Subject: Response to CRFQ OOT2700000006 - Temporary Technical Staffing Services

Dear Mr. Welch,

Virtual Technology Enterprise Group, Inc. (VTEGI) is pleased to respond to CRFQ OOT2700000006 in support of the West Virginia Office of Technology (WVOT). VTEGI provides IT staffing and technical services to government and commercial clients across systems engineering, system and server administration, network management, virtualization, cybersecurity, application and database support, and desktop support.

Our delivery experience gives us a practical basis for identifying professionals who can perform the work in this solicitation. Under our USDA-ARS Professional Services contract, VTEGI's Senior Systems Engineer restored physical and virtual server environments servers, storage, switches, and routers and performed cybersecurity engineering, vulnerability remediation, configuration changes, and testing in coordination with Dell and VMware support. Additional engagements include U.S. Geological Survey VMware support, U.S. Naval Academy data-center equipment support, and North Carolina DHHS Micro Focus/COBOL support, along with other Federal and State work spanning the infrastructure, database, application, cybersecurity, and systems disciplines aligned to WVOT's needs.

For WVOT, we will treat each staffing request as a defined technical requirement: review the requested classification and qualifications, identify candidates whose education and experience match, verify each candidate's information, and submit them for WVOT's consideration. This keeps every submission tied to the specific labor classification the State requests rather than to generalized candidate profiles.

VTEGI has reviewed CRFQ OOT2700000006 including its specifications, terms, conditions, staffing requirements, and submission instructions and accepts the requirements without exception. We acknowledge receipt of Addendum 1 and Addendum 2 and have incorporated them into this response.

We appreciate the opportunity to respond to the State of West Virginia and the West Virginia Office of Technology, and we look forward to providing technical professionals whose qualifications directly match WVOT's staffing requirements.

Sincerely,

Terry Williamson

COMPANY OVERVIEW & CAPABILITY STATEMENT

COMPANY OVERVIEW

Virtual Technology Enterprise Group Inc. (VTEGI) provides IT staffing and technical services to government and commercial organizations. Our capabilities cover system engineering, system administration, network management, server administration, virtualization, desktop management, information assurance, hardware and software procurement, technical documentation, training, and IT staffing.

VTEGI's technical experience aligns with the environment WVOT describes in this solicitation. Our team has supported enterprise infrastructure, physical and virtual servers, storage, switches, routers, VMware environments, cybersecurity requirements, application software, and database-related systems for Federal and State customers. This includes work for the U.S. Department of Agriculture, U.S. Geological Survey. Naval Academy, Department of Energy/Jefferson Lab, North Carolina Department of Health and Human Services, and Virginia Community College System.

VTEGI is the Best Value for WVOT

- **Technical Depth:** Technical resources spanning cloud, cybersecurity, infrastructure, applications, databases, networking, and systems management.
- **Government IT Experience:** Proven technical delivery across USDA, USGS, U.S. Naval Academy, DOE/Jefferson Lab, NCDHHS, and Virginia Community College System.
- **Class-Based Staffing:** Candidates matched to WVOT's specific classification and qualification requirements, not generic IT resumes.
- **Ready for Complex Environments:** Experience working within established enterprise and government IT environments while supporting ongoing operations.
- **Knowledge That Stays:** Personnel support mentorship, training, documentation, and structured knowledge transfer so capability remains with WVOT.
- **Quality-Controlled Delivery:** ISO 9001, ISO 20000-1, and ISO 27001 certified processes supporting quality, IT service management, and information security.

For USDA-ARS, VTEGI assigned a Senior Systems Engineer to diagnose and restore physical and virtual server environments, including servers, storage devices, switches, and routers. The assignment also required cybersecurity engineering, vulnerability remediation, configuration changes, testing, documentation, and coordination with Dell and VMware support teams. This experience is directly relevant to WVOT's need for specialized technical resources capable of working within established enterprise environments without disrupting ongoing operations.

Our experience also extends across VMware, cloud and virtualization environments, network infrastructure, cybersecurity, application software, and mainframe-related technology. For example, VTEGI supported VMware software and maintenance for the U.S. Geological Survey and provided Micro Focus/COBOL software support for the North Carolina Department of Health and Human Services. These engagements give our team experience across multiple technology environments represented in WVOT's requirement.

WVOT's requirement goes beyond filling a technical seat. Contract personnel must also provide professional mentorship, technical training, and structured shadowing to State analysts so that knowledge remains with the State after the engagement. VTEGI's service portfolio includes training and technical documentation, and our USDA engagement required engineers to document configuration changes and work directly with customer personnel during implementation. We will carry that same knowledge-transfer discipline into each WVOT assignment.

For each staffing request, our team will start with the specific WVOT classification and qualification requirements, then align the candidate's technical background to the work the State

Use or disclosure of data contained on this sheet is subject to the restrictions on the title page of this Proposal

needs performed. This is particularly important for WVOT's specialized requirements spanning web applications, CRM, SQL Server, business analysis, eLearning, cloud financial operations, cloud architecture, cloud security, cloud platforms and networks, CCOE implementation, and mainframe programming.

VTEGI's approach gives WVOT access to technical resources that can match the requested skill set, work within the State's existing technology environment, and transfer practical knowledge to State personnel while performing the assigned work. That directly supports WVOT's stated need for specialized expertise, temporary staff augmentation, project execution, and long-term sustainability of its IT environment.

VTEGI maintains ISO 9001:2015, ISO 20000-1:2018, and ISO 27001:2013 certifications, reflecting established processes for quality management, IT service management, and information security.

UNDERSTANDING OF THE REQUIREMENT

VTEGI understands that WVOT is establishing multiple open-end contracts for temporary technical staffing across 13 technical classifications covering application development, database administration, business analysis, learning technologies, cloud, cybersecurity, infrastructure, and mainframe systems.

WVOT needs qualified technical professionals when specialized skills are required beyond its existing workforce. Each candidate must meet the qualifications of the requested classification and align with the specific work requirement.

We also understand that WVOT expects assigned personnel to perform the required work while transferring knowledge through mentorship, technical training, and structured shadowing. Our team will focus on accurate qualification matching, responsive candidate delivery, and productive performance from the start of each assignment.

STAFFING CAPABILITY AND DELIVERY APPROACH

VTEGI will use a requirement-driven staffing approach to provide WVOT with technical professionals whose qualifications match the requested labor classification and assignment. Our approach combines VTEGI's IT staffing capability with technical experience across systems engineering, infrastructure, virtualization, cybersecurity, application and database environments, and related IT services. Our delivery model is built around four steps with 2 additional steps

Requirement, Qualification Match and Candidate Validation, Technical Role Alignment, Candidate Delivery and Knowledge Transfer and Quality Assurance Our focus is qualification accuracy at the point of submission. WVOT receives candidates selected against the requirements of the specific staffing request, supported by VTEGI's experience delivering technical personnel and services across Federal and State environments. *Figure 1* below describes VTEGI's Staffing process for WVOT.

Use or disclosure of data contained on this sheet is subject to the restrictions on the title page of this Proposal

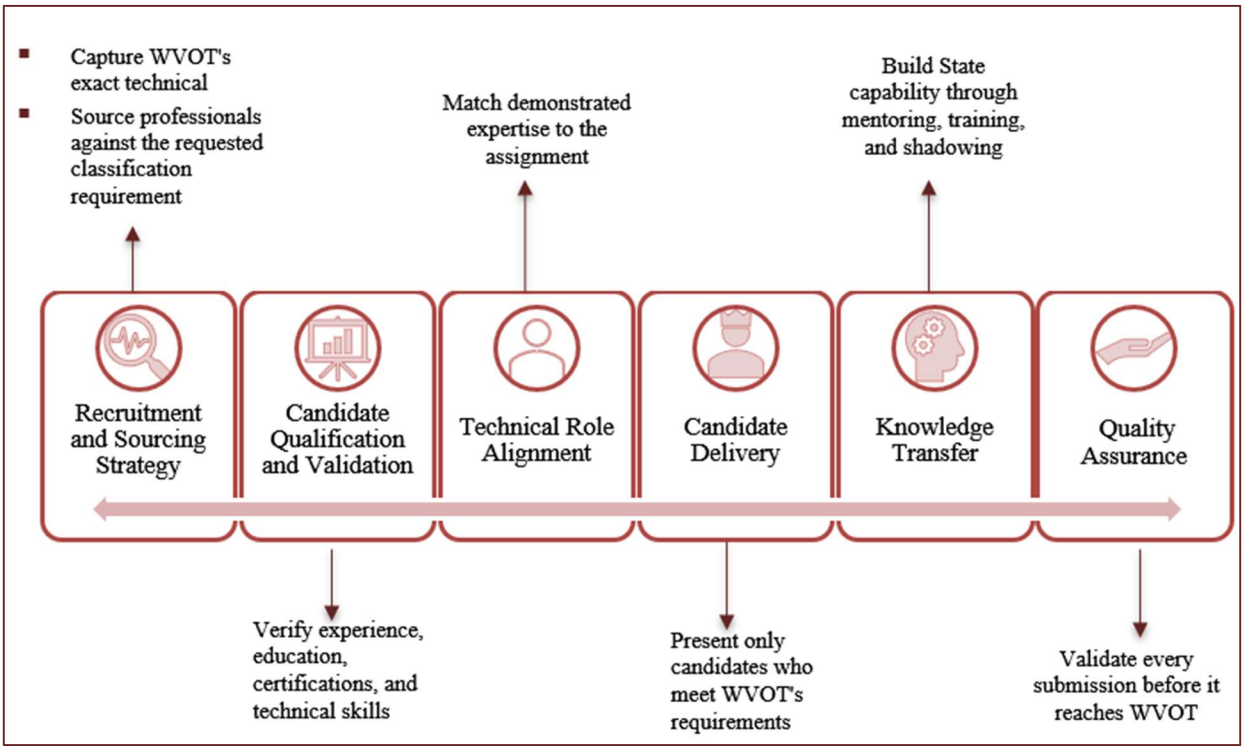

Figure 1:Our Staffing Model

1. *Recruitment and Sourcing Strategy*

VTEGI will begin each staffing request by reviewing the specific labor classification, minimum qualifications, technical skills, experience, education, certifications, and assignment requirements identified by WVOT.

Our technical service experience gives our team a practical basis for identifying professionals across the disciplines represented in the CRFQ. VTEGI's documented capabilities include system engineering, server administration, network management, virtualization, desktop management, information assurance, hardware/software integration, and IT staffing.

We will focus sourcing on candidates whose backgrounds correspond to the requested classification rather than submitting candidates based solely on broad IT experience.

2. *Candidate Qualification and Validation*

Before presenting a candidate, our team will compare the candidate's qualifications against the applicable WVOT labor category. We will review the candidate's relevant education, experience, technical background, certifications where required, and experience with the technologies identified in the staffing request.

VTEGI's technical delivery experience provides additional insight into the skills required for specialized assignments. For USDA-ARS, for example, VTEGI assigned a Senior Systems Engineer to support physical and virtual servers, storage, switches, routers, VMware infrastructure, cybersecurity engineering, vulnerability remediation, configuration changes, testing, and technical documentation.

Candidates who do not satisfy the applicable qualification requirements will not be presented as qualified resources for that classification.

3. Technical Role Alignment

VTEGI will align each candidate to the work actually requested by WVOT, not simply to a job title.

This is particularly important because the CRFQ spans specialized disciplines including web application development, CRM, SQL Server database administration, business analysis, eLearning, cloud financial operations, cloud architecture, cloud security, cloud platforms, cloud networking, cloud systems management, CCOE implementation, and mainframe programming.

Our team will evaluate the candidate's demonstrated experience against the technical responsibilities and minimum qualifications associated with the requested classification and provide WVOT with the information needed to evaluate the candidate's fit.

4. Candidate Delivery and Staffing Support

VTEGI will maintain a direct line of communication with WVOT throughout the staffing process. When WVOT identifies a staffing requirement, our team will confirm the requirement, identify appropriately qualified candidates, complete the applicable qualification review, and submit candidates for WVOT's consideration.

Our objective is straightforward: give WVOT qualified candidates who meet the stated requirement not a volume of resumes that requires the State to determine basic qualification itself.

5. Knowledge Transfer and Assignment Support

WVOT's requirement includes professional mentorship, technical training, and structured shadowing so that State analysts can gain knowledge from temporary technical resources.

VTEGI's technical service experience includes training and technical documentation, and our past performance includes documenting infrastructure configuration changes and working with customer personnel during technical implementation.

For assignments requiring knowledge transfer, our team will support the assigned professional in documenting relevant technical information, working with designated State personnel, and sharing practical knowledge within the scope of the assignment.

6. Quality Control and Delivery Excellence

VTEGI maintains qualification control throughout the candidate delivery process. Our team will verify that the candidate presented corresponds to the requested classification and stated WVOT requirements before submission.

VTEGI also maintains ISO 9001:2015, ISO 20000-1:2018, and ISO 27001:2013 certifications, supporting established quality, IT service management, and information security practices within the company.

This experience and proposed resource alignment demonstrate VTEGI's ability to provide technical professionals matched to the State's defined qualification requirements.

VTEGI exceeds the five-year experience requirement in Section 3.1. Supporting documentation is included with this response.

3.2 RELEVANT STAFFING EXPERIENCE – DEMONSTRATED PLACEMENT CAPABILITY

VTEGI has demonstrated its ability to provide qualified technical personnel for Federal and State technology environments. Our IT staffing capability is supported by technical delivery experience across application development, database administration, systems engineering, cloud, cybersecurity, networking, infrastructure, and mainframe environments.

VTEGI has provided technical resources to organizations including the U.S. Department of Agriculture, U.S. Geological Survey, Department of Energy/Jefferson Lab, U.S. Naval Academy, North Carolina Department of Health and Human Services, and Virginia Community College System. These engagements required personnel with specialized technical skills and the ability to perform within established government IT environments.

This experience aligns with the technical breadth of WVOT's requirement. VTEGI's proposed resources include personnel aligned to Business Analysis, Cloud Security, Cloud Platform Engineering, Cloud Network Engineering, Cloud Systems Management, and CCOE Implementation, with additional resources identified against the remaining WVOT classifications.

The following placement experience provides the individual, client/entity, position or classification, period of performance, and client contact information required to demonstrate VTEGI's technical staffing capability.

ALIGNMENT WITH CONTRACT REQUIREMENTS

VTEGI's demonstrated technical staffing experience aligns with the breadth of WVOT's 13 required technical classifications. Our proposed resources include personnel aligned to Business Analysis, Cloud Security, Cloud Platform Engineering, Cloud Network Engineering, Cloud Systems Management, and CCOE Implementation, with supporting experience across Federal and State technology environments.

These assignments demonstrate our ability to provide personnel with specialized technical skills matched to defined customer requirements. VTEGI's experience across the U.S. Department of Agriculture, U.S. Geological Survey, Department of Energy/Jefferson Lab, and Virginia Community College System provides relevant experience supporting the types of technical environments addressed by this CRFQ.

Our approach keeps the staffing process focused on qualification, technical fit, and assignment requirements. We will apply the same discipline to WVOT requests by matching each candidate to the applicable classification and verifying that the candidate's documented qualifications meet the requirements established in the CRFQ.

DEMONSTRATED CAPABILITY AND PERFORMANCE STRENGTHS

VTEGI's experience provides WVOT with several capabilities directly relevant to this staffing requirement:

- Technical breadth: VTEGI has provided technical resources across application, database, systems, cloud, cybersecurity, networking, and infrastructure environments, supporting the range of disciplines represented in WVOT's 13 classifications.
- Government IT experience: Our team has supported Federal and State organizations, including the U.S. Department of Agriculture, U.S. Geological Survey, Department of Energy/Jefferson Lab, U.S. Naval Academy, North Carolina Department of Health and Human Services, and Virginia Community College System.
- Specialized personnel: VTEGI has identified personnel aligned with Business Analysis, Cloud Security, Cloud Platform Engineering, Cloud Network Engineering, Cloud Systems Management, and CCOE Implementation, providing WVOT with technical resources matched to defined areas of need.

- Requirement-focused staffing: Our staffing approach centers on the specific WVOT classification and its stated qualifications. Candidates are aligned to the technical requirements of the assignment before being presented to the State.
- Technical continuity: VTEGI's experience supporting established government technology environments enables assigned personnel to work within existing systems, processes, and customer requirements while contributing to ongoing operations.

Together, these capabilities position VTEGI to support WVOT with qualified technical personnel matched to the State's requirements, while maintaining the technical focus, responsiveness, and continuity expected under the temporary staffing contract.

COMPLIANCE STATEMENT

VTEGI confirms that it has reviewed and understands the requirements of CRFQ OOT2700000006 and will perform in accordance with the solicitation, its specifications, terms, and conditions. VTEGI takes no exceptions to the requirements and acknowledges all addenda issued in connection with this CRFQ.

All personnel provided under the resulting contract will meet or exceed the minimum qualifications established for the applicable WVOT classification and will satisfy applicable employment eligibility requirements. VTEGI will comply with all applicable Federal and West Virginia laws, regulations, and contract requirements throughout performance.

WORKFORCE AVAILABILITY AND SCALABILITY

This approach gives WVOT a consistent staffing process for both routine requirements and specialized technical needs.

VTEGI's experience supporting multiple Federal and State technology environments provides the operational foundation to identify, qualify, and deliver technical personnel as requirements arise.

“THE REMAINDER OF THE PAGE HAS BEEN INTENTIONALLY LEFT BLANK”

COMMITMENT TO SERVICE EXCELLENCE

VTEGI's commitment is straightforward: provide WVOT with qualified technical personnel who meet the requested requirements and can contribute from the start of the assignment.

We will maintain close communication with WVOT throughout each staffing request, from requirement clarification and candidate identification through submission and assignment support. Our team will keep the focus on qualification, technical fit, responsiveness, and compliance with the CRFQ.

Each staffing request will be evaluated against the applicable WVOT classification before a candidate is presented. This helps ensure that the State receives candidates whose education, experience, technical skills, and other required qualifications correspond to the position requested.

VTEGI will also support the State's requirement for mentorship, technical training, and structured knowledge transfer when included in an assignment. Our goal is not simply to fill a position, but to provide technical capability that supports WVOT's immediate requirements while strengthening the State's ability to sustain its environment.

Throughout contract performance, we will maintain clear communication, accurate candidate information, timely staffing support, and adherence to all contractual requirements. Or is the award based solely on price among vendors meeting the stated minimum qualifications.

Answer: *Contracts will be awarded to vendors that provides the contract Items meeting the required specifications for the lowest cost as shown on the Pricing Pages.*

3. If a technical response is required, could you point us to the section of the solicitation documents that describes its required format and content?
