RFQ No. CEOI 0403 DBS25*1STATE OF WEST VIRGINIA
Purchasing Division**PURCHASING AFFIDAVIT**

MANDATE: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

WITNESS THE FOLLOWING SIGNATURE:Vendor's Name: The Thrasher Group, Inc.Authorized Signature:  Date: October 7, 2024State of West VirginiaCounty of Harrison, to-wit:Taken, subscribed, and sworn to before me this 7 day of October, 2024.My Commission expires July 7, 2029, 20 .

CERTIFICATION AND SIGNATURE: By signing below, or submitting documentation through wvOASIS, I certify that: I have reviewed this Solicitation/Contract in its entirety; that I understand the requirements, terms and conditions, and other information contained herein; that this bid, offer or proposal constitutes an offer to the State that cannot be unilaterally withdrawn; that the product or service proposed meets the mandatory requirements contained in the Solicitation/Contract for that product or service, unless otherwise stated herein; that the Vendor accepts the terms and conditions contained in the Solicitation, unless otherwise stated herein; that I am submitting this bid, offer or proposal for review and consideration; that this bid or offer was made without prior understanding, agreement, or connection with any entity submitting a bid or offer for the same material, supplies, equipment or services; that this bid or offer is in all respects fair and without collusion or fraud; that this Contract is accepted or entered into without any prior understanding, agreement, or connection to any other entity that could be considered a violation of law; that I am authorized by the Vendor to execute and submit this bid, offer, or proposal, or any documents related thereto on Vendor's behalf; that I am authorized to bind the vendor in a contractual relationship; and that to the best of my knowledge, the vendor has properly registered with any State agency that may require registration.

By signing below, I further certify that I understand this Contract is subject to the provisions of West Virginia Code § 5A-3-62, which automatically voids certain contract clauses that violate State law; and that pursuant to W. Va. Code 5A-3-63, the entity entering into this contract is prohibited from engaging in a boycott against Israel.

RE: West Virginia Schools for the Deaf and Blind — Maintenance Building and Keller Hall Renovations

Dear Mr. Hager and Members of the Selection Committee:

Maintaining a facility that not only meets the educational needs of students but also provides a safe and comfortable home for them is an incredibly complex task. Whether it's renovations to a dormitory, providing efficient laundry facilities, or ensuring enough storage for the many needs of the campus, the West Virginia Schools for the Deaf and the Blind needs a partner who can handle a wide variety of projects. The Thrasher Group is the right firm for the job.

At Thrasher, educational design projects are a key piece of our portfolio. We have developed a dedicated K-12 team to serve schools across West Virginia, with the goal of helping our communities provide the best facilities and experiences for their students. Our architects and engineers will work with the WVSDB team under that same philosophy – finding solutions that help your campus and students thrive.

While we recognize that not every project on your to-do list is a typical school need, we have experience with all of the work you're looking to accomplish and will handle each task through the lens of an educational designer. The care and attention that goes into the secure entrance at Keller Hall and repairs to the running track – things we've done for countless schools – will be translated to the laundry facilities, maintenance building design, and additional renovations required. As we know from being on campus and getting to know the real needs behind these projects, your track project is not just any old track project. A track for your athletes has to be pristine. Your facility requires adaptive elements such as the running cable system for sprints – an component critical for the many students who will get to experience a track meet on your campus.

To that end, the safety of your students and staff will be at the forefront of our process. Not only will these needs be considered in our designs, but they will be paramount in our planning of the construction process. We understand the care and attention that must be paid with the construction of an occupied facility and the additional importance of this for your students and staff. We will work closely with the WVSDB personnel to ensure a construction plan that takes every need into consideration and coordinate with the selected contractor to put that plan into action.

With a dedicated team of K-12 experts, a staff experienced in all of your project needs, and an understanding of the specific requirements of working on your campus, The Thrasher Group is ready to hit the ground running because we have a great understanding of the "why" behind these projects. We appreciate the opportunity to share our qualifications with you and look forward to further discussing how Thrasher can be your partner now and for the long haul.

Sincerely,
The Thrasher Group, Inc.

THRASHER'S GOT IT

A critical step in meeting your goals is first ensuring that we understand your vision for the project. Thrasher's team has thoroughly reviewed the expression of interest request and we are confident in our ability to deliver the highest-quality solutions for your needs. We are capable of meeting each goal/objective you have outlined, and feel strongly that you will be satisfied with the outcomes you receive.

We understand your goals/objectives for renovations and updates on West Virginia Schools for the Deaf and the Blind's campus and will handle them in the following manner:

Goal/Objective 1: *The agency intends to design and install a storage building approximately 7,500 square feet, that meets current codes.*

- » A full-service school like the West Virginia Schools for the Deaf and the Blind undoubtedly has a long list of storage needs. Thrasher will work with WVSDDB personnel to identify exactly what needs are to be met within the new 7,500-square-foot storage building and will design a structure accordingly. Several key pieces will be taken into consideration for this project, with cost and functionality as two main drivers. For example, discussions around building type will be a focal point — Is a pre-engineered metal building similar to your existing facility/acceptable, or would a masonry structure be more durable?

Goal/Objective 2: *The agency intends to design and install running track repairs and upgrades to the existing track surface and supporting infrastructure.*

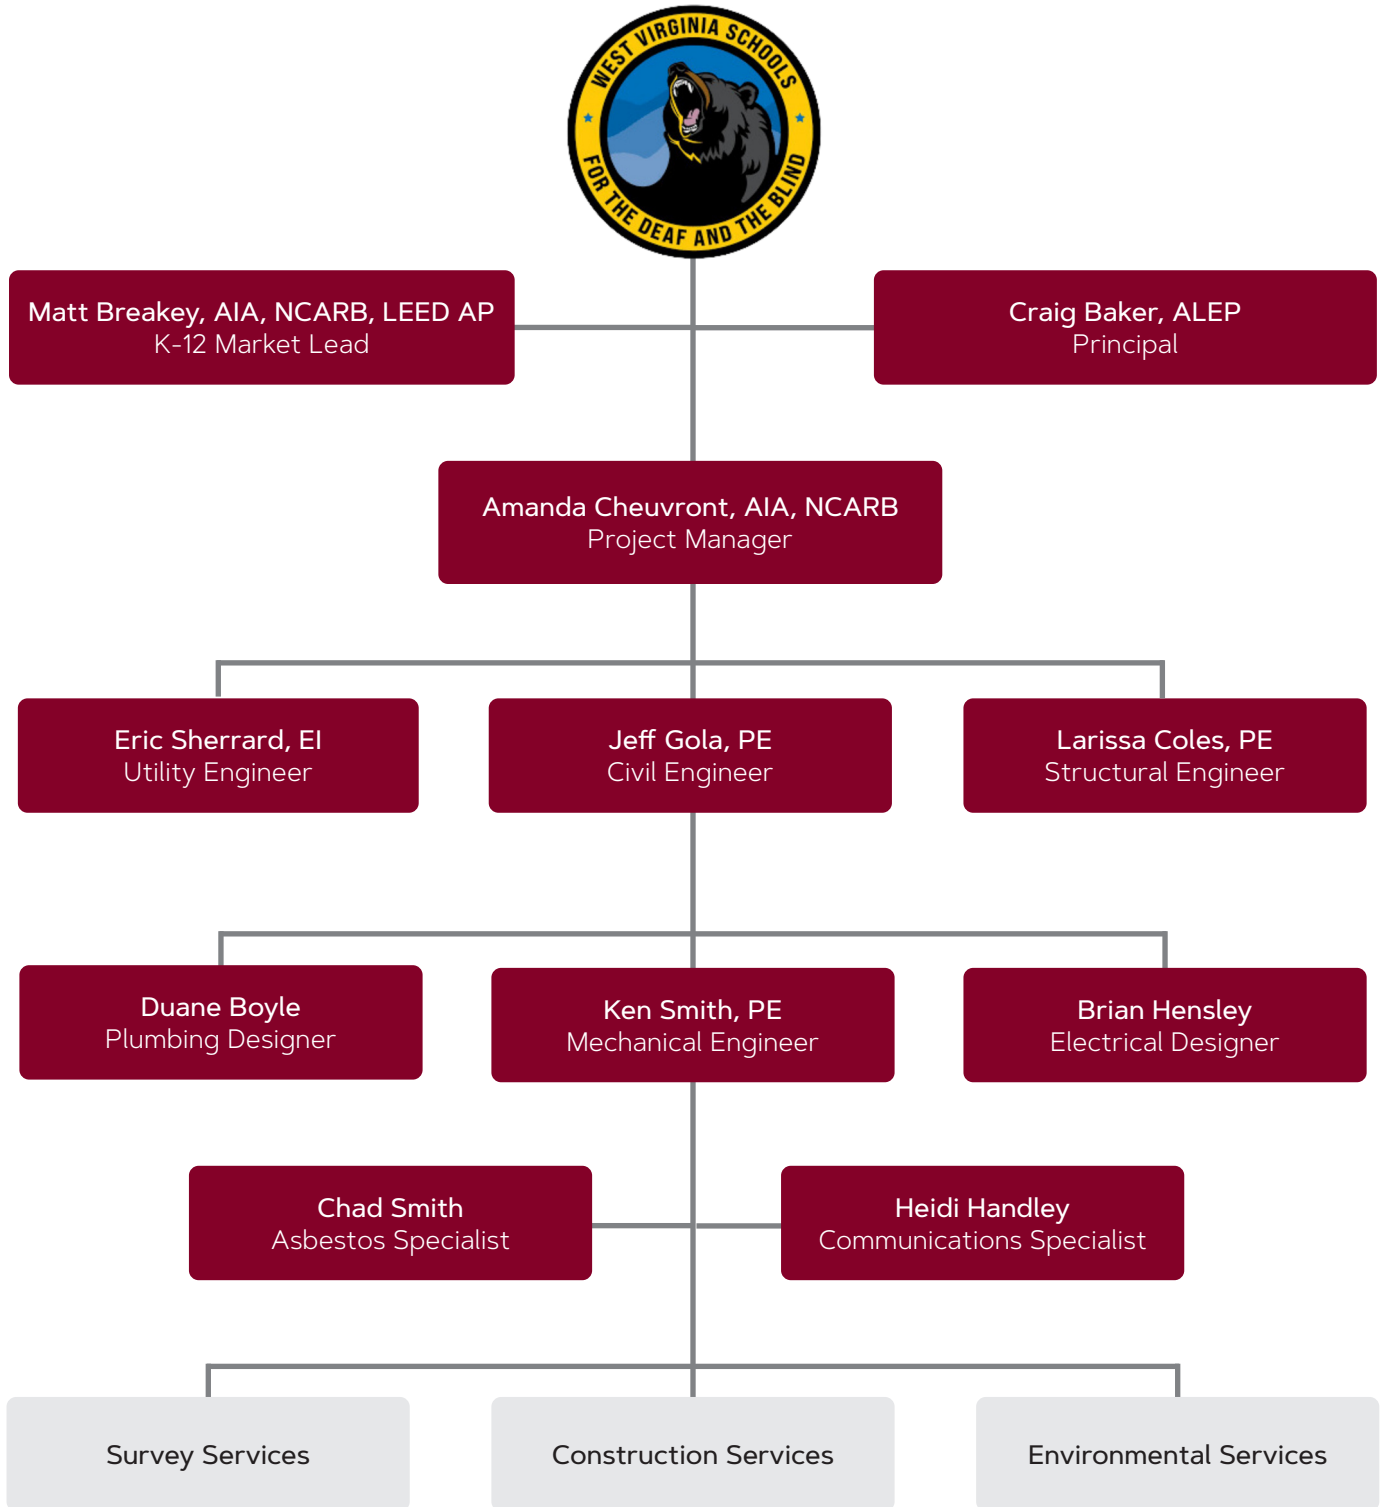

- » Athletic facilities are an increasingly prevalent piece of Thrasher's portfolio. We've worked with countless schools over the years to design new or upgrade existing tracks, turf fields, and more. Our in-house civil engineer, Jeff Gola, will lead this portion of work for the WVSDDB. He has an in-depth understanding of the elements required for success in track projects. Whether ensuring the appropriate grading of the site, reviewing stormwater and drainage plans, or creating a visually pleasing end product, he will take all components into consideration. Our team will also ensure we design a system that will meet the requirements for events for those with vision impairments, as eliminating cracks is imperative. We will also plan for the reuse of the existing cable lane guidance systems for the track sprinting areas.

Goal/Objective 3: *The agency intends to design and install sectional garage door replacements and renovate the laundry area at the Maintenance Building to meet current needs and codes.*

- » While not necessarily typical school components, Thrasher's team has handled a wide variety of laundry facilities and garage door replacements. We will provide a design that not only meets current codes, but is geared toward the WVSDDB's needs.

Goal/Objective 4: *The agency intends to design and install a new laundry space on the ground floor, update the plumbing infrastructure as required, replace exterior windows, perform masonry repairs, and build a secure building entrance at Keller Hall.*

- » The same principles will be applied to the new laundry facility in Keller Hall, keeping efficiency and staff needs at the forefront. Meanwhile, safety will lead the way for the building entrance project. This is a specialty of our K-12 team, having completed dozens of safe school entries across the state. We will evaluate the particular needs of your facility and students and create an entrance that keeps your dorm and its occupants as safe as possible.

PROFESSIONAL OVERVIEW

Craig Baker, ALEP, is an experienced designer and manager with an extensive background working with clients to design, plan, and manage projects both large and small. As an Accredited Learning Environment Planner (ALEP), he has a special interest in the functionality and design of educational facilities.

Craig has worked on a wide variety of projects during his tenure at Thrasher. His knowledge includes a thorough understanding of industrial facilities, administrative office spaces, academic building design, government buildings, residences, medical facilities, and hospitality.

As manager of Thrasher's Architecture Market, Craig works hand-in-hand with staff and clients to ensure projects remain on time and within budget. In addition to his strong technical skills, Craig's attention to client communication and responsiveness make him an excellent manager. He manages coordination of construction, detailed construction document preparation, bidding, construction management, and contract administration.

PROFESSIONAL OVERVIEW

Matt Breakey, AIA, NCARB, LEED AP, has over 25 years of experience providing architectural design and management services. He has worked with a wide range of clients, including those in the education section (K-12 and higher education), state, federal, correctional, commercial, and multi-unit residential and healthcare providers.

Matt spent part of his career providing oversight for major capital construction projects for two auxiliary entities at a higher education institute. This experience gave him a refined eye for the design aspect as well as project construction and feasibility. As a LEED Accredited Professional, Matt works with clients to find cost saving and sustainable features that will enhance their projects. His educational background combined with his well-executed projects make Matt a highly sought-after architect.

PROFESSIONAL OVERVIEW

Eric Sherrard, EI, is a valuable asset within the Water Resources Market at Thrasher. Eric assists in the planning, development, and implementation of public water and wastewater projects for the firm. His responsibilities include the development of engineering reports and funding applications, creation of design documents, engineering during construction, and a variety of other engineering tasks. He also serves as a project manager on many public utility projects.

Eric has experience in the design and construction of water and sewer system upgrades. His expertise includes design and construction of pump stations and water tanks, evaluation of hydraulics, and other aspects of water distribution and sewer collection. He is familiar with environmental and construction permitting requirements for these projects and has been involved with the development of multi-phased projects during his time at Thrasher. Additionally, Eric's contracting experience allows him to bring unique design solutions forward as an engineer.

PROFESSIONAL OVERVIEW

Jeff Gola, PE, is an integral part of The Thrasher Group's Land Development Market. He has accrued more than 25 years of experience in the design and construction of public works projects. In that time, Jeff has been a part of a variety of project types, including sidewalks, dams, bridges, roadways, stormwater systems, and retaining walls. He has dedicated much of his career to understanding the structural design elements that govern these infrastructure projects and takes a methodical design process to ensure his work takes these elements into account so that his projects remain safe, stable, and secure throughout their use.

In addition to his public works projects, Jeff is also highly experienced in the transportation world. He has built a large portfolio of these projects over the years, having been involved in more than \$100 million worth of critical transportation infrastructure. He has worked alongside the West Virginia Division of Highways for 17 years and has also become an expert in airport design and construction, working directly with the Federal Aviation Administration.

PROFESSIONAL OVERVIEW

Duane Boyle, Plumbing Designer, brings Thrasher value in several capacities. He has provided plumbing designs for various project types over the years, such as tenant build-outs, schools, assisted living and memory care facilities, and warehouses. Several of Duane's daily duties consist of performing plumbing calculations, fixture selections, attending project development meetings, checking shop drawings, and coordinating with all other disciplines. Most of his work involves providing these design services from the beginning to end of a project using the most current versions of AutoCAD and Revit. Duane is capable of providing field verified documents of all existing plumbing systems on site and hand drawn existing systems for use in the design and development of new construction documents. He also performs field inspections and generates field reports of observations.

PROFESSIONAL OVERVIEW

Brian Hensley is an Electrical Designer serving Thrasher in a number of capacities. He works primarily with the Buildings and Facilities and Water Resources Markets, providing expertise in electrical work of all types. He has served as an MEP specialist for both public and private clients, working on everything from educational facilities to utility extensions and much more. Prior to joining Thrasher, Brian supervised projects such as installation and maintenance of complex mining equipment and power lines, substation maintenance, and underground communications. His understanding of electrical design, paired with his ability to find innovative solutions, makes Brian a valued member of the Thrasher team.

PROFESSIONAL OVERVIEW

Chad Smith serves as an Environmental Scientist for Thrasher with a primary focus as the Lead Asbestos Specialist. He brings over 30 years of environmental consulting to the Thrasher team. Chad's experience focuses on asbestos, lead-based paint, mold, and methamphetamine, including air monitoring for asbestos and lead abatement projects. He has performed over 5000 asbestos inspections. Beyond his field experience, Chad brings the unique aspect of being a business owner – allowing him the inside-out knowledge of managing a project and the team involved throughout it.

PROFESSIONAL OVERVIEW

Heidi Handley serves as Thrasher's Director of Marketing and Business Development. She has over a decade of experience with direct marketing and communications for the engineering, architecture, and construction industry. Through hands on application, Heidi has helped clients of all sizes increase community engagement to create more successful projects. Her knowledge of the A/E consulting world and the Mid-Atlantic region, paired with her marketing and communications background, allows her to effectively garner a high level of project awareness and stakeholder support. From the creation of marketing collateral to the implementation of targeted social media campaigns, Heidi successfully leads a full marketing staff on a vast array of endeavors critical to client success.

DODDRIDGE COUNTY SCHOOLS Maintenance Building and Career Center

Client Contact:

Mr. Jeff Harvey, Director of Student Support Services
1117 WV Route 18 N | West Union, WV 26456
304-873-2300

The Thrasher Group has worked with Doddridge County Schools on a number of projects over the years. One of our recent projects is the creation of a new, multi-purpose building for the County that provides both a maintenance facility and several vocational classrooms.

The facility houses space for maintenance and staff. This side of the building is primarily used to house buses, facility vehicles, and related staff members. It also supports one of the new vocational classes that is housed in this building – Diesel Mechanics.

In addition to the diesel class, this building features classes for welding, digital media, and oil and gas. These classrooms have been designed with the newest technology in mind, while meshing the look and feel of the surrounding educational buildings.

This project was a cross-divisional effort for Thrasher. Our Architecture Division lead the effort, providing design services, while our Survey Division provided traditional survey and aerial mapping for the project. Our Utilities Division was also involved.

Maintenance Building

LINCOLN COUNTY SCHOOLS New Athletic Facility

Client Contact:

Mr. Austin Lucas, CFO
10 Marland Ave. | Hamlin, WV 25523
304-824-3033

The Thrasher Group was hired by Lincoln County Schools to produce an overall master plan for a new athletic complex to serve football, track, soccer, and more. The site of the new complex was selected by the BOE to be positioned at the existing natural grassed football practice field on-site at Lincoln County High School.

From the master plan, we authorized to phase the project due to budgetary restraints. This resulted in Thrasher designing an athletic field, rubberized 6-lane

track, track and field events, bleachers, and score board.

Thrasher coordinated with Field Turf, Musco Lights, and Stadium Solutions (bleachers) to construct a functional athletic field for athletic events.

A future phase will involve the design and construction of a locker room/concession area. In total, the project cost approximately \$6 million.

Athletic Track

DODDRIDGE COUNTY SCHOOLS Athletic Complex

Client Contact:

Mr. Scott Cochran, Superintendent
1117 WV Route 18 N | West Union, WV 26456
304-873-2300

The new Doddridge County Athletic Complex is a state-of-the-art athletic campus, including three turf fields, an indoor athletic facility, and a multi-use building housing brand-new locker rooms and Board of Education offices. The first of its kind in West Virginia, the site – directly beside the current high school – provides safety and convenience for students, families, and employees, while bringing economic development to the county. The facility will connect the small, rural community with ample opportunities for health and

fitness and allow space for local and state athletic events with flexible, all-weather facilities.

The Thrasher Group provided all architecture and engineering services on this project, including site development, utility work, survey, environmental permitting, and architectural design. The team transformed an undeveloped hillside on a 14-acre flat pad for the turfed football and baseball fields, **one-of-a-kind track**, athletic locker rooms, and Board of Education offices. Although some unforeseen issues arose during the process, The Thrasher Group's expertise, communication, and relationship with Doddridge County allowed the project to be completed before the first home Friday night lights game.

Athletic Track

WETZEL COUNTY COMMISSION **Shiben Building** **Judicial Annex Renovation**

Client Contact:

Wetzel County Commission,
200 Main Street | New Martinsville, 26155
304-455-8217

The historic Shiben building in downtown New Martinsville, WV, will be renovated to house the Wetzel County Circuit Court and supporting offices. The project consists of using these, once separate buildings, as one main building. While there is much that will be renovated, it was also important to the client that some original details remain intact and act as showcase features, such as the original metal pan ceilings, which will be featured in the courtrooms.

Renovations will also include security, new vertical circulation, and another important feature is the accessibility access we're creating at the main and back entrance, to support this work as well as future phases.

These phases will include family court and other judicial County offices. Construction on Phase I is complete.

Historic Building Renovation

Historic Building Renovation/Window Replacement

DODDRIDGE COUNTY COMMISSION Courthouse Exterior Renovations and Historic Rehabilitation

Client Contact:

Ms. Randee Britton, Executive Assistant
108 East Court Street, Suite 1 | West Union, WV 26456
304-873-2331

The Thrasher Group was hired by the Doddridge County Commission to perform several exterior renovations, window replacements, and a historical rehabilitation of the existing Doddridge County Courthouse in 2017. Thrasher was tasked with evaluating the dilapidated structure and designing a solution that not only worked for the Commission's budget, but also preserved the historic nature of the facility. Thrasher worked closely with the Commission to ensure that all their needs were met, and that WV SHPO approved crucial design elements.

This project required the Thrasher team to work within a very tight project site, and to also keep the courthouse open throughout the entire renovation. Close attention was paid to project staging to safeguard the property throughout construction.

With the bigger picture in mind, the Thrasher team also designed these exterior solutions with consideration given to future interior projects. By consciously phasing the job, Thrasher was able to secure additional grant money to help expand the scope of work to include a second phase which will remedy accessibility and life safety issues throughout the facility.

**MCDOWELL COUNTY
BOARD OF EDUCATION**
Mount View High School
Window Replacement

Client Contact:

Ms. Ingrida Barker, Superintendent
900 Mount View Road | Welch, WV 24801
304-436-8441

The Thrasher Group has a longstanding relationship with McDowell County Schools, having worked on a variety of projects in the county. One of those schools is Mount View High School. Thrasher replaced all windows and glass curtain walls throughout the entire Mount View High School building. Our team used thermally broken aluminum window frames along with low-e insulated glass. These improvements were funded locally.

Window Replacement

GREENBRIER COUNTY SCHOOLS Alderson Elementary School Renovations

Client Contact:

Mr. Jeffrey Bryant, Superintendent
197 Chestnut Street | Lewisburg, WV 24901
304-647-6470

The Greenbrier County Board of Education hired Thrasher to design renovations for Alderson Elementary School. The previous facility had reached a point where the infrastructure could no longer operate efficiently and major systems upgrades were not feasible, as the school was situated in a flood zone. Thrasher came up with a creative solution to utilize the near-by high school that had been used by the community for several decades.

The early 20th-century building was structurally sound, but the systems were dated, there were environmental issues, and it had many life-safety and accessibility challenges.

Thrasher's team of design professionals analyzed the existing structure, developed plans that would breathe life into the old building, bring it up to current code, and provide a facility that accommodates the State's educational requirements and the County's specific needs.

With a sloping site surrounded by residential properties, the project scope was complex, but do-able! Our team connected the existing structures with two major additions, creating new entrances, playgrounds, and drop-off/parking areas. We also gutted and replaced the mechanical, electrical, and plumbing systems, as well as reconfigured interior partitioning into 21st century educational standards, all while finding ways to preserve and feature elements original to the building that spoke of the historic value within the community.

School Renovation

STONEWALL RESORT New Laundry Facility and Building Renovations

Client Contact:

Mr. Rudy Henley, Partner
619 Church Street | Summersville, WV 26651
304-872-5758

The Thrasher Group was hired to help design renovations to the Stonewall Resort facility, which included renovations to their laundry facilities within the building.

The lodge is divided into the following areas: the two story lodge proper, conference center, spa/pool complex, and the three story guest wings. The conference center houses eight meeting rooms, three large conference rooms, one board room, a conference

hall, and a full-service laundry facility. All are served by break-out areas adjacent to outdoor gathering spaces overlooking the golf course. The conference facilities can accommodate over 1600 people.

In the spa complex, guests may enjoy a relaxing massage, work out in the fitness room, visit the steam baths and saunas or take a swim in the 2300 SF all-season indoor/outdoor pool with built-in hot tubs. The pool is flanked by a large fenced-in patio with magnificent views in all directions. The Stonewall Resort offers over 3.5 acres of floor area to welcome both local patrons and long distance travelers.

Laundry Facility

BOY SCOUTS OF AMERICA J.W. Marriott, Jr. Leadership Center and Yamagata Lodge

Client Contact:

Mr. Rob Ridgeway
Facilities and Development Director
2550 Jack Furst Drive | Glen Jean, WV 25846
304-646-2312

The JW Marriott Leadership Center is one of several that were constructed at the Summit Bechtel Reserve in Glen Jean, West Virginia. This building works in conjunction with other activities at the Reserve as a remote retreat designed to stimulate out-of-the-box thinking while immersing guests in a wooded habitat with expansive views of the valley below.

The JW Marriott Leadership Center provides numerous spaces for educational, social, and dining activities with a flexible, fluid design. The building contains a two-story lobby that offers several break-out spaces for learning and collaboration, as well as a link to the adjacent lodge.

The JW Marriott Leadership Center is equipped with a employee laundry room for washing dining linens. Yamagata Lodge is equipped with a large laundry room for guests and a commercial laundry room for bedding, towels, and other linens. Thrasher worked with commercial laundry representatives to ensure that the machines could handle the necessary loads based on capacity and the necessary requirements for installation and use.

Laundry Facility

Budgeting

Construction estimating and budgeting is one of the most important parts of what Thrasher can provide you. Without accurate budgets, there is no tool to guide the design process and issues will be inevitable. By including cost estimating as a part of the project scope from day one, we are able to avoid issues before they arise and keep your project within a reasonable cost.

Our estimates go beyond the typical system — rather than simply providing cost per foot or lump sum price, Thrasher will provide contractor-grade estimates that look at every part of the project. We do detailed take-offs of materials and look at every man hour needed to complete a project and factor this in accordingly. Then, we use our thorough understanding of the local market and material costs to accurately design within your budget.

Scheduling

Thrasher realizes the importance of establishing and maintaining project schedules. Time means money and making sure we help you spend your money wisely is our number one goal. Because of this, our team puts an emphasis on ensuring project timetables are met and communication is upheld throughout the process.

To accomplish these goals, Thrasher utilizes scheduling to track every stage of a project - from design and bidding through construction completion. We also require contractors working on our projects to regularly update their project schedules and give a detailed progress report at each job meeting, again focusing on the communication component of scheduling. This helps to ensure all parties are informed and aware of potential delays. Keeping our owners up to speed with progress is always our priority and ensures occupancy and owner supplied equipment are scheduled accordingly.

Cost control

Thrasher follows four main cost control principles:

Thorough construction documents — Starting off with detailed construction documents helps the entire project run more smoothly. By laying an accurate, realistic picture at the beginning of the process, we are able to complete your project more efficiently and with fewer change orders.

In-depth review process — The Thrasher team participates in an in-depth review process to ensure there is a thorough understanding of your project. Our construction administration team visits your site in person so we know exactly what is needed for the space.

Understanding of what things cost — Thrasher has a knowledgeable construction administration team that understands what it truly costs to make things happen. Rather than relying on general industry standards, our in-house professionals, can tell you what something will cost in actuality if the need arises.

Respect for your wallet — We respect your business needs and work to ensure the lowest-cost options we can find. We also keep you updated of budget throughout the process: an initial construction cost will be calculated to reflect your budget, and construction cost estimates will be delivered with the drawings at the end of Schematic Design, Design Development, and Construction Documentation. Adjustments to size and/or quality will be made, as necessary, during each design phase to maintain your budget.
