INTRODUCTION

SECTION ONE BACKGROUND

IT ALL STARTED
WITH AN AMERICAN PARTNERSHIP.

April 1977, Snap-on Tools needed a reliable upfitter to convert GMC and Chevrolet cargo vans into mobile tool retail centers. In the back of our Lynch Chevrolet dealership here in Burlington, Wisconsin, we converted one of these vans into the first of its kind: the Snap-on Tool truck. Almost 50 years later, decades of experience, manufacturing prowess and growth has helped us grow into the industry's leading custom vehicle manufacturer. We have stayed true to our Midwestern roots and still operate our facilities here in Burlington. We are proud to employ generations of dedicated and talented staff members who have helped us produce these exceptional custom trucks (and trailers too!). We are leading the way in custom law enforcement, power & utility vehicles, mobile medical units, library outreach vehicles, fire rescue, tactical units, commercial specialty vehicles and more. Along the way, we have added to our features and options, our Intel-I-Touch™ vehicle automation system is installed in thousands of custom vehicles worldwide and our quality standard has never let up. LDV vehicles have the ability to be retrofit down the road to stay current as technology changes also. We look forward to the opportunity to build a legendary vehicle that you and your organization will be proud of for years to come.

MARY LYNCH
Vice President & Owner

Snap-on®

SECTION ONE SECOND-TO-NONE STAFF

THE PEOPLE MAKE THE DIFFERENCE.

WE ASSEMBLED A TALENTED TEAM TO BUILD YOUR NEXT CUSTOM TRUCK.

We are firm believers that the right people make all the difference when it comes to custom specialty vehicles. When employees are passionate about the work they do, the finished product is that much better.

Since our early beginnings, we have employed people that want to do great things every day. They enjoy the collaborative working environment required to design, build and deliver trucks and they like working on a team with similar worth ethic.

If you have ever toured our facilities, you have seen for yourself how many people work with a smile, jam out to the music in the background of the shop or fist bump their co-workers after knocking-out another large custom vehicle project for a customer. And if you haven't visited us, perhaps you should so you too can see the difference.

Much like recruiting the best, most talented players for a football team, LDV has made it our mission to bring in only the best staff members to work on your project. We call that: #teamLDV.

LDV
CUSTOM SPECIALTY VEHICLES

LDV, Inc. | 800-558-5986 | www.LDVusa.com

WHY ARE OUR TRUCKS BUILT BETTER?

DIFFERENTIATORS

INTEL-I-TOUCH™ VEHICLE AUTOMATION SYSTEM

LDV's Intel-I-Touch™ vehicle automation system puts full vehicle control at your fingertips. Nobody in the industry offers an all-inclusive system that is as user-friendly as the Intel-I-Touch. All vital vehicle functions are controlled through the easy-to-navigate touch panel. Slide-out rooms, lighting, HVAC, vehicle leveling and more are all accessed via the Intel-I-Touch.

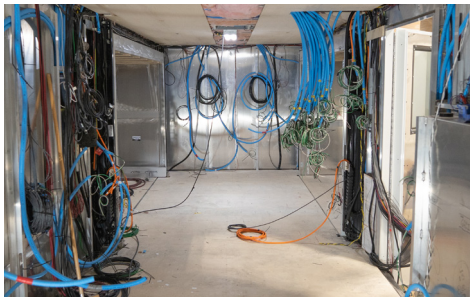

EXTREME DUTY STORAGE BOXES

We build each exterior storage box in-house and specific for your truck. These boxes feature fully perimeter-welded structures with a heavy duty piano hinge. Their slam-ready construction means they can carry a lot of weight while being weather-resistant as well. We can add dividers, mounts and door-actuated LED lighting to make them even better.

EXTERIOR MONITOR COMPARTMENTS

Just like our storage boxes, our exterior monitor compartments are 100% designed, built and installed in-house for your vehicle. We can size them to house a large display monitor, mini Intel-I-Touch pad for lighting and awning controls, HDMI input jacks, USB charging outlets and more.

MIL-SPEC WIRING

MIL-Spec wire and cabling is built in accordance with military specifications, specially designed for the harshest environments. MIL-Spec cable performs well in applications requiring absolute-reliability in physical and demanding environments. When reliability is the goal, MIL-Spec wire is the only way...and all of our custom vehicles are wired to this standard.

TRUE COMMERCIAL CHASSIS

Our vehicles are true commercial chassis trucks. They offer proven chassis and body combinations, corrosion-resistant aluminum bodies and either a diesel or gasoline engine. We can also design and build a truck for no-CDL required operation!

CAPABILITY STATEMENT

COMPANY HISTORY

LDV, Inc. was established on September 29, 1977 initially as a Snap-on® Tools mobile tool store manufacturer. We began building specialty service vehicles in other markets in 1986. LDV, Inc. is the global leading manufacturer of emergency response, mobile medical, bookmobiles, library outreach and commercial specialty vehicles. Our long-standing reputation for unmatched quality, performance and vehicle reliability makes us the most trusted resource in the industry.

As one of the most innovative companies in the world, we were the first-to-market with a number of industry innovations and the only supplier that utilizes Intel-I-Touch™, a single-touch activation panel that controls all operating and power management systems on the vehicle. Not surprisingly, LDV is the chosen vendor for the most prestigious corporations, U.S. and international government agencies and builds 9 out of every 10 Snap-on Mobile Tool Stores.

CORE COMPETENCIES: Over 40 years of specialty vehicle manufacturing, Innovation, Customer-focused culture, Market knowledge and experience, Technology integration, Vehicle platform diversity

PROJECT PROPOSAL

CRFQ-0802-DMV2700000003-1

OCTOBER 21, 2026

STATE OF WEST VIRGINIA
DEPARTMENT OF ADMINISTRATION
PURCHASING DIVISION
ATTN: JOHN ESTEP

LDV is submitting the following proposal for **(1) custom trailer mobile DMV office.** We are confident LDV will manufacture a vehicle that exceeds your expectations and will provide your department with many years of dependable service. We ask that when reviewing the responses from each vendor, you take the following points into consideration:

Specification Compliance: LDV has taken no exceptions and complies or exceeds all specification requirements. LDV has provided detailed specifications including drawings to insure you are receiving everything required to make the unit operational and meet the response requirements.

Pricing: Our price below includes everything listed in the bid specifications in addition to items not called out, but necessary in order to make your vehicle fully operational.

1. Base vehicle specification, per unit: **$849,575.00**

References: History is the greatest indicator of success. We encourage you to contact references for feedback on each vendor's performance, quality, project timeliness and after delivery support. We also recommend you make site visits to each vendor's facilities before awarding the contract to get a firsthand view of their capabilities, staffing levels, and expertise to successfully complete this project. LDV has been in the specialty vehicle industry since 1977.

CAD Drawings: LDV has included scaled drawings with our response. The LDV drawings are based on our interpretation of the bid. Receiving scaled drawings from all vendors is essential as they will provide an accurate representation of how the interior space of the vehicle will look.

ISO 9001:2015: Although not required, we have included a copy of our ISO certification with our response. ISO certification is something you should consider for this project as it will ensure you are working with a reputable company that has standardization and quality control processes in place.

ISO 9001:2015 ensures consistency:

1. Production process/quality between multiple units
2. Reporting during production
3. QA process
4. Billing
5. Service/Warranty

I look forward to working with you on your mobile DMV office. Please reach out with any questions.

Respectfully,

Cory Weithaus
Outreach Sales Specialist

LEADING THE WAY

INDUSTRY EXCLUSIVE FEATURES Since the beginning, we have lead the way with industry exclusive features and options for your new custom vehicles. Our Intel-I-Touch™ vehicle automation system simplifies the setup of your truck on the route or on scene. Our Extreme Duty body storage boxes are engineered, built and installed specific for your vehicle. Nothing is off the shelf. And our flat floor slide-outs provide maximum interior workspace without any tripping hazards. Want a multi-source power plant system to power your vehicle? Our exclusive GreenPower features rooftop solar panels, a smart inverter-charger and potent lithium ion battery bank to store that energy. This reduces or even eliminates the reliance on a standby generator for power generation. Smaller vehicles can utilize GreenPower exclusively in many cases!

1	Network Video Recorder - 16TB	FEATURES: - 16TB Network Video Recorder - Video Out for Multi-View of Selected Cameras - Built-In AI Event Analytics (on-prem)
	TIE DOWN SYSTEMS	**DETAILS**
48	Aircraft Tie Down (per ft.) 	Installed to surface
48	Plastic Insert for above	Snap-in HD plastic insert to dress-off / cover opening in aircraft tie down (Per foot)
20	Tie Down Ring for above	VT-1000 single stud tie down ring

	STANDARD OPTIONS	DETAILS
	Standard Included Options 1. Clean & Detail Completed Trailer 2. Weigh Completed Trailer 3. Photo Shoot Completed Trailer 4. Water Test Completed Trailer 5. Operations Manual for Trailer	
1	Warranty	Standard 1 yr., Bumper to Bumper, 3 year structural warranty and 5 year frame warranty. There is to be on-site repair capability and/or clear instructions for shipping the custom fifth wheel trailer back to the vendor, at no cost to the buyer, if the unit requires off-site repair during the warranty period. Vendor must provide written proof of warranty coverage.
	MISCELLANEOUS OTHER:	
	Delivery to Charleston, WV	
	Note: Project scope does not include certain tasks or costs that are the responsibility of the customer unless clearly specified as LDV supplied. These items include, but are not limited to: • Radio and telephone system programming. • Activation and service fees for cellular telephones, satellite telephones, satellite TV, satellite internet access. • Loading and configuring computer software. In the event of a discrepancy between the drawing and specification, the specification will supersede. LDV reserves the right to make substitutions of equal quality and specifications of those listed in this document. Some component models change frequently. In the event that a specified component model becomes unavailable at the time LDV attempts to source it, LDV will provide a replacement model with equivalent or better features, as agreed upon with the customer.	
	Custom fifth wheel trailer complies with all applicable state and federal vehicle manufacturing and safety codes.	

SERVICE APPROACH

LDV provides industry leading service and support through a multi-tiered approach.

We begin with a rigorous design phase to ensure major components (body, slide outs, cabinetry, etc) are robust and purpose built for the rigors of a mobile application. This in-depth design is the first step in reducing issues post-sale. That said, should issues arise on any of our components, LDV uses a tiered approach for service and warranty.

Tier One - This first step in the process is always to contact LDV for any issues that may arise; all issues are coordinated by LDV's in-house service team who guide and direct the repair process every step of the way. LDV has two dedicated service representatives available to answer questions and troubleshoot via phone, email and web conference (Zoom, Teams, etc).

Tier Two - If we are unable to take care of the issue via phone, we move to the second tier – local service partners. LDV has over 10,000 vehicles on the road, throughout the country. As a result, our service network for engine, generator, AC repair, etc is extensive and we utilize local service shops when possible. For example, air conditioning issues can often be fixed by local RV shops, generators can be serviced by local generator shops. When customers have local resources that they wish to use, we work together to address the issue.

Tier Three - Our third tier of support is on-site repair by trained LDV staff. We send out one or more of our trained service technicians, available to travel to customer locations to provide repairs, if needed. These resources are available and ready to travel quickly should their services be required.

Tier Four - In the most severe cases, we will do an in-house repair. LDV may require the vehicle to be repaired at our facility in Burlington, WI. LDV would transport the vehicle to our facility, prioritize any repair, and return the vehicle to the customer location as quickly as possible.

LDV passes on any manufacturer warranties that are offered on purchased products. These warranties are administered by the manufacturer and as such, follow the particular manufacturer's warranty guidelines. As an example, chassis warranties will be passed on to the end user. Any required warranty work on a chassis will need to be taken to an authorized dealer of that particular make of chassis.

As an industry leader for nearly 50 years, LDV maintains relationships at the highest level with truck OEMs such as Freightliner, Peterbilt, Kenworth and Hino. LDV utilizes these resources as required to ensure customers receive priority service wherever they are located throughout the US and Canada. These relationships extend beyond the OEMs down to major component suppliers as well. Strong and long-term relationships are in place with Cummins, Allison, Valeo/Spheros (A/C), Webasto and more to ensure quality and prompt service for all of our customers.

While the idea of a "local dealer" may seem appealing, it is important to understand the manufacturing and service capabilities of that dealer. The reality is that most local dealers have never seen a vehicle like this, have no access to the engineering drawings or build specifications, and are not trained on the specialized systems integrated into a custom mobile command center. Proximity does not equal capability — and a well-intentioned but unqualified repair attempt can turn a minor issue into a major one. LDV's multi-tiered approach exists precisely to close that gap: direct access to the people who designed and built your vehicle, backed by longstanding OEM and component-level relationships, and the ability to send our own trained technicians to you when the issue calls for it. That combination — not a nameplate on a building down the street — is what actually gets a specialty vehicle back in service quickly.

To drive home our commitment to service, consider a recent customer experience that illustrates the point and the process. LDV had a customer located in Florida. An issue arose that could not be addressed by the first three service tiers noted above. Within one day, LDV determined the unit needed to be brought back to our facility for repair. We had the unit picked up, repaired and returned within two weeks. The customer was astounded, stating that "Even our local builders would not have been able to get this fixed as quickly as you did." We relay this to convey LDV's singular focus on customer service and support. We recognize the importance of the work you do day in and day out and the role our vehicles play in supporting you. We will do everything we can to ensure any vehicle you have from LDV is 100% operational when you need it, every time you need it.

LDV, Inc. | 800-558-5986 | www.LDVusa.com

FIVE YEAR LIMITED WARRANTY TO THE ORIGINAL PURCHASER

This limited warranty is issued to the original purchaser and is neither transferable to another person or organization nor enforceable by any other person. THIS WARRANTY IS LIMITED IN DURATION TO FIVE (5) YEARS FROM THE DATE OF DELIVERY TO THE ORIGINAL PURCHASER.

Should a defect in workmanship develop which is attributable to LDV's interior and/or exterior conversions and which is reported to LDV during the WARRANTY PERIOD, LDV will, in the method it determines, bear the cost of repair or replacement of any such defective workmanship, exclusive of freight costs. Should you require additional information or assistance relating to matters covered by this warranty, it can be obtained by calling the Customer Service Department at the telephone number below.

The remedy set forth in the preceding paragraph is the sole and exclusive remedy with respect to this warranty. LDV SPECIFICALLY EXCLUDES ANY OBLIGATION OR LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES FOR BREACH OF THIS WARRANTY OR FOR ANY OTHER REASON.

The manufacturer's specifications detail the primary uses for which this vehicle is intended. The components added by LDV allow the vehicle to be used for special services but are not intended to permit passenger occupancy except in designated seating while the vehicle is in motion. Cross-country travel or unimproved roads or for hauling or towing of loads in excess of the manufacturer's specifications.

THE WARRANTY SET FORTH IN THIS DOCUMENT IS THE SOLE WARRANTY BY LDV, ALL OTHER WARRANTIES, ORAL OR WRITTEN, EXPRESS OR IMPLIED, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY DISCLAIMED AND EXPRESSLY EXCLUDED BY LDV.

THIS WARRANTY DOES NOT APPLY TO:

1. Items warranted separately by the manufacturer, thereof, including but not limited to: the chassis, engine, body, tires, cast aluminum wheels, air conditioning, furnaces, radios, lighting fixtures, generators, computers, telephones, and other electronic equipment, or any items that have not been added by LDV.
2. Damage resulting from tire failure.
3. Additions, alterations or installations made by individuals, including dealers, other than LDV or defects arising out of attribution to such additions, alterations or installations.
4. Damages resulting from down time or lost income attributed to service, regular maintenance, repair or warranty work.
5. Defects attributable to abuse, misuse, negligence, accident or other casualty damage.
6. Damage resulting from failure to promptly notify and comply with the instructions of LDV about the defects when noted.
7. Minor imperfections which do not affect the suitability of the vehicle for its intended use.
8. Exterior paint which is covered by the body manufacturer.
9. Plumbing system damage due to failure to properly winterize plumbing.
10. Battery failure due to improper use of charging systems.

Any questions should be directed to the Customer Service Department at 800-558-5986.

This custom DMV vehicle features a Freightliner MT-55G forward control chassis with a GM L8T 6.6L 380 gasoline engine with an Allison 2205HS automatic transmission. The all aluminum body features our Extreme Duty body storage boxes. We also added a vehicle leveling system to stabilize the vehicle when setup for use. A wheelchair lift is added for accessibility. Entry into the vehicle is by swing out curbside entry door.

Inside, there are three DMV workstations for walk-up patrons. We added wall mounted literature racks as well. Ceiling mounted surveillance cameras are utilized. A flip down bench seat can be used for staff. Plexiglass dividers are utilized for privacy. There is a flip up counter top section as well. The workstations have computers, display monitors and printers added. Credit card machines are also included for convenience at each workstation. A powered backdrop is included along with a tower camera for capturing driver's license and passport photos on the truck. A front galley is included with a microwave, refrigerator and coffee maker.

Additional features include: 15kW liquid cooled generator, full vehicle surge suppression system, low profile rooftop A/C units and more.

100 E. Grand Avenue
Des Moines, IA 50316

This mobile office features a Ford F59 chassis with a 7.3L gas engine and a 6-speed TorqShift automatic transmission. The all aluminum body features a single in-house fabricated flat floor slide-out. We also added a weatherproof exterior monitor compartment to the curbside of the vehicle. We also added a swing out rear door and a wheelchair lift for accessibility. Extreme Duty body storage compartments were also added for additional storage. A vehicle leveling system has also been added to stabilize the vehicle while deployed.

Inside, the mobile office has 10 workstations, each with a spider base task chair. An electronics rack has been installed to house all of the installed gear. Custom aluminum cabinetry has been installed throughout for storage. The ceiling in the rear of the vehicle has a custom flip down monitor compartment. Lighting throughout the interior is LED.

Additional features include: AM/FM Bluetooth head unit with 6×9 speakers and a three camera backup camera system. Blackout curtains have been added for the cab area windows. Countertops are durable laminate. Three low profile rooftop A/C units have been added with wall mounted thermostat. A powerful 15kW liquid cooled generator supplies plenty of electric power to the vehicle.

CONTACT INFORMATION:
Tammy James
803-605-3791
tamara.james@dss.sc.gov
1535 Confederate Avenue
Columbia, SC 29201

This mobile office is built on a Freightliner MT-55 forward control chassis and features 26,000lb. GVWR, air ride rear suspension and air brakes. The vehicle is powered by a Cummins B6.7L diesel engine with 300HP and an Allison 2500HS automatic transmission. The all aluminum body has several of our Extreme Duty body storage compartments added for gear. A wheelchair lift was added for accessibility. A full vehicle wrap has also been installed on the exterior.

Inside, the mobile office has nine work areas, each with a spider base task chair. Overhead cabinets feature dry erase writing surfaces. Sliding egress windows are utilized for safety and each feature blinds. A 40" high resolution display has been added along with an electronics rack for the installed equipment. There is a café-style work desk and a galley with a microwave and refrigerator. The rear conference room has fixed and flip down bench seating for staff.

The HVAC system consists of three low profile rooftop A/C units with wall thermostats. We also added a direct discharge diesel furnace and a wall mount electric heater. A liquid cooled diesel generator supplies plenty of electric power to the vehicle.

Built on a Freightliner MT-55 forward control chassis, this vehicle features a Cummins B6.7L diesel engine with 260HP and an Allison 2200HS automatic transmission. The vehicle is also equipped with rear air suspension. Louisiana Workforce Commission went with two of our custom fabricated flat-floor slide-outs to increase the interior workspace. The all aluminum vehicle body has a 46" wide swing-out rear door for deployment of an electric hydraulic wheelchair lift. A custom fabricated weatherproof exterior workstation is integrated into the body, which houses a 49" QLED monitor.

In the rear of the vehicle is a lavatory with pressurized water system. The wheelchair lift is also installed in this area. A total of 12 workstations are on board with pneumatic task chairs at each station. Chairs are secured during transport with buckled straps. Custom fabricated aluminum cabinets are included with LED under cabinet lighting. A galley was included in the design complete with microwave, refrigerator and a Keurig™ coffee maker. Counter tops are durable laminate. A 49" QLED monitor is included. We also installed 13 customer-supplied computers with monitors on wall mounts at each workstation. There is also a wireless microphone system in the vehicle. A 20kW liquid-cooled diesel generator supplies electric power to the vehicle.

Form **W-9**
(Rev. March 2024)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give form to the requester. Do not send to the IRS.

Before you begin. For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See *Specific Instructions* on page 3.

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

LDV, INC.

2 Business name/disregarded entity name, if different from above.

LDV, INC.

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☐ C corporation ☑ S corporation ☐ Partnership ☐ Trust/estate

☐ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) . . . . .

Note: Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see Instructions)

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any)

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any)

(Applies to accounts maintained outside the United States.)

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions . . . . . ☐

5 Address (number, street, and apt. or suite no.). See instructions.

180 INDUSTRIAL DRIVE

Requester's name and address (optional)

6 City, state, and ZIP code

BURLINGTON, WI 53105

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–			–				

or

Employer identification number

3	9	–	1	2	8	1	2	3	7

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here **Signature of U.S. person** K—D **Date** 9/18/26

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

Responses to Questions from Vendors

Question 1

Please confirm whether the 26,000-lb limitation refers to the combined *GVWR/GCWR ratings of the tow vehicle and trailer, or the actual combined loaded* operating weight of the completed trailer and tow vehicle.

Response 1

It refers to the combined loaded operating weight. The weight is not to exceed 26,000 lbs so that a CDL will not be required for the operator. With an estimated truck weight of 8,000 - 9,000 lbs the trailer spec is set for no more than 17,000 lbs.

Question 2

Comparing the specs from the original to the revised, it appears the only changes *were the 5 th wheel being removed from the custom trailer description and going to* a
17,000 lb. GVWR from 16,000 lb. The GVWR is based on axle weight capacity and to the best of our knowledge a tandem axle configuration tops out at dual 8,000 lb. axles. The GVWR is the weight rating the trailer cannot exceed fully loaded and finished, also accounting for whatever payload you might add after our upfitting. So, the increase in GVWR doesn't seem to make sense as there are no 8,500 lb. *axles available.*

Do you know how much payload availability will be required by the state? For instance, what are they going to add in after delivery and what is the total weight of the additional equipment?

You have also added in the specs that the combination of trailer and truck GVWR does not exceed 26,000 lbs. I'm assuming that's to remain non-CDL. The caveat is this from Google: If your cargo trailer has a GVWR greater than 10,000 lbs and the total combined GVWR of the truck plus trailer exceeds 26,000 lbs, a Class A CDL becomes federally required. Some individual states also enforce a separate state-specific license or endorsement if the trailer alone exceeds 10,000 lbs, even if the total combination is under 26,000 lbs. We believe with the above statement being said, a non-CDL product may not be feasible. Do you know what year, make, and model of the tow vehicle will be? What's the GVWR for it?

When you have a trailer that's 42' L, it has to be a gooseneck or 5 th wheel style trailer. Typically, they have triple axles. Meaning (3) 7,000 lb. or 8,000 lb. axles providing 21,000 lb. GVWR or 24,000 lb. GVWR. In this case we need tandem 8,000 lb. axles for 16,000 lb. GVWR. It's also best practice to not exceed 90% of the maximum GVWR so that the trailer suspension works effectively and to provide

maximum longevity for the trailer. As such, we typically spec our vehicles with extra GVWR so that even if you run the trailer at close to your target weight there is still headroom on the suspension/structure. Based on this we would recommend a triple axle configuration with 21,000 lbs. We can still try to shoot for a finished weight of 16,000 lbs. (plus accounting for your payload) but at least you will still have a useable trailer even if you load it to 17,000 lbs. or even slight over that (depending on the weight of your towing vehicle). We would have concerns about building a 16-17,000 lbs. GVWR trailer that you will always be struggling to keep under weight not just with CDL but also the GVWR of the trailer.

We can also offer alternative layouts to try and accommodate the needs of the DMV if that would be acceptable for the bid.

Response 2

We cannot accept alternative layouts, outside of the specifications laid out in this RFQ at this time. We conducted research prior to publishing the RFQ and found that the specifications are not outside the scope of attainment.

The only additional weight we plan to add to the trailer will be computer equipment, i.e. laptops, printers, etc.

We do not have a specific truck yet, as we will likely have to put it out for bid, but plan on one in the one ton model range.

ADDENDUM ACKNOWLEDGEMENT FORM
SOLICITATION NO.: CRFQ DMV2700000003

Instructions: Please acknowledge receipt of all addenda issued with this solicitation by completing this addendum acknowledgment form. Check the box next to each addendum received and sign below. Failure to acknowledge the addenda may result in bid disqualification.

Acknowledgment: I hereby acknowledge receipt of the following addenda and have made the necessary revisions to my proposal, plans and/or specification, etc.

SOLICITATION NUMBER: CRFQ DMV2700000003
Addendum Number: 2

The purpose of this addendum is to modify the solicitation identified as CRFQ DMV2700000003 Solicitation" to reflect the change(s) identified and described below.

Applicable Addendum Category:

[ ] Modify bid opening date and time

[ ] Modify specifications of product or service being sought

[X] Attachment of vendor questions and responses

[ ] Attachment of pre-bid sign-in sheet

[ ] Correction of error

[ ] Other

Additional Documentation:

Vendor Questions and Responses

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.

2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

Responses to Questions from Vendors

Question 1

Please confirm whether the 26,000-lb limitation refers to the combined GVWR/GCWR ratings of the tow vehicle and trailer, or the actual combined loaded operating weight of the completed trailer and tow vehicle.

Response 1

It refers to the combined loaded operating weight. The weight is not to exceed 26,000 lbs so that a CDL will not be required for the operator. With an estimated truck weight of 8,000 - 9,000 lbs the trailer spec is set for no more than 17,000 lbs.

Question 2

Comparing the specs from the original to the revised, it appears the only changes were the 5 th wheel being removed from the custom trailer description and going to a
17,000 lb. GVWR from 16,000 lb. The GVWR is based on axle weight capacity and to the best of our knowledge a tandem axle configuration tops out at dual 8,000 lb. axles. The GVWR is the weight rating the trailer cannot exceed fully loaded and finished, also accounting for whatever payload you might add after our upfitting. So, the increase in GVWR doesn't seem to make sense as there are no 8,500 lb. axles available.

Do you know how much payload availability will be required by the state? For instance, what are they going to add in after delivery and what is the total weight of the additional equipment?

You have also added in the specs that the combination of trailer and truck GVWR does not exceed 26,000 lbs. I'm assuming that's to remain non-CDL. The caveat is this from Google: If your cargo trailer has a GVWR greater than 10,000 lbs and the total combined GVWR of the truck plus trailer exceeds 26,000 lbs, a Class A CDL becomes federally required. Some individual states also enforce a separate state-specific license or endorsement if the trailer alone exceeds 10,000 lbs, even if the total combination is under 26,000 lbs. We believe with the above statement being said, a non-CDL product may not be feasible. Do you know what year, make, and model of the tow vehicle will be? What's the GVWR for it?

When you have a trailer that's 42' L, it has to be a gooseneck or 5 th wheel style trailer. Typically, they have triple axles. Meaning (3) 7,000 lb. or 8,000 lb. axles providing 21,000 lb. GVWR or 24,000 lb. GVWR. In this case we need tandem 8,000 lb. axles for 16,000 lb. GVWR. It's also best practice to not exceed 90% of the maximum GVWR so that the trailer suspension works effectively and to provide

maximum longevity for the trailer. As such, we typically spec our vehicles with extra GVWR so that even if you run the trailer at close to your target weight there is still headroom on the suspension/structure. Based on this we would recommend a triple axle configuration with 21,000 lbs. We can still try to shoot for a finished weight of 16,000 lbs. (plus accounting for your payload) but at least you will still have a useable trailer even if you load it to 17,000 lbs. or even slight over that (depending on the weight of your towing vehicle). We would have concerns about building a 16-17,000 lbs. GVWR trailer that you will always be struggling to keep under weight not just with CDL but also the GVWR of the trailer.

We can also offer alternative layouts to try and accommodate the needs of the DMV if that would be acceptable for the bid.

Response 2

We cannot accept alternative layouts, outside of the specifications laid out in this RFQ at this time. We conducted research prior to publishing the RFQ and found that the specifications are not outside the scope of attainment.

The only additional weight we plan to add to the trailer will be computer equipment, i.e. laptops, printers, etc.

We do not have a specific truck yet, as we will likely have to put it out for bid, but plan on one in the one ton model range.

Question 3

We reviewed Addendum No. 1 and the State's responses to the vendor questions. Based on their clarification, we do not believe the revision materially changes the concerns identified in my original email/question.
The required floor plan and equipment remain unchanged; alternative layouts are not being accepted, and the trailer is still expected to remain within a 17,000 lb GVWR while paired with an estimated 8,000–9,000 lb tow vehicle. Could you Advise?

Response 3

The trailer is still to be 17,000 lbs or less, though we are willing to accept a comparable floor plan, provided everything required is included.
