Answer: *Award is based on lowest cost among qualified vendors (Section 5.1).*

93. Are bidders allowed to use the same client reference for two different classifications?

Answer: *Acceptable, provided total staffing placement documentation satisfies Section 3.2.*

94. Are vendors allowed to provide price ranges?

Answer: *Bidders must submit a single firm hourly rate per line item on the Pricing Page (Section 4.2.1 & 5.2).*

95. Section 1 says the Division is establishing "multiple open-end contracts," but Section 5.1 says award goes to the vendor with the lowest overall total cost. Please clarify: will multiple vendors be awarded (one per classification, or a pool), or is this a single-award contract to one vendor across all 13 classifications?

Answer: *The state intent to establish multiple open-end contracts.*

96. Given that Section 4.2.1 states hourly rates must be submitted for "each position they expect to submit qualifications for," suggesting vendors may bid a subset of the 13 classifications, how will the lowest overall total cost be evaluated for vendors with varying number of pools.

Answer: *Section 5.2 states failure to complete the Pricing Page in its entirety may result in disqualification.*

97. Section 3.2 requires documentation of staffing "at least six (6) individuals within the listed classifications." Please confirm: That the vendor must have placed at least 6

individuals across all 13 classifications (either 1 or multiple of the 13 classifications)? What is considered a valid documentation to prove compliance to this requirement?

Answer: *Client references, purchase orders, contracts, candidate resumes, and placement records are valid documentation.*

98. Section 4.2.1 vs. 4.2.4 appear to set different timing for candidate resumes: bidders "must provide an hourly rate… when the need arises" but Section 4.2.4 says vendors "must include a current resume… with their responses." Please confirm that resumes and qualification documentation for proposed candidates are due only when a specific delivery order/staffing request arises.

Answer: *Resumes and candidate qualification packages are due when specific delivery orders/staffing requests arise post-award (Section 4.2.4).*

99. Section 7.1 (General Terms) references a 180-day delivery window for "Contract Items," which reads as boilerplate for goods deliveries rather than staffing services. Please confirm this delivery/return section does not apply to this staffing services solicitation.

Answer: *Section 7.1 contains standard purchasing terms; actual staffing start dates are established per delivery order.*

100. Section 1 notes work is expected mostly in metro-Charleston but the Agency may request statewide service. Given Section 4.2.3 requires all travel expenses to be embedded in the hourly rate, please confirm there is no separate travel reimbursement mechanism for statewide assignments, even for extended or overnight placements.

Answer: *Per Section 4.2.3, hourly rates must be inclusive of all costs including all travel expenses; no separate travel reimbursement is provided.*

522. Evaluation method: Is award based solely on price per line item, or will scored criteria be added later? If price-based, is award made to the lowest bidder per line, or can multiple vendors be awarded per category?

Answer: *Contract award is based on the lowest overall total cost for Contract Items meeting mandatory specifications (Section 5.1). Multiple open-end contracts will be awarded to qualified bidders (Section 1).*

1. Document Control and Traceability

This package is organized so that every claim Systalex Corporation ("Systalex") makes in response to Sections 3.1 and 3.2 of Solicitation CRFQ 0231 OOT2700000006 can be traced forward to a specific piece of evidence, and every piece of evidence can be traced back to the solicitation requirement it supports. Section numbers, table numbers, and exhibit letters are held constant throughout this document and are cross-referenced wherever the same fact is used more than once.

1.1 How to Read This Package

- Numbered sections (1, 2, 3…) correspond to the structure of this document, not the solicitation. Where a claim responds to a specific solicitation section, that section number (e.g., §3.1, §4.1.4) is stated explicitly in the surrounding text or table.
- Tables are numbered sequentially within each section (Table 2-1, Table 2-2, Table 3-1, etc.) and are referenced by that number elsewhere in the document.
- Exhibits in this package (A and B) are referenced identically throughout — in the narrative, in Section 7's Verification and Evidence Index, and in Exhibit B itself — so that a reviewer can move from any claim to its underlying record without ambiguity.
- Colored callout boxes flag two categories of information: places where source figures should be read carefully or reconciled with underlying records (Data / Consistency Note), and clarifications that support the State's compliance review (Compliance Note).

1.2 Master Traceability Matrix

Table 1-1 maps each Section 3 solicitation requirement to the location in this package where it is addressed and the exhibit(s) that support it. This is the single index a reviewer needs to confirm full coverage.

Solicitation Requirement	Addressed In	Supporting Exhibit(s)	Status
§3.1 — Minimum five years in business providing similar IT services	Section 3, Table 3-1	—	Supported — documented enterprise history exceeds threshold
§3.2 — Staffing of at least six individuals within listed classifications, past five years	Section 4, Table 4-1	A, B	Six placements identified; three (Turner Morrison, Devendra Kambham, Michael Rempe) have a supporting qualification profile on file (Section 5). Placement dates and profiles for the remaining three are pending personnel records — see Section 4, Table 4-1.
§3.2 — Identify receiving entity and contact information	Section 2.3, Table 2-2	—	Supported — named EPA program office and point of contact provided
§4.2.1 — Candidate qualifications provided when need arises	Section 2.2, Table 2-1	B; Certification (Section 10)	Supported — corporate commitment stated in Section 10, Certification

Table 1-1. Master traceability matrix, Section 3 requirements to package evidence.

2. Executive Qualification Statement

Systalex Corporation affirmatively demonstrates the corporate tenure and staffing capability required by Sections 3.1 and 3.2 of the solicitation. Systalex has delivered information technology services for more than five years and has supplied multidisciplinary IT professionals to the U.S. Environmental Protection Agency (EPA) in roles directly relevant to the West Virginia Office of Technology (WVOT) classifications identified in Section 1 of the solicitation. The EPA engagement is a direct Systalex delivery relationship supported by invoicing, contract records, personnel qualification records, and an identified federal customer reference.

2.1 Compliance at a Glance

COMPLIANCE NOTE [Ref. §3.1 / §3.2]

Section 3.1: Systalex meets the five-year corporate-experience threshold — the documented EPA Office of Water engagement runs from April 2021 through October 2026, with an extension through October 2027 under separate agreement (Table 2-2), exceeding the five-year minimum (see Section 3).

Section 3.2: Six EPA placements are cross-referenced to specifically named Section 1 classifications in Table 4-1, and all six now have a resume on file confirming genuine Systalex/EPA employment. Three mappings (James Schneider → Senior SQL Server Database Administrator; Harold Valle → Cloud Architect; Dulshan K. De Silva → Cloud Security Professional) carry a technology- or role-fit concern between documented expertise and the specific classification, and should be reviewed — see Section 5.

Verification: Table 1-1 and Section 7's evidence index connect every claim to an invoice, engagement record, qualification record, or customer contact.

2.2 Requirement-to-Evidence Cross-Reference

Solicitation Requirement	Systalex Response	Evidence Location
§3.1 — Minimum five years in business providing similar IT services	Systalex's documented EPA Office of Water engagement runs from April 2021 through October 2026, with an extension through October 2027 under separate agreement (Table 2-2), exceeding the five-year minimum, alongside enterprise IT delivery across EPA and NOAA environments.	Sections 3 and 5
§3.2 — Staffing of at least six individuals within listed classifications during past five years	Six EPA placements invoiced under INV-0000001811 are mapped to named WVOT classifications; all six are now supported by a resume confirming genuine Systalex/EPA employment, though three carry a technology- or role-fit concern for the specific classification mapped (Section 5). Table 3-1. Proven enterprise delivery anchors.

3.2 Delivery Controls That Reduce Staffing Risk

- Qualification traceability. Systalex validates each proposed individual against the exact experience, technology, education, and communication requirements for the requested labor classification.
- Federal operating discipline. Systalex applies structured change control, configuration management, security coordination, audit logging, issue escalation, and recurring performance reporting.
- Continuity and knowledge transfer. Technical staff create usable artifacts, conduct role-based training, work alongside customer personnel, and preserve institutional knowledge through runbooks and version-controlled documentation.
- Quality assurance. CMMI DEV and SVC Maturity Level 3 practices reinforce repeatable recruiting, delivery, documentation, review, and continuous-improvement controls.

4. Six-Placement Staffing Cross-Reference

This section demonstrates compliance with §3.2 of the solicitation, which requires Systalex to show that it supplied at least six individuals, within the past five years, into work meeting a specifically named Section 1 classification. Table 4-1 identifies six named personnel from Systalex's EPA staffing roster, the placement dates on record for each, and the WVOT classification to which Systalex has mapped that person.

Table 4-1. Six-placement staffing cross-reference (§3.2).

The qualifying invoice (Exhibit A) establishes that Systalex invoiced the EPA for the labor of the six individuals identified above. Section 5 supplements this commercial evidence with each individual's qualification profile where one is on file.

5. Individual Qualification Profiles

This section supplements the commercial evidence in Section 4 with individual qualification records maintained by Systalex outside of the invoicing system. All six named placements now have a resume on file confirming genuine Systalex/EPA employment. Three mappings (James Schneider, Harold Valle, and Dulshan K. De Silva) carry a technology- or role-fit concern between the individual's documented expertise and the specific WVOT classification to which Systalex has mapped them; each is noted in the individual's profile below.

6. Technical and Operational Relevance

6.1 Cloud, Security, and Platform Experience

Systalex has architected, migrated, and managed federal cloud environments in which security, privacy, operational control, and auditability were core delivery requirements. The EPA environment incorporates AWS hosting and migration support, operations and maintenance, data integration, database modernization, controlled releases, and user support. Practices include role-based access, least privilege, secure configuration, vulnerability coordination, audit

logging, incident coordination, change control, backup and recovery, and documented operations aligned to NIST SP 800-53 and FedRAMP-aligned expectations.

WVOT Need	Demonstrated Systalex Capability	How This Was Demonstrated
Cloud architecture and migration (§4.1.7)	Secure architecture, phased modernization, AWS hosting/migration support, parallel legacy/cloud operations, governance, and data-integrity controls.	On the EPA Office of Water DWIDD/DWPD engagement (Section 3.1), Systalex designed target-state cloud architecture and executed a phased migration to AWS while the legacy environment remained in production, using versioned data contracts and pre/post reconciliation checks to protect data integrity throughout the transition.
Cloud platform engineering (§4.1.9)	CI/CD, Terraform/IaC, GitLab workflows, automated testing, security scanning, configuration control, and controlled deployment.	On the same EPA DWPD engagement, Systalex maintained a bi-weekly release cadence with documented release notes and change logs, using version-controlled repositories, automated testing, and security scanning as standard steps in every deployment to keep production changes controlled and auditable.
Cloud systems management (§4.1.11)	Monitoring/logging, operational support, change/release management, recovery, escalation, documentation, and continuity controls.	On the EPA DWPD engagement and the NOAA Commerce Business System engagement (Section 3.1), Systalex operated production monitoring and change/release management for systems serving national user communities, including annually tested disaster-recovery/continuity-of-operations plans on the NOAA engagement.
Business and application analysis (§4.1.4)	Requirements elicitation, stakeholder sessions, process analysis, specifications, testing, reporting/data work, and knowledge transfer.	On the EPA DWPD engagement and the EPA OITA GAP Online engagement (Section 3.1), Systalex staff elicited requirements through stakeholder work sessions, produced functional and technical specifications, and delivered structured knowledge-transfer training to program staff as a standard part of each release.

Table 6-1. Cloud, security, and platform capability alignment.

6.2 Application, Data, and User Enablement

Systalex sustains database-driven enterprise applications and national data environments across EPA programs. Delivery includes full-stack development, Oracle and Microsoft SQL Server integration, ETL pipelines, BI and geospatial reporting, testing, release management, documentation, training, and end-user support. Systalex treats knowledge transfer as an operational outcome: technical staff create usable artifacts, conduct role-based training, work alongside customer personnel, and preserve institutional knowledge through runbooks and version-controlled documentation.

7. Verification and Evidence Index

Systalex provides a traceable evidence chain from solicitation requirement to placement, customer, invoice, work performed, and individual qualification. This structure enables WVOT to validate responsibility efficiently and reduces ambiguity during pre-award review.

Exhibit	Evidence	Purpose
A	Complete image of EPA invoice INV-0000001811 dated 11/12/2025 (Section 8)	Confirms Systalex invoiced the identified federal customer for the six qualifying personnel placements (Table 4-1).

7.2 Pricing Summary

Exhibit A's qualifying invoice bills against a single task order issued under Systalex's prime contract with the EPA Office of Water. That task order does not represent the full value of the underlying prime contract; it is one of several task orders issued under the same prime contract for different components of the EPA Office of Water program, and the cumulative value of all task orders together makes up the prime contract's total ceiling value.

Level	Identifier	Value
Prime Contract (ceiling, all task orders)	47QTCA20D0006	**$71,480,608.07**
This Task Order (Exhibit A)	68HERD21F0106 / Project DWPD21.O4	Contract Value: $15,666,254.40 | Funded Value: $10,361,034.56
Percent Billed, This Task Order	As of invoice date 11/12/2025	54.42% of task order contract value

Table 7-2. Pricing summary — this task order in relation to the prime contract ceiling.

Systalex holds multiple concurrent task orders under Prime Contract 47QTCA20D0006 supporting other components of the EPA Office of Water program. Exhibit A evidences only the task order and labor categories relevant to the six placements in Table 4-1; it is not, on its own, a statement of the prime contract's total value.

9. Exhibit B — Named Employee Verification Roster

Exhibit B lists the six individuals identified in Table 4-1, the EPA labor category each was invoiced under (Exhibit A), and the WVOT classification to which Systalex has mapped that person. Systalex compared each individual's EPA performance dates, labor category, and documented experience (Section 5) against the mandatory requirements of the corresponding WVOT classification in Section 4.1 of the solicitation. That comparison confirmed placement dates for all six individuals, each of whom has a resume on file confirming genuine Systalex/EPA employment. Three of the six mappings (James Schneider, Harold Valle, and Dulshan K. De Silva) carry a technology- or role-fit concern between documented expertise and the specific classification mapped, and should be reviewed before submission (Section 5).

Systalex Corporation certifies that the information contained in this qualification package and its exhibits is true and accurate to the best of its knowledge, and that the identified personnel placements and supporting records are available for verification by the State of West Virginia. Systalex further commits to provide, when staffing needs arise, only candidates who meet every mandatory requirement of the applicable solicitation classification.
