**DATE:** July 25, 2022

**TO:** Mark A. Adkins, Buyer Supervisor, Statewide Contracts  
West Virginia Department of Administration  
Purchasing Division

**FROM:** Tony Simental, State GIS Coordinator  
West Virginia Office of GIS Coordination

**RE:** Request: Extension/Renewal of the Statewide Contract for ESRI Software and Support

## **Overview:**

The Geological and Economic Survey's State Office of GIS Coordination is requesting that the Purchasing Division pursue a renewal of the statewide contract purchase ESRI GIS software and support as outlined in Article 2(two) of the current contract. The current state contract (ESRI21) expires August 14, 2022. As you know ESRI GIS software has become the de-facto standard for GIS software among state agencies.

## **Background:**

Agencies have purchased and continuously used ESRI GIS software and support for the past 23 years, typically via a state contract. Among the ESRI modules currently used among various agencies are: ArcGIS for Desktop Advanced, ArcGIS for Desktop Standard, ArcGIS for Desktop Basic, ArcGIS Spatial Analyst, ArcGIS 3D Analyst, ArcGIS Geostatistical Analyst, ArcGIS for Server Enterprise, etc.

These products provide agencies with an integrated suite of geospatial computing environment for mapping and analyzing spatial data and the development of new datasets. Among the agencies using this software are, Department of Environmental Protection, Division of Highways, Geological and Economic Survey, Division of Natural Resources, Bureau of Public Health, Department of Health and Human Resources, Water Development Authority, State Historic and Preservation Office, Division of Emergency Management, Department of Military Affairs and Public Safety, Department of Commerce, Property Tax Division, Broadband Enhancement Council, etc. Users of the software also include constitutional offices such as the Secretary of State and the Department of Agriculture.

The Geological and Economic Survey's State Office of GIS Coordination will work with the Purchasing Division and will prepare needed documentation for the renewal of this contract for state agencies to use.

**Importance of the Software:**

These GIS analytical software modules are typically integrated with a database server running Oracle and other database software, and geoprocessing servers running the various mapping and graphic applications software and storing georeferenced data. While some other analytical software is also used for special spatial analytical techniques, agencies have standardized on the ESRI GIS software for mapping and analysis and have developed considerable in-house expertise with these software modules. ESRI software is primarily used to develop, evaluate, maintain, update and enhance the State's Spatial Data Infrastructure. Agencies also utilize the software to: evaluate and analyze environmental hazards and water quality in the State; regularly answer questions from the public about mineral resources, mining, gas or oil reservoirs, and landslide susceptibility; and create, develop, and analyze geologic, broadband, and other types of maps, protect the State's historical sites, manage state parks and recreational areas, manage state rights of way, emergency management and response, etc.

Derivative interactive mapping products have been developed over the years and have been published in agency websites for public availability. In addition, Arc REST shared services have been created which enable external users to connect to agency map services where the public user can access layers and include within their own maps.

The ESRI GIS software used to create and manage these applications/services have typically been maintained continuously under support agreements with ESRI since the licenses were originally purchased. Since the previous State contract expired, a new contract is necessary to enable agencies to continue to purchase new modules and enable continued and uninterrupted software support.

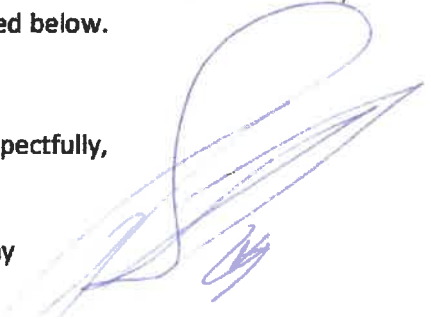

The ESRI software and support agreement is by necessity a sole-source procurement because no vendor other than ESRI can provide the software updates and the software technical support that are included in the agreement being developed.

A new software and support contract with ESRI is imperative for all GIS units in State government to work for the benefit of West Virginia citizens and I hope you will consider approving and supporting our effort to develop a statewide contract for ESRI software and support.

Please feel free to contact me if you have any questions or concerns via email or at the phone or address listed below.

Marc,

Thank you for the call back this morning and it was great to touch base with you. As I indicated, I want to provide an overview of the changes to the product catalog associated with the Esri Master Purchase Agreement (MPA) amendment that Thomas Amrine sent over. For clarity, there are no changes to the existing product pricing in the new catalog that was sent. The changes highlighted relate to new products that were added, old products removed and product name updates. Additionally some of the items were moved within the catalog to improve clarity and consistency. A more detailed overview of changes include:

### General

- Re-organized some product locations and groupings for more consistency.

### Product Name Updates

- Renamed Field Worker to Mobile Worker
- Updated "Term" to "Subscription" for all applicable products
- Added "Perpetual" to the product description for applicable products

### Removed Products that are no longer available

- ArcGIS Collector for ArcGIS Online
- ArcGIS Tracker for ArcGIS Online and ArcGIS Enterprise
- All Workgroup products
- Drone2Map (old version)

## Addition of the following Products

- ArcGIS Indoors (Maps and Spaces) and ArcGIS IPS for Enterprise – Annual Subscription
- ArcGIS Indoors (Maps and Spaces) and ArcGIS IPS for ArcGIS Online – Annual Subscription
- ArcGIS Drone2Map Standard and Advanced for ArcGIS Online and ArcGIS Enterprise – Annual Subscription
- ArcGIS Knowledge Server + Staging Servers (*ArcGIS Enterprise Optional Capability Server*)
- ArcGIS Aviation Airports for ArcGIS GIS Server
- ArcGIS Aviation Charting for ArcGIS GIS Server
- ArcGIS Field Maps for ArcGIS Online and ArcGIS Enterprise
- ArcGIS Location Sharing User Type Extension for ArcGIS Online and ArcGIS Enterprise
- ArcGIS Business Analyst Pro
- 2023 Training - Pricing and Training option updates

Because of the reorganization and renaming of products on the updated catalog, there were a lot of items highlighted in the document comparison. Hopefully this helps with the review.

Please let me know if you have any questions or concerns,

Thank you,

Bob
