RE: West Virginia Army National Guard — National Guard Readiness Center Bluefield

Dear Mr. Pauline and Members of the Selection Committee:

The Thrasher Group is eagerly anticipating the chance to further collaborate with the West Virginia Army National Guard on the Bluefield Readiness Center project. Given our wide-ranging experience in the design and construction of robust, ballistic-resistant facilities, our unwavering commitment to excellence, and our proven history with the National Guard, we are confident that we are the best partner for this significant project.

Thrasher has a rich history of delivering projects that demand sophisticated and durable construction solutions. Our skill in creating fortified environments capable of enduring extreme conditions ensures we meet the high standards expected by the West Virginia Army National Guard. Additionally, our team's dedication to quality and meticulousness throughout all project phases matches perfectly with the stringent requirements of this initiative.

Our previous collaborations with the National Guard have provided us with a comprehensive understanding of your protocols, which allows us to commence work swiftly upon selection guaranteeing a smooth and effective partnership from the start. Our familiarity with your specific needs enables us to anticipate challenges and provide solutions that align with the National Guard's goals and expectations.

Thrasher's technical proficiency is complemented by a broad portfolio of adaptable spaces designed for diverse functions. Our innovative design approach ensures we address not only the immediate needs of the National Guard, but also future requirements. With this foresight, we can create flexible environments that adapt to the evolving needs of the organization.

We are excited for the opportunity to contribute to the West Virginia Army National Guard's mission by delivering a cutting-edge readiness center that exemplifies functionality, security, and resilience. We look forward to the opportunity to extend our partnership and are confident in the unparalleled value The Thrasher Group will bring to the Bluefield National Guard Readiness Center project.

Sincerely,
The Thrasher Group, Inc.

Craig Baker, ALEP
Project Manager and Architect

DESIGNATED CONTACT: Vendor appoints the individual identified in this Section as the Contract Administrator and the initial point of contact for matters relating to this Contract.

(Printed Name and Title) Craig Baker, Principal

(Address) 600 White Oaks Blvd. | Bridgeport, WV 26301

Revised 6/8/2012

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

MANDATE: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

THRASHER'S GOT IT

A critical step in meeting your goals is first ensuring we understand your vision for the project. Thrasher's team has thoroughly reviewed the expression of interest request and is confident in our ability to deliver the highest-quality solutions for your needs. We are capable of meeting each goal/objective you have outlined and feel strongly that you will be satisfied with the outcomes you receive.

We understand your goals for a hangar addition at Wheeling and will handle them in the following manner:

► GOAL 2.1

We recognize that this project is in the preliminary stages, with the West Virginia Army National Guard using this first step as away to further their goals. With that in mind, Thrasher will prepare a 35% design that conveys the project concept and anticipated cost estimates. These documents will be used not only for preliminary design purposes, but – perhaps more importantly – as a way to help secure funding for the rest of the project's design and construction.

► GOAL 2.2

As the architect of record for this work, Thrasher will lead all aspects of the project. Our staff will coordinate with our long-time partners NGE to handle any necessary geotechnical engineering. We will also ensure all appropriate utilities research is completed and infrastructure drawings are provided as needed.

► GOAL 2.3

Should the West Virginia Army National Guard receive the funding necessary to move this project to Phase 2, Thrasher will be available and capable of completing all additional services to make this hangar renovation a success. Our architectural team will continue the design of the building, providing design updates at the 65%, 95%, and 100% milestones. Having worked on countless renovations in the state and with prior experience with the Guard, we will ensure appropriate compliance with all relevant building codes and military force protection regulations.

Once design is complete, Thrasher will use our network of construction contacts to assist with the bidding process. We take a proactive approach to this work, helping to solicit contractors to bid on the project – this allows for a more competitive bid process and provides a better result for the Owner. Upon selection of a contractor, our in-house Construction Administration team will work on the Guard's behalf to ensure that the renovations being built meet the plans and specifications, getting the end product intended.

► GOAL 2.4

Based on our recent negotiations with the WVANG on the Hangar and CFMO HVAC projects, we are familiar with the price proposal format. We recognize that this project has the potential to be a multi-phase, multi-year project, with pricing for the design and the architect's fee being dependent upon which phase of the project is underway and whether further funding is obtained.

► GOAL 2.5

Thrasher will provide the Guard with a 35% design during the initial phase of this project. Should Phase 2 be undertaken, we will continue the process and provide additional drawings for review at the 65%, 95%, and 100% stages, with cost estimates revised at each stage.

► GOAL 2.6

As a full-service firm, The Thrasher Group has the capabilities to facilitate the bidding process and provide an on-site Project Representative throughout construction. Our team will help ensure the project moves along seamlessly and the Guard is kept apprised of all progress, with timely updates on any challenges that arise.

QA/QC Procedure

Thrasher has an internal Quality Control Policy to ensure our projects move forward efficiently and effectively. The objectives of this manual are to continually improve the quality of the design and technical deliverables Thrasher provides to its internal and external clients.

This manual illustrates the basic requirements for quality control in our projects. It describes the methods for checking and reviewing product elements and client deliverables and includes rigorous comprehensive written check-lists for each stage of the design process, document production, and construction activities.

The purpose of these QC methodologies is to reduce or eliminate the potential for errors, omissions, ambiguities, and inconsistencies.

The policy outlines three main areas:

» **General**

Defines the purpose, intent and limitations, definitions, and implementation

» **Project Management Procedures**

Presents required procedures specific to this practice that allow for the efficient and accurate management of projects

» **Check and Final Review Procedures**

Presents required procedures specific to this practice that are used to insure technical accuracy of the work product

Cost Control

Thrasher follows four main cost control principles:

Thorough construction documents — Starting off with detailed construction documents helps the entire project run more smoothly. By laying an accurate, realistic picture at the beginning of the process, we are able to complete your project more efficiently and with fewer change orders.

In-depth review process — The Thrasher team participates in an in-depth review process to ensure there is a thorough understanding of your project. Our construction administration team visits your site in person so we know exactly what is needed for the space.

Understanding of what things cost — Thrasher has a knowledgeable construction administration team that understands what it truly costs to make things happen. Rather than relying on general industry standards, our in-house professionals, can tell you what something will cost in actuality if the need arises.

Respect for your wallet — We respect your business needs and work to ensure the lowest-cost options we can find. We also keep you updated of budget throughout the process: an initial construction cost will be calculated to reflect your budget, and construction cost estimates will be delivered with the drawings at the end of Schematic Design, Design Development, and Construction Documentation. Adjustments to size and/or quality will be made, as necessary, during each design phase to maintain your budget.

Budgeting

Construction estimating and budgeting is one of the most important parts of what Thrasher can provide you. Without accurate budgets, there is no tool to guide the design process and issues will be inevitable. By including cost estimating as a part of the project scope from day one, we are able to avoid issues before they arise and keep your project within a reasonable cost.

Our estimates go beyond the typical system — rather than simply providing cost per foot or lump sum price, Thrasher will provide contractor-grade estimates that look at every part of the project. We do detailed take-offs of materials and look at every man hour needed to complete a project and factor this in accordingly. Then, we use our thorough understanding of the local market and material costs to accurately design within your budget.

Scheduling

Thrasher realizes the importance of establishing and maintaining project schedules. Time means money and making sure we help you spend your money wisely is our number one goal. Because of this, our team puts an emphasis on ensuring project timetables are met and communication is upheld throughout the process.

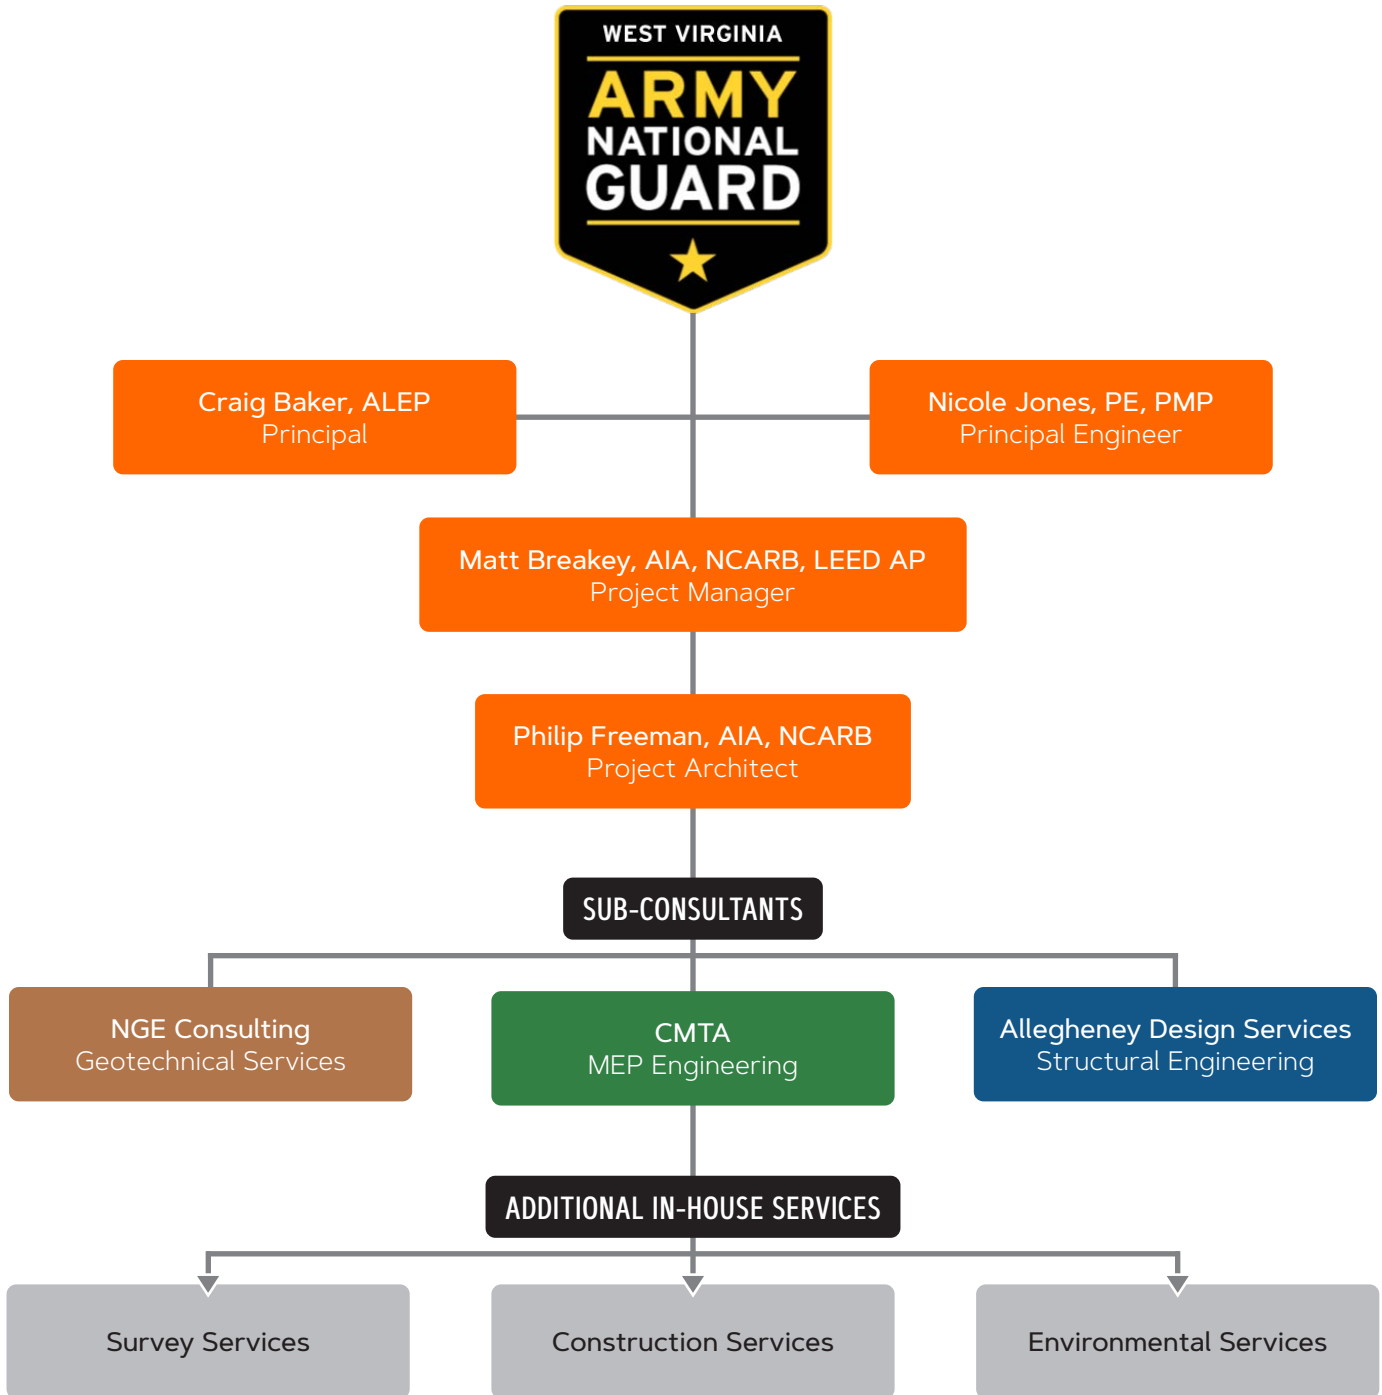

To accomplish these goals, Thrasher utilizes scheduling to track every stage of a project - from design and bidding through construction completion. We also require contractors working on our projects to regularly update their project schedules and give a detailed progress report at each job meeting, again focusing on the communication component of scheduling. This helps to ensure all parties are informed and aware of potential delays. Keeping our owners up to speed with progress is always our priority and ensures occupancy and owner supplied equipment are scheduled accordingly.

The Thrasher Group has successfully completed several projects for the West Virginia Army National Guard. We bring a comprehensive team of engineers, architects, and landscape architects to design facilities that are not only functional but aesthetic and easy to maintain. This team of multi-disciplinary experts has partnered with the Guard on a variety of project types over the years.

Below is a sampling of the projects we have done for West Virginia Army National Guard:

- » Stormwater Pollution Prevention Plan and Spill Prevention, Control, and Countermeasure Plan Development
- » National Pollutant Discharge Elimination System Individual Permit
- » Camp Dawson Stormwater
- » Wheeling Stormwater
- » Vehicle Wash Permits
- » Williamstown Apron Rehabilitation
- » CFMO Office HVAC Renovations
- » Wheeling and Williamstown Hangars

PROFESSIONAL OVERVIEW

Craig Baker, ALEP, is an experienced designer and manager with an extensive background working with clients to design, plan, and manage projects both large and small. As an Accredited Learning Environment Planner (ALEP), he has a special interest in the functionality and design of educational facilities.

Craig has worked on a wide variety of projects during his tenure at Thrasher. His knowledge includes a thorough understanding of industrial facilities, administrative office spaces, academic building design, government buildings, residences, medical facilities, and hospitality.

As manager of Thrasher's Architecture Market, Craig works hand-in-hand with staff and clients to ensure projects remain on time and within budget. In addition to his strong technical skills, Craig's attention to client communication and responsiveness make him an excellent manager. He manages coordination of construction, detailed construction document preparation, bidding, construction management, and contract administration.

PROFESSIONAL OVERVIEW

Nicole Jones, PE, PMP, is an integral member of Thrasher's Land Development and Transportation Markets. She is experienced as a Project Engineer and Project Manager for a variety of client types. Nicole has worked alongside Thrasher's team of talented engineers and support staff to design several million dollars' worth of critical infrastructure upgrades over the years. Her projects have served both public and private clients, ranging from state highway systems and regional airports to municipalities and large-scale developers.

Her meticulous design aesthetic has served clients well, as she is able to clearly evaluate project sites and identify key challenges that ultimately impact design feasibility. Nicole is heavily involved in all facets of a project-assisting with site layout, drafting, project specifications, and reviewing final plans. Her thorough project documentation also draws the attention of Contractors, and results in highly competitive bidding.

PROFESSIONAL OVERVIEW

Matt Breakey, AIA, NCARB, LEED AP, has over 30 years of experience providing architectural design and management services. He has worked with a wide range of clients, including those in the education section (K-12 and higher education), state, federal, correctional, commercial, and multi-unit residential and healthcare providers.

Matt spent part of his career providing oversight for major capital construction projects for two auxiliary entities at a higher education institute. This experience gave him a refined eye for the design aspect as well as project construction and feasibility. As a LEED Accredited Professional, Matt works with clients to find cost saving and sustainable features that will enhance their projects. His educational background combined with his well-executed projects make Matt a highly sought-after architect.

Paula Guffey PE

ROLE: Principal-in-Charge / Project Manager

Profile

Ms. Guffey is a Principal and Electrical Engineer at CMTA. She brings almost 30 years of multi-disciplinary electrical and mechanical design experience, working on both new construction and renovation projects. She has significant experience in higher education, governmental, industrial, institutional, pharmaceutical, multi-family, commercial, hazardous, power generation and health care facilities.

She is knowledgeable with many specialized aspects of electrical design such as high voltage system distribution and low voltage internal and external communications design. Throughout her career, Ms. Guffey has gained extensive knowledge of renewable energy systems, energy efficient lighting, security lighting, IT infrastructure and general building electrical systems design.

Role

As Project Manager/Lead Electrical Engineer, Ms. Guffey will coordinate with the design team to meet the expectations of the project. She will be responsible for the design of electrical systems and the production of plans and specifications for the electrical systems to ensure the design developed by the team will be executed properly. She will ensure that energy efficient design principles are incorporated into the MEP systems.

Primary Employer of Record:	ALLEGHENY DESIGN SERVICES

Geotechnical Engineering & Drilling Services

Geotechnical Engineering

Geotechnical engineering is one of NGE's core areas of practice. Our highly qualified and experienced staff of geotechnical engineers, geologists, and technicians enables us to provide practical and economic solutions to a variety of geotechnical problems. We are especially experienced and qualified in dealing with the types of geotechnical issues typically encountered in the Appalachian region.

Some of the geotechnical engineering services NGE provide include:

- Commercial development geotechnical investigations and reports
- Shallow and deep foundation analysis
- Highway and bridge geotechnical studies
- Well pads and compressor stations geotechnical investigations
- Water storage tank investigations
- Freshwater and wastewater impoundment investigations
- Slope stability studies
- Fill embankment analysis and design
- Cut slope analysis and design
- Retaining wall design
- Landslide investigations and remedial designs
- Laboratory soil testing
- Geotechnical instrumentation
- Mine subsidence investigations
- Pile drivability studies
- Groundwater and seepage studies

Geotechnical Drilling Services

In addition to geotechnical engineering services, NGE also offers geotechnical drilling and exploration services with in-house experienced drilling personnel. Equipment available for use includes track-mounted drill rigs which can be used to access most sites, portable hand-operated equipment for difficult to reach sites, and dynamic cone penetrometer equipment. Some of the drilling and exploration services offered include:

- Test borings with Standard Penetration Sampling
- Rock coring and sampling
- Shelby tube sampling
- Piezometer and monitoring well installation
- Slope inclinometer installation
- Dynamic cone penetrometer testing
- Portable drilling equipment for difficult site access

RANDOLPH COUNTY DEVELOPMENT AUTHORITY Convention Center

Client Contact:

Mr. Robert L. Morris, Jr., Executive Director
10 11th St., Suite A | Elkins, West Virginia 26241
304-637-0803

The Thrasher Group worked with the Randolph County Development Authority to create a redevelopment plan for the historic railyard property located in Downtown Elkins. The program for the plan includes a 16,000 square foot events and convention center that would serve as a versatile performance venue, event space, and conference space for a variety of different users.

The floor plan for the building create a space that can be utilized as a single large space or broken into multiple sections for smaller group use. Additionally the building will serve as a welcome center with exhibits that celebrate the history and heritage of Elkins and the Railyard.

The remaining acreage for the Railyard will be developed with a mixed use commercial building that has bottom floor retail space for small businesses to occupy with top floor Class A office space. An existing plaza and amphitheater space will be accompanied by an outdoor patio with the ability to accommodate farmers markets, outdoor events, or food truck festivals. Important connections to the river front and nearby bike trails will be made with ample parking for these recreational uses when the events space is not active.

DODDRIDGE COUNTY SCHOOLS Early Learning Academy

Client Contact:

Mr. Scott Cochran, Superintendent
268 Bulldog Dr. | West Union, WV 26456
304-873-2300

The Thrasher Group designed a new facility for Doddridge County Schools that is dedicated to Pre-K and Kindergarten education. The school has separate parent and bus drop-off areas, with visitors entering through a Safe School entrance. The project features separate academic wings, STEM Labs, outdoor classrooms, and playgrounds for both grade levels. An operable partition allows the Gymnasium and Café to be open into one space for large events, while a large

folding stage provides an area for presentations. The FF&E package, a practice football field with artificial turf, and a new access bridge were also part of the Contract work.

HARRISON COUNTY COMMISSION

Harrison County 4-H
Recreation/Meeting Center

Client Contact:

Harrison County Commission
301 West Main Street | Clarksburg, WV 26301
304-624-8500

The Harrison County 4-H Recreation Center is utilized by many community members for the purposes of offering programs that enhance the development of individuals interested in 4-H. The facility also serves as a great location for special events, summer playground programs, instructional programs and sports leagues. The facility is often used for weddings, reunions, and meetings. The large glass windows provide a panoramic view of the surrounding hills to serve as a beautiful backdrop for any event. The outdoor areas overlook the neighboring golf course, and the conference facilities can accommodate over 1,600 people.

BOY SCOUTS OF AMERICA J.W. Marriott Jr. Leadership Center

Client Contact:

Mr. Rob Ridgeway, Facilities & Development Director
2550 Jack Furst Drive | Glen Jean, WV 25846
304-646-2312

The JW Marriott Leadership Center is one of several new buildings at the Summit Bechtel Reserve in Glen Jean, West Virginia. This building works in conjunction with other activities at the Reserve as a remote retreat designed to stimulate out-of-the-box thinking while immersing guests in a wooded habitat with expansive views of the valley below.

The JW Marriott Leadership Center provides numerous spaces for educational, social, and dining activities with a flexible, fluid design. The building contains a two-story lobby that offers several break-out spaces for learning and collaboration, as well as a link to the adjacent lodge. Classrooms can be divided into different configurations to accommodate a variety of group sizes. The building's auditorium – Yamagata Hall – can be adapted for use for lectures, movies, theater, and live music performance. Additionally, the primary spaces lack parallel walls and have sloping ceilings with unique lighting systems, while the circulation paths create an ever-unfolding environment.

CITY OF BECKLEY Fire Station #3

Client Contact:

Mr. Rob Rappold, Mayor
409 S. Kanawha Street | Beckley, WV 25802
304-256-1768

The Thrasher Group was hired by the City of Beckley for the design of their new Fire Station #3 building. The services provided included architectural design; site, structural, mechanical, electrical, and plumbing engineering; survey; interior design; construction administration; and materials testing. This 20,000 square foot fire station includes four apparatus bays, male and female bunk rooms, offices, day room, exercise room, a 50-person training room, support areas, and a storage mezzanine.

The site work was a large portion of this project. Thrasher's design provided two separate access points for the site, with one employee entrance and one that allows EMS crews to exit directly off-site. Additionally, the pad was designed to allow vehicles to flow through, including access for the Fire Department to utilize the training tower without interfering with daily activities. Site work also included running utilities for sanitary sewer, potable water, and natural gas service.

Another component Thrasher was responsible for was stormwater management. A bio-retention pond was designed to collect and treat the stormwater runoff, per local regulations. The Thrasher team oversaw these regulations as well as permitting for the West Virginia Division of Highways, Beckley Sanitary Board, and West Virginia Department of Environmental Protection.

The image features the Thrasher logo, which consists of the word "THRASHER" in a white, stylized, blocky font. The logo is centered horizontally and vertically. The background is a vibrant orange color with a complex pattern of overlapping, semi-transparent geometric shapes, primarily triangles and polygons, creating a sense of depth and movement. The lines of these shapes are in a lighter shade of orange, creating a layered effect.

THRASHER
