Truck Transport Delivery of:
Gasoline, E-10, Diesel, Winterized Diesel,
Biodiesel B5, Winterized B5 & Heating Fuels
Specifications

II. SCOPE

2.1 UNLEADED GASOLINE shall comply with the most recent ASTM D 4814-07a or the most current edition of the Standard Specifications for Automotive Gasoline. The minimum anti-knock octane for Unleaded Gasoline is 87. E-10, Ethanol Blend (87 Octane minimum) shall be an acceptable substitute fuel for unleaded gasoline. Whenever E-10 is delivered, it must be noted as E-10 Blended Fuel on the vendor's invoice.

2.2 DIESEL Fuel Oil shall comply with ASTM D 975-09 or the latest edition except the Minimum Octane Rating shall be 40. The cloud points are as follows:

- TYPE II +10F**
- TYPE II ULTRA LOW SULFUR**

Diesel Fuel Oil shall be an ultra low sulfur all-purpose diesel fuel oil intended for the use in all automotive type diesel engines under all normal conditions of service. Fuel shall be free from water, grit, acid, and fibrous or other foreign matter likely to clog or injure pumps, nozzles, or valves.

2.3 Biodiesel B5

Biodiesel blend shall be B5 composed of a vegetable-based 5% (B100) biodiesel fuel blend stock and 95% Ultra-Low Sulfur Fuel Oil (ULSD) or winter blend fuel oil for the time period of November 1 to February 28. The biodiesel (B100) fuel blend stock shall meet the requirements for B100 in ASTM D6751 Standard Specification for biodiesel. The biodiesel blend (B5) shall conform to the requirements of ASTM D975 Standard Specification for biodiesel blend B5.

Biodiesel fuel blending, mixing, or addition of additives shall be done at the vendor's location and/ or the refinery. Manifold or tank blending at time of delivery shall not be acceptable. Vendors shall provide biodiesel B5 quotes for those terminal sources (vendor pulls from to supply West Virginia) listed on the OPIS Weekly pricing publication at the time quotes are submitted. As of 07/11/2011, only Altoona (APA) and Pittsburg (PPA) terminals list weekly OPIS B5 prices. **Vendor mark-up quoted for the B5 products will not be a factor in the award of the FUELTT 12 Contract.** Deliveries of

biodiesel shall be clearly marked as such on vendor's invoice and delivery ticket.

2.4 SPECIAL REQUIREMENT OF THE DIVISION OF HIGHWAYS: During the period of November 1 to February 28, diesel motor fuels, including the biodiesel B5, shall be blended with a permissible diesel/biodiesel additive to reduce operability parameters (cloud point, cold filter plug point) and to increase winter operability, maintaining state/federal mandated regulatory specifications for on-road diesel fuel.

2.5 HEATING OIL: These specifications cover the grades #1, #2, #4, and #5 fuel oils for various types of fuel burning equipment. Heating oil specifications must meet the specifications of ASTM Heating Oil D396-09 or the latest edition.

The fuel oils herein specified shall be hydrogen oils free from grit, acid and fibrous or other foreign matter likely to clog or injure the burner or valves. If required, the oil shall be strained by being drawn through filter or wire of 16 mesh to the inch. (U.S. Standard sieve 16, ASTM 1, 190 microns). The clearance area through the strainers shall be at least twice the area of the suction pipe and strainers shall be in duplicate.

The various grades of fuel oil shall conform to the detailed requirements for Fuel Oils "National Bureau of Standards" CS-12-48, dated September 25, 1948, or the latest edition: It is the intent of these specifications that failure to meet any requirements of a given grade does not automatically place an oil in the next grade unless in fact it meets all requirements of the lower grade.

The technical requirements of the National Bureau of Standards Commercial Standard CS-12-48 are identical in substance with tentative specifications for fuel oil, American Society of Testing Materials D396-48T latest edition.

Fuel oil not meeting specifications is unacceptable to any of the localities and must be removed from tank at vendor's expense. No additional product may be added to change the grade of the product.

No allowances shall be made for any reproducibility factors in the prescribed test methods. The supplier will allow samples to be taken prior to discharging of product into localities tanks. Delivery tickets must include the location where delivery was made, the product(s) delivered, the blended percentages, the number of gallons delivered, and the rack price or prices for blended fuels.

Vendors must have the capability to deliver to above ground storage tanks utilizing a remote fill system on the tank.

Delivery errors by the vendor's delivery personnel or agents/sub contractors shall be the responsibility of the vendor and must be corrected to the agency's satisfaction.

A penalty fee of \$250 (reduction of invoice), can be imposed for failure to provide delivery of fuel within the three (3) working day period of order

placement, unless such delay is attributable to terminal allocations. Vendors can submit documentation related to allocation issues to avoid the penalty.

NOTE: All fuel deliveries shall be metered at the point of delivery and shall issue a printed ticket, to meet the Division of Labor requirements: Tanker trucks may make a delivery of a complete compartment and are permitted to use the allocation metered ticket from the loading point for this printed ticket. West Virginia Code 47-1-11 adopts NCWM Hand Book 130 part "Uniform Engine Fuels...Regulation". Section 3 of that Regulation, subparagraph 3.1.1 concerns documentation. A Bill of Lading from the terminal source locations is acceptable and shall contain quantities, location, time (a.m. / p.m.) date, driver, and product.

XII. DELAY OR FAILURE TO DELIVER: The vendor shall not be liable in damages for the delay of shipment or failure to deliver caused by fire, flood, Acts of God, Acts of Government, Act of an alien enemy, or by any other circumstances which in the opinion of the state agency is beyond the control of the contractor. The state agency may, in its discretion purchase the product on the market until such time product becomes available by the supplier.

NOTES: Under no circumstances will the West Virginia Division of Highways accept, or pay for quantities of fuel in excess of the quantity requested via the telephone or electronic order.

If that fuel terminal location was not quoted as a potential source of supply, the agency shall reimburse the wholesale vendor the OPIS price for that terminal location as well as the additional transport expenses associated with the deliveries and documented by the vendor.
