Exception to Bid Specifications

X9.4.7 Specified 88" Sweeping path. The Bobcat Broom designed for optimum performance with the Bobcat S220 has an 84" Sweeping path.

X9.4.10 Specified 84" Width. The Bobcat Brush Grapple designed for optimum performance with the Bobcat S220 is 82" wide.

X9.4.25 Vibratory Rollers – You specified a VR73 which is overall drum width of 73" the roller I quoted is a Bobcat Roller with an overall drum width of 73.

This notation is not an exception but a suggestion for an alternative. The water kit quoted here is the type specified at 50 gallon. These tanks are typically mounted on top of the operators compartment and might restrict visibility of the strobe light and cause problems for operators in low height conditions. As an alternative I can provide Bobcats water system which is 25 gallon but the tanks are removeable and are mounted on the sides of the machine near the rear (see attached literature). This system can be offered at the same bid price as the Woods 50 gallon system.

Proof of the in-service date must be provided for claims involving product that originally shipped more than twelve (12) months prior to the date of the claim.

Under no circumstances will this Warranty apply in the event that the product, in the good faith opinion of WOODS, has been subjected to improper operation, improper maintenance, misuse, inappropriate application or an accident. Examples of Common, Non-Covered Claims

1. The owner and operator are responsible for maintaining weld integrity on attachments subject to weld erosion from ongoing contact with soils, rocks, and other materials. Different materials have differing abrasive characteristics that will erode the structural welds of ground-engaging attachments at differing rates. Structural failures may occur as a result of excessive weld erosion. The owner and operator are responsible for maintaining necessary weld sizes and re-welding eroded welds with industry-approved procedures. Woods will not accept warranty claims for weld erosion or structural failures of the attachment as a result of weld erosion.
2. Attachments are used extensively in ground-engaging operations and, as a result, the teeth, tooth holders, cutting edges, bucket edges, ripper shanks, and other portions of the attachment are subject to abrasion and resulting wear. Woods will not accept warranty claims for wear of components or wear of areas of the attachment subject to ground-engaging wear.
3. The owner and operator are responsible for examining the attachment for any weld or structural cracking. Any such cracking caused by a defect in materials or workmanship by Woods will be covered under the Woods Warranty Policy. If the owner or operator continues to operate the attachment after weld cracking or structural cracking is visible or should have reasonably been visible, and as a result of continued operation, additional damage to the attachment results, Woods will not accept responsibility for the additional damage caused to other welds or to the attachment structure.
4. Materially modifying Woods attachments may result in premature failures of the attachment. Woods will not accept warranty claims on attachments that have been materially modified.
5. Misapplications of attachments may result in premature wear, breakage, or structural failures of the attachment. Woods will not accept warranty claims on attachments that have been misapplied. For instance, using a general purpose excavator bucket in an application requiring a heavy or severe duty bucket or using the excavator bucket as a "jack hammer" to break concrete are considered misapplications.
