MODULAR COMPONENTS

- Smart, adaptable, reconfigurable assortment to maximize office layout flexibility and optimize floor space.
- Components for all popular office layouts.
- Selection allows user to choose their own workstation shape, size, and storage.
- Sizes for large and small spaces:
 - 36"D x 72"W or 84"W
 - 30"D — six sizes up to 84"W
 - 24"D — in 6" increments, from 30"W to 96"W
- Worksurfaces supported by post legs with casters provide added layout flexibility.
- Mobile desks quickly convert an office into a small conference space; desks roll easily and can be repositioned in seconds.
- Grommet options provide cord management from the top, side, and back in appropriate models.
- Broad menu of under-surface storage to enable user to specify the solution that best meets their individual needs.
 - Non-handed units can be configured to meet individual tastes and reconfigured when preferences or floor space requirements change.
 - Applications include:
 - The ability to "build" contiguous customized/personalized storage behind the desk that looks like custom architectural millwork, but at a fraction of the price. Allows for multiple storage pedestals to be configured under a single top with clean lines and no gaps.
 - Choosing the storage solution to go under desks, credenzas, and returns.

WORKSURFACES

- Available in a variety of shapes and sizes.
- Scratch-, stain-, and spill-resistant laminate over durable 1½" solid core high performance particleboard; resists warping.
- An external support channel, for attachment under worksurfaces, is required for all unsupported spans — a distance in which there is not a vertical support (point of contact) between the underside of the worksurface and the floor — greater than 54"W.
- For tri-oval and beaded edge options on tops with horizontal grain, there is a shaped profile on the user and approach sides, and a flat edge on the ends.
- For tri-oval and beaded edge options on tops with vertical grain, there is a shaped profile on the user side and a flat edge on the approach side and the ends.
- Grommets are an option and require specification. If grommets are selected, grommets come in a pre-determined location.

- Must be specified with support components; for pedestal, end panel, column, and leg options, see "Components — Supports" listings.

SUPPORTS

- For use with rectangle, bow, bullet, and extended corner worksurfaces.
- Available in 28½" and 41"H.
- Adjustable hex glides allow floor-standing units to be easily leveled, without lifting, to compensate for uneven floors; glides have 1¼" adjustable range on most components; 2" on O-legs.
- Bottom of laminate end panels are edgebanded for added strength and to seal out moisture.

FOR 29½"H WORKSURFACES

- Specify from a broad assortment of solutions, including —
 - Modular Pedestals
 - Laminate end panels (must be used in conjunction with a laminate modesty panel)
 - Laminate L-shaped end panels
 - Laminate T-shaped end panels
 - Metal O-legs — for use with worksurfaces up to 78"W (when using an 84" or wider worksurface, cannot use two O-legs; must use at least one 15¾" or wider pedestal for the other support).
 - 4½" diameter metal column
 - 2" square metal post leg

FOR 42"H WORKSURFACES

- 42", fixed standing-height workstations give users the option of changing postures from sitting to standing throughout the day to help achieve their wellness goals.
- Specify supports from —
 - Modular Pedestals
 - Laminate end panels (must be used in conjunction with a laminate modesty panel)
 - Laminate L-shaped end panels
 - Metal O-legs
- When combined with a stool-height task chair, provides users the benefit of alternating their work between a seated or standing position.
- An external support channel, for attachment under worksurfaces, is required for all unsupported spans greater than 54"W.

CONCINNITY™ COMPONENTS

- Worksurface End Support (panel, leg, column, base, pedestal) requirements by product type are as follows —
 - Desk, peninsula, or credenza — qty. 2
 - Return — qty. 1
 - Island extension — qty. 1

COORDINATE™ HEIGHT ADJUSTABLE BASE

- Height adjustable bases deliver a healthier style of working by allowing a seamless transition between sitting and standing throughout the day. For open, private, or training spaces.
- Frame rises from 21⁵/₈" to 47³/₄".
- Telescoping base design.
- Accommodates rectangle worksurface sizes 24" to 36"D and 48" to 72"W.
- Standard-height adjustable control included with base. Memory control allows preset worksurface heights for consistency.

NOTES: See chart on page 40 for cord management options.

! When grommets are specified for 30"D and 36"D rectangle worksurfaces, pre-drilled holes will not be included for a 4½" diameter support column.

NOTES:

- Grain direction on all rectangle worksurfaces runs horizontal (side-to-side) except as follows: 30"W - 36"W - 42"W - 48"W - 54"W - 60"W x 24"D tops can be specified with horizontal (side-to-side) or vertical (front-to-back) grain.
- 42"W and 48"W x 20"D tops are available with vertical (front-to-back) grain only.
- 48" - 72"W x 24" - 30"D worksurfaces are compatible for use with height adjustable electric base model HHAB3S2L.
- For standing-height requirements, use worksurface with 41"H O-leg, end panel, L-shaped end panel, or pedestal supports.
- For mobile desks and tables, use post leg with casters.
- For paper organizers, see page 111.
- ! Attachment of above privacy screen models requires a minimum 1" clear space/overhang on the underside of worksurface.
- ! Worksurfaces used with Coordinate™ Height-Adjustable Bases should have 1" perimeter gap on each side to provide clearance between other furniture. Failure to do so risks injury or product damage (not covered by warranty).
- ! Attachment of above/below privacy screen models requires a minimum 2" clear space/overhang on the underside of the worksurface.
- ! Steel external support channel can be attached to the underside of worksurfaces that are subjected to heavier loads. Channel is recommended to provide extra support on unsupported spans of 54"W or greater or per user preference. Ordered separately from worksurface.
- ! If using a 54"W or 60"W floating modesty panel, it is not necessary to specify an external support channel.
- ! When using an external support channel under the worksurface, the depth clearance for center drawers and keyboard platforms decreases by 8".

NOTES: Can be used in a host of applications, including as a desk, credenza, return, bridge, stationary or mobile table surface, in U- or L-shaped configurations, as part of a work wall layout with an island extension, or with the height adjustable electric base. The conference overhang dimension on the approach side of worksurfaces varies depending on the supports and modesty panels specified. Top can be positioned with a cantilevered conference overhang on one end when used with select worksurface supports, including an O-leg or 9½"W modular pedestal. For return applications in which there is an unsupported span wider than 54", such as a 72"W x 24"D worksurface supported by a 15¾"W modular pedestal (= 56¼") or a 60"W x 24"D worksurface supported by a 1½" thick end panel (= 58⅞"), use internal support panel model HNL11SUPP. For bridges wider than 54", use internal support panel HNL11SUPP. When using a 30"W, 36"W, 42"W, or 48"W rectangle worksurface as a bridge, no support legs are needed. When specifying a 84"W, 90"W, or 96"W worksurface, cannot use two O-legs for the supports. In these applications, the maximum number of supports that can be an O-leg is one; must choose from a 15¾" or wider modular pedestal for use as the additional support component. For applications requiring connection to an adjoining worksurface, two flat brackets are included with 24"D and 20"D worksurfaces that are ≤48"W; one flat bracket is included with 24"D worksurfaces that are ≥54"W. Underside of worksurface includes pilot mounting holes for O-leg, 1½" thick laminate end panel, pedestals, and flat brackets. See chart on page 40 for cord management options.

❗ When grommets are specified for 30"D and 36"D rectangle worksurfaces, pre-drilled holes will not be included for attachment of a 4½" diameter support column.

- 42"W and 48"W x 20"D tops are available with vertical (front-to-back) grain only.
- 48" - 72"W x 24" - 30"D worksurfaces are compatible for use with height adjustable electric base model HHAB3S2L.
- For standing-height requirements, use worksurface with 41"H O-leg, end panel, L-shaped end panel, or pedestal supports.
- For mobile desks and tables, use post leg with casters.
- For paper organizers, see page 111.
- ❗ Attachment of above privacy screen models requires a minimum 1" clear space/overhang on the underside of worksurface.

Back View

NOTES: For use with modular worksurface and support components. Component is 3/4" thick. Full-to-floor sizes can be specified with or without grommet; see chart on page 40 for cord management options. For standing-height applications, a worksurface supported by 1 1/8" thick x 41"H laminate end panel(s) and/or 41"H support pedestal(s), the recommended modesty panel length extends 27 7/8" below the underside of the top, leaving 13" of wall access; 9 1/2" and 15 3/4" W x 13"H backs are available to enclose the balance of the pedestal back. Worksurfaces supported by a 1 1/8" thick x 41"H laminate end panel and 41"H support pedestal, or by two 41"H support pedestals, can be used with a 10" modesty panel to increase the amount of wall access, however in this application the pedestal(s) should be positioned against a wall, as there is not a 30 7/8"H panel to cover the back of the pedestal that is exposed below the modesty panel. The 10"H modesty panel is not recommended for use in a standing-height shell, where both supports are 41"H laminate end panels; for this solution use the 27 7/8"H modesty panel. For standing-height applications with the worksurface supported by 41"H O-legs or L-shaped end panels, use the appropriate floating modesty panel size.

NOTES:

- Provide approach-side kneespace privacy for user seated at desks, credenzas, returns, and bridges.
- Full-width laminate panel can be specified in 6" increments from 30"-96"W, and in full-length (27 7/8"H) or short (10"H).
- Formal, full-length, 27 7/8"H models extend from the underside of the worksurface to the floor.
- 10"H sizes allow quick and easy access to wall power outlets.
- 30"W and 36"W x 27 7/8"H are designed to serve as a modesty panel, or pedestal back for respective 30"W and 36"W support storage pedestal models.

! The full-width panel designs are specifically for use when the worksurface supports are two 1 1/8" thick end panels, two support storage pedestals, or one 1 1/8" thick end panel and one support storage pedestal; not for use with O-legs or L-shaped end panels.

SUPPORT STORAGE PEDESTALS — 28½”H

- Non-handed, interchangeable design reconfigures easily.
- For use with component top and modesty/back panels or pedestal top and back panels.
 - Pedestals are not fully enclosed and require a component top/worksurface and modesty/back panel or a pedestal back, both of which must be ordered separately.
 - Pedestal's front and side panels are finished.
- The pedestal depth dimension is less than the like-size depth of the component top, to accommodate addition of a modesty/back panel.
 - 29½”D pedestals can be used under 30” or 36”D worksurfaces; 23½”D pedestals can be used under 24” or 30”D worksurfaces.
 - When specifying a 29½”D pedestal with ¾” modesty panel under a 36”D worksurface, or a 23½”D pedestal with a ¾” modesty panel under a 30”D worksurface, there will be a 6” approach side overhang.
- Bottom of side panels are edgebanded for added strength and to seal out moisture.
- Drawers:
 - Operate on steel ball-bearing suspensions to ensure smooth, quiet, long-lasting operation; full extension allows easy access to contents.
 - Fronts are edgebanded on all four sides.
 - Feature 5-sided construction for added strength and easy alignment or replacement of drawer fronts.

- Interchangeable core removable locks are located on front of all modular storage products, except the storage cabinet.
- Finish of lock is determined by, and aligned with, the handle finish specified.
- Locks feature a removable cylinder that can be interchanged as needed; allows users to access all furniture pieces in an office with a single key for convenience and security. Makes re-keying quick and easy. Keyed alike cores must be ordered separately by specification of the key number (removable lock core kit models available in Black [model HF23B] or Satin [model HF23S]).
- Ship fully assembled.
- Chassis and drawer front colors are specified separately; can be selected with common woodgrain or solid laminate color, or with different, complementary chassis and drawer/door colors.
- See chart on page 40 for cord management options. If the pedestal grommet option is chosen, two cutouts, one per end/side panel, each with a black plastic cap, are included.

SUPPORT STORAGE PEDESTALS — 41”H STANDING-HEIGHT

- Same as above except — not to be used freestanding; top and back are not enclosed.
 - Rear of pedestal can be enclosed with a full, 40¾”H back panel or with a 27¾”H modesty panel combined with a lower, 13”H pedestal back component. Pedestal back and modesty panel must be ordered separately.

- Tops are abrasion- and stain-resistant laminate over extra-thick 1½" solid core high-performance particleboard; resists warping.
- "Ribbon" edge profile; shape is on all four sides.
- Full height modesty panels.
- Cord management grommets, for routing and hiding wires and cables, are located in the tops of desk and return shells.
- 3" round worksurface grommet can be replaced with optional Power Hub (model HGRMTAC) or Power/USB Hub (model HGRMTUSB2) to bring the ease of plug-and-play to the desktop. See page 167.
- Credenza shells have a cord pass-through grommet in the top center of the modesty panel.
- The narrow design of the kneespace clearance end panel kits replace full end panels to provide added kneespace.
- Adjustable hex leveling glides allow floor-standing furniture to be easily leveled; glides have ¾" adjustable range.

- All modular pedestals have an easy attach method to the workspace for quick assembly.
- One double-depth O-leg can replace two regular O-legs in teaming applications.
- Shared O-legs create cleaner aesthetic where two legs are used side-by-side.
- 2" adjustable glides on O-leg supports.
- Standing-Height Support Pedestals bottom two file drawers are locking.
- Standing-Height Bookcase Support contains easy-access, fixed storage shelves.

Tips

- Mixed material and laminate floating modesty panels create a lighter scale look by attaching to the top of the worksurface.
- Choose from a variety of materials to create your desired look.
- Laminate modesty panels to create a more conventional look.
- 54"W and 60"W Floating Modesty panels eliminate the need for an external channel.
- Above Privacy Screens provide a division between two worksurfaces and create a division of space in an open plan area.
- Modesty panels cannot be used as a support.
- See modesty panel chart to choose proper modesty size depending on support options.

4. Select Above the Worksurface Storage (Stack-on Storage) or Overhead Cabinets

Tips

- Select sliding or hinged doors.
- Specify O-leg separately for a contemporary look.
- Optional storage shelf works in conjunction with the O-leg design to provide additional storage space. Only works with 65"H O-legs.
- O-legs come in two sizes to make a 50"H or 65"H stack-on storage unit.
- Wall-mount brackets carry a \$150 upcharge and are specified the model ordering logic.
- Use shared overhead and attachments in small footprint applications.
- Shared overhead must be ordered as left or right to determine open storage location.
- Shared overhead panel mount brackets and overhead post legs allow overhead to span over all panels systems or run down the spine wall, centered on top of the panel.
- Use the 65"H for a more conventional design. 65"H and 50"H aligns with Abound and Accelerate.
- Stack-on Storage must be placed over two full-height supports. Cannot be placed over non-supported sections such as returns using a flat bracket or tower-to-worksurface bracket.
- If the end panel conventional look is preferred, order the built-up stack-on storage models.
- There are two types of tackboards for use on Overhead Cabinet and Stack-on Storage.

Tips

- Small credenza models can be used in small footprint applications.
- Can use pedestal or credenza seat cushions on smaller credenza models.
- Low credenzas work in conjunction with worksurface 7" O-leg designed to create a unique layering design.
- Bookcase/laterals and other conventional storage components provide additional storage space.
- Must specify chassis and drawer front color separately.
- Low Credenzas, Laterals and Mobile Pedestals have seat cushions to create additional seating in the workspace.
- Storage and Personal Tower models offer conventional storage as well as wardrobes with a coat rod.
- Using a seat cushion with a power-ready credenza will cover one grommet.
- A worksurface-to-tower bracket kit allows the attachment of worksurfaces to Storage and Personal Tower models.
- Telescoping ball-bearing slides used on box and file drawers. Lateral drawers use a progressive ball-bearing slide.

6. Select Accessories to add color, additional storage and organization to your workspace.

- Layering shelves are great for filing and piling or in conjunction with the lower credenza.
- Optimize shared overhead capabilities by adding the Markerboard for Shared Overhead.

VOI® AND SYSTEMS INTEGRATION

Worksurface Applications

Either Voi or Systems worksurfaces can be used with Voi in an open plan application. There are several support options:

- A. Completely panel supported.
- B. Combination of panel supported and another worksurface support such as:
 - Bookcase support
 - Pedestal (Brigade®, Flagship®, Contain®, or Voi®)
 - Systems open leg
 - Voi O-leg
 - End panel (Systems or Voi)
 - Tower to worksurface bracket
 - Support column
 - Systems round post leg
 - Voi post leg
- C. Freestanding:
 - Bookcase support
 - Two pedestals (Brigade®, Flagship®, Contain®, or Voi®)
 - Two Voi O-legs
 - One Voi O-leg and one Voi O-leg support for lower credenzas
 - Two end panels (metal or Voi)—requires metal or Voi modesty panel

Additional application guidelines for worksurfaces:

- Systems worksurfaces are available with grommets or no grommets.
- When Voi lower credenzas are used along the spine wall and are placed adjacent to the wing wall, one electrical/data cutout on the wing wall will be blocked.
- When Voi credenzas are used along the wing wall and are placed adjacent to the spine wall, one electrical/data cutout on the spine wall will be blocked.
- When the Voi O-leg support for credenzas is used, it is recommended to also panel attach the worksurface with the worksurface anti-dislodgement bracket kit HWSA2.
- When the Voi O-leg support is used with panels, it is recommended to also panel attach the O-leg to the panel with the O-leg to panel bracket kit HLSPBL (left) and/or HLSPBR (right). This bracket will provide additional workstation rigidity.
- When the Voi end panel support is used with panels, it is recommended to use the end panel support with panel bracket model. This model will provide additional workstation rigidity.
- The worksurface to tower bracket kit, HSTB2W1, will work with Voi towers, Voi worksurfaces, and systems worksurfaces.

Application Guidelines—Combination of Panel Supported and Another Worksurface Support

- For applications where 1) the worksurface is perpendicular to the spine wall; 2) the worksurface is panel supported off the spine wall; and 3) there are Voi credenzas placed under the worksurface along the spine: there is not enough clearance to use standard worksurface cantilevers to attach the worksurface to the spine. Use the worksurface anti-dislodgement bracket kit HWSA2 to panel attach the worksurface in lieu of cantilevers.

Panel Mounted Stack-on Storage Applications

- The Voi stack-on storage cabinets can be used on Abound and Accelerate as panel mounted overheads.
- The sliding door stack-on storage units are available in 36", 42", 48" widths in addition to 60", 66", and 72" widths.
- The 4 door stack-on storage units are only available in 36", 42", 48", 60", 66", and 72" widths.
- The storage units require a storage to panel bracket kit, model HLSPMB. This model includes one left hand, one right hand, and one center bracket. The brackets are available in all Core and Choice/Metallic paint colors.
- The storage cabinets do not have off modular capabilities.
- For proper installation and support, the storage units must follow the following specification rules:
 - There should be a storage unit of the same construction on each side of a given panel.
 - The storage units on opposite sides of a given panel should be in the same location vertically and horizontally.
 - Only one storage unit per panel, per side.
 - The wing panel adjacent to the spine wall needs to be the same height as the spine wall.

NOTES:

- Systems worksurfaces can be used with all Voi components.
- Worksurfaces are abrasion- and stain-resistant laminate over durable 1/8" solid core high performance particleboard: resists wrapping.
- There is one 3" grommet in 36"W and 42"W worksurfaces and two in 48"W-84"W worksurfaces.
- One flat bracket ships with each work surface.
- When attaching tops to panels, refer to Systems section of this pricer.
- Square edge detail.
- When using a floating modesty panel or an external channel under the work surface, the depth clearance for keyboard trays and center drawers decreases by 8". See accessory matrix in accessory section of the pricer.
- 3" Power Hub model HGRMTAC can be interchanged with 3" standard grommet.
- ! Voi® worksurfaces cannot be used with Abode™ Desks components.
- ! Grommets in worksurfaces must be specified. If grommets are specified, grommets come in predetermined location.
- ! Edgeband option only on all Voi worksurfaces. For edgeband options, see matrix on page 187.
- ! When specifying an 84" Work surface, cannot use two O-legs, must use at least one additional support such as a pedestal or lateral file.
- ! When using a work surface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.
- ! Lateral file or multi-files must be used with surfaces 24"D and 60"W or greater.
- ! Depending on your support combination, an external channel may be required for extra support on unsupported spans greater than 54"W. Please see the matrix on page 188 for more details.
- ! If using a 54"W or 60"W floating modesty, it is not necessary to spec an external channel.
- ! When attaching worksurfaces to panels, one or more of the following are required: anti-dislodgement brackets, end panel, support leg and/or cantilevers. Cantilevers and anti-dislodgement brackets must be ordered separately when attaching worksurfaces to panels.
- ! A return work surface is considered 48"W or shorter. Longer returns cannot be supported by a flat bracket only.

- Will have a 6" overhang when using 30" worksurface supports with a 36"D worksurface.
- Glides on O-Leg Support for Worksurfaces and Post Leg Base have 2" of adjustability. No glides on 7"H O-leg. Glides on end panels have 1¼" adjustability.

- One flat bracket ships with each worksurface for applications requiring connection to an adjoining worksurface.
- For end panels, legs, columns and bases, see the Worksurface Supports listing on pages 240-241.
- When using a floating modesty panel or an external channel under the worksurface, the depth clearance for keyboard trays and center drawers decreases by 8". See accessory matrix in accessory section of the pricer.

! Worksurfaces are subject to slight bowing. The magnitude of the deflection is dependent upon the weight, placement, and duration of the load.

! When using a worksurface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.

! External channel support is recommended for extended unsupported spans or heavily loaded worksurfaces. See above and below for details.

NOTES: Ship fully assembled with mounting hardware, 1/pack. Non-handed. O-leg glides have 2" adjustability. For shared components such as modesty panels and privacy screens see pages 195-197. O-leg installation requires 6" of clearance from the worksurface end. For standing-height O-leg sizes, see page 242. Shared O-legs create a cleaner aesthetic in all applications where two legs are used side-by-side. Will have 6" overhang when using 30"D O-legs with a 36"D worksurface.

IMPORTANT: The O-leg attachment bracket interferes with placement of 10500 Series modular pedestals and 28½"H mobile pedestals, preventing them from being positioned directly next to (flush with) the O-leg. Box/file mobile pedestal (model H105106) and mobile printer/fax cart model (H105679) can be positioned along side the O-leg.

- Antique brass drawer pulls; hand-applied raised decorative molding, and plinth style base.
- Pullout reference/writing shelf is standard on all desk pedestals.

WORKING WITH ABODE™ COMPONENTS

Configurations

End Panels and Support Legs

Each are available in two options: freestanding or panel-mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a systems application.

The 11"D end panel is used to support peninsulas.

Corner Desk Legs

Corner desk legs have a 90-degree bend and welded construction. The strong construction allows gussets or half-height modesty panels to be used with corner legs.

Bridge Kits

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.

There are some bridge instances where only half of a bridge kit is needed (e.g., using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

Support Column

Support columns are used to support one end of curvilinear worksurfaces. Includes column, worksurface bracket kit HWSA2, attaching hardware, and adjustable glides.

Return Kits

Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.

Desk-to-Panel Attachment Kits

Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end panel, support leg, or corner leg mounted directly under this worksurface.

When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk, use corner w/desk attachment kit. Hand of unit is determined from the user's side of the desk (right-hand unit attaches to right side of modesty).

ABODE™

Corner w/Desk Panel Attachment Kit

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. Hand of unit is determined from the user's side of the desk (left-hand unit attaches to left side of modesty).

Corner Worksurfaces

Corner worksurfaces accommodate 90-degree corner desk legs.

In-Line Connections of Desks

Shared leg can be used at in-line connections to support adjacent rectangular desks.

Pedestals and Storage

Pedestals must be ordered smaller than the depth of the worksurface. For example, 18"D peds should be used with 24"D worksurfaces. 18"D or 23"D pedestals can be used with 30"D worksurfaces. Using 18"D laterals or personal files provide additional storage options under 24"D worksurfaces.

Modesty Panels

The following are some general guidelines for Abode™ modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

Stand-Alone Corner Modesty Panels

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.

Gussets "G"

Gussets can be used in place of a modesty panel with desks 36"W to 60"W. Gussets can also be used with corner desk legs.

ABOUT® FRAMES OVERVIEW

PANEL FRAME

OPEN BASE PANEL FRAME

STACKING FRAMES

Reminder: Panel frame top caps must be ordered separately. Please refer to page 392. Do not specify top caps when putting frameless glass on top of the panel frame or when using a countertop worksurface.

ABOUND® FRAMES OVERVIEW

Stacking connection provides a solid metal-to-metal connection, allowing the stacking frame to accept hang-on components, per configuration guidelines.

Construction and Features

Specifications—formed, steel vertical members, with tubular steel horizontal members are welded into a sturdy, structural panel frame. Panel frames are shipped with base pathway covers installed.

Tiles, Panel Top Caps, and Segment Bars are ordered separately.

Additional design and specification information available at hon.com.

ABOUT® FRAMES OVERVIEW

FRAME DIMENSIONS (ACTUAL)

Depth: 2 $\frac{5}{8}$ " (use 2 $\frac{3}{4}$ " to calculate intersections in length of panel run)

Widths: 24", 30", 36", 42", 48", 60"

Heights*: Painted trim: 34 $\frac{1}{2}$ ", 42", 49 $\frac{1}{2}$ ", 64 $\frac{1}{2}$ "

Stacking Frames: 15"H, 30"H

*with levelers fully retracted

Stacking frames can be added to the top of any 35"H, 50"H or 65"H frame. Adding stacking frames to 42"H frames is not recommended due to inconsistencies in segmentation. 15"H and 30"H stacking frames can be used to add up to 45" of additional height to a standard frame. Do not combine differing frame widths in a single stack.

NOTE: When stacking on 42 $\frac{1}{2}$ "H frames, panel slots will be off by $\frac{1}{2}$ " compared to any other height panel. When stacking on 42 $\frac{1}{2}$ "H frames, hanging accessories will be $\frac{1}{2}$ " off in height compared to accessories hanging on panels at any height other than 42 $\frac{1}{2}$ "H.

BUILDING HORIZONTALLY WITH ABOUT FRAMES

Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:

Method 1—Opposing returns:

A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels running in opposing directions on each end of run.

Method 2—Single-sided

Spine Length:	90 degree connector	120 degree connector
48"-108"	72" total	84" total
110"-132"	84" total	96" total
134"-144"	96" total	108" total

ABOUND[®] FRAMES OVERVIEW

INTERSECTING CONNECTIONS

"L", "T", "X", "Y2" and "Y3" connector kits are used when connecting frames at intersecting runs. For "L", "T" and "X" connector kits, add $2\frac{3}{4}$ " to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.

Wall starter kits provide a means to affix a panel run to a permanent building wall. Kit adds $1\frac{5}{32}$ " to length of panel run.

Segment bars — horizontal cross members required between tile segments. Must be specified on each side of frame. One Segment Bar is needed for each reveal between tiles.

Extended straight connector kit "S" can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate "T" or "X" intersections. (Add $2\frac{3}{4}$ " to the length of the run for every extended straight connector used.)

IN-LINE CONNECTIONS

Direct connections between same height frames in a continuous run are accomplished with provided hardware. There is no incremental increase in dimension along the run.

END OF RUN

Finished end trim must be specified for the unconnected sides of panel frames. The Abound end trim adds $\frac{3}{8}$ " to the length of the panel run. When adding a stacking frame, order finished end trim in the height that matches the stacking frame height. Move the end cap from the standard frame end trim to the stacking frame end trim.

IN-LINE VARIABLE HEIGHT TRIM

In-line connections between different height panels require trim to cover the exposed frame of the taller panel. The bottom of the trim is contoured to match the profile of the frame top cap.

Multiple-height connections are accomplished by combining standard height panel connectors (35"H, 42"H, 50"H and 65"H) with shorter connectors (7"H, 15"H, 22"H and 30"H). Start from the bottom-up — select the standard connector that corresponds to the height and connection type of the shortest panel, then use the shorter connectors to build up to each subsequent panel height. (See examples.)

Example 1

1 ea. 50"H T-Connector
1 ea. 15"H T-Connector
Or
1 ea. 35"H T-Connector
1 ea. 15"H S-Connector

In variable height "T" connections — as shown above — you would use the connectors as indicated.

Example 2

Connectors required:
1-35"H "X"
1-7"H "T"
1-7"H "L"
1-15"H "FT"

Example 3

Connectors required:
1-50"H "L"
1-15"H Variable Height Trim over Connector

Example above represents Abound variable height "L" for 65" to 50" connection over connector.

VARIABLE HEIGHT CONNECTION TRIM

L, X and T connections between different height panels require trim to cover the exposed frame of the taller panel. The bottom of the trim is flat to match the profile of the Universal Connector top cap. Models are designated as "Variable Height Finished End over Connector Trim". For variable height connections in a Y configuration, contact the HON Product Solutions group.

OPTIONAL STIFFENER SUPPORT

Stiffener supports can be used to provide additional rigidity to a panel when fabric tiles are on both sides of the frame. May also be used for routing power/data at non-standard heights.

ABOUND[®] CONNECTOR OVERVIEW

CONNECTOR KITS — ABOUND

"L"	90° Connector Kit
"T"	3-way Connector Kit
"X"	4-way Connector Kit
"S"	"S" Extended Straight Connector Kit
"Y2"	2-way 120° Connector Kit
"Y3"	3-way 120° Connector Kit
"W"	Wall Starter Kit
"F"	End Trim Kit
"V"	Variable Height Finished End
"FT"	Variable Height Finished End over Connector

- ABOUND Connector Kits include universal connector block(s), bracket clips and painted metal trim.
- The universal connector block can be used for an L, T, X, or Extended Straight connections, simplifying staging and installation at the project site as well as future reconfigurations.
- Bracket clips are attached to the connector blocks as needed based upon connection type.
- While the connectors themselves are universal, ABOUND connector kits must be specified by connection type (X, L, T, S, 120 degree) in order to receive the correct type of trim.

ABOUND® TILE OVERVIEW

About tiles come in a variety of styles.

*Aesthetics of opposing tile surface and/or frame interior should be considered when selecting light-colored sheer materials.

ABOUND® SPECIFYING/DESIGN GUIDE

Tile Heights

Monolithic tiles are 5" shorter than frame heights to account for top trim and base raceway.

Typical Tile Height Configurations

Segment bars are required between any two tiles — order separately based on tile configuration on each side of frame. Note: Most CAD specification programs will calculate quantity of segment bars required.

Stacking	15"H	30"H	15"H	15"H
35"H	15"H	30"H	15"H	15"H
42"H	37"H Monolithic Only	22 1/2"H	15"H	22 1/2"H
50"H	15"H	15"H	30"H	45"H Monolithic
65"H	15"H	15"H	30"H	15"H
80"H	15"H	15"H	30"H	30"H
95"H	15"H	15"H	30"H	30"H

Glass will not work with 42"H frames. Please see note on page 407 about hanging on 42½"H panel height.

*Additional tile combinations to those shown above are possible; heights above 65" require stacking frames - maximum height is 110".

To calculate the total height of tiles(s) required, deduct 5" (height of base/top trim) from the total nominal panel height.

EXAMPLE: 65"H Frame takes 2 30"H tiles. $65 - 5 = 2 \times 30$ or $45 + 15$

Tiles and Top Caps are ordered separately

Tiles can be ordered in the size that matches the frame height plus the stacker height.

EXAMPLE: If you are using a 35"H frame plus a 30"H stacker, you can order 2 - 30"H tiles or 1 - 60"H tile.

Door panels include frame, 42"W door, hinges and attaching hardware. Two 7½"H fabric tiles for the top of the door frame are required and ordered separately (HRVD0742T).

Sliding doors are available in 50", 65", and 80"H models and can mount to 30", 36", 42", and 48"W panels. The doors provide a 36"W opening and are 42"W, nominally. The doors ship non-handed. A Mounting Bracket Kit must be ordered for each door corresponding to the mounting panel's width (30", 36", 42", or 48"W).

Plains Tiles and Hard-surface Tiles include tile and Custom Bracket Kit.

Abound
String-in Capacity

Openings in frame sides permit electrical data and communication cables to be run between frames in Abound. Using tackable acoustical tiles, the beltline pathway accommodates up to 62 cables (.25" dia) or 46 cables with electrical components installed.

DO NOT run electrical equipment or extension cords through cable openings in frame sides. Use beltline or base-mounted electrical system for all electrical supply.

Cables can enter/exit panel through underside of base pathway at juncture between frames. Openings are sized as follows (in sq. in.):

Straight connection	6.0
"S" Extended Straight Connection	10.0
"L" 90° Connection	8.9
"T" Connection	15.9
"X" Connection	17.9
"Y" Connection	—

When leveling glides are fully retracted, panel-to-floor clearance is 7/16". This may affect the volume of cabling that can be fed into the frame from the bottom of the pathway.

Vertical Capacity

Vertical Capacity Through Panel Frames

- A 60% fill ratio is achievable; however, when electrical components are installed in the beltline area, cabling capacity through the beltline area will be limited to approximately 45% fill ratio.

ACCELERATE® PANELS OVERVIEW

INTERSECTING CONNECTIONS

“L”, “T” and “X” connector kits are used when connecting frames at intersecting runs. For “L”, “T” and “X” connector kits, add 2¼” to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.

Wall starter kits provide a means to affix a panel run to a permanent building wall. Kit adds 7⁄8” to length of panel run.

STACKING PANELS

Stackers add 15” to the height of the base panel and can be ordered separately or as part of the panel model, see pages 429 and 432.

When adding stackers to an existing panel, a new connector must be ordered, to the tallest panel height.

Please note that Stacking Panels are not to be used freestanding and must match the panel width of the panel it is stacking on.

Cannot use a stacking panel on a Top Tier Glass Panel model.

Stackers ship with pins to connect stacker to post connector for added rigidity.

Stackers can be stacked up to 80”H on a base panel. Overheads can be placed on the first stacker only, up to 65”H. Voi overheads are not to be placed on stackers.

Extended straight connector kit “S” can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate “T” or “X” intersections. (Add 2¼” to the length of the run for every extended straight connector used.)

IN-LINE CONNECTIONS

There is no incremental increase in dimension along the panel run when using an in-line connector kit.

END OF RUN

Finished end trim must be specified for the unconnected sides of panel. When adding a stacking panel, order finished end trim in the height that matches the total stacked height. Move the end cap from the standard frame end trim to the stacking frame end trim.

Accelerate® frameless glass is single pane, 3⁄8” thick laminate safety glass, available in clear or frosted glass.

Frameless glass can only be used on the tallest panel in a typical, not at inline or post connectors with variable height. Frameless glass is not allowed on top of glass stackers or glass header panels and hanging or stacking on frameless glass is not permitted.

Frameless glass can span multiple panels with one piece of glass, creating a clean, seamless look.

IN-LINE VARIABLE HEIGHT TRIM

In-line connections between different height panels require trim to cover the exposed frame of the taller panel.

VARIABLE HEIGHT CONNECTOR TRIM

L, X and T connections between different height panels require trim to cover the exposed connector. The bottom of the trim is flat to match the profile of the top cap. Models are designated as “Variable Height Connector Trim”. For variable height connections in a Y configuration, contact the Accelerate Specials Department.

Multiple-height connections are accomplished by combining standard height panel connectors (35”H, 42”H, 50”H and 65”H) with shorter trim kits (7”H, 15”H, 22”H and 30”H). Start from the top-down — select the standard connector that corresponds to the height and connection type of the tallest panel. (See examples.)

ACCELERATE® PANELS OVERVIEW

Example 1

Connectors required:
1-50"H "T" Connector
2-15"H Connector VH Kit
2-35"H End Trim
1-65"H End Trim

In variable height "T" connections — as shown above — you would use the connectors as indicated.

Example 2

Connectors required:
1-50"H "X" Connector
2-7½"H Connector VH Kit
2-50"H End Trim
2-42"H End Trim

Example 3

Connectors required:
1-65"H "T" Connector
1-15"H Connector VH Kit
1-22½"H Connector VH Kit
1-65"H End Trim
1-50"H End Trim
1-42"H End Trim

Example above represents Accelerate variable height "L" for 65" to 50".

TOP CAPS

Top caps must be specified as a separate model from the panel. Top caps can span more than one panel when panels are connected in an in-line.

ACCELERATE® WORKING WITH PANELS

PANELS

- Accelerate® Panels are 2½" thick and available in 4 heights / 8 widths.

PANEL SPECIFICATION AND INSTALLATION NOTES

Definitions:

Parent Panel Run – Panels (or a single panel) configured in a straight line intended to divide space. It is usually longer than the panels used to stabilize it.

Return Panels – Panels attached to a parent run for the purpose of stabilizing it. Return panels may also have the effect of dividing space.

Note: Return panels must be no more than 30" lower than the maximum height of the parent panel run. When stacking, the maximum height allowed is 80". This includes frameless glass. If attaching overhead storage, return panels must be the same height as parent run.

Method 1: Opposing Returns

A parent panel run must be a minimum of 4 feet and a maximum of 12 feet, and must have a minimum of two return panels extended in opposing directions on each side of the parent run.

EMPOWER[®] ELECTRICAL SPECIFYING INFORMATION

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:

- **The Four-circuit system
(4-Hot/2-Neutral/2-Ground)**
 - 3 + 1 option
 - 2 + 2 option
- **The Three-circuit system
(3-Hot/3-Neutral/2-Ground)**

2. Determine location, quantity and circuit of duplexes.
3. Determine the appropriate choice and use of Isolated, Isolated/Dedicated and Separate Neutral circuits.
4. Specify appropriate Power Harnesses* and Pass-Thru Cables.*
5. Determine the location, quantity and type of Power In-feed needed.

* Select Power Harness models (HH8712XX) and Pass-Thru Cables (HH8711XX) with the last two digits being the same as the associated worksurface width.

Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power in-feed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals.

Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this price.

Four-circuit, 3 + 1 Receptacle Option

The 3 + 1 option is the electrical standard used by The HON Company for many years in most of their systems products. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment.

Four-circuit, 2 + 2 Receptacle Option

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

EMPOWER[®]

ELECTRICAL SPECIFYING INFORMATION

Three-circuit, separate neutrals

The Three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/dedicated. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Two 8-wire, 20 AMP (15 AMP Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground (10 gauge neutral wires)	3 + 1	Common Circuit-1 HH873501	Common Circuit-2 (1) HH873502	Common Circuit-3 HH873503	Iso/Dedicated Circuit-4 HH873504

(1) Circuit-2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system from being connected to components of another system.
- HON Cat. Nos. are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

Typical power usage by the most commonly specified office equipment.

SYSTEMS OVERHEAD AND SHELVES SPECIFYING

SPECIFICATION GUIDELINES

In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side. When suspending overhead storage off-module only one storage unit per panel side is allowed.

When overhead storage units are suspended from stacking frames, the following guidelines should be adhered to:

A maximum of two overhead storage units can be suspended from each side of stacking frames on any given panel.

Overhead Storage cabinets and the **Open Shelf** can also be mounted to a maximum height of 65"H on all systems. Voi overheads not to be mounted on Accelerate stackers.

No limitation to the number of units on structural frames when units are spaced 12" apart and when the run is supported with return panels of equal height to the spine wall on each side of storage shelves or overhead storage cabinets.

Storage shelf and overhead width must correspond with width of panel(s). It is possible to span two panels when combined panel width equals cabinet or shelf width.

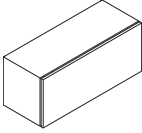

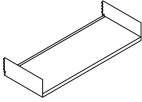

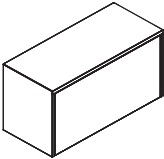

Overhead Cabinets can be mounted on a panel equal to or up to 18" narrower than cabinet.

Not applicable for ETA overheads, Voi overheads, and shelves.

ABOUND® Electrical and Data

Abound® features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway and beltline. The open structure of the frame allows voice and data cables to be routed both vertically and horizontally.

THE ABOUND ELECTRICAL SYSTEMS

Abound offers a choice of three electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals

All three systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian). See pages 528-529 for a detailed explanation of each electrical system.

Abound frames and electrical components are UL Listed. Electrical components are also CSA certified.

Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

Abound's electrical harnesses are UL listed and are considered raceways themselves as defined by the National Electrical Code. This means there is no separation requirement between the electrical harnesses and communications cables per Sec. 800-52 of the National Electrical Code. Communication cables may be placed next to Abound's electrical components without a metal septum and will still meet the guidelines of the Telecommunications Industry Association for separation of power and data.

IN-FEEDS

Power in-feed cables deliver power from building to system. In-feed cables are housed in conduit to separate electrical system from communications and data lines.

Integrated power and communications poles provide capacity for routing power supply directly through the top of any structural or stacking frame using same width trim/connector kit in place of top cap. Avoid glass or translucent tiles in upper position of frames with integrated power poles. Power pole has a cavity on each side of a center septum. When using a ceiling power in-feed, consider that the in-feed must connect into an electrical harness located in an adjacent panel. (See pages 530-531 for cable capacity.)

Ceiling power in-feed connects to a prewired electrical harness in the beltline or base pathway, traverses through an adjacent panel and terminates in the junction box at the top of the integrated power pole. For use with integrated power pole models HEP65 and HEP35. No portion of the flex cable can be exposed after installation.

Sealtight base pathway power in-feed attaches to a receptacle opening at the base pathway. A heavy rubber sheathing shields conduit, allowing in-feed to be exposed.

Hardwire (New York Code) power in-feed (model H871400) is used when local electrical codes require hardwire entry. When used in 24"W, 30"W and 36"W panels, power can be routed only in one direction. When used in 42", 48"W and 60"W panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction. Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel. Customer to furnish all cabling and wiring from power entry to power source. Junction box can be positioned at any duplex receptacle location.

HARDWARE (CHICAGO CODE) JUNCTION BOX

Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all metallic components. Concealed mounting is the only option at beltline. For the base pathway, junction box (model HH873500) clips directly into receptacle locations. Customer must furnish conduit, wiring, standard duplex receptacles with metal covers for the beltline and designer-type receptacles for the base pathway. Power entry can be routed from the ceiling, via an Abound power pole, or from the floor into a junction box (model HH873500).

ABOUND® Electrical and Data

POWER

Power blocks on electrical power harness and pass-thru harness accept duplex receptacles.

Electrical power harnesses are used to distribute power in panels. Abound electrical can be located at base pathway or beltline only. Connectors at both ends of power harnesses allow power distribution in either direction.

Electrical pass-thru harnesses have capacity to handle one duplex receptacle on each side of the panel when exposed.

A 60" pass-thru harness can be used to jump up to a single duplex receptacle per side at beltline and connecting to a power harness at base pathway.

Electrical power harnesses and pass-thru cables cannot be routed at 90° at beltline once frames are connected to connector blocks.

Electrical pass-thru cables distribute power through any panel where receptacles are not required. Cable length cannot be stretched.

Electrical jumper cables connect power from base pathway or beltline to a harness located on any horizontal member as needed. Jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.

Model HH871366 is 66" to jump up to 30 inches vertically – base pathway to beltline or beltline to base pathway.

Jumper can also be used from beltline to adjacent beltline at 90° juncture.

POWER BLOCKS

Base pathway mounting: Power blocks snap directly onto brackets in base pathway area.

Beltline electrical mounting: For ported receptacles at beltline mount power blocks onto Electrical Mounting Brackets which screw into the panel frame. Electrical Mounting Brackets must be ordered separately. Data/Electrical Port Tiles must be used where exposed receptacles will be located.

RECEPTACLES

Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses. Duplexes are available in multiple colors. Each receptacle is labeled to indicate which circuit it will be connected to.

OPTIONAL STIFFENER SUPPORT
Stiffener supports can be used to provide additional rigidity to a panel when fabric tiles are on both sides of the frame. May also be used for routing power/data at non-standard heights.

All electrical power harnesses and pass-thru harnesses will stretch 3½", allowing them to span "T" and "X" intersections and "S" extended straight connections.

ACCELERATE® Electrical and Data

WORKSTATIONS

Accelerate® features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway. See Systems electrical pages 532-537 for electrical models to be used with Accelerate® Systems products.

ACCELERATE®

Electrical and Data

THE ACCELERATE ELECTRICAL SYSTEMS

Accelerate offers a choice of three electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals

All three systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian). See pages 528-529 for a detailed explanation of each electrical system.

Accelerate panels and electrical components are UL Listed. Electrical components are also CSA certified.

Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

Accelerate's electrical harnesses are UL listed and are considered raceways themselves as defined by the National Electrical Code. This means there is no separation requirement between the electrical harnesses and communications cables per Sec. 800-52 of the National Electrical Code. Communication cables may be placed next to Accelerate's electrical components without a metal septum and will still meet the guidelines of the Telecommunications Industry Association for separation of power and data.

Customer must furnish conduit, wiring, standard duplex receptacles with metal covers for the beltline and designer-type receptacles for the base pathway. See Systems electrical pages 532-537 for electrical models to be used with Accelerate® Systems products.

DUPLEX RECEPTACLES

For Duplex Receptacle models that can be used on Accelerate® panel systems, please see page 535.

All Systems electrical components can be found on pages 532-537.

LIGHTING

Task lights can be recessed under storage cabinets or storage shelves.

Task lights in four sizes are available to correspond to cabinet or shelf width. They have 9' power cords in black, connected in the right rear corner. All models feature electronic ballast for longer bulb life and cooler operating temperature. Task lights with a fused plug to meet Chicago electrical code are also available.

Recommendation: Provide a separate circuit for task lights for proper long-term operation without RF interference to computers that may be in use.

LED TASK LIGHTS

No finish specification required. Attaches magnetically to underside of overhead storage, or attaches with provided screws.

Occupancy sensor attaches to a single or starter LED light and will automatically turn the light off after no motion is detected for 30 minutes.

Just like all the LED light models, the occupancy sensor features a soft-touch on/off switch. LED task lights have a lifetime of 50,000 hours and have a dimmer feature that allows the user to adjust the amount of light output.

Daisy chain options are available. To use the daisy chain application, must start with model HLED17A or HLED31A.

VOICE/DATA RECEPTACLES

Abound not only provides space for large volumes of voice and data cables, it also offers several means of mounting commercially available voice and data components.

Commercially available modular data faceplates can be mounted in vacant base receptacle openings or can be mounted in data/electrical port tiles above or below the worksurface.

Cable management troughs attach to worksurfaces with provided screws. The graphite metal troughs are designed with cord access cut outs. These cut outs give users access to inside the trough without having to detach it from the worksurface.

SYSTEMS ELECTRICAL SPECIFYING INFORMATION

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:

- **The Four-circuit system
(4-Hot/2-Neutral/2-Ground)**
 - 3 + 1 option
 - 2 + 2 option
- **The Three-circuit system
(3-Hot/3-Neutral/2-Ground)**

2. Determine location, quantity and circuit of duplexes.
3. Determine the appropriate choice and use of Isolated, Isolated/Dedicated and Separate Neutral circuits.
4. Specify appropriate Power Harnesses* and Pass-Thru Cables.*
5. Determine the location, quantity and type of Power In-feed needed.

* Select Power Harness models (HH8712XX) and Pass-Thru Cables (HH8711XX) with the last two digits being 1" (or 2") smaller than the associate panel width.

Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power in-feed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals.

Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Four-circuit, 3 + 1 Receptacle Option

The 3 + 1 option is the electrical standard used by The HON Company for many years in most of their systems products. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment.

Four-circuit, 2 + 2 Receptacle Option

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

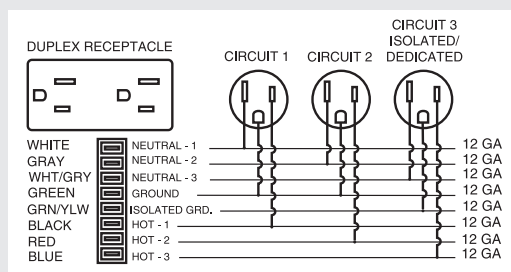

SYSTEMS ELECTRICAL SPECIFYING INFORMATION

Three-circuit, separate neutrals

The Three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/dedicated. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Two 8-wire, 20 AMP (15 AMP Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground (10 gauge neutral wires)	3 + 1	Common Circuit-1 HH873501	Common Circuit-2 (1) HH873502	Common Circuit-3 HH873503	Iso/Dedicated Circuit-4 HH873504
	2 + 2	Common Circuit-1 HH873501	Common Circuit-2 HH873502	Isolated Circuit-3 HH873506	Isolated Circuit-4 HH873504

(1) Circuit-2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system from being connected to components of another system.
- HON Cat. Nos. are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

Typical power usage by the most commonly specified office equipment.

Circuit Usage

Strategy 1

Circuits to Equipment

Assign specific uses for each of the circuits:

- For example, in a four-circuit system:
 - Circuit 1* — Calculators, fans, etc.
 - Circuit 2* — Task lights (could be wired to wall switch)
 - Circuit 3* — Computer monitors
 - Circuit 4* — CPUs

Strategy 2

Circuits to Workstations

Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

Placement of pedestals and lateral files may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

Abound® Lay-in Cable Capacity

The **top and base pathway** allow continuous voice and data lines to run through and between panels without interruption. Lay-in is provided for environments where systems furniture or cabling are subject to frequent change. All capacities are for Cat 6 cable with a 0.25" diameter.

Top pathway accepts up to 8 voice/data cables (.25" dia.).

Abound® Lay-In Cable Capacity

Variable height junctions accept up to 3 voice/data cables (.25" dia.).

Abound® Cable Capacity

Abound® base pathway accepts up to 56 voice/data cables (.25" dia.) (6.03 sq. in.) at 60% fill.

When electrical system shares base pathway, the cable capacity in Abound is reduced to 16 cables (2.25 sq. in.). Cable quantities listed are at 60% fill ratio.

Cable capacity of the power pole, in addition to electrical in-feed is 2.79 sq. in. on one side and 2.91 sq. in. on the other for a total capacity of 66 cables with power of .25" diameter.

Accelerate® Cable Capacity

Accelerate® base pathway accepts up to 56 voice/data cables (.25" dia.) (6.27 sq. in.) at 60% fill.

When the electrical system shares the base pathway, the cable capacity in Accelerate® is reduced to 12 cables (.25" dia.) (2.03 sq. in.) at 60% fill ratio.

Integrated Power Pole: 2" x 2" overall, 3.3"² interior accommodates a total of 25 cables with power of .25" diameter. Available in two heights: 6'6" or 13', the power pole connects via the universal connector and the overall height is the sum of the connector and the power pole. Constructed of aluminum with a powder coat paint finish in the specified color. Power pole requires a Ceiling In-Feed.

Ceiling In-Feeds: UL listed as raceways. This means the electrical components are completely shielded and meet any requirements for separation of electrical components and communications cables per Section 800-52 of the National Electrical Code.

SYSTEMS

Working with Worksurfaces and Supports

Worksurfaces are 1½" thick with particle-board core and with top surfaces finished in high-pressure laminate. Bottom surfaces are covered with a backer sheet.

Primary worksurfaces are available in 18", 24" and 30" depths. Nominal worksurface width is equal to nominal panel width. Other support hardware is ordered separately.

Corner worksurfaces with woodgrain laminate have grain direction diagonal to adjacent worksurfaces. One rear center support bracket is included. All other support hardware is ordered separately.

Wire management grommets are standard in most worksurfaces. Worksurfaces less than 48"W have one grommet centered on edge of worksurface. Rectangular worksurfaces over 42"W have two grommets. Peninsulas have one grommet. Corner Worksurfaces have one grommet (one on each back edge). D-Shaped worksurfaces and countertops do not have grommets.

Edgeband is available on laminate tops in standard colors (customer specified) to match or complement solid, patterned, or woodgrain laminates.

SYSTEMS

Working with Worksurfaces and Supports

Optional width worksurfaces are available for use with panel runs having a TEE or Extended Straight connection.

Worksurfaces can be configured at 29½" with end-panel supports and support legs, or at various heights on 1" increments using specific product configurations.

Worksurface support options include:

Open leg models
Support column
Flat brackets
Worksurface bracket kit
Cantilever bracket
Universal support leg
End-panel support
Freestanding pedestal

Other worksurface supports include:

Support columns
External channel supports
Support pedestals
Pedestals with panel-to-pedestal bracket
Desking freestanding shared leg

Support Guidelines:

- Unsupported panel runs greater than 72"W need floor support for improved stability.
- Worksurface bracket kit should be used to tie panels to worksurfaces for added stability.
- A panel run without a return needs a floor support.
- Unsupported worksurface spans of 60"W-84"W require an external worksurface support channel. It is recommended for 48"W-60"W.
- Cantilevers only to be used on worksurface runs 48"W or less.

Worksurface bracket kit allows one end of a worksurface to be supported by a return panel. Return panel width must be the same as the depth of the worksurface.

Flat brackets can be used to connect one worksurface perpendicular to another worksurface.

Cantilever brackets are left or right handed. They can be inserted into panel reveals in 1" vertical increments. One size is used for both 24" and 30"D worksurfaces. 18" Cantilever brackets are used for 18"D worksurfaces. Both left and right brackets are required in shared applications.

Important: Do not use cantilever brackets at the end of a worksurface where no 90° return panel is positioned.

- Do not use to support worksurfaces from which a hanging pedestal is suspended, or which a peninsula worksurface is attached.
- Do not use to support worksurfaces supported with permanent wall hanger kit.

Universal support legs are used to support worksurfaces only in a shared position.

End-panel supports are used in place of return panels at the end of worksurface runs. Straight worksurfaces adjacent to 120° connections must be supported by full end panels. End-panel supports are ordered for right- or left-handed application. Leveling glides provide 1½" of adjustment.

SYSTEMS

Working with Worksurfaces and Supports

Open Leg models are used to support various worksurface configurations and include attaching hardware and leveling glides.

D-Shaped, Peninsula and Jetty worksurfaces require support columns (ordered separately).

Countertops are available in straight or corner configurations.

Corner shelves are available in Edgeband. Attachment brackets are included.

- Unsupported worksurface spans of 60"W-84"W require an external worksurface support channel. It is recommended for 48"W-60"W.

OVERVIEW OF PERSONAL STORAGE AND PEDESTALS

LATERAL FILES

Advantages:

a) The most efficient means of conventional filing; b) Ideal for active filing in workstations, where higher volume capacity is necessary and retrieval is frequent

Considerations:

2-drawer steel lateral files fit under standard-height worksurfaces when using panel systems.

VERTICAL FILES

Advantages:

a) Economical; b) The most widely used filing method; c) requires minimal floor space

Considerations:

Vertical files are best suited for long-term storage, where retrieval is less frequent. For larger banks of files, lateral files are more space-efficient than vertical files.

BOOKCASES

Advantages:

a) These units are ideal for binders, reference books or other items; b) Available with your choice of fixed or movable shelves

Considerations:

If working with panel systems, it is more attractive to specify units that are lower than the panel height.

FILING TECHNIQUES

Type	Standing Files	Hanging Files
Advantages	Inexpensive. Uses existing file folders.	Easier organization and identification of the file folders. Files viewed from top. Remaining files hold their place when folders are removed. Easier to re-stock.
Requirements	Follower block or Dividers	Hangrails or high-drawer sides
Can be used in	<ul style="list-style-type: none"> Vertical files (front-to-back only) Lateral files (side-to-side only in drawers) Shelf files (side-to-side only) 	<ul style="list-style-type: none"> Vertical files (front-to-back only) Lateral files (front-to-back or side-to-side in drawers)

Specification guide for IQ Electrical on Huddle tables

Determine table width, the type of power access being used (3" grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feed which is needed for each run. For example, a 48"W table with two 3" power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.

4-TRAC ELECTRICAL SYSTEM

4-Trac Electrical System

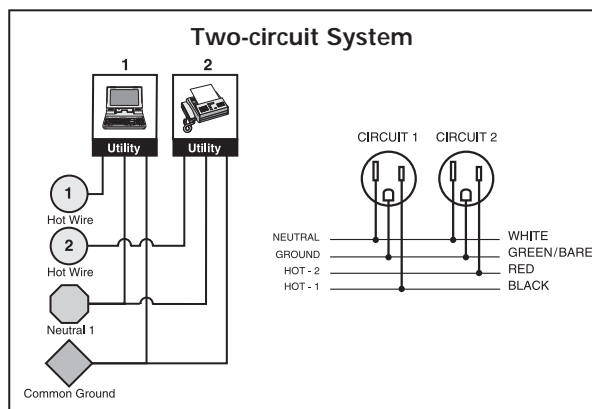

The 4-Trac Electrical System is a UL-recognized Manufactured Wiring System that seamlessly passes power from one worksurface to another. This low-profile non-sequential electrical system allows tables to be “daisy-chained” together in any desired order and allows users to reconfigure quickly due to simple connectable/disconnectable links.

- Meets requirements of UL 183 and National Electric Code Article 604
- 4-Wires, 2-circuits, 20 Amps each (Circuit 1 and Circuit 2 only)
- 13 Duplex Receptacles per circuit, 26, 15 Amp Duplex receptacle per power in-feed
- Electrical system attaches directly to underside of worksurface with included brackets
- Up to twelve tables can be linked together

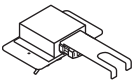

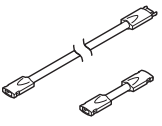

Steps for Electrical Specifications:

- Determine how many rows of tables are needed and order the following:
 - One HMAPLATE per row (or power in-feed)
 - One HMAcABLE per row (or power in-feed)
- Order one power harness per table in each row
 - For 1-6 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harnesses (ex. If powering six 24x60 tables order six sets of HMAPOWER60)
 - For 7-12 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harness for first six tables and Circuit 2 Power Harness for remaining tables (ex. If powering eight 24x60 tables, order six sets of HMAPOWER60 and two sets of HMAPOWER602)
- Order one set of ganging hardware per table (ex. HMAGANG)
- Determine which accessories are needed:
 - Power Hub model HGRMTAC — to access power at worksurface.
 - Data Grommet model HGRMTDATA — to access data at worksurface.
 - Wire Management strips model HBTMS — for vertical and horizontal wire management.

Specification guide for IQ Electrical on Motivate® tables

Determine table width, the type of power access being used (3" grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feed which is needed for each run. For example, a 48"W table with two 3" power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.

4-TRAC ELECTRICAL SYSTEM

4-Trac Electrical System

The 4-Trac Electrical System is a UL-recognized Manufactured Wiring System that seamlessly passes power from one worksurface to another. This low-profile non-sequential electrical system allows tables to be “daisy-chained” together in any desired order and allows users to reconfigure quickly due to simple connectable/disconnectable links.

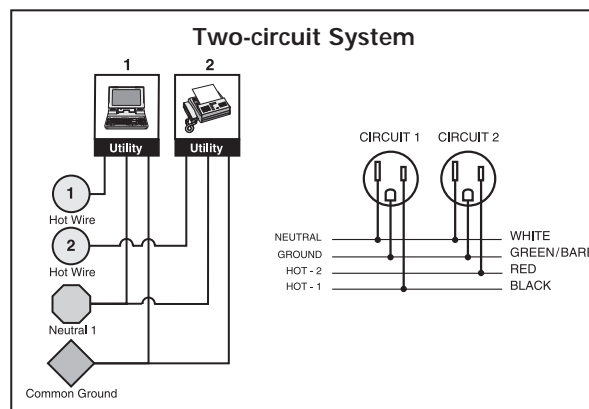

- Meets requirements of UL 183 and National Electric Code Article 604
- 4-Wires, 2-circuits, 20 Amps each (Circuit 1 and Circuit 2 only)
- 13 Duplex Receptacles per circuit, 26, 15 Amp Duplex receptacle per power in-feed
- Electrical system attaches directly to underside of worksurface with included brackets
- Up to twelve tables can be linked together

TABLES

Steps for Electrical Specifications:

- Determine how many rows of tables are needed and order the following:
 - One HMAPLATE per row (or power in-feed)
 - One HMAACABLE per row (or power in-feed)
- Order one power harness per table in each row
 - For 1-6 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harnesses (ex. If powering six 24x60 tables order six sets of HMAPOWER60)
 - For 7-12 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harness for first six tables and Circuit 2 Power Harness for remaining tables (ex. If powering eight 24x60 tables, order six sets of HMAPOWER60 and two sets of HMAPOWER602)
- Order one set of ganging hardware per table (ex. HMAGANG)
- Determine which accessories are needed:
 - Power Hub model HGRMTAC — to access power at worksurface.
 - Data Grommet model HGRMTDATA — to access data at worksurface.
 - Wire Management strips model HBTMS — for vertical and horizontal wire management.

PRESIDE® SPECIFYING INFORMATION

Specify Preside tables with two steps—select a top and select a base.

1. Select desired top size, shape, and edge profile.

Multi-piece Tops:

Multi-piece tops are made of 108", 120", 144" and 168" two-piece "starter-sections" in rectangle, boat, arc end, or racetrack shapes in 48" or 54" depths. For tables up to 20', models are preconfigured for you. If you need a table top longer than 20', add as many 72" adder sections as you need. The examples below illustrate preconfigured sizes as well as how starter section and adder section tops can be used to create tables in virtually any length. Please note that 2-piece tops, in woodgrain colors, will not have exact grain alignment in the center where the two halves meet, a reasonable match can be expected. For tops utilizing an adder section, there will not be a grain match for those pieces.

SMARTLINK® SPECIFYING INFORMATION

- Openings used by Accessory type:

Accessory	Openings used per Accessory
3"H tray	1
6"H tray	2
12"H tray	4
12"W shelf	1
30"W shelf	1

- Any combination of trays or shelves (of common width) can be used as long as the openings used equal the total number of openings available per column. The following illustrations show a variety of tray configuration options. Numbers shown in the opening refers to the tray size.

Full Height Storage (61 3/4"H) — 16 Openings, Single Column Examples:

Credenza Height Storage (30"H) — 7 Openings, Single Column Examples:

Using the information above, follow these guidelines to help determine accessory quantities.

- Determine the total number of available "openings" by width (12", 30") for each case type.
Example: HLSF52T-3F has 3 columns of 16 openings, total 48 openings
- On a PER COLUMN basis, determine the desired tray/shelf configurations total number of openings used so they equal the total openings available per column. Total accessory quantities per case then multiply by the total number of like cases.
Example: If each column will have 2-12" trays, 2-6" trays and 4-3" trays. The number of openings used for this column combination is 16. Assuming all three columns are the same total tray quantities for this case will be 12-3", 6-6" and 6-12".
- Once total tray and shelf quantities are determined, simply divide by the kit quantity to determine the number of kits required.
Example: 3" trays = $12 \div 7 = 2$ kits, 6" trays = $6 \div 4 = 2$ kits, 12" trays = $6 \div 2 = 3$ kits

Shelf Spacing

The clearance between shelves is approximately $3\frac{3}{8}"$ for every support rail that is not used between shelves. The following illustration shows the clearance between shelves when 0-4 support rail positions are not utilized.

SMARTLINK® SPECIFYING INFORMATION

WALL RAIL SYSTEM

The SmartLink® wall rail is a multi-layered, multi-functional system that can accommodate a variety of presentation boards and accessories. The multiple tracks allow boards to be easily positioned and changed to support today's interactive learning environments.

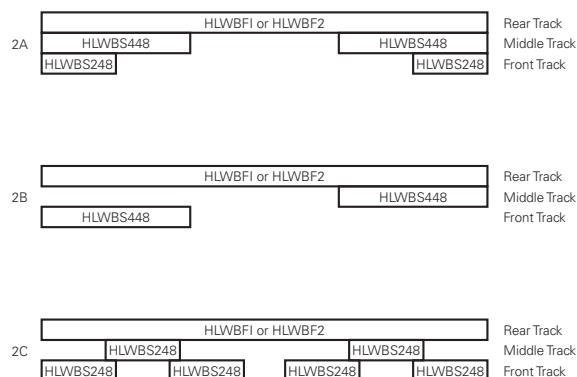

Planning Notes

- Installation of the wall rail system over existing white or chalkboards is not recommended.
- The rail and wall bracket provide three separate tracks for the Learning boards. The REAR or wall/bracket track is occupied by the fixed wall board. The MIDDLE and FRONT tracks are for sliding boards.
- To allow for greater utilization of the rear fixed board a maximum width of 96" of sliding boards on the middle or front track is recommended.

The illustration below shows the overall wall space requirements for the rail system and recommended mounting height for use in K-12 classroom applications.

Sliding boards are removable and reversible so a wide variety of layouts are possible. The following illustrations highlight a couple of the more common applications. Layouts 2A and 2B provide the greatest amount of board space and overall flexibility. When used with rail mounted worksurfaces, use 24"W boards on the front rail as shown in 2C in front of each worksurface to provide information specific to that work area. Boards could then be added to the middle rail for information/work to be shared between the stations.

Specification Notes

- Boards are specified individually.
- Hardware to mount to the wall brackets is not provided by HON and MUST BE SOURCED LOCALLY.
- Learning board only applications require two (2) HLWR-12 rails to be specified.
- REFER TO PRODUCT INSTALLATION INSTRUCTIONS FOR DETAILED INSTALLATION INFORMATION.

SPECIFICATION TIP: Consider available kneespace when specifying under desk storage Wire Book Box. Available kneespace will vary significantly given set desk height. Use the following example to calculate the available and usable kneespace.

EXAMPLE: HLDV-M3A Student Desk, HLDA-15 Wire Book Box

(user set desk height – top thickness – seat height = available kneespace)

(29"H – 1" thickness – 18" seat height = 10" available kneespace)

(available kneespace – book basket/box height = usable kneespace)

(10" available kneespace – 5" basket height = 5" usable kneespace)

NOTES: The cross-brace is installed to maximize kneespace but will not allow for book basket (HLDA-15) installation. The cross-brace orientation can be switched in the field to allow for book basket install.
