40. BACKGROUND CHECK: In accordance with W. Va. Code § 15-2D-3, the State reserves the right to prohibit a service provider's employees from accessing sensitive or critical information or to be present at the Capitol complex based upon results addressed from a criminal background check. Service providers should contact the West Virginia Division of Protective Services by phone at (304) 558-9911 for more information.

41. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open hearth, basic oxygen, electric furnace, Bessemer or other steel making process.
- c. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
 1. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
 2. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

42. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a “substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

43. INTERESTED PARTY SUPPLEMENTAL DISCLOSURE: W. Va. Code § 6D-1-2 requires that for contracts with an actual or estimated value of at least \$1 million, the Vendor must submit to the Agency a disclosure of interested parties prior to beginning work under this Contract. Additionally, the Vendor must submit a supplemental disclosure of interested parties reflecting any new or differing interested parties to the contract, which were not included in the original pre-work interested party disclosure, within 30 days following the completion or termination of the contract. A copy of that form is included with this solicitation or can be obtained from the WV Ethics Commission. This requirement does not apply to publicly traded companies listed on a national or international stock exchange. A more detailed definition of interested parties can be obtained from the form referenced above.

44. PROHIBITION AGAINST USED OR REFURBISHED: Unless expressly permitted in the solicitation published by the State, Vendor must provide new, unused commodities, and is prohibited from supplying used or refurbished commodities, in fulfilling its responsibilities under this Contract.

45. VOID CONTRACT CLAUSES: This Contract is subject to the provisions of West Virginia Code § 5A-3-62, which automatically voids certain contract clauses that violate State law.

46. ISRAEL BOYCOTT: Bidder understands and agrees that, pursuant to W. Va. Code § 5A-3-63, it is prohibited from engaging in a boycott of Israel during the term of this contract.

DESIGNATED CONTACT: Vendor appoints the individual identified in this Section as the Contract Administrator and the initial point of contact for matters relating to this Contract.

Introduction

Riverside Technologies, Inc. (RTI) is proud to present to the State of West Virginia Department of Administration a response to RFQ# CRFQ 0323 WWB2500000005. This proposal contains both server and network configurations.

Proposed Solution for Appendix A: Virtualization Hosts (Section 3.1.1)

Proposed Virtualization Hosts

A total of six HPE DL325 Gen11 servers are being proposed to fulfill the needs requested in section 3.1.1 of the RFQ. These servers are the current generation of HPE's ProLiant DL325 server platform, which is a 1U/1CPU server platform utilizing AMD's 4th and 5th generation EPYC CPUs. This server is a perfect platform for virtualization due to its high density and extremely high core count potential while still maintaining the capability to expand with a vast array of components and technologies to fit nearly any use case.

We believe that the server configuration proposed for section 3.1.1 meets all requirements listed in the RFQ.

Configuration Summary for the Proposed Virtualization Hosts

- 6x HPE DL325 Gen11 Servers

Proposed Solution for Appendix A: AI Host (Section 3.1.2)

Proposed AI Host

An HPE DL385 Gen11 server is being proposed to fulfill the needs requested in section 3.1.2 of the RFQ. This server is the current generation of HPE's ProLiant DL385 server platform, which is a 2U/2CPU server platform utilizing AMD's 4th and 5th generation EPYC CPUs. The specific server chassis option utilized in this proposal is specifically designed for use with GPUs and houses the GPU units in the front of the server, improving airflow and cooling. It is a perfect platform for AI due to its ability to house up to four double-wide GPUs and can be expanded with a vast array of components and technologies to fit nearly any use case.

We believe that the server configuration proposed for section 3.1.1 meets all requirements listed in the RFQ with the exception of the power supply wattage. HPE does not make a 3000W+ power supply. The 1600W power supplies included in this configuration have more than enough capacity to run the system as configured. If only a single power supply powered, the system should be able to function in most situations. Near-100% utilization with full fan speed may slightly exceed the capabilities of a single PSU. This system does have the capability of being expanded to 4x 2200W power supplies if future needs such as additional GPUs or other components that require more power.

Configuration Summary for the Proposed AI Host

- 1x HPE DL385 Gen11 GPU Chassis Servers
 - 2U / 2CPU AMD based HPE server platform
 - PCIe Gen5 support
 - 24 DIMM slots
 - 2x AMD EPYC 9354 CPU per host
 - 32 cores / 64 threads
 - 3.25 GHz base clock speed
 - Up to 3.84 GHz max boost clock speed
 - 256 GB L3 cache
 - 280W TDP
 - 12 memory channels
 - 12x 128 GB DIMMs per host (1536 GB total)
 - Dual rank DDR5 6400 MHz
 - 8x 3.84 TB NVMe Gen4 Mainstream Performance SSDs per host
 - U.3 form factor
 - Hot swappable
 - Read Intensive rating
 - Not managed by a storage controller – no hardware raid available
 - 1x Broadcom VCM57416 dual port 10GBASE-T per host
 - 1x Broadcom 57504 dual port 10/25Gb SFP28 NIC per host
 - Supports a variety of optics
 - 4x 25 Gb short range transceivers (per host) included in quote
 - 1x Nvidia H100 NVL 94 GB PCIe GPU per host

- 94 GB HBM3 Video RAM
 - Dual width card
- 2x 1600W Power Supplies per host
 - Hot swappable
 - High voltage (200-240V) input only
- 1x ILO Advanced license per host
 - Provides remote hardware and power management & KVM
 - Can be used to control firmware patching
- 1x Greenlake Compute Ops Management (COM) license per host
 - Inventory management
 - Automation of server lifecycle operations
 - Firmware baseline management and notifications
 - Monitoring and support
 - Auto case creation
- All hosts covered by HPE's Tech Care Basic
 - 5 year pre-paid term
 - Provides 8x5 phone support
 - Provides access to support portal including support documents and downloads
 - Next Business Day parts replacement once issue is identified
 - Can be extended (generally available for a minimum of 7 years, oftentimes longer)
