Vendor should complete these Pricing Pages by providing the price per case/roll and the quantity in each case. For cases, Vendor shall calculate the "Unit Price" by dividing the "Case/Roll Price" by the "Quantity in Each Case." Vendor shall calculate the "Total Cost," by multiplying the "Estimated Qty. of Units" by the "Unit Price". "Total Bid" should equal the sum of each line's "Total Cost."

The "Quantity in Each Case" is the quantity of each individual item in a case, not the number of boxes. For example - if 1 case of forks has 10 boxes of forks and each box has 100 forks. The quantity in the case is 1,000 forks.

Vendor should provide the Manufacturer Name and Manufacturer Part Number
