The Miller Engineering Difference

We are very pleased to submit our response for the Camp Dawson FMS4 Maintenance Shop Design project. We have elected to submit as prime due to MEI's past history working with the WVANG and at Camp Dawson. MEI has operated in this role many times before, including renovations to restrooms and locker rooms at FWAATS Bridgeport and USPFO Buckhannon. We are also currently the prime consultant on the HVAC Renovations to the WVANG Child Development Center, which have had the plans issued for bidding. We were the prime consultant for the fire protection project at FMS4 at Camp Dawson, giving us experience with the facility. We have also served as the prime consultant on many other projects for various clients and state agencies.

We're not your typical MEP firm; we ensure our designs meet very specific, time-tested criteria, including but not limited to being constructible, operable and maintainable. We want to set up our clients to be self-sufficient, but we work to be available every step of the way.

Most every renovation we do requires a phased approach to keep the facility in operations. We routinely deliver phased renovations for educational, institutional, commercial, and government facilities. Every project we do has a particular set of standards which we must apply, and this is no exception. We see our diversity of previous work as an advantage as we do not use "cookie cutter" design or presume we have all the answers when we start.

Our hands-on staff takes great pride in their construction and operations backgrounds, which help us visualize the project as it would be built instead of just lines on paper. We don't sit clients down and lecture to them about what they're going to get; we listen to them so we can strive to deliver exactly what they want and need. It costs too much time and money (for both our clients and us) to not deliver exceptional service every single time, and we work tirelessly to keep projects on time and on budget. We're proud to say that our change order percentage over the last 10 years is less than 0.1%, and that's not just a statistic; it's a proclamation of our commitment and determination to make sure things are done right the first time, every time.

While MEI's portfolio covers all types of construction, the majority of our projects are focused on renovations. The aforementioned renovations to FWAATS and USPFO included changes to floorplans, HVAC, electrical, plumbing, and fire protection systems. Both projects were designed to allow the WVANG to continue operations at the facilities with minimal interruptions. Montum Architecture will provide architectural services on this project with MEI. MEI and Montum have delivered several successful projects for the WVANG including the FMS4 Fire Protection, USPFO, FWAATS, Child Development Center, and ChalleNGe Academy Maclin Hall HVAC projects in addition to renovation projects for other various state agencies. Arrow Engineering in Morgantown, WV will provide structural engineering support. Arrow has worked with both MEI and Montum on several projects. For geotechnical and site utility support,

Potesta will be part of the team, as MEI and Potesta have worked as part of design team together many project. Potesta brings experience with the water utilities at Camp Dawson.

We encourage you to contact any of our references to gauge our level of commitment, not only through design but continuing through construction administration, and beyond the warranty period.

I would like to personally thank you for affording Miller Engineering the opportunity to propose on for the Camp Dawson FMS4 Maintenance Shop Design project and we look forward to the chance to discuss the project in an interview.

Best Regards and Good Luck on the Project,

A handwritten signature in blue ink, appearing to read "Craig Miller", with a stylized flourish at the end.

Craig Miller, PE
President/Owner
Miller Engineering, Inc.

TAB 1 –FIRM QUALIFICATIONS

Firm Profile

MILLER ENGINEERING is a solely held (S) corporation owned by Craig Miller PE, President. The corporation maintains a Certificate of Authority with the WV State PE Board and has carried professional liability insurance since its inception. Neither the firm nor its professional engineers have ever faced disciplinary action in any form from the states in which they are registered.

Our engineered solutions involve a detailed assessment process: investigation, observation, communication with stakeholders, system analysis, building modeling and engagement from our entire team. We approach each and every project with this process and the guiding principle that buildings are designed to be livable and function in their intended purpose.

*Over the past 14 years Miller Engineering, Inc. (MEI) has engineered solutions for over \$23.2M in MEP system upgrades, repairs and renovations for projects of all scopes and sizes, with clients ranging from private owners to local and state governments. With a strict attention to detail and commitment to delivering a job done well and done right the first time, every time, **MEI has accumulated a change order percentage of less than 0.1% over the past 8 years.***

Our team has unique skill-sets regarding engineered renovation solutions. Each member of the team has hands-on mechanical system experience including installation, construction, design and maintenance.

*Miller Engineering takes pride in being **different by design**, and that difference shines through in all phases of our work and continued relationships with our clients.*

B. Craig Miller, PE

Craig founded Miller Engineering in 2003, and serves as President and Principal Engineer. He has more than 20 years experience in design, specification, operations and project management. During his employment with WVU, Craig was directly involved with approximately \$130 million in new capital construction. His experience with a wide range of projects including HVAC, electrical, plumbing, infrastructure upgrades, building automation, energy efficiency and maintenance/renovation, among others, allows him to serve in multiple capacities within a given project. Craig will serve as the "Relationship

Manager" for Miller Engineering as the main communication interface between the Owner, the design team, contractors and end users.

Project Role: Relationship Manager – Primary Point of Contact

- *Engineer in Responsible Charge*
- *Design and Project Management of Mechanical, Electrical, Plumbing Projects*
- *Concept and Construction Design*
- *Business Operations and Financial Management Oversight*
- *Quality Assurance and Control*

Professional Project Highlights

- Morgantown High School Area 4 HVAC Renovations
- WVU Life Sciences Building and Student Recreation Center – Owner's Engineer
- WVANG Bridgeport FWAATS Restroom Renovations
- ChalleNGe Academy Maclin Hall Make Up Air Unit Replacement
- Advanced Surgical Hospital
- Camp Dawson FMS4 Fire Protection
- Chief Logan Lodge HVAC Renovations
- WVANG Child Development Center HVAC Upgrades

Professional History

2003- Present	Miller Engineering, Inc.	President, Relationship Manager
2002-2003	Casto Technical Services	Existing Building Services Staff Engineer
2001-2002	Uniontown Hospital	Supervisor of Engineering
1995-2001	West Virginia University	Staff Engineer
1990-1995	BOPARC	Caretaker – Krepps Park
1983-1988	University of Charleston	Electrician/HVAC Mechanic

Education

1995	West Virginia University	BS- Mechanical Engineering
1988	University of Charleston	BA- Mass Communications

Licenses and Certifications

- Professional Engineer (West Virginia, Pennsylvania, Maryland, and Ohio)
- Licensed Master Plumber
- LEED-AP Certified

Travis Taylor, PE

Experience in project management facilitates Travis's ability to create and design constructible projects. Prior to joining the Miller Engineering team he was directly responsible for managing \$10 million in electrical construction budgets. His experiences encompass both new construction and renovation. Travis maintains professional competencies by attending seminars and continuing education classes. These include local ASHRAE classes in addition to classes on electrical systems, and also steam systems through Shippenburg Pump Company. As lead engineer he provides HVAC, mechanical, plumbing, and electrical design solutions and services for our clients. In addition, he is part of our team's complete assessment process in both planning and MEP design through construction administration.

Project Role: Lead MEP Engineer

- *Design of Mechanical, Electrical, and Plumbing Systems*
- *Building Information Modeling - Revit*
- *Constructible Materials Evaluation*
- *Site Evaluation and Mechanical System Review*
- *Submittal and RFP Review*
- *RFI Coordination, Review, and Response*
- *Construction Observation*

Professional Project Highlights

- WVANG Bridgeport FWAATS Restroom Renovations
- WVANG USPFO Buckhannon Restroom Renovations
- Camp Dawson FMS4 Fire Protection
- WVANG Jackson County AFRC Canopy
- WV State Building 25 (Piping, HVAC, Lighting)
- Mineral County Commission Facility Additions & Renovations
- Blackwater Falls Lodge Renovations
- WVANG Child Development Center HVAC Upgrades
- Pipestem Lodge McKeever Lodge HVAC Piping Replacement

Professional History

2011-Present	Miller Engineering, Inc.	Staff Engineer
2006-2011	Tri-County Electric, Co.	Project Manager
2006-2006	Schlumberger	Field Engineer Trainee - MWD

Education

2006 West Virginia University, BS – Mechanical Engineering

Licenses and Certifications

- Professional Engineer - State of West Virginia, Maryland
- OSHA 10-hour Course: Construction Safety & Health

Tyler Trump

Tyler joined Miller Engineering in August 2022. A recent graduate of West Virginia University, he has been eager to learn the means and methods of MEP consulting. Tyler assists the MEP design team with design calculations and is rapidly learning design software such as Autodesk REVIT and Hourly Analysis Program by Carrier. He is also learning construction administrations along with building, electrical, and plumbing codes and standards. Tyler is currently preparing to take the Fundamentals of Engineering Exam.

Project Role: Junior Engineer

- *Design Calculations*
- *Drafting of MEP Systems*
- *Assist with Construction Administration*

Professional Project Highlights

- Cass Scenic Railroad State Park Campground
- Lost River Campground
- WVANG Child Development Center HVAC Upgrades
- USPFO Buckhannon Restroom Renovations
- WV Building 25 Lighting Upgrades
- Ronald McDonald House Morgantown Addition & Renovations
- McKeever Lodge Boiler Replacement
- Chief Logan Lodge HVAC Renovations
- Challenge Academy Maclin Hall Make Up Air Unit Replacement

Professional History

Licenses and Certifications

Staff – Qualifications and Experience

Jack Jamison

Jack brings 20 years as an electrical/building inspector and over 25 years of experience in the commercial electrical construction industry. His knowledge and experience are valuable resources to Miller's complete assessment process.

Project Role: Master Code Official

- *Facility Review, Code Research, Field Observations, Issue Resolutions, and Project Evaluation*

Professional History

2010- Present	Miller Engineering, Inc.	Code and Construction Specialist
1999-2010	Megco Inspections	Chief Inspector
1972-1998	Jamison Electrical Construction	Master Electrician

Education

1971 Fairmont State College, BS-Engineering Technology-Electronics

Licenses and Certifications

- Master Code Professional, IAEL Master Electrical Inspector, Class C Electrical Inspector – WV, PA, MD, & OH
- ICC Commercial Building, Building Plans, Commercial Plumbing, Residential Energy, and Accessibility Inspector/Examiner
- WV Master Electricians License
- NCPCCI-2B, 2C, 4B, 4C: Electrical & Mechanical General/Plan Review
- OSHA 30 Hour Course: General Industry
- NFPA Code Making Panel 14 – NEC 2014 Edition

Montum Architecture, LLC Firm Profile

Who We Are.

Montum Architecture, LLC was founded in 2017 to provide architectural design and consulting services. Montum Architecture is a Limited Liability Corporation filed in the state of West Virginia. The company is also registered in the State of Maryland as a foreign LLC. Montum is staffed by a licensed principal architect and a design professional. They work manage projects together, from conceptual to construction administration, allowing the utmost coordination of building plans and specifications with minimal potential for miscommunication.

Our Services

Government	Planning
Institutional	Building Assessment
K-12 schools	Architectural Detailing
Higher Education	Specification Writing
Multi-Dwelling	Contract Administration
Medical	Design/Bid/Build
Retail	Renovation
Emergency Services	Renderings
Automotive	Life Safety Evaluations
Financial	Design/Build
Warehouse	Project Management

Why Choose Us.

Communication

Tom Pritts will be the primary point of contact for Montum's architectural services. Montum will manage communication with the Owner, Contractor, and sub-consulted team of members on this project.

Project Budget

Previous work experience has shown a consistent +/-2%bid-to-budget ratio.

Project Schedule

Montum will monitor and adjust the design tasks in order to complete the design work in the established timetables. They will also work diligently during project construction to maintain the contractual constraints placed as part of the contractor's bid.

Design Software

Montum utilizes Autodesk Revit for all design projects incorporating three-dimensional modeling and parametric reporting. Existing condition documentation includes drone imaging, 360 camera shots, and handheld LiDAR telemetry.

Thomas Pritts, AIA, LEED-AP, CSI-CCS

Tom founded MontumArchitecture in 2017. He has more than 15 years experience in design, specification, and project management. During his former employment, Tomhas designed and managed dozens of built projects.His experience encompasses a wide range of projects including K-12 and higher education facilities, financial Institutions, emergency services buildings, and automotive dealerships. A native of Mineral County, Tom is member of the West Virginia Chapter of American Institute of Architects and was involved in the establishment of the US Green Building Council's West Virginia chapter. He is highly skilled in the design of complex building systems, technical construction detailing and specifying, and construction contract administration. These skills were critical in the development and maintaining of many multi-year, multi-project relationships with Clients in his previous employment.

Project Role: Relationship Manager – Primary Point of Contact

- Principal in Charge
- Design and Project Management
- Concept and Construction Design
- Quality Assurance and Control

WHO WE ARE

Since 2016, Arrow Engineering has been dedicated to delivering top-tier structural engineering solutions that exceed expectations. Drawing from his extensive background as a contractor, civil engineer, and structural engineer, Michael Howell founded Arrow Engineering to bring a unique blend of practical experience and innovation to every project.

At Arrow Engineering, we understand the paramount importance of a sturdy foundation and impressive design. Whether it's a residential, commercial, or an industrial venture, our team is committed to crafting solutions that exceed industry standards. With a focus on safety and durability, trust us to bring your structural visions to life with precision and expertise.

DESIGN PRINCIPLES

RELIABLE

High quality documents.

ORGANIZED

We are practical and detailed.

TRUSTWORTHY

You can count on our word.

EFFICIENT

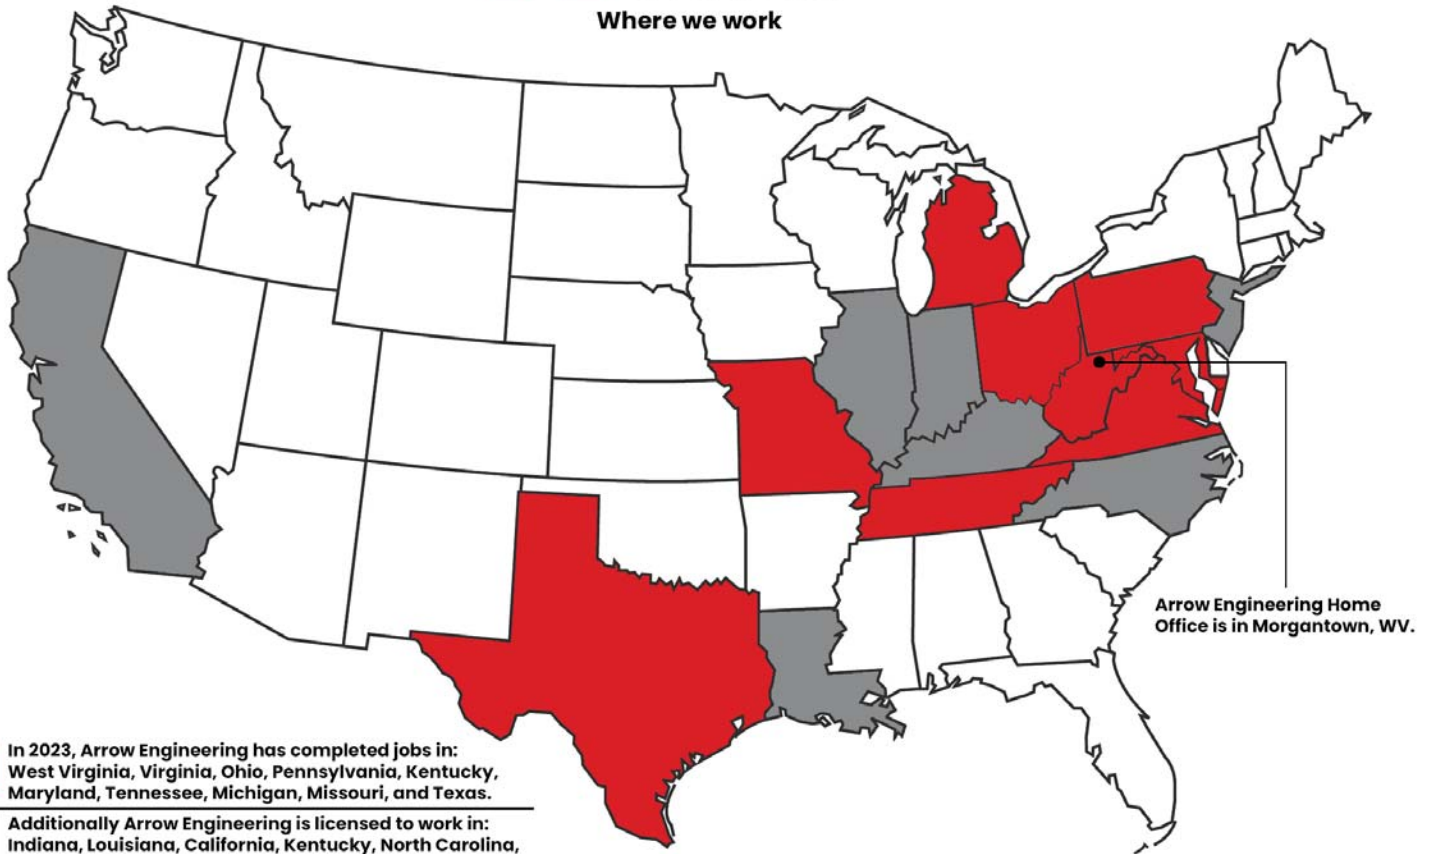

We are timely and proficient.

EXPERTS

Educated and experienced.

PASSIONATE

We love what we do.

In 2023, Arrow Engineering has completed jobs in:
West Virginia, Virginia, Ohio, Pennsylvania, Kentucky,
Maryland, Tennessee, Michigan, Missouri, and Texas.

Additionally Arrow Engineering is licensed to work in:
Indiana, Louisiana, California, Kentucky, North Carolina,
Ohio, New Jersey, and Illinois

MEET THE TEAM

MICHAEL HOWELL PE, SE ARROW ENGINEERING OWNER

EDUCATION

UNIVERSITY OF PITTSBURGH

BACHELOR'S OF SCIENCE

CIVIL ENGINEERING

WEST VIRGINIA UNIVERSITY

MASTER'S OF ARTS

BUSINESS ADMINISTRATION

Mike's passion for construction ignited during his youth in New Brighton, Pennsylvania. From helping his father build a deck to volunteering on construction mission trips, his fascination with structures blossomed. He pursued this passion academically, earning a B.S. in Civil and Environmental Engineering from the University of Pittsburgh and later obtaining a Master's in Business Administration from West Virginia University.

Throughout his career, Mike has honed his expertise with reputable firms such as American Bridge Company, McKinney and Company, Brockenbrough and Associates, and Allegheny Design Services. Actively involved in professional organizations, he has held leadership roles in the American Society of Civil Engineers and the Richmond Joint Engineers Council. Mike's commitment extends beyond his professional realm; he engages in community service, serving on boards for organizations like Pace Enterprises and the Spark Imagination and Science Center. Residing in Morgantown, West Virginia, Mike balances his career with coaching youth sports and cherishing time with his two children.

As a professional speaker, Mike lectures on construction topics such as 'Lessons from the Great Builders: What History Teaches Us About Modern Construction,' 'Failure: When Engineers Make Mistakes,' and 'When Engineers Manage.'

PROFESSIONAL LICENSURE: WV, VA, PA, IN, LA, CA, TN, MD, KY, TN, NJ, OH

MEET THE TEAM

ASHBEE SYKES, PE

PROJECT ENGINEER

Originally from Kitty Hawk, North Carolina, Ashbee brings a deep understanding of construction and structures to his work as a structural engineer. His background working with a family construction business provided hands-on experience ranging from framing houses to engineering multimillion-dollar projects, informing his approach to the intricacies and impact of design decisions.

Inspired by his early days as a carpenter, Ashbee's journey led him to West Virginia. A graduate of West Virginia University with degrees in Mechanical and Aerospace Engineering, Ashbee is currently advancing his expertise in Structural Engineering at The Citadel. As a licensed Professional Engineer since 2019, he's committed to delivering excellence in every project.

PHILLIP BAILEY, EI

PROJECT ENGINEER

With a background in civil engineering and construction management, Phillip brings practical experience and academic knowledge to our projects. Phillip holds B.S. in Civil Engineering from West Virginia University, and has a background in construction management working for Yates Construction on the WVU Medicine Children's Hospital.

Having worked on significant projects like WVU Medicine Children's Hospital, Phillip is well-prepared to lead complex building and design endeavors. As a licensed Engineering Intern in West Virginia, he's committed to delivering top-notch results.

Phillip is a volunteer YoungLife Leader for Grafton High School (c. 2018), and previously held an official position for the West Virginia University's Chi Epsilon Honorary Academic Fraternity.

MEET THE TEAM

SYDNEY RAECKELBOOM, EIT

PROJECT ENGINEER

Hailing from South Carolina with deep-rooted family ties to West Virginia Sydney forged her path in the industry by honing her skills in pre-manufactured metal building systems before transitioning seamlessly to spearheading diverse commercial ventures for government installations across the globe. With over half a decade of collective experience, Sydney exemplifies unwavering expertise and dedication.

A proud alumna of Clemson University, Sydney earned her stripes with a Bachelor of Science in Civil Engineering, equipping her with a robust foundation to revolutionize Arrow's projects with a contemporary edge and innovative mindset.

ZACHARY HOWELL

CAD TECHNICIAN

As Arrow's sole CAD Technician, Zachary plays a vital role in the team. His expertise in engineering technology and design enables him to create both 2D and 3D designs, ensuring Arrow produces top-quality plans for superior structures.

Beyond design, Zachary also assists with field work, measuring structures and conducting assessments. His attention to detail makes him an essential part of the team.

Zachary received AutoDesk Certification from the Virtual Design Construction Institute, further validating

Company Overview

FIRM HISTORY

Potesta & Associates, Inc. (POTESTA) was founded in 1997 as a full service engineering and environmental consulting firm headquartered in Charleston, West Virginia. We have now expanded to a diverse staff of 79 experienced engineers, scientists, and support personnel with branch offices in Morgantown, West Virginia, and Winchester, Virginia. Our clients include mining, manufacturing and chemical companies; utility companies; waste management companies; colleges/universities; land developers; attorneys; financial institutions; insurance companies; local, state and federal agencies; construction companies and architects.

SERVICES

- Air
- Asbestos Inspection
- Biological and Toxicological
- Civil Engineering and Site Design
- Coal Supply and Procurement
- CADD
- Construction Monitoring
- Environmental Emergency Response
- Environmental Site Assessment
- Geographic Information Systems
- Geotechnical Engineering
- Groundwater
- Hydrology and Hydraulics
- Landfills and Solid Waste
- Litigation Support
- Marcellus Shale Natural Gas
- Mining
- Mixing Zone Analysis
- Occupational Safety and Health
- Oil and Natural Gas
- Permitting
- Remedial
- Roadway Engineering
- Stream Restoration
- Storage Tanks
- Surveying and Mapping
- Water Quality Studies
- Water and Wastewater
- Wetlands

Experienced Professionals

Ronald R.
Potesta
President

POTESTA's staff is committed to delivering innovative, cost-effective solutions to meet our client's complex requirements. The firm's environmental department consists of biologists, geologists, chemists, environmental scientists and environmental engineers, many with advanced degrees (Masters and Ph.D. level). POTESTA's engineering department includes civil, geotechnical, environmental, mining and mechanical engineers. Our registered professional engineers have over 300 years experience among them and are supported by a capable team of engineers, designers, and surveyors.

Dana L. Burns
**Vice
President**

Our firm is managed by two principals driving POTESTA forward with their experience and emphasis on exceeding expectations. Ronald R. Potesta, President, is a former Director of the West Virginia Division of Natural Resources and Dana L. Burns, P.E., Vice President of Engineering, has more than 39 years experience with civil, geotechnical, mining, and environmental engineering projects.

FIRM HIGHLIGHTS:

USPFO Buckhannon Restroom Renovations

Buckhannon, WV

Services Provided:

- Renovation
- MEP Renovation
- Construction Administration

Estimated Cost: \$1.2M

Facility Area: 4,000 ft²

Owner: WVANG

MEI was the Engineer of Record for the renovations to the restrooms and locker rooms at the United States Property & Fiscal Office (USPFO) in Buckhannon, WV. The front restrooms will be reconfigured into three single use restrooms and one lactation room. The locker rooms will be configured as single use restrooms with showers that share a common locker area. Montum Architecture provided architectural support and selection of finishes. The previously successful Bridgeport FWAATS restroom layout and finishes were the basis for USPFO. Also included are renovations to the break room and select office spaces. Corridor carpeting will be replaced with luxury vinyl tile. The project is currently bidding with an anticipated completion date in Summer 2025.

Descriptions of Past Projects Completed – MEP

Freedom Automotive Dealerships

Granville, WV & Bridgeport, WV

Services Provided:

- HVAC
- Electrical
- Plumbing
- Building Automation
- Fire Protection
- Fire Alarm

MEP Budget: \$3.6M

Owner: Freedom Automotive

Miller Engineering was the MEP consultant for three new dealerships from Freedom Automotive: Ford, Kia, & Volkswagen. Each facility required a complete design of HVAC, plumbing, electric, fire protection, fire alarm, and communications for the showrooms, offices, service departments, and support spaces. The dealerships are a "campus" in which the Ford dealership acts as the main building, and sub-feeds to Kia and Volkswagen. This required MEI to design interconnecting utilities between buildings. The Ford dealership utilizes waste oil boilers which use old oil as a heating source. The Ford dealership also uses radiant in-floor heating. All three building had to meet the owner's requirements in addition to meeting the requirements of Ford, Kia, & Volkswagen. Additionally, MEI & Alpha designed an additional Kia Dealership for Freedom Automotive in Clarksburg, WV. This facility was very similar to the Granville location, with the exception of being a stand-alone facility.

Descriptions of Past Projects Completed – Fire Protection

Camp Dawson FMS4 Fire Protection

Kingwood, WV

Services Provided:

- Fire Protection

Budget: \$130K

Facility Area: 7,400 sq ft

Owner: WVARNG

FMS4 is a vehicle and equipment repair facility located on the Camp Dawson Army National Guard base located near Kingwood, WV. The 7,400 square foot facility includes 4,800 square feet of high bay service area, with the remaining area dedicated to office space, storage, and locker rooms. The facility contains bulk storage of oil and other equipment fluids, requiring fire protection. MEI was tasked with designing a fire protection system which would provide adequate coverage of FMS4 and meet applicable codes. Through research of NFPA 30 and NFPA 13, MEI was able to determine the size of the service and coverage requirements. MEI determined that by providing separation of the bulk storage from the rest of the facility, the fire protection service requirements could be reduced, eliminating a water service upgrade by the utility. Montum Architecture was brought on board to provide architectural support in regards to the separation of the bulk storage room and for the construction of the sprinkler room. The project was successfully completed in December 2019, one month ahead of schedule.

Descriptions of Past Projects Completed – New Construction

WVANG Challenge Academy Maclin Hall MAU Replacement

Montgomery, WV

Services Provided:

- Mechanical
- Electrical
- General Trades

Construction Cost: \$496K

Owner: WVANG

MEI was tasked with replacing two failing make-up air (MAU) units at Maclin Hall. The units provide ventilation air for the facility. The MAU replacement involved installing new rooftop mounting curbs and replacement on rooftop mounted ductwork. New exhaust fans were installed on the roof and tied to the existing exhaust / relief air systems. New electrical feeds were installed to the new MAUs and fans. Montum Architecture assisted with the addition of rooftop railing to improve worker safety and the replacement of roof hatches and access ladders. The project was completed in January 2024 with no disruption to Challenge Academy operations.

Descriptions of Past Projects Completed – Renovation

Blackwater Falls State Park Lodge Renovations

Davis, WV

Services Provided:

- General Trades
- Plumbing
- Electrical
- Mechanical
- Pool

Const. Cost: \$4.6 Mil

Facility Area: 44,000 ft²

**Owner: West Virginia Division of
Natural Resources**

Project Contact:
 Barrow Koslosky, AIA – Chief of PEM
 WV DNR
 Phone: (304) 558-2764

MEI was part of a design team with Paradigm Architecture to design the interior renovations to the lodge at Blackwater Falls State Park. All 54 lodge guestrooms were completely renovated with new finish, HVAC, and bathroom upgrades. Four of the guestrooms were modified to meet modern ADA guidelines. The lobbies, reception area, and dining rooms were upgraded with new HVAC, lighting, and finishes. The original finned tube radiant was replaced with new 4 pipe fan coil units and were tied into the boilers which were recently replaced by a previous MEI project.

A new chiller was installed with pumps and chilled water piping to the fan coil units. The guest rooms HVAC systems are fan coil units with ventilation served by make-up air units. Energy recovery ventilators pre-condition outside air to make the make-up air units operate more efficiently. The lodge was re-opened in January 2022.

WVANG Bridgeport FWAATS Restroom Renovations

Description of Project:

In Partnership with Miller Engineering, Montum Architecture helped prepare renovated floor plans for two locker / shower rooms and two restrooms. The goal was to renovate the spaces to meet ADA guidelines and improve efficiency and utilization of the areas. As well as, choose appropriate finishes that bring these spaces into the modern era. The flooring on the first floor was also replaced under this project. MEI designed renovations to the plumbing, lighting, fire alarm, fire protection, electrical, and VAC systems to accommodate the changes to the floor plans. The existing boiler was replaced with two, high efficient, modulating boilers. The owner was pleased with the chosen finishes and plans to use these as a standard going forward.

Mineral County Commission

Facility Renovations and Additions

Description of Project:

The Mineral County Commission operates three primary buildings at the Courthouse Complex which are the Courthouse, the Judicial Annex, and Sheriff Building. Additional office space is provided via a second-story addition to the Sheriff Building with elevator access. The Courthouse gains a security checkpoint vestibule, egress stair, and elevator access to all three existing floors. The Judicial Annex improvements include the fit out of the existing second floor, an addition of a security checkpoint vestibule, egress stair, and elevator. The project includes fire alarm and sprinkler system installations for code compliance.

DISCOVERY WORLD ON MARKET

This former masonic lodge temple in Parkersburg, WV is an iconic historic building that has fallen out of use in recent years. That is until a private developer with a vision for adaptive reuse and a passion for serving children of his community came up with the idea to reuse the shell of the building to house "Discovery World On Market", a new and innovative learning center for children. Arrow's team had to navigate the complexities of a nearly century old building to house this new facility. This required careful attention to detail and study of the existing facility drawings as well as the use of non-destructive testing to confirm the building was structurally adequate for the needs of the new facility.

PROJECT HIGHLIGHTS

- Integration with architectural and exhibit design teams
- Careful study of existing drawings and historical structural design
- Hands on coordination with construction team throughout construction

ARMORY PHARMA

Armory Pharmaceutical, Inc wanted to expand their presence in the fast growing West Virginia market. As part of an architectural design team, this company approached Arrow for assistance in converting an existing WV National Guard armory building into its newest flagship growth facility.

Arrow's involvement in this project centered around modifications to the existing building. This included the construction of an extensive internal equipment mezzanine with the need to carefully place columns in strategic locations around the "grow pods". This necessitated that Arrow's team of engineers work closely with other members of the design team to integrate the structural aspects of the building.

PROJECT HIGHLIGHTS

Completed in 2021

Extensive internal structural modifications

Integrated structural design around complex internal space programming

Budget History

Project Name	Description	Budget	Cost	Notes
Bluestone State Park	Pool Replacement	\$1,000,000	\$935,600	6% Under Budget

What our satisfied customers have to say...

“Hard working, do-whatever-it-takes, diligent team that provides excellent customer service is what you can expect from Miller Engineering.”

--Chris Halterman, Dominion Post, Morgantown

“As a design/build team, working with Miller Engineering, our project involving a private surgical hospital together was a success – completed ahead of schedule and on budget. Miller worked with us throughout the project to consult, engineer and inspect the mechanical systems. Craig Miller, PE and his staff are working with us again, and are very important members of our design/build team. I highly recommend their services.

From Jonathan Miller, Mechanical Project Manager, Nitro Mechanical:

“Miller Engineering is not your average engineering company; they work with the owner AND the contractor to solve all issues that arise throughout the project to make the process as fluid as possible”

TAB 4 – METHODOLOGY & APPROACH

Project Methodology & Approach

Evaluation

Miller Engineering will begin the design process by reviewing all existing documentation related to FMS4. Reviewing documents will give MEI an initial understanding of the facilities which will be confirmed or adjusted through an extensive on site evaluation of the facilities. Evaluations of both existing documents and site visits will allow the design team to create initial building models. MEI will utilize building information modeling (BIM) via Autodesk REVIT to create models and therefore drawings of the facilities' areas of impact. Arrow Engineering will review the structural integrity of the existing facility, particularly in relation to the overhead crane system. Montum Architecture will review the facility in regards to programming space, ADA compliance, and appearance. MEI and Montum have the ability to perform LiDAR scanning of FMS4 to provide incredibly accurate documentation of existing conditions. If geotechnical studies are needed, Potesta & Associates will provide these services. Potesta also has vast experience with the existing site domestic, sanitary, and stormwater infrastructure at Camp Dawson.

Schematic

Once the BIM models are accomplished, and MEI grasps the building systems intent and construction, MEI will meet with the owner. The meeting will involve all stakeholders to gain an understanding of the intended project outcomes. MEI will discuss items which will affect the renovation including changes in building usage, current deficiencies and issues, operating methods, operating costs, and construction timeline phasing. Initial schematic design plans will be presented to the WVANG for discussion. MEI will incorporate early on any input from Montum, Arrow, and Potesta. Miller Engineering's staff has backgrounds in construction, maintenance, and operations which provide a unique perspective as we do not just think "Will it work?" but also consider "How will it be installed?" and "How well can it be maintained to work as intended?" A majority of MEI's past projects include renovations which must be phased as the owner still occupies the facility. MEI will work with the owner to determine the maximum amount of facilities can be taken out of service at one time and the duration of these outages. These ramifications, in addition to any occupancy disruptions anticipated, would be discussed with the owner. The initial schematic design will be the basis of the 35% documents. MEI will provide cost estimates using real material quotes and take-offs to convey projected costs to the owner.

Design Development

MEI will take input from the owners based upon review of the 35% design documents and proceed. While the requirements of the EOI give specific milestones for progress sets (35%, 65%, 95%, & 100%), MEI will not wait until the next progress set to speak with the stakeholders if questions arise. Our philosophy is that the sooner issues are brought forward and addressed, the less they cost the project in time and money. The estimate will also be updated regularly as MEI treats the estimate as a "living document." Any changes or inputs from the owner, as well as other changes made during proceeding with design development, will be reflected in the estimate. MEI believes in giving the owner the information necessary, including budgetary

effects, to make informed decisions regarding the design. The 65% and 95% progress sets will reflect the outcomes of the formal and informal discussions with the owners.

Construction Documents

The construction documents will be completed using both the results of the progress set reviews and internal peer review. MEI understands that while working on a project, engineers and designers can get "tunnel vision", meaning they see what they want to see reflected in the documents. All drawings and specifications issued by Miller Engineering go through a three step peer review internally to ensure the intent of the document is clearly transmitted. The final 100% construction document set will be issued to the owner for bidding, along with our best estimate of probable cost.

Bidding

During bidding, Miller Engineering will assist the owner to successfully procure bids for the upgrades. MEI will be present during the pre-bid meeting to discuss the technical scope of work for the project. Any technical questions from contractors or vendors to the owner during bidding will be answered by MEI. MEI will provide addendum documents as needed. MEI will also assist in reviewing bids and making recommendations to the owner. We have completed many projects through WV State Purchasing, and understand the requirements to successfully bid a project with the state of West Virginia.

Construction Administration

After bids are received and the contract awarded, MEI is not a firm that disappears until the final punch list. MEI will provide thorough construction administration (CA) services as agreed upon with the owner. We will be present for a construction kick-off meeting to make sure the project gets off on the right foot. MEI believes in being present at construction progress meetings and making informal site visits to keep the project on track. Our background in construction and operations allows us to understand the sequencing of construction in the field to better aid the contractors when questions arise. One of MEI's main beliefs is that any requests for information (RFIs) submitted by the contractor should be reviewed and answered within one business day if possible. This is because we understand that delays in RFI responses can lead to additional costs and construction days. If necessary, we will provide an informal answer and follow up with the formal response to keep the project rolling. During progress meetings and site visits, any issues discovered by MEI will be relayed to the owner and contractor immediately to prevent delays. Another company standard is for our staff to be present for testing and balancing (TAB), equipment start-up, and owner training. While these events occur at the very end of the project, they are critical to ensure the new systems operate as designed. MEI will be on hand for these activities to quickly answer any questions and confirm these items are performed properly in accordance with the construction documents.
