Type I -37 C (-35 F)
Type II -15 C (+ 5 F)

Diesel Fuel Oil shall be a low sulfur all-purpose diesel fuel oil intended for the use in all automotive type diesel engines under all normal conditions of service. Fuel shall be free from water, grit, acid, and fibrous or other foreign matter likely to clog or injure pumps, nozzles, or valves.

SPECIAL REQUIREMENT OF THE DEPARTMENT OF HIGHWAYS: During the period of November 1 to February 28, diesel motor fuels type I and II shall be blended. The blend may consist of 30% type I and 70% type II with a cloud point of approximately -21 C (-7 F). The percentage of blend is subject to change at the request of the ordering agency.

SAMPLING, INSPECTION, AND TESTS: Sampling, inspection and testing shall be in accordance with Federal Specifications VV-L-791 of the issue in effect on the date of the invitation for bids. It is the intent of our specifications to obtain a fuel which meets the detailed requirements as specified and determined in the Department of Highway Laboratory. No allowances will be made for any reproducibility factors in the prescribed test methods. The supplier will allow samples to be taken prior to discharging of product into localities tanks. Samples will be taken without prior notices.

HEATING FUEL OIL: These specifications cover the grades #1, #2, #4, and #5 fuel oils for various types of fuel burning equipment.

The fuel oils herein specified shall be hydrogen oils free from grit, acid and fibrous or other foreign matter likely to clog or injure the burner or valves. If required, the oil shall be strained by being drawn through filter or wire of 16 mesh to the inch. (U. S. Standard sieve 16, ASTM 1, 190 microns). The clearance area through the strainers shall be at least twice the area of the suction pipe and strainers shall be in duplicate.

The various grades of fuel oil shall conform to the detailed requirements for Fuel Oils "National Bureau of Standards" CS-12-48, dated September 25, 1948, or the latest edition. It is the intent of these specifications that failure to meet any requirements of a given grade does not automatically place an oil in the next grade unless in fact it meets all requirements of the lower grade.

The technical requirements of the National Bureau of Standards Commercial Standard CS-12-48 are identical in substance with tentative specifications for fuel oil, American Society of Testing Materials D396-48T latest edition.

All fuel oil not meeting specifications is not acceptable to any of the localities and must be removed from tank at contractor's expense. No additional product may be added to change the grade of the product.

DELIVERIES: Normal use requirements will be ordered three (3) working days in advance of the required delivery date. The State prefers that delivery be made in three (3) working days. Emergency requirements or situations which cannot be scheduled in advance will require 24 hour delivery.

DELIVERY DOCUMENTS: Delivery documents must be presented to the receiving agency prior to unloading. The documents will be signed after unloading and verification of quantities received is made.

DELAY OR FAILURE TO DELIVER: The contractor shall not be liable in damages for the delay of shipment or failure to deliver caused by fire, flood, Acts of God, Acts of Government, Act of an alien enemy, or by any other circumstances which in the opinion of the State agency is beyond the control of the contractor. The state agency may, in its discretion purchase the product on the market until such time product becomes available by the supplier.

TAXES: The State of West Virginia agencies are exempt from the Federal Excise Tax and the State Consumer Sales Tax. State of West Virginia agencies are not exempt from State Excise Tax, however, municipalities are exempt from the State Excise Tax on purchases of five hundred (500) gallons or more.

Any Superfund Tax must be included in the bidders mark-up price. The State will not accept bids from bidders who cannot meet the above conditions regarding taxes.

PRICING: The State of West Virginia will accept bids only by District locations. Vendors must bid a firm fixed mark-up price per gallon on fuel delivery with product price tied to the OIL PRICE INFORMATION SERVICE publication. Prices should reflect the OPIS price for the terminal used to service each district.

FIRM FIXED MARK-UP PER GALLON: The vendor is to bid only a firm fixed mark-up for business profit and expenses in supplying the product to the State Agencies. Product cost shall be the average rack price of the products as published (for the preceding week) for the vendor supply terminal location in the OIL PRICE INFORMATION SERVICE, as published by United Communications Group, 11300 Rockville Pike, Suite 1100, Rockville, MD 20852. Telephone (800) 929-4824.

NOTE: The OPIS Publication provides pricing information on No. 2, Regular, Unleaded, Premium Unleaded Fuels. Therefore, the average rack price for No. 2 oil shall be used as the base for all types of diesel and heating fuels. Vendor must include any product price different between No. 2 and No. 1 diesel fuel type, in the firm fixed mark-up price. The low bidders for No. 2 Diesel fuel must also receive No. 1 fuel because of the requirements for blended fuel for Department of Highways.

Bids are requested for two pricing categories:

Tank-wagon (T/W) and Truck Transport (T/T) delivery. Vendor must indicate the minimum delivery quantity for truck transport (T/T) delivery pricing. The bid prices for one District shall not be conditioned on the award of any other District.

AGENCY ORDERING PROCEDURE: The State agency should coordinate fuel deliveries with the Department of Highways, Buckhannon, WV. The Department of Highways shall attempt to consolidate fuel orders in a manner to reduce your fuel costs.

Contact person: Mr. Gary Barr (304) 472-1750 Ext. 223

Since the product pricing is subject to weekly changes, the State agency is to verify pricing information provided by the Department of Highways and the Notice of Contract Award. The actual price is computed as follows:

NORMAL: Average rack price from OPIS report. + State Excise Tax for Motor Fuel (if applicable).

+ Vendors mark-up as quoted in contract = price per gallon delivered.

BLENDED FUEL: Average rack price for No. 2 Diesel from OPIS report + State Excise tax is applicable.

+ Vendors mark-up per gallon #2 diesel delivered.

= Price per each gallon of #2 diesel used in blend.

Average rack price for #2 Diesel from OPIS report + State excise tax if applicable.

+Vendors mark-up per gallon #1 Diesel used in Blend (Mark-up for #1 includes any differential between #1 diesel and #2 diesel = price per each gallon #1 Diesel used in Blend).

AWARD

1. Instate Vendors Preference will be considered, if requested in writing by instate vendor, and such preference will be added to the out of state vendors mark-up price for the purpose of evaluation.
2. The award will be made by District (Districts 1 through 10). Each District may be split into tank transport or tank wagon pricing.

The successful bidder will be awarded all items under tank wagon or all items under tank transport.

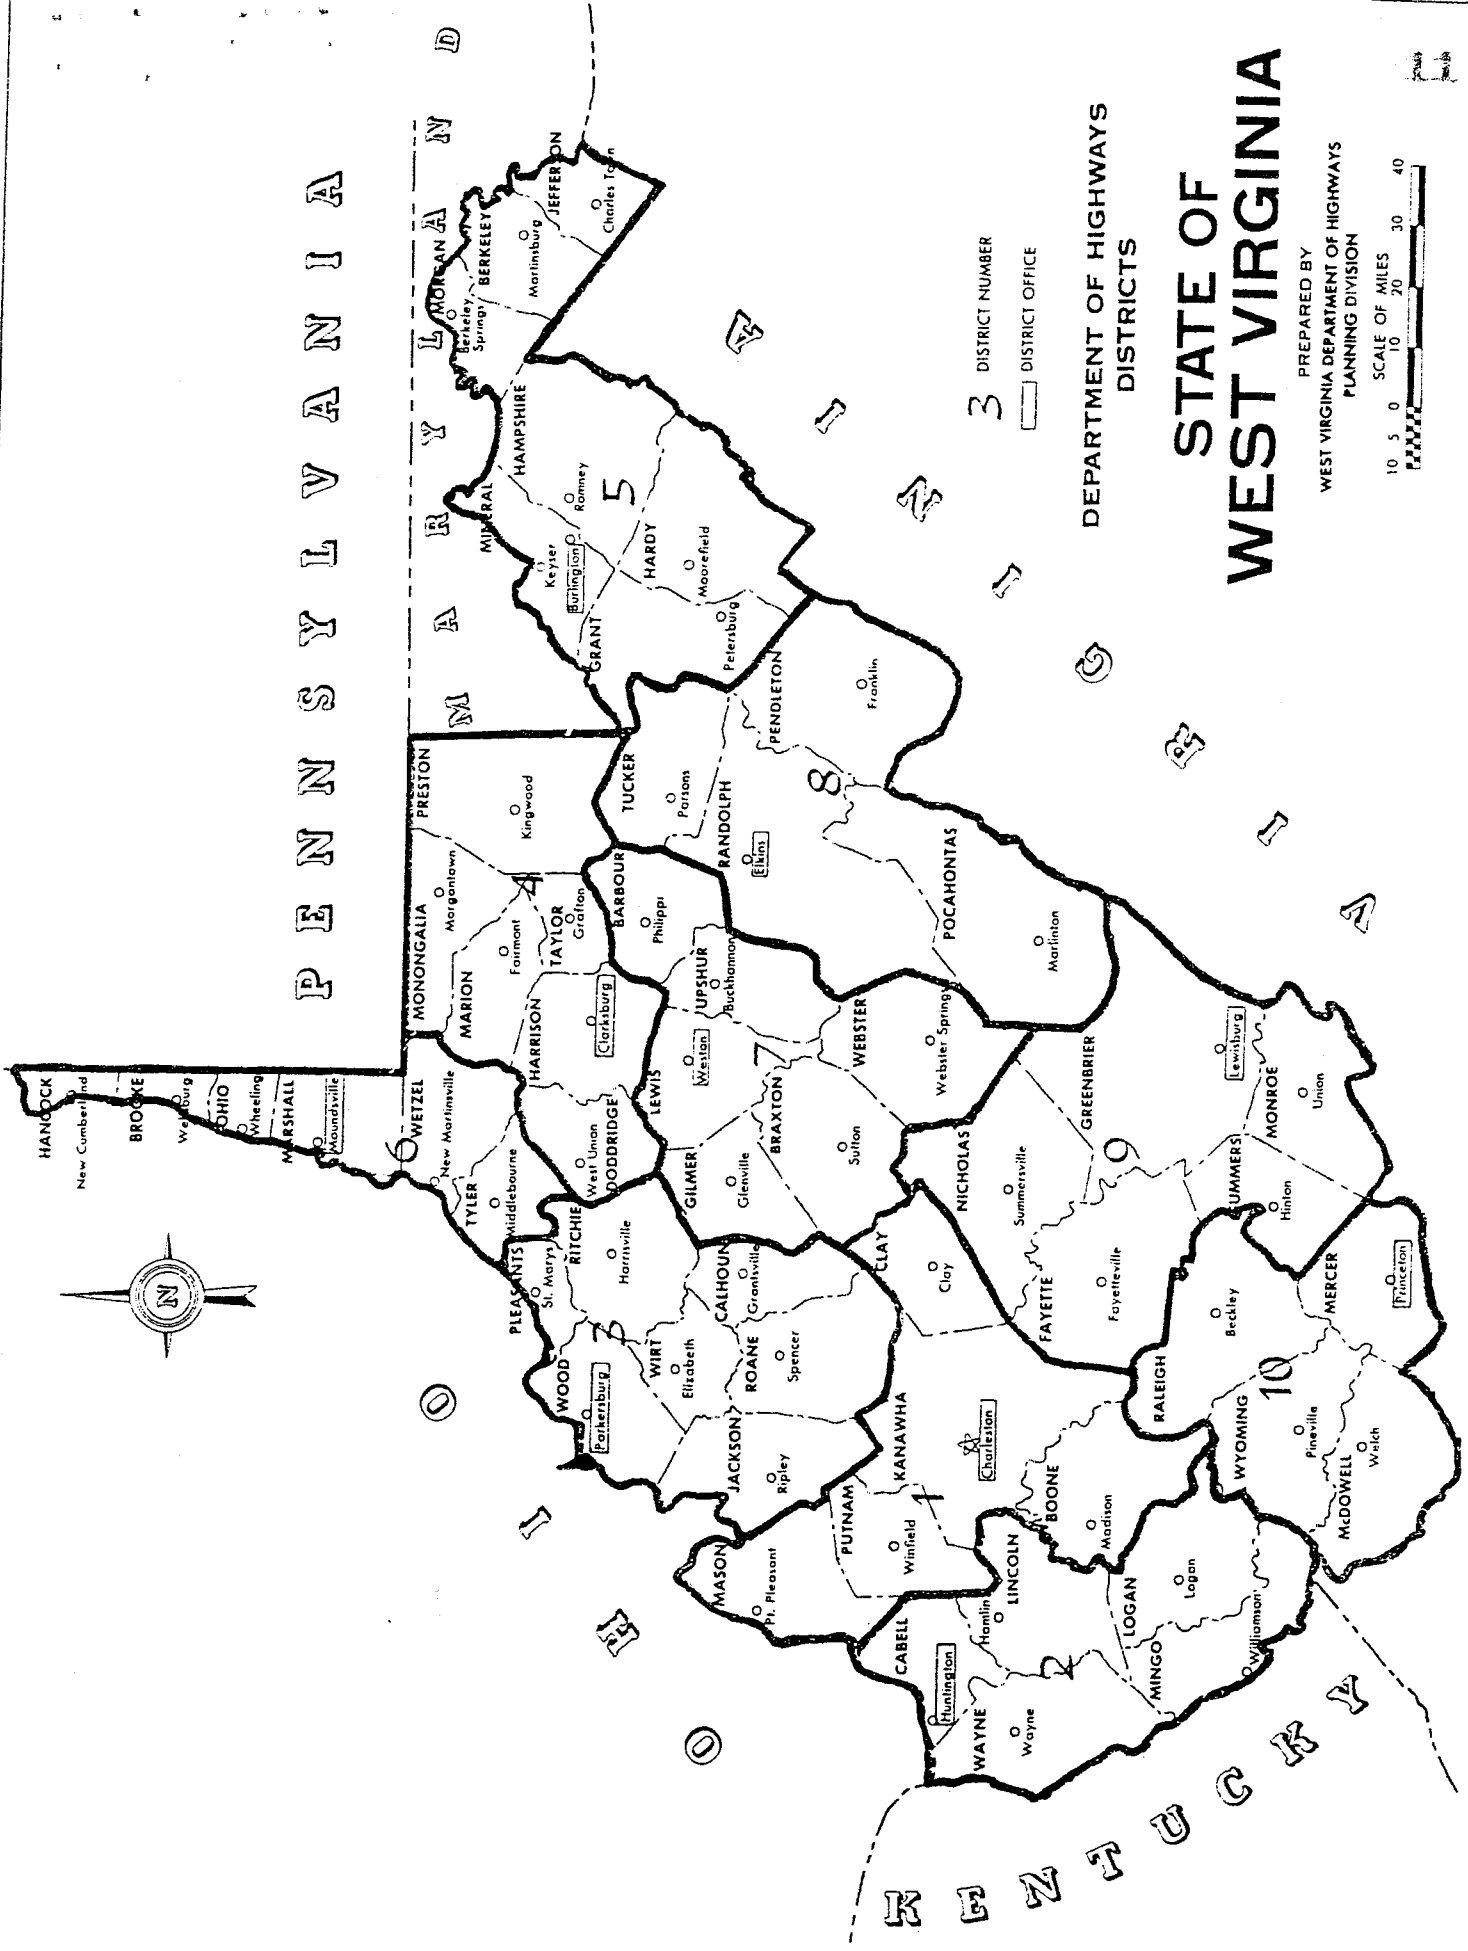

The State of West Virginia reserves the right to combine orders in an effort to receive tank transport pricing at all locations where feasible. In the event that the vendor with tank transport pricing cannot accept a combined order to more than one location, the Fuels Coordinator will then issue the order to the vendor who has tank wagon pricing.

3. For the purpose of evaluation, the average rack price for fuel reported in the OPIS publication in the week that this bid is opened will be used for the terminal.
