**(Class 371) 41,000 GVWR Single Axle Dump Truck w/ Snow Plow and**  
**V-Box Spreader**

---

**8.2 Reports:** Vendor shall provide quarterly reports and annual summaries to the Agency showing the Agency's items purchased, quantities of items purchased, and total dollar value of the items purchased. Vendor shall also provide reports, upon request, showing the items purchased during the term of this Contract, the quantity purchased for each of those items, and the total value of purchases for each of those items. Failure to supply such reports may be grounds for cancellation of this Contract.

**8.3 Contract Manager:** During its performance of this Contract, Vendor must designate and maintain a primary contract manager responsible for overseeing Vendor's responsibilities under this Contract. The Contract manager must be available during normal business hours to address any customer service or other issues related to this Contract. Vendor should list its Contract manager and his or her contact information below.

# SOLICITATION NUMBER: CRFQ DOT2400000038

## Addendum Number: 3

The purpose of this addendum is to modify the solicitation identified as CRFQ DOT2400000038 (“Solicitation”) to reflect the change(s) identified and described below.

### Applicable Addendum Category:

- Modify bid opening date and time
- Modify specifications of product or service being sought
- Attachment of vendor questions and responses
- Attachment of pre-bid sign-in sheet
- Correction of error
- Other

### Additional Documentation:

Vendor Questions and Responses

Bid Opening remains 11/30/2023 at 1:30pm

### Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.
2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

**Technical questions DOT2400000038:**

1. **3.3.1.1 Moldboard construction.** The specification calls for weather resistant steel equivalent to corten. Would the State consider modifying the specification to require a minimum of 201 grade stainless steel? The manufacturer of corten advises against using corten material in areas where salt is more prevalent. Since a plow moldboard face is in continued contact with plowed material, the self-healing properties of weathering steel such as corten continue to erode. In addition, winter maintenance materials such as road salts and calcium chloride can expedite rust in corten on the plow face. If the moldboard sheet was stainless steel, the front face would remain in natural finish and provide the State with long-term durability.

**Answer: Will accept Corten, Strenx or 304 stainless.**

2. **3.2.1.7 Stainless Steel Dump Body-** Would a 1 piece AR400 ¼" thick floor be acceptable as it has overlapping hardness characteristics as AR450 and is a material that has been utilized by the state for many years?

**Answer: No leave as written.**

3. **3.2.3.1 – Tailgate Design.** Would a tailgate design same as current bodies be acceptable as FMVS 108 with 45 degree visibility left and right of the vehicle only applies if only 1 lamp is installed? "Signals from lamps mounted on the left side of the vehicle shall be visible through a horizontal angle of 45 deg. to the left and signals from lamps mounted on the right side of the vehicle shall be visible through a horizontal angle of 45 deg. to the right." For both wide and narrow vehicles, MVMA interprets the 45 degree left visibility requirement as applying only to the outboard side of the left turn signal lamp, and a 45 degree right visibility requirement only to the outboard side of the right turn signal lamp. This would make the flush tailgate requirement not needed since a minimum of 1 light will be installed in each corner post. A tailgate design the same as current bodies eliminates possibility of material hang up in between the tailgate and rear bolsters and still complies with FMVS 108.

**Answer: Will accept non flush tailgate design.**

4. **3.2.3.1 Tailgate Design.** Would a light box to extend lights to edge of tailgate be acceptable ILO a rear corner post extending to rear of tailgate? This would allow tailgate latches to remain external for ease of maintenance and can be easily cleared of debris which could cause inset tailgate latches to become jammed with material. This design would retain the standard tailgate design while allowing lights to be seen from both sides of the body.

**Answer: Light box extension will not be needed as non-flush tailgate will be accepted.**

5. 3.2.1.11 – The specification calls for, “The long sills are of a one piece trapezoid design, fabricated”. Would a two piece fabricated design which would be the same as current bodies be acceptable? This allows us to create a material overlap at the bottom of the longsills a total material thickness of ½” at the truck frame rail whereas the way the spec is currently written the overlap would only be ¼” at the truck frame rail.  
**Answer: No leave as written.**
  
6. 3.5.1.1- Would the state accept an auger that has a poly bushing on gearcase end and an idler bearing on the idler end of the auger? This would be the same as current builds for the state.  
**Answer: Will accept poly or nylon.**
  
7. 3.2.1.11- The specification calls for 4” wide at the bottom of the sill. Would a sill that is 8” tall and approximately 3” wide be acceptable as it matches current bodies being received by the state?  
**Answer: No leave as written.**
  
8. 3.2.3.13.1 The specification calls for 4” channels to mount the pull-out ladder. Would the state consider a 3-step pullout ladder the same as current bodies be acceptable if it still had a bolt on cover?  
**Answer: Will accept**
  
9. 3.3.9.14 – “Each bumper wing is to be constructed using 10” H.D. Insert LB./ft...”. Would formed channel bumper wings be acceptable? This allows for holes and cutouts to be laser cut for a clean finish profile.  
**Answer: No leave as written.**
  
10. 3.2.4.11- Would a cradle hinge block the same as current builds be acceptable? Picture below  
**Answer: No leave as written.**
  
11. 3.2.4.11- Would a cradle with formed angle construction be acceptable ILO structural channel as it has higher tensile strength and allows for material drop out to keep the blocks clear and allows water to drain. This design is also currently being used by the state. (Picture Below)  
  
**Answer: No leave as written.**
  
12. 3.7.8.5 – “X64 Range ISO 16028 flat face pressure eliminator quick couplers...” Can the State provide specific or preferred brand and part numbers for the couplers being requested?

**Answer: No specific brand is being requested. The product used must meet the flow rate set by the body manufacturer.**

3.1.11.5 Transmission (TCM) Transmission Control Module shall be located inside cab.

Q. Would a TCM mounted at the top of the firewall against the cab under the hood be acceptable? The TCM is well protected from corrosion behind the bulkhead module.

**Answer: No leave as written.**

3.1.4.7 Calls out that the driver and passenger seats need to be leather.

Q. Would the division consider accepting modura cloth or vinyl?

**Answer: Will accept cloth or leather.**

3.1.21.2.D Batteries shall have aluminum battery box with plastic or aluminum lid with battery pad for vibration and corrosion.

Q. Will the division accept a stamped steel painted battery box that meets all other requirements if a 7-year replacement warranty due to rust through corrosion is included in our bid?

**Answer: Will accept stamped steel with 7 year corrosion or rust through warranty, aluminum or stainless steel.**

3.1.6.2 Requires that all mirror arms, hardware and fasteners be stainless steel.

Q. Will the division accept painted or powder coated metal arms if fasteners meet requirements and a 7-year replacement warranty due to rust through corrosion is included in our bid?

**Answer: Will accept chromed plated steel or stainless arms.**

3.1.18.9 Front brakes: shall be full air powered disc brakes.

Q. Will the division accept full air powered disc or drum brakes on the front?

**Answer: Will accept disc or drum.**

3.1.21.5.C Halogen head lamps.

Q. Will the division accept LED head lamps.

**Answer: Will accept LED or halogen head lamps.**

**Question 1 – 3.1.10.2 Will the state accept a 80 gal fuel currently in service.**

**Answer 1 – Will accept 80 gallon fuel tank.**

**Question 2 – 3.7.13.1 Warranty start date to start as units are placed in service, is this acceptable as the orders won't come in for a period of time.**

**Answer 2 – Warranty will start as units are put into service.**
