SCOPE

This contract is to furnish automotive and equipment lead acid batteries for vehicles and equipment owned and/or leased by various agencies and political subdivisions. It is the intent of this contract to provide a "discount from list" contract covering all current product applications and any new product applications as they become available.

General Information

All products furnished and delivered must meet the needs of the State of West Virginia.

- 1. The catalogs may be updated at renewal. If the Purchasing Division extends the offer to renew, and the catalog prices have significant increases, Purchasing may decline and re-bid the contract. Any price increase request must be substantiated by information from supplier to contract holder.
- 2. Orders shall be delivered within three (3) working days after orders are received. Spending unit must be advised in writing if orders will be delayed for any reason. Contractor shall carry an adequate stock to insure such delivery service for the duration of the contract.
- 3. All deliveries must be made during normal working hours for the delivery location. Any shipment of products requiring a material safety data sheet (MSDS) shall include a MSDS with the product.
- 4. The minimum order for prepaid shipping to one, in-state destination shall be \$200.00. For orders less than \$200.00, transportation charges (if any) will be invoiced as a separate charge with the original freight bill attached to the invoice. Agencies may make purchases that fall under the \$200.00 limit at a local source to avoid the delivery charges. Note: Stringing orders to circumvent purchasing regulations is expressly prohibited.
- 5. All products furnished must conform to the current edition of Battery Council International (BCI) guidelines on Cold Cranking Amps (CCA) and Reserve Capacity (RC). All batteries quoted on the bid sheet itself should meet or exceed minimum performance levels which are stated. The performance levels are based on the state's requirements and original equipments specifications. All material and workmanship used in the construction of batteries through this contract must be first class to industry practice. All

batteries furnished through this contract must be of a wet type and ready for service upon delivery. All batteries furnished through this contract must be manufactured within the United States and have on them manufacturers trade name, its part number, and its CCA rating.

- 6. Vendor shall not substitute any other brand of products from those awarded, nor sell any additional items under their contract not specifically covered herein, without prior written permission of the Purchasing Division.
- 7. All products must be highly efficient and effective in the performance of the tasks for which the product is intended to be used.
- 8. Vendor shall provide quarterly reports and annual summaries showing the quantities, dollar value and agencies (including political subdivisions) which have used this contract. Vendor shall also be able to provide report showing the top items purchased during the contract period. This report is mandatory and failure of the successful bidder to supply such reports may be grounds for cancellation of contract.
- Nonconforming products and materials shall be returned to the vendor at no expense to the State of West Virginia at any time during the life of this contract; and such shipment shall be credited or not invoiced if caught prior to billing.
- 10. If any battery becomes unserviceable (not merely discharged) due to defects in material or workmanship within 90 days of delivery, vendor will replace in full to the original purchaser. After the expiration of the 90 days warranty period the vendor agrees to replace to the original purchaser, on a pro-rata basis during its insured life, based on current suggested list price which is in effect at the time of the purchase. Warranty will not apply in the following cases: If the containers, cover, or terminals are broken; if battery has been opened, frozen, or damaged due to neglect or abuse including fire, wreckage, or explosion. Warranty product must be received within 30 days upon receipt of a returned battery.
- 11. The vendor is required to remove junk cores on a one for one basis, if required by any agency or political subdivision. Vendor must also show the amount of credit allowance per junk core removed. The D.O.H. may at its option have their junk cores removed by sealed bid.

Suggested Price List & Adjustment Costs Effective February,6,2006 Supersedes all previous data. Subject to change without notice.
