>NO</p>

13. PERSONAL HISTORY STATEMENT OF PRINCIPALS AND ASSOCIATES **RESPONSIBLE FOR AML PROJECT DESIGN** (Furnish complete data but keep to essentials)

NAME & TITLE (Last, First, Middle Int.)	YEARS OF EXPERIENCE		
	YEARS OF AML DESIGN EXPERIENCE:	YEARS OF AML RELATED DESIGN EXPERIENCE:	YEARS OF DOMESTIC WATERLINE DESIGN EXPERIENCE:
Richard "RJ" Hovatter, PE Principal and Project Manager	16	16	16

Brief Explanation of Responsibilities

As Principal and Project Manager, RJ has completed the site design, grading, storm water and erosion and sediment control plans for over twenty private and commercial development. He has also managed over 35 Abandoned Mine Land Emergency and Abandoned Mine Land projects in West Virginia, Maryland and Ohio. RJ has also been the lead on numerous slip remediation projects.

EDUCATION (Degree, Year, Specialization)

Bachelor of Science, 2002, Civil Engineering Technology – Fairmont State University

MEMBERSHIP IN PROFESSIONAL ORGANIZATIONS

N/A

REGISTRATION (Type, Year, State)

Professional Engineer, 2009, West Virginia #018460

14. PROVIDE A LIST OF SOFTWARE AND EQUIPMENT AVAILABLE IN THE PRIMARY OFFICE WHICH WILL BE USED TO COMPLETE AML DESIGN SERVICES

The Thrasher Group, Inc. will design work for AML utilizing one of the largest networks of computer aided design (CAD) equipment, software and trained personnel in the state of West Virginia.

Connected through a virtual private network, our cad staff has the ability to share necessary plans among our locations. This will allow work designed for AML to be prepared and updated at the office location that best meets the needs of the scope of services.

Civil 3D, Carlson and Microstation V8 Software is utilized at 35 CAD stations throughout our locations. Additionally, equipment includes 10 large format (Size E) plotters and 5 large format plotter / scanners. CAD plans are prepared by both dedicated cad employees and by staff engineers and engineering technicians in each of the firm's offices.

Thrasher also utilizes top-of-the line survey equipment. Our survey work is accomplished with global positioning systems (GPS) and electronic distance measuring (EDM) survey stations with data gathering capabilities. The survey crews and office support staff generate mapping deliverables in virtually any digital format referenced to specified projection systems.

Additional survey services include: high accuracy monumentation, astronomic observations / orientation, NGS blue booking, hydrographic, terrestrial scanning, 3D asbuilts, 3d monitoring, sub-surface utility location / designation. The field crews are all equipped with late model four-wheel drive vehicles stocked with the most modern equipment available to perform professional land surveying services.

- 111 TRIMBLE GNSS UNITS
- 68 TRIMBLE ROBOTS
- 2 PRECISE DIGITAL FIRST ORDER LEVELS WITH INVAR RODS
- 39 LEICA, NIKON OR TOPCON TOTAL STATIONS ALL MANAGED BY
- TRIMBLE TSC3 FIELD COMPUTERS
- 2 REMOTE CONTROLLED/UNMANNED MAPPING AERIAL PLATFORM

PAPERWORK REDUCTION STATEMENT

The Paperwork Reduction Act of 1995 (44 U.S.C 3501) requires us to inform you that: Federal Agencies may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid OMB control number. This information is necessary for all successful bidders prior to the distribution of AML funds, and is required to obtain a benefit.

Public reporting burden for this form is estimated to range from 15 minutes to one hour, with an average of 30 minutes per response, including time for reviewing instructions, gather and maintaining data, and completing and reviewing the form. You may direct comments regarding the burden estimate or any other aspect of this form to the Information Collection Clearance Officer, Office of Surface Mining Reclamation and Enforcement, 1849 C Street, NW, Room 4559, Washington, DC 20240.
