WHEN RESPONDING TO RFQ, INSERT NAME AND ADDRESS IN SPACE ABOVE LABELED 'VENDOR'

**GENERAL TERMS & CONDITIONS
REQUEST FOR QUOTATION (RFQ) AND REQUEST FOR PROPOSAL (RFP)**

1. Awards will be made in the best interest of the State of West Virginia.
2. The State may accept or reject in part, or in whole, any bid.
3. All quotations are governed by the *West Virginia Code* and the *Legislative Rules* of the Purchasing Division.
4. Prior to any award, the apparent successful vendor must be properly registered with the Purchasing Division and have paid the required \$125.00 registration fee.
5. All services performed or goods delivered under State Purchase Orders/Contracts are to be continued for the term of the Purchase Order/Contract, contingent upon funds being appropriated by the Legislature or otherwise being made available. In the event funds are not appropriated or otherwise available for these services or goods, this Purchase Order/Contract becomes void and of no effect after June 30.
6. Payment may only be made after the delivery and acceptance of goods or services.
7. Interest may be paid for late payment in accordance with the *West Virginia Code*.
8. Vendor preference will be granted upon written request in accordance with the *West Virginia Code*.
9. The State of West Virginia is exempt from federal and state taxes and will not pay or reimburse such taxes.
10. The Director of Purchasing may cancel any Purchase Order/Contract upon 30 days written notice to the seller.
11. The laws of the State of West Virginia and the *Legislative Rules* of the Purchasing Division shall govern all rights and duties under the Contract, including without limitation the validity of this Purchase Order/Contract.
12. Any reference to automatic renewal is hereby deleted. The Contract may be renewed only upon mutual written agreement of the parties.
13. **BANKRUPTCY:** In the event the vendor/contractor files for bankruptcy protection, this contract is automatically null and void, and is terminated without further order.
14. **HIPAA Business Associate Addendum -** The West Virginia State Government HIPAA Business Associate Addendum (BAA), approved by the Attorney General, and available online at the Purchasing Division's web site (<http://www.state.wv.us/admin/purchase/vrc/hipaa.htm>) is hereby made part of the agreement. Provided that, the Agency meets the definition of a Covered Entity (45 CFR §160.103) and will be disclosing Protected Health Information (45 CFR §160.103) to the vendor.

INSTRUCTIONS TO BIDDERS

1. Use the quotation forms provided by the Purchasing Division.
2. **SPECIFICATIONS:** Items offered must be in compliance with the specifications. Any deviation from the specifications must be clearly indicated by the bidder. Alternates offered by the bidder as **EQUAL** to the specifications must be clearly defined. A bidder offering an alternate should attach complete specifications and literature to the bid. The Purchasing Division may waive minor deviations to specifications.
3. Complete all sections of the quotation form.
4. Unit prices shall prevail in cases of discrepancy.
5. All quotations are considered F.O.B. destination unless alternate shipping terms are clearly identified in the quotation.
6. **BID SUBMISSION:** All quotations must be delivered by the bidder to the office listed below prior to the date and time of the bid opening. Failure of the bidder to deliver the quotations on time will result in bid disqualifications.

 Rev. 1/29/02 PURCHASING CONTINUATION SHEET
 VENDOR:

SCOPE OF WORK

The successful bidder shall provide appropriate equipment, materials, labor and any technical services needed for the successful reclamation of DAUGHERTY COAL COMPANY, INC., Permit 65-77, and any disturbance associated with such operation. The General Performance Standards (GPS) shall apply to all items in Scope of Work.

Work necessary on this site will include the following items, but is not limited to these:

1. Upon mobilization to the site, which will be directed in a written Notice to Proceed, the access roads shall be developed in accordance with bid item #3 & 4. If, fuel and lubricants are to be stored on site, bid item # 2 shall be in place before fuel is delivered. The project sign is to be obtained and installed at the beginning of the project.
2. Storm water management in the form as described in bid item # 8 shall be installed (described locations).
3. Revegetation and soil improvements are required for areas designated at pre-bid meeting. Reclamation is to be according to the attached specifications, plans, and clarifying discussions at the Pre-Bid Conference.
4. Construct open limestone channels (OLCs).
5. Construct seep collectors.
6. Prepare and construct foundation and install aquafix and silo at one site.
7. Construct roadside riprap ditches.
8. Replace and install road culverts.
9. Dewater pond site #3.
10. Eliminate pond #3.
11. Upgrade existing access roads.
12. Construct new access road.
13. Any other site specific items required.

I, David B. McCoy, the undersigned, hereby certify¹ that this Reclamation Plan is correct and shows to the best of my knowledge and belief all the information required by the surface mining laws of the State of West Virginia. The source of information was the approved mining and reclamation plan contained in the forfeited surface mine permit, existing site conditions and information contained in the WV DEP, Inspection and Enforcement files.

David B. McCoy

 VENDOR:

BID ITEM TECHNICAL SPECIFICATIONS

1.0 MOBILIZATION/DEMOBILIZATION/PROJECT SIGN PROJECT SIGN

A project sign shall be obtained or manufactured and installed as indicated on the attached specifications and details. Payment for this sign shall be incidental to the mobilization item. No separate payment will be made.

MOBILIZATION

This work shall consist of the performance of construction preparatory operations, including the movement of personnel, equipment and other facilities to the project site necessary to begin work on a substantial phase of the contract.

DEMOBILIZATION

Prior to demobilization, an inspection shall be conducted by the Department of Environmental Protection and the contractor to insure compliance with contract performance. Once compliance is ascertained, demobilization activities can be initiated and completed. Demobilization shall be totally completed before the invoice for payment shall be processed.

PAYMENT

The lump sum bid for this item shall not exceed 5% of the total bid for this permit. Payment shall be made in two 50% amounts, one upon completion of the mobilization and project sign items and the second payment at the completion of demobilization. No deduction shall be made nor shall any increase be made in the lump sum item amount, regardless of decreases or increases in the final total contract amount or any other reason.

2.0 SPILL CONTAINMENT AREA (S.C.A.)

Spill containment measures shall be used for fuel and lubricant storage areas. All containers, barrels, buckets, cans, etc., are to be legally disposed of off site. Used lubricants are to be disposed of according to state law to minimize pollution to the local surface and ground water supplies. Spills are the responsibility of the contractor and need immediate clean up and maintained at no expense to the State. This S.C.A. shall be constructed in accordance with the typical drawing specification (See Attachment). Alternate containment measures will be considered for approval by the Program Manager if acceptable results can be shown. Fuel tanks manufactured with secondary containment are desirable. Minimum secondary containment is 110 percent. (Bid limited to \$1,000.00 maximum)

3.0 ACCESS ROAD UPGRADE

The contractor shall maintain the existing access road (~2360 LF) during the reclamation process to provide access on a well drained surface. This road is currently used as an access road for the adjacent landowner. The access road shall be maintained to drain and provide a road surface free of excessive mud and standing waters at all times while work is in progress. Upon completion of all reclamation activities, the road shall be graded, as needed, in areas designated by the DEP on-site representative, and a final layer of 1½ inch crusher run limestone shall be placed in a three (3) inch minimum layer on the existing road. The completed road shall have a minimum width of twelve (12) feet and the surface shall be crowned and sloped to the both sides a minimum of 24-horizontal to 1 vertical. A roadside drainage ditch shall be established and/or maintained along the hillside of the road, and shall be free draining to any culverts crossing under the road. The ditch shall be vegetated and constructed as indicated in the New Access Road drawing. Dust-control measures may be necessary if hauling creates airborne material. Payment shall be for completed length of road upgrade.

BUYER CB-23	PAGE 016	REQ. OR PO NO. DEP13568
SPENDING UNIT WEST VIRGINIA DEPARTMENT OF ENVIRONMENTAL PROTECTION/SPECIAL RECLAMATION		

WV-36a STATE OF WEST VIRGINIA
 Rev. 1/29/02 PURCHASING CONTINUATION SHEET
 VENDOR:

4.0 CONSTRUCT NEW ACCESS ROAD

This required road will be approximately 1115 LF. Accompanying plans show the details of the construction of the road. The contractor shall provide all services, materials, construction layout, equipment, or other materials necessary to execute the work. Payment shall be for completed length of road.

SITE PREPARATION

Any areas with soft unsuitable foundation materials shall be undercut to remove this material. The material removed shall be disposed of within the construction area at a site agreed to between the contractor and the DEP on site representative. Construction stake out shall be completed as necessary to complete that phase of the work being undertaken. Payment for the construction stakeout is to be included in the road price. No separate payment will be made for construction stake out.

ROAD CONSTRUCTION

Suitable foundation material shall then be placed in compacted layers not to exceed six (6) inches in thickness to obtain the desired grade and alignment. Compaction equipment is to be approved by DEP on site representative. Filter Fabric (Tyvar 3401, Mirafi 500X, or equivalent) shall be placed over the completed foundation and covered with a six (6) inch minimum layer of No. 1 limestone (3 1/2 to 1 1/2 inches). The No. 1 stone shall then be covered with 1 1/2 inch crusher run limestone so that the surface is choked off and a two (2) inch minimum layer remains on top. The completed road shall have a minimum width of twelve (12) feet and the surface shall be crowned and sloped to both sides a minimum of 24-horizontal to 1 vertical. Any fill sections, if used, shall not impound water. Payment shall be made at the unit price for the measured length completed. The total length of roadside ditch shall be along the entire length of the newly constructed road. A roadside drainage ditch shall be established along the hillside of the road, and shall be free draining to any culverts crossing under the road. The ditch shall be vegetated and constructed as indicated in the New Access Road drawing. The roadside ditch will drain in two directions. The most appropriate drainage divide will be determined during construction activities.

Payment shall be for completed length of road, and shall include a truck turn-around area paid as length of road (204 LF). The turn-around area shall be approximately twenty four (24) feet wide and ninety (90) feet in length with twelve (12) feet wide corners totaling 2448 sq.ft., see Truck Turn-around Detail drawing. The turn-around area location shall be designated by the DEP on-site representative.

5.0 ROAD ACCESS GATES

All gate hardware shall be hot-dipped galvanized as per ASTM A153 specifications for zinc coating (hot dip) on iron and steel hardware. The pipe gates and posts shall be painted. The preferred color is green. Gate posts shall be a minimum of four (4) inch diameter and seven (7) feet long. Post holes shall be a minimum of four (4) ft. deep and twelve (12) inch in diameter or square. Sides shall be nearly vertical. Posts shall be embedded in concrete, and filled with concrete. At least twelve (12) inches of concrete shall be placed below the post. Concrete shall have a minimum of 28-day test strength of 4000 psi. All pipe on the gates shall have the ends welded closed.

Posts shall be braced to support the weight of the gate. Conventional bracing with use of wire cable and adjustable turnbuckles shall be used. The support posts shall be set to the same specifications as the main gate posts, and shall be a minimum of one (1) foot above grade. Pipe hinge pins shall be made from 1 1/2" I.D. steel line pipe (pipe O.D.= 1 7/8"). Pipe gates shall be constructed with 2 inch I.D. diameter steel line pipe with a wall thickness of 0.188" (pipe O.D.= 2 3/8"). Two 9 ft. pipe gates shall be installed at the site to provide an opening of 18 feet. Provide a lockable latch, which includes a two-lock mechanism and protection for both locks. The lock box shall be welded to one side of the gate pipe. Grease fittings shall be installed on the four hinge points. See the Pipe Gate Detail drawing. All hardware and/or accessories necessary for installation of gates shall be part of this lump sum bid price. An equivalent type of lock guard and hinge detail may be accepted upon approval of the DEP Engineer or on-site representative.

Gates will be installed near the intersection of the access road and the county road. Additional on-site

BUYER CB-23	PAGE 017	REQ. OR PO NO. DEP13568
SPENDING UNIT WEST VIRGINIA DEPARTMENT OF ENVIRONMENTAL PROTECTION/SPECIAL RECLAMATION		

WV-36a STATE OF WEST VIRGINIA
 Rev. 1/29/02 PURCHASING CONTINUATION SHEET
 VENDOR:

existing rock materials shall be placed on each side of gates to protect from bypassing around the gates. Placement of large rock material shall be incidental to this bid item. Payment shall be made at the completion of installation and acceptance by the DEP.

6.0 30-INCH CULVERT

The forty (40) feet length of culverts shall be HDPE, dual wall smooth interior corrugated twenty (20) foot joint type. The pipe joints shall be silt-tight and the pipe shall meet ASTM D3350 manufacturing standards.

This culvert shall be placed in the dip of the road, replacing a smaller concrete culvert, and the pipe shall be installed perpendicular to the road with a 2~3% drainage slope.

Culvert inlet end shall be protected by a headwall of stable non-erodible material and the slope at the outlet shall be protected with an apron of rock riprap, energy dissipater or other designated material. The culvert shall be installed in a trench excavated in solid undisturbed ground or formed by compacted earth.

The culvert shall be imbedded in a formed trench to a depth no less than 1/10 the outside diameter of the pipe. Selected backfill material shall be placed around the culvert in four (4) inch layers and thoroughly compacted by means of hand tamping or manually directed power tampers or plate vibrators.

Culvert shall be covered with a minimum of twelve (12) inches or one-half the culvert diameter whichever is greater. Payment shall be for completed length of culverts.

7.0 ROCK LINED PLUNGE POOL

This compacted earth dike shall be constructed below the outflow of the 30 inch road culvert in bid item #5.0. The constructed earth semi-circular dike shall have a top width of five (5) feet. Excess materials from all three seep collectors and from the new access road may be used for construction of the earth embankment. The inner slopes of the constructed earth embankment and the exit channels shall be lined with filter fabric and riprap to prevent soil erosion. See the attached drawing for specific information on Plunge Pool Channels.

Lump sum payment shall be for construction of a compacted earth plunge pool on the exit end of the culvert, lined with limestone rock riprap exit channels, set to specific elevations as specified by the DEP onsite representative. The filter fabric, and limestone riprap used to line the exit channel and the culvert outlet will be incidental to this lump sum bid item.

8.0 12-INCH CULVERT

Culvert shall be HDPE, dual wall smooth interior corrugated twenty (20) foot joint type. The pipe joints shall be silt-tight and the pipe shall meet ASTM D3350 manufacturing standards.

Culverts installed in sloped areas of the access road shall cross the road at a 30 degree angle downgrade with a minimum grade of three percent (3%) from inlet to outlet. Where culverts are placed in the dip of the road the pipe shall be installed perpendicular to the road.

Culvert inlet end shall be protected by a headwall of stable non-erodible material and the slope at the outlet shall be protected with an apron of rock riprap, energy dissipater or other designated material. The culvert shall be installed in a trench excavated in solid undisturbed ground or formed by compacted earth.

The culvert shall be imbedded in a formed trench to a depth no less than 1/10 the outside diameter of the pipe. Selected backfill material shall be placed around the culvert in four (4) inch layers and thoroughly compacted by means of hand tamping or manually directed power tampers or plate vibrators.

Culvert shall be covered with a minimum of twelve (12) inches or one-half the culvert diameter whichever is greater. Three culverts shall be installed along the wooded area of the "Road Access Upgrade" portion of the road. Three culverts shall be installed on the New Access road. Three 40 ft culverts shall be installed near the three existing ponds. The specific culvert locations shall be designated by the DEP on-site representative.

Payment shall be for completed length of culverts.

WV-36a STATE OF WEST VIRGINIA
 Rev. 1/29/02 PURCHASING CONTINUATION SHEET
 VENDOR:

9.0 REVEGETATION

All bare areas as discussed at the pre-bid meeting, and areas affected by construction activities shall be revegetated.

The actual seeding date, within the work performance period, shall be at the discretion of the contractor, but a permanent vegetative cover must be established. Verification of materials used shall be required for payment. Seed bed preparation, unless otherwise approved, shall be conducted by industrial disks or tracking with heavy equipment with cleat marks across slope and parallel to the final contours. The surface shall be tracked, track to track. Seeding shall commence after seedbed preparation on a loose and uncompacted soil and with the approval of the Department of Environmental Protection. Contractor shall provide equipment as necessary to secure approval of the seedbed. Revegetation activities shall be carried out in a continuous, concurrent, timely and uniform manner. Failure to do this may result in nonpayment for portions of or the entire Revegetation item. Hydroseeding or broadcast seeding with the approved species is acceptable. The application rate may be increased but the ratio is to remain constant, but no additional monetary compensation will be awarded. Areas outside the limits of construction, disturbed by the contractor, shall be revegetated by the contractor at no expense to DEP. Water utilized for hydroseeding shall be free of injurious or other toxic substances harmful to plant life. The source of water is subject to the approval of the DEP Specialist. It shall be the vendor's responsibility to repeat the procedures under REVEGETATION until a permanent vegetation is established. The acreage quantities in this contract are for bidding purposes only.

A warranty period of one (1) year shall commence upon completion and payment of the revegetation item of the contract. No payment will be made for additional seeding necessary to comply with warranty requirements. The warranty period will be extended for one (1) year from the date of the last augmented seeding done by the contractor. The performance bond and labor and materials bond shall remain in effect throughout the warranty period. The Standards for Evaluating Vegetative Cover as presented in Title 38, CSR2, Section 9 of the West Virginia Surface Mining Reclamation Regulations will apply.

Equipment for the retracking/scarification to eliminate rills and gullies shall be mobilized and utilized to produce slopes consistent with the regrading and topsoiling bid item prior to warranty reseeding. No additional payment will be made by DEP for this warranty work.

9.1 AGRICULTURAL LIME

Use of blends and low-grade agricultural liming materials shall require prior approval. Lime shall be spread as soon as possible after delivery to site. Lime shall be applied evenly and uniformly distributed over the treated area. Lime shall be thoroughly mixed into the soil material. Lime subjected to adverse conditions before spreading will be deemed unacceptable. Failure to complete this phase shall result in nonpayment of this bid item.

Lime Applied at 10 ton/acre.

9.2 FERTILIZER

Fertilizer rates given for REVEGETATION are for 1000 lbs. of 10-20-20 per acre. These rates are minimum and for bidding purposes.

Fertilizer shall be applied evenly and uniformly distributed over the treated area. Common complete fertilizers that meet the minimum standards are acceptable.

9.3 MULCH

Acceptable mulch for this project is wood fiber, hay, or straw.

Mulch: Wood Fiber @ 1.0 ton/Acre

Hay or straw mulch may be substituted at a rate of 2 tons/Acre.

BUYER CB-23	PAGE 019	REQ. OR PO NO. DEP13568
SPENDING UNIT WEST VIRGINIA DEPARTMENT OF ENVIRONMENTAL PROTECTION/SPECIAL RECLAMATION		

WV-36a STATE OF WEST VIRGINIA
 Rev. 1/29/02 PURCHASING CONTINUATION SHEET
 VENDOR:

9.4 VEGETATIVE SPECIES

Seeding rate required is for pure live seed (pls) in pounds per acre. The use of annuals or cover crops will not be considered for vegetative success.

NORTH MIX

<u>VEGETATIVE SPECIES</u> ¹	<u>RATE/ACRE</u> ¹
Orchard Grass	@ 15 lbs/acre
Birdsfoot Trefoil ²	@ 15 lbs/acre
Yellow Sweet Clover	@ 5 lbs/acre
Red Clover	@ 10 lbs/acre
Ky 31 Fescue	@ 15 lbs/acre
Foxtail Millet ³	@ 12 lbs/acre
Wheat or Rye ⁴	@ 50 lbs/acre

1. Seeding rate suggested is for pure live seed (pls) in pounds per acre.
2. Herbaceous legumes must be treated with the appropriate bacterium before seeding.
3. Spring mix.
4. Fall mix.

10.0 HAYBALE DIKE

Disturbed areas that have storm water runoff and does not pass through a sediment control structure shall utilize the following method to manage storm water runoff: Max. Bid of \$5.00/LF of Hay Bale Dike.

1. All bales shall be placed on the contour.
2. Bales shall be placed in a row with ends tightly abutting the adjacent bales.
3. Bales shall be securely anchored in place by stakes or rebar driven through the bales. Rebar shall be removed at the direction of the DEP. The first stake in each bale shall be driven toward the previously laid bale to force the bales together. Construction of sumps may become necessary to supplement the hay bale dikes.

Continuous sediment control structures shall be placed in areas from the 30 inch culvert to the treatment unit, beside the new access road construction, and at all areas below culverts or ditch outlets during construction. These specific locations for sediment control are not to limited to any other locations deemed necessary by the contractor. Payment shall be for completed length of hay bales installed.

11.0 SEEP COLLECTOR #1

Provide all materials and construct seep collector #1 according to the attached typical plans, cross-section, specifications, and as discussed at the Pre-Bid Showing. The twelve-inch (12") SDR35 PVC pipe shall be perforated within the seep collector according to the detail drawing and specifications. The collector shall daylight as a solid pipe directly into OLC #1 with an animal guard on the end. The four-inch (4") HDPE water intake line, used to drive the unit, shall be perforated within the seep collector, but will exit as a solid pipe, leading directly to the treatment building. The four-inch HDPE line shall be converted to SDR35 PVC perforated type inside the seep collector, and shall extend above ground as a cleanout with an end cap. This pipe shall be buried with a minimum of two and one-

VENDOR:

half (2.5') feet of cover to prevent the line from freezing. The four-inch (4") HDPE is not included in this bid item but is included as a separate bid item (#~~250~~). Payment for seep conveyance drain shall be by the linear foot installed, and shall include any perforated pipe, fittings, and cleanouts within the seep collector. Any solid pipe required to daylight the water to ditches shall be a separate bid item (#~~250~~).

12.0 SEEP COLLECTOR #2

Provide all materials and construct seep collector #2 according to the attached typical plans, cross-section, specifications, and as discussed at the Pre-Bid Showing. The six-inch (6") SDR35 PVC shall be perforated within the seep collector according to the seep collector #2 & #3 detail drawing and shall daylight as a solid pipe directly into OLC #1 with an animal guard on the end. The length of six (6") inch solid pipe exiting the seep collector is included under bid item (#~~250~~). Payment for seep collector drain shall be by the linear foot installed.

13.0 SEEP COLLECTOR #3

Provide all materials and construct seep collector #3 according to the attached typical plans, cross-section, specifications, and as discussed at the Pre-Bid Showing. The six-inch (6") SDR35 PVC pipe shall be perforated within the seep collector according to the seep collector #2 & #3 detail drawing and shall daylight as a solid pipe directly into OLC #2 with an animal guard on the end. The solid six-inch (6") PVC is not included in this bid item but is included as a separate bid item (#~~250~~). The two-inch (2") SDR35 PVC water intake line, used to drive the unit, shall be perforated within the seep collector, but will exit as a solid pipe, leading directly to the treatment building. Also, the two-inch (2") PVC line shall extend above ground as a cleanout with an end cap. Any elbow fittings shall be the long sweep type. The two-inch pipe shall be buried with a minimum of two and one-half (2.5') feet of cover to prevent the line from freezing. The solid two-inch (2") SDR35 PVC is not included in this bid item but is included as a separate bid item (#~~250~~). Payment for seep conveyance drain shall be by the linear foot installed, and shall include any perforated pipe, fittings, and cleanouts within the seep collector.

14.0 2 INCH WATER INTAKE LINE TO DRIVE UNIT

One (1) PVC 2 inch water line (gasket joint type) shall be provided to connect seep collector #3 (see details) to the control valve on the dispensing unit. The line shall be buried with a minimum of two and one-half (2.5') feet of cover to avoid freezing. Any elbow fittings shall be long sweep type. Approximately 220 linear feet will be required. Payment shall be made for the actual measured length of pipe installed.

15.0 4 INCH WATER INTAKE LINE TO DRIVE UNIT

One (1) HDPE (DR 15.5 or 17) 4 inch diameter water line shall be provided to connect seep collector #1 (see details) to the control valve on the dispensing unit. The line shall be buried with a minimum of two and one-half (2.5') feet of cover to avoid freezing. Approximately 1240 linear feet will be required. The line shall have three (3) wye cleanouts with threaded caps, evenly spaced along the length of the line. The line shall be reduced to a 2 inch diameter PVC line within five (5) feet of the treatment unit. Also, a "true union" ball type shut-off valve shall be located in this 5 ft. section of line. Payment shall be made for the actual measured length of pipe installed. Cleanouts, molded elbows, caps, reducer fittings, and valves shall be incidental to this bid item.

16.0 OPEN LIMESTONE CHANNEL #1

Provide all materials, excavate and construct the open limestone channel as indicated on the attached typical plans, cross-section, specifications, and as discussed at the Pre-Bid Showing (See riprap specifications). Ditches shall be free draining upon completion of construction. Length of ditch may be adjusted to meet on site conditions. Payment shall be made by the linear foot.

17.0 OPEN LIMESTONE CHANNEL #2

Provide all materials, excavate and construct the open limestone channel as indicated on the attached typical

BUYER CB-23	PAGE 021	REQ. OR PO NO. DEP13568
SPENDING UNIT WEST VIRGINIA DEPARTMENT OF ENVIRONMENTAL PROTECTION/SPECIAL RECLAMATION		

WV-36a STATE OF WEST VIRGINIA
Rev. 1/29/02 PURCHASING CONTINUATION SHEET
VENDOR:

plans, cross-section, specifications, and as discussed at the Pre-Bid Showing (See riprap specifications). Ditches shall be free draining upon completion of construction. Length of ditch may be adjusted to meet on site conditions. Payment shall be made by the linear foot.

18.0 ROADSIDE RIPRAP DITCH A

Provide all materials, excavate and construct the open limestone channel as indicated on the attached typical plans, cross-section, specifications, and as discussed at the Pre-Bid Showing (See riprap specifications). Ditches shall be free draining upon completion of construction. Length of ditch may be adjusted to meet on site conditions. Payment shall be made by the linear foot.

19.0 ROADSIDE RIPRAP DITCH B

Provide all materials, excavate and construct the open limestone channel as indicated on the attached typical plans, cross-section, specifications, and as discussed at the Pre-Bid Showing (See riprap specifications). Ditches shall be free draining upon completion of construction. Length of ditch may be adjusted to meet on site conditions. Payment shall be made by the linear foot.

20.0 POND #3 DEWATERING

The pond water is to be treated to a pH between 6 and 9 and to have suspended solids which do not exceed 35 mg/liter before discharge. Discharge rates must be controlled (limited) so that stream bed erosion, flooding, and any other off-site impacts are prevented. Monitoring of the receiving stream shall be done at all times this work is in progress.

After the pond has been dewatered, construction of open channel seep collectors will be required to collect any excess ground water and channel away from the pond site. The riprap channels will be paid under bid item (#170).

Construction of a settling sump may be necessary for this water before discharge to the receiving stream.

Provide all chemicals, equipment, testing, personnel, or other items needed to complete this item. Lump sum payment shall be made upon completion of the dewatering of the pond.

21.0 POND #3 ELIMINATION

Once pond is dewatered, all sludge, mud, and sediment or undesirable material down to original ground is to be removed. The method of elimination can be chosen by the contractor as long as acceptable results are obtained. Material removed from the pond shall be disposed of at a site agreed to with the on-site DEP representative. Once dewatered, the disposal site shall be covered with material suitable for vegetative growth. The area shall then be revegetated.

Fill material is available adjacent to the pond site, and may be used with the elimination of the pond berm to fill the pond site.

Payment shall be made in two installments. One payment shall be at the completion of removal of material from the existing pond, and the second at the completion of regrading of the disposal area, and upon completion of backfill of pond site.

22.0 INCIDENTAL ¾ CRUSHER RUN STONE FOR EXISTING ROADS

During construction of seep collectors, culvert replacements, and roadway ditch improvements, the landowner's existing graveled roadways may be damaged and must be repaired. After any necessary re-compaction and re-grading work on roadways performed by the contractor, a three (3) inch layer of ¾ inch crusher run stone shall be placed as needed. This stone shall be graded and tracked in with a dozer or other equipment to achieve a compacted base for the final top layer of #8 (1/4 to 3/8 inch) graded limestone (separate bid item).

Payment shall be paid per ton of stone applied by weight ticket and will be made at completion of all work

VENDOR:

and acceptance by DEP.

23.0 INCIDENTAL #8 STONE FOR EXISTING ROADS

During construction of seep collectors, culvert replacements, and roadway ditch improvements, the landowner's existing graveled roadways may be damaged and must be repaired. After any necessary re-compaction and re-grading work on roadways has been completed and a two (2) inch layer of ¾ inch crusher run stone has been applied, a three (3) inch layer of #8 stone shall be placed as the final layer. This stone shall be graded and tracked in with a dozer or other equipment to achieve a uniform appearance for the final top layer.

Payment shall be paid per ton of stone applied by weight ticket and will be made at completion of all work and acceptance by DEP.

24.0 6 INCH PVC SOLID PIPE

PVC (SDR-35) six (6) inch line (gasket joint type) shall be provided. Installation is to be according to the manufacturer's recommendations. Provide all materials, equipment, excavation and personnel necessary for installation. The pipe shall be buried with a minimum of two and one-half (2.5') feet of cover to avoid freezing. Payment shall be made for the actual measured length of pipe installed.

25.0 12 INCH PVC SOLID PIPE

PVC (SDR-35) twelve (12) inch line (gasket joint type) shall be provided. Installation is to be according to the manufacturer's recommendations. Provide all materials, equipment, excavation and personnel necessary for installation. The pipe shall be buried with a minimum of two and one-half (2.5') feet of cover to avoid freezing. Payment shall be made for the actual measured length of pipe installed.

26.0 SUB-FOUNDATION PREPARATION

The sub-foundation shall be undercut to remove all fill (unconsolidated material) down to a competent foundation as determined by the DEP on site representative. The sub-foundation shall be constructed in substantial conformity to the plans and/or specifications. The DEP on site representative shall be present during this work.

The sub-foundation material shall be suitable material free of particles larger than three inches in diameter and consist of granular material conforming to WVDOH specification 716.1.1.2. A bearing capacity of approximately 6 tons per square ft should be obtained.

Compaction shall be done with a suitable compactor to obtain approximately 98% Standard Proctor Density. Layers shall be six (6) inches or less in thickness before compaction is initiated. Moisture content of the fill material shall be controlled to obtain maximum compaction.

Payment shall be made for each one (1) foot depth of undercut required.

27.0 FOUNDATION

The foundation shall be Type II Sulfate Resistant Concrete and shall conform to the dimensions and shape shown in the detail drawings and specifications. Include all reinforcing bars with supports and anchor bolts as necessary. Provide all forms, personnel and equipment required for the placement, finishing, and curing of the concrete. The concrete shall be consolidated with use of an internal spud vibrator to liquefy the concrete so that entrapped air and water can come to the surface. Adverse weather conditions shall be avoided during completion of this item. WVDOH specifications for concrete shall apply to this item. Concrete shall cure for a minimum of 5 to 7 days before the silo may be erected in place. Excavation for the foundation is incidental to this item with no separate payment being made.

The channel in the foundation is to receive water from seep collector #1 by means of open limestone channel #2 (see bid item #15). After treatment with the reagent, the water will exit the foundation into open limestone channel #2(see bid item #16). This item shall be paid for as a lump sum item after completion of the foundation and acceptance by the DEP.

 Rev. 1/29/02 PURCHASING CONTINUATION SHEET
 VENDOR:

28.0 CRANE

This shall include furnishing a crane of sufficient capacity to unload and erect the silo structure on its foundation and to install the reagent dispensing unit. The silo is estimated to weigh less than 10 ton.

Payment for this work shall be made based on the lump sum contract and paid upon final acceptance by DEP.

29.0 DOSING UNIT AND SILO

This item includes all work necessary to purchase, install and initiate operation of an Aquafix water powered dosing unit (Unit type MSS-SM-OA-50). This item shall be subcontracted to:

Aqua-Fix Water Treatment Systems.
 Michael Jenkins
 301 Maple Lane
 Kingwood, WV 26537 Telephone: (304) 329-1056.

Structural elements shall be warranted by the manufacturer to withstand normal static and dynamic loads as commonly accepted by industry. Changes to these specifications shall be made only with the written approval of the Program Manager.

A 50 ton steel silo to store the reagent is required. The silo shall be equipped with an interior ladder, an exterior ladder with a protective cage and a lockable steel safety door, a steel safety fence around the top of the silo, and a filler pipe to extend to the unloading port. A steel cone shall be placed at the base of the silo to direct the discharge of the reagent through a steel flange, which is sized and located to accommodate the reagent dispensing unit. Silo shall include a vent pipe to prevent pressure buildup during filling. An emergency pop off valve shall be included in case the vent pipe malfunctions. Pneumatic filling of the silo is to be utilized.

An insulated steel security enclosure attached to the silo structure support system to protect the dosing unit from vandalism and the weather is required. The wall thickness of the silo enclosure shall be equivalent to the steel used in the construction of the silo. The enclosure shall be equipped with a hinged, lockable steel door of sufficient size to facilitate removal of the dosing unit for repair and/or future replacement. The enclosed structure shall be fitted with a propane heating unit with a capacity to prevent freezing of the dosing unit during the winter. The heater will include all needed piping, regulator and fittings to connect to the tank. A 100 gallon tank shall be included, and will need to be filled one time.

Painting of the silo and steel security enclosure shall be done in accordance with WVDOH Specification 711. Preferred colors are green and/or tan.

The dosing unit, silo, and filler pipe shall be designed to facilitate the use of Calcium Oxide (CaO) during the service life of the unit. A water line will be installed to power the water wheel. This portion of the work shall include the initial filling and the start up of the unit, at the direction of the Program Manager, to confirm that all units function as intended. Any repairs and/or adjustments required to the unloading system and dosing unit to allow them to function as designed shall be performed at no cost to the DEP. The system shall be operated successfully for a one-week period before acceptance by the DEP. All settling ponds and riprap ditches leading to them must be completed before testing is initiated. The Calcium Oxide shall be 50 tons in amount and delivered as scheduled by the on site DEP representative.

Payment for all of the work specified above shall be made based on the lump sum contract price.

BID PREPARATION INFORMATION

HISTORICAL INFORMATION

Prospective bidders may review files at the West Virginia Department of Environmental Protection, Charleston, WV office, or the Regional West Virginia Department of Environmental Protection Office at 105 South Railroad St., Philippi, WV 26416. These files may contain additional information not included in the contract documents including, but not limited to, permit applications, permits, inspection reports, environmental documents, permit violation history, geological and geotechnical information, probable hydrologic consequences, maps, modifications, NPDES information and other related data. Copies may be obtained upon request and payment of copying fees.

EXAMINATION OF BID PACKAGE AND SITE OF WORK

The bidder is required to examine, carefully, the bid package (plans, specifications, supplemental specifications, contract forms, etc.) and the site of the work contemplated. The submission of a bid shall be considered prima facie evidence that the bidder has made such examination and has judged for and satisfied themselves as to the character, quantity, and quality of work to be performed and the materials required to be furnished under the contract.

PREBID CONFERENCE

Only the prospective bidders on the sign-in sheet in attendance for the entire Pre-Bid Conference will be eligible to submit bids for consideration of this project.

VIDEO

The information given at the pre-bid showing by the project contact person or the assigned person shall be documented on video tape and shall be an integral part of this contract's requirements, but will not supersede the written contract.

INTENT OF CONTRACT

The intent of the contract is for the reclamation/restoration of forfeited mine lands as required by West Virginia Department of Environmental Protection. The contractor is to provide for the construction and completion in every detail of the work described. The Contractor shall furnish all labor, materials, equipment, tools, transportation, and supplies required to complete the work in accordance with the Plans, Specifications, and terms of the Contract.

Should any misunderstanding arise as to the intent or meaning of the Contract, or any discrepancy appear, the decision of the Director of Division of Land Restoration shall be final.

GENERAL PERFORMANCE STANDARDS

INTRODUCTION

The performance standards and non-compliance penalties which govern special reclamation-bond forfeiture projects are in Chapter 22A, Article 3, of the Code of West Virginia and subsequent rules and regulations. The following performance standards are of a general nature and do not represent all the performance standards applicable to a special reclamation-bond forfeiture project. However, some or all of these standards will pertain to each project.

LIFE OF CONTRACT

The purchase order contract becomes effective on the starting date as specified in the notice to proceed as issued by the Department of Environmental Protection. This contract extends for a period of one (1) year and may be renewed until such "reasonable time" thereafter as is necessary to complete the payment therefore. A responsible Contractor's Agent shall be on the site at all working times who demonstrates a knowledge of mined land reclamation, contract requirements and responds to DEP (owner) inspections.

WORK PERFORMANCE PERIOD

The work performance period is a defined portion of the contract in which all items shall be completed. The work performance period is to be performed within 365 calendar days. Extensions may be granted based upon contractor's performance, weather conditions and site-specific site conditions.

NOTICE TO PROCEED

A notice to proceed shall be issued to the Contractor by the project contact person for the Department of Environmental Protection. Actual construction may only begin after a Notice to Proceed is given and as specified. Such notice shall specify the starting date of the Purchase Order, the work performance period, and the completion date of the work performance period.

PRE-CONSTRUCTION CONFERENCE

The Contractor in possession of the awarded purchase order shall schedule a Pre-Construction Conference on the site within ten (10) days after receiving the Notice To Proceed. The Contractor's foreman or the on-the-ground supervisor must be in attendance.

GENERAL SUPERVISION

This contract is under the general supervision of the West Virginia Department of Environmental Protection's contact person for the purpose of contract compliance inspection only. Contractor shall supervise work being conducted at all times. All services rendered by the Engineer/Contact Person consist of professional opinions and recommendations made in accordance with generally accepted engineering practice. Under no circumstances is it the intent of the Engineer/Contact Person to directly control the physical activities of the Contractor or the Contractor's workmen's accomplishment of work on this project.

CONTRACTOR RESPONSIBILITY

The contractor is responsible for compliance with all aspects of this written contract. No changes will be honored without prior approval from the Program Supervisor.

SILENCE OF SPECIFICATIONS

The apparent silence of these Specifications, Supplemental Specifications, plans and Special Provisions as to any detail, or the apparent omission from them of a detailed description concerning any point shall be regarded as meaning that only material and workmanship of acceptable quality are to be used.

BUYER CB-23	PAGE 026	REQ. OR PO NO. DEP13568

 VENDOR:

LAWS TO BE OBSERVED

The Contractor shall keep fully informed of all Federal and State laws, all local laws, ordinances, and regulations and all orders and decrees of bodies or tribunals having any jurisdiction or authority, which in any manner affect those engaged or employed on the work, or which in any way affect the conduct of the work. The Contractor shall at all times observe and comply with all such laws, ordinances, regulations, orders and decrees; and shall protect and indemnify the State and its representatives against any claim or liability arising from or based on the violation of any such laws, ordinances, regulations, orders, or decrees, whether by themselves, their subcontractors or their employees.

PERMITS, LICENSES AND TAXES

The Contractor shall procure all permits and licenses, pay all charges, fees, and taxes, and give all notices necessary and incidental to the due and lawful prosecution of the work.

CONCURRENT RECLAMATION

Reclamation of this project shall commence at a definite point as defined and shall progress from that point with total reclamation to include backfilling, grading/regrading, and revegetation. Changes may be granted based upon weather or differing site conditions with prior approval.

WATER QUALITY CONTROL

Shall commence with initial start-up of the project and remain in effect for the extent of the backfilling, regrading and revegetation activity. DEP obtains a storm water permit for each project from the Water Resources Division. (General Water Pollution Control Permit WVO115924) The Contractor is responsible for performing the best management practices. Adequate facilities shall be installed, operated and maintained using the best management practices of the U.S. Environmental Protection Agency's Non-Point Source (NPS) Program for sediment control during the active reclamation. The contractor shall take any and all steps necessary to prevent erosion or silting problems from occurring and to minimize pollution or sedimentation of the stream. If any such problems develop, the contractor shall be responsible to take immediate corrective action. No separate payment for this work will be honored. All impounded waters which require removal during reclamation, shall be pumped with appropriate measures taken to prevent erosion from the discharge. The contractor shall be responsible for treatment of said waters to meet pH standards. The water shall be discharged only when the quality meets a pH equivalent to the pH of the receiving stream but not less than 6.0.

DIFFERING SITE CONDITIONS

During the progress of the work, if subsurface or latent physical conditions are encountered at the site differing materially from those indicated in the contract or if unknown physical conditions of an unusual nature, differing materially from those ordinarily encountered and generally recognized as inherent in the work provided by the contract, are encountered at the site, the party discovering such conditions shall promptly notify the other party in writing of the specific differing conditions before they are disturbed and before the affected work is performed.

Upon written notification, the Engineer/Contact Person will investigate the conditions, and if determined that the conditions materially differ and cause an increase or decrease in the cost or time required for the performance of any work under the contract, an adjustment, excluding loss of anticipated profits, will be made and the contract modified in writing accordingly. The Engineer/Contact Person will notify the Contractor of DEP's determination whether or not an adjustment of the contract is warranted.

No contract adjustment which results in a benefit to the Contractor will be allowed unless the Contractor has provided the required written notice.

No contract adjustment will be allowed under this clause for any effects caused on unchanged work.

HANDLING AND STORAGE OF MATERIALS

Materials which are stored on site, before utilization, shall be stored so as to assure the preservation of their quality and fitness for the work. Stored materials, even though approved before storage, may be inspected again prior to their use in the work. Damaged or deteriorated materials shall be removed and replaced by materials meeting the original specifications.

Aggregate stockpiles shall be made on ground that is denuded of vegetation, hard, and well drained. Removal of aggregate from the stockpile shall be done in a manner which will not result in the inclusion of foreign material into the aggregate. The use of the aggregate will determine if exceptions are permitted.

All materials shall be handled in such a manner as to preserve their quality and fitness for the work.

MAINTENANCE DURING CONSTRUCTION

The contractor shall maintain the work during construction and until the project is accepted. All cost of maintenance work during construction and before the project is accepted shall be included in the unit or lump sum prices on the various pay items.

FINAL INSPECTION

A final inspection meeting by the Department of Environmental Protection's Specialist and the contractor is required for the construction phase and prior to demobilization.

ACREAGE QUANTITIES

The acreage quantities in this contract are for bidding purpose and are set (definite) number for the project area as specified at the pre-bid showing. Only surveyed acreage's through figures the Contractor and/or the State develops will be honored to alter these acreage numbers.

PAYMENT

Invoices must be submitted on prescribed Department of Environmental Protection, Special Reclamation Program forms and include verification. Certified contractor payrolls for operators directly involved in this project and a current workers compensation certificate must accompany each invoice for payment. Verification of wage rates may include employee interviews. Invoices shall be signed in blue ink so that it is easy to verify that document is an original.

MOBILIZATION/DEMobilIZATION shall be invoiced at fifty percent (50%) with the first invoice and the last 50% invoiced after demobilization and acceptance of the road abandonment or final invoice. Demobilization must have written approval.

SPILL CONTAINMENT AREA shall not exceed \$1,000.00 and will be payable in two payments. The first fifty percent (50%) payable with the first invoice and the remainder payable when all fuel tanks, containers and etc., are removed from the site.

Lump sum items shall be percentage payments based on work completed at time of invoice and paid upon acceptance by the Department of Environmental Protection.

Unit items shall be invoiced by specified units completed and accepted by the DEP.

ROAD ABANDONMENT shall be included in the final construction invoice.

FAILURE TO COMPLETE ON TIME AND LIQUIDATED DAMAGES

Time is an essential element of the Contract and it is important that the work be completed within the time specified. The cost to the Department of the administration of the Contract, including engineering, inspection and supervision, will increase as the time required to complete the work is increased.

The work performance period as specified in the contract's Notice to Proceed shall be complied with or result in liquidated damages. Such damages shall be assessed at an amount of two hundred and fifty dollars

BUYER CB-23	PAGE 028	REQ. OR PO NO. DEP13568

 VENDOR:

(\$250.00) per day for each and every day beyond the work performance period as specified in the Notice to Proceed. The total amount of daily charges will be deducted from any moneys due the Contractor, not as a penalty but as liquidated damages.

REVEGETATION AND WARRANTY

The seeding date shall be at the discretion of the contractor once an approved seedbed has been prepared. In all cases a permanent vegetative cover capable of supporting the post-mining land use must be established. A warranty period of one (1) year shall commence upon completion and payment of the revegetation item of the contract. No payment will be made for additional seeding necessary to comply with warranty requirements. The warranty period will be extended for one (1) year from the date of the last augmented seeding done by the contractor. The performance bond and labor and materials bond shall remain in effect throughout the warranty period. The Standards for Evaluating Vegetative Cover as presented in Title 38, CSR2, Section 9 of the West Virginia Surface Mining Reclamation Regulations will apply.

Equipment for the retracking/scarification to eliminate rills and gullies shall be mobilized and utilized to produce slopes consistent with the regrading and topsoiling bid item prior to warranty reseeding. No additional payment will be made by DEP for this warranty work.

Water utilized for hydroseeding shall be free of injurious or other toxic substances harmful to plant life. The source of water is subject to the approval of the DEP contact person.

CONTRACT NON-COMPLIANCE

If in the opinion of the Department of Environmental Protection the contract is not in compliance with any line item specification, that portion of the project shall cease until a compliance schedule and understanding is demonstrated in writing and accepted by the Director of Division of Land Restoration.

CONTRACT DELETIONS

Any line item or any portion thereof, may be deleted when determined by the project contact person that such line item, or portion thereof, is deemed unnecessary for the successful reclamation of this project. No claim for loss of anticipated profits will be considered.

CANCELLATION

The performance of work under contract may be terminated by the State in whole, or from time to time in part whenever the State shall determine that such termination is in the best interest of the State. Any such termination shall be effected by delivery to the Contractor of a Notice of Termination specifying the extent to which performance of work under the Contract is terminated and the date upon which such termination becomes effective.

When contracts, or any portion thereof, are terminated before completion of all items of work in the Contract, payment will be made for the actual number of units or items of work completed and accepted at the contract unit price. No claim for loss of anticipated profits will be considered. Reimbursement for organization of the work, when not otherwise included in the Contract, and moving equipment to and from the job will be considered where the volume of work completed and accepted is too small to compensate the Contractor for these expenses under the contract unit prices, the intent being that an equitable settlement will be made with the Contractor.

Termination of the Contract or a portion thereof shall not relieve the Contractor of his responsibilities for the completed work, nor shall it relieve his surety of its obligation for and concerning any just claims arising out of the work performed.

This contract may be cancelled in whole or in part in writing by the Director of Purchasing, without prejudice to any other right or remedy it may have, provided that the contractor is given not less than thirty (30) calendar days written notice, (delivered by certified mail, return receipt requested) of intent to terminate. This contract objective is to comply with the reclamation laws of this state and must be expedient to meet the time requirements for reclamation of revoked surface mine permits.

Re: Notice to Proceed
 Permit Name: _____
 Permit No. _____
 Purchase Order No.: DEP _____

Dear :

The purpose of this letter is to express our appreciation for your work in advance and to recognize a reclamation partnership project. The official starting date for the above mentioned purchase order is . The work performance period must be completed by . The contract life of one year is provided to accomplish all line items and to process all payments within that period.

You must schedule a pre-construction conference on site within ten (10) days after receiving this notice to proceed. It is then mandatory that construction begins within ten (10) days of the pre-construction conference and continues diligently until completion of the project. Please contact this office to schedule the pre-construction conference. The foreman, superintendent, or on-the-ground supervisor must be in attendance at this conference.

Failure to comply with this notice to proceed will cause termination of the contract and forfeiture of your performance bond.

If you have any questions please feel free to contact this office.

Sincerely,

E

General Requirements

Project Construction Sign

Work Required

The work to be performed under this Section consists of providing all labor, material and equipment necessary to install a project sign as indicated on the detail included herein and as specified herein.

Materials

- (a) Paint. Paint for the project sign shall be one (1) coat Exterior-Grade Wood Primer- Sealer, and two (2) coats Exterior-Grade Enamel by Glidden or equivalent.
- (b) Wood. Sign face shall be 3/4" X 4' X 8' Marine Exterior plywood, and posts and cross braces shall be treated.
- (c) Hardware. All hardware shall be manufactured from good, commercial-quality material and be rust resistant such as galvanized coated.

Execution

- (a) Project Sign. The signboard shall be cut to the dimensions shown on the details herein. The sign shall be painted with one (1) coat of primer and two (2) coats of white enamel. All exterior cut edges shall be smooth sanded prior to painting. All edges shall be double primed. The letters, border and strips shall be painted as shown on the detail drawing.

The Contractor shall bolt the sign to posts and provide required cross bracing. The posts and sign shall be erected and posts set in gravel base, as shown on the drawings. One (1) sign is required and is to be located at the direction of WVDEP.

- (b) Payment. Payment for the work which shall include installation of the project sign shall be incidental to the lump sum bid item for "Mobilization/Demobilization"

Note: No construction work shall commence prior to the project sign being installed.

PLUNGE POOL

Open Limestone Channel #2 will have a slope a 1% grade from the Plunge Pool to the Treatment Site. There will be a safety overflow, by-pass channel prior to the treatment building. The existing natural flow path and the new V-ditch will be combined into one channel after the building.

The overflow channel is located higher in elevation than the DLC #2 so that water will flow to the building first. The intent of the overflow channel is to allow a large storm volume to exit the Plunge Pool without eroding away any rock or soil material.

Roadside V-Ditch A will be relocated along the access road. This will allow all water to enter the Plunge Pool before entering the channels.

PLUNGE POOL CHANNELS

TOP VIEW

SECTION A--A

The Open Limestone Channel #2 will be located below the High Flow Exit Channel. This is to allow the flow to enter the Exit Channel. This configuration will force the DLC #2 to be 2.5 feet in depth and a top opening of 5 feet. The dimensions will revert back to the detail specs, as soon as the channel passes through the Plunge Pool structure. The Plunge Pool structure may be constructed from compacted earth covered with fabric and riprap stone.

The High Flow Exit Channel will have a slope of 4H:1V (Horizontal to Vertical) on the outflow. This channel will be constructed of standard riprap. The inner slope will be 2H:1V. This pay item will include the compacted earth, filter fabric, all rock for the High Flow Exit Channel, and the rock for the DLC#2 until the profile returns to the specs. for DLC#2. This item is lump sum.

BID BOND

059

KNOW ALL MEN BY THESE PRESENTS, That we, the undersigned, _____
of _____, _____, as Principal, and _____
of _____, _____, a corporation organized and existing under the laws of the State of _____
with its principal office in the City of _____, as Surety, are held and firmly bound unto the State
of West Virginia, as Obligee, in the penal sum of _____ (\$ _____) for the payment of which,
well and truly to be made, we jointly and severally bind ourselves, our heirs, administrators, executors, successors and assigns.

The Condition of the above obligation is such that whereas the Principal has submitted to the Purchasing Section of the
Department of Administration a certain bid or proposal, attached hereto and made a part hereof, to enter into a contract in writing for

NOW THEREFORE,

- (a) If said bid shall be rejected, or
- (b) If said bid shall be accepted and the Principal shall enter into a contract in accordance with the bid or proposal attached
hereto and shall furnish any other bonds and insurance required by the bid or proposal, and shall in all other respects perform the
agreement created by the acceptance of said bid, then this obligation shall be null and void, otherwise this obligation shall remain in full
force and effect. It is expressly understood and agreed that the liability of the Surety for any and all claims hereunder shall, in no event,
exceed the penal amount of this obligation as herein stated.

The Surety, for the value received, hereby stipulates and agrees that the obligations of said Surety and its bond shall be in no
way impaired or affected by any extension of the time within which the Obligee may accept such bid, and said Surety does hereby
give notice of any such extension.

IN WITNESS WHEREOF, Principal and Surety have hereunto set their hands and seals, and such of them as are corporations
have caused their corporate seals to be affixed hereunto and these presents to be signed by their proper officers, this
_____ day of _____, 20_____.

A F F I D A V I T061**West Virginia Code §5A-3-10a states:**

No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owned is an amount greater than one thousand dollars in the aggregate.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions.

"Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

EXCEPTION:

The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

LICENSING:

The vendor must be licensed in accordance with any and all state requirements to do business with the state of West Virginia.

CONFIDENTIALITY:

The vendor agrees that he or she will not disclose to anyone, directly or indirectly, any such personally identifiable information or other confidential information gained from the agency, unless the individual who is the subject of the information consents to the disclosure in writing or the disclosure is made pursuant to the agency's policies, procedures and rules. Vendors should visit www.state.wv.us/admin/purchase/privacy for the Notice of Agency Confidentiality Policies.

Under penalty of law for false swearing (West Virginia Code, §61-5-3), it is hereby certified that the vendor acknowledges the information in this said affidavit and are in compliance with the requirements as stated.

STATE OF SOUTH CAROLINA
COUNTY OF RICHLAND

On this 8th day of May, 2006, before me personally came the above named officers to me known, who being by me duly sworn, did depose and say that he resides in Columbia, in the County of Richland, State of SC, at Columbia; that he is the President of COMPANION PROPERTY & CASUALTY INSURANCE COMPANY, the corporation described in and which executed the above instrument; that he knows the seal of the said corporation; that the seal affixed to the said instrument is such corporate seal; that it was so affixed and that he signed his name thereto pursuant to due authorization.

[Signature] Notary Public, State of SC, Qualified in Richland County Commission Expires: 7/14/14

STATE OF SOUTH CAROLINA
COUNTY OF RICHLAND

I, the undersigned, an Officer of COMPANION PROPERTY & CASUALTY INSURANCE COMPANY, a South Carolina Corporation, DO HEREBY CERTIFY that the foregoing and attached Power of Attorney remains in full force and has not been revoked; and furthermore that the Resolution of the Executive Committee of the Board of Directors set forth in the Power of Attorney is now in force.

Signed and sealed at the City of Columbia, Dated the 3rd day of October, 2006

[Signature]
Curtis C. Stewart, Vice President & CFO

State of West Virginia
Offices of the Insurance Commissioner
Certificate of Authority

Whereas, **COMPANION PROPERTY AND CASUALTY INSURANCE COMPANY** domiciled in the State of South Carolina has complied with all the requirements of the laws of this State so as to entitle it to transact its appropriate business in the State of West Virginia.

Therefore, I the undersigned, Insurance Commissioner of the State of West Virginia, pursuant to the authority vested in me by the laws of this State, do hereby authorize it to transact the business of insurance as defined in Chapter 33

ARTICLE 1, SECTION 10(c) -- FIRE
ARTICLE 1, SECTION 10(d) -- MARINE
ARTICLE 1, SECTION 10(e) -- CASUALTY
ARTICLE 1, SECTION 10(f) (1) (2) & (3) -- SURETY

of the 1931 Code of West Virginia as amended, in the State of West Virginia in accordance with the laws thereof until midnight on the 31st day of May, 2007, unless this license be sooner revoked. Pursuant to W. Va. Code 33-3-2(c), the above authorization does not allow the insurer to transact a kind of insurance in this State unless duly authorized or qualified to transact such insurance in the state or country of its domicile.

In Testimony Whereof, I have hereunto set my hand and affixed my seal of office at the City of Charleston this 1st day of June, 2006.
