## Electrofisher Boat with Motor and Trailer Specifications

Hull length: 16 feet 8 inches; bottom width: 80 inches; gunwale width: 79 inches

Side height: 24 inches; transom height: 25 inches; maximum HP rating: 75

Jack transom for 60 hp outboard motor

Maximum weight: 2,080 lbs.; maximum payload: 1,650 lbs.

Material: 5052-H32 aluminum alloy; thickness: 0.125 inch bottom; 0.10 inch side

Modified "V" configured hull; adequate floatation so boat with a full rated load will float level if flooded

Work platform: 48 inches by 84 inches with anti-skid dri-deck tread mat; 42-inch high removable safety railing surrounding work platform; meets OSHA specs.

20-gallon foam-lined fuel tank provides fuel for outboard motors and GPP generator; fittings at fuel filter facilitate using standard marine gas tanks to supplement the main fuel tank; outside hull filling; marine fuel filter; meets Coast Guard specs

1 Locking storage compartment

2 Electrofisher booms 7-feet 11-inches long, 1.75-inches diameter; adjustable 0 to 180 degrees; mounted on each corner of bow on clutches that allow horizontal slippage during impact; quick-release fitting to attach anode arrays

6-Dropper heavy duty stainless steel cable anode array adjustable from 6 to 42 inches diameter.

Dual foot switches built into work platform; additional foot switch at console; 2-position control switch on console to select foot-switch combinations

24 Recessed work lights along bow and side of work deck; 12-volt

2 Halogen head lights mounted in neoprene cases on corners of work deck; 12-volt

2 Back-up lights mounted on stern; 6 deck lights along walk-ways

LED work-up lights on top of console

Running lights: Coast Guard approved

74-Gallon reinforced aluminum fish holding tank, insulated bottom, removable divider, 2 tank lights; hinged lids with braces to permit use as seats; high volume pump for filling and secondary pump for out-of-water aeration

2 Group-24 marine batteries housed in marine enclosures with a 40-amp charging system; dual battery switch, 230-amp. Separate outboard motor starting battery

4 Accessory 12-volt power plugs, 2 on console and 2 on work deck

5.0 GPP Electrofisher and Kohler marine generator or equal, electric start, electric choke, heavy duty windings to provide 12-volts @ 40 amps for battery charging and 12-volts @ 40 amps for auxiliary lighting; heat exchanger high temperature cutout switch; generator engine housing with 12-volt fan and 12-volt nightlight; generator hour meter mounted on console

Automatic bilge pump

Heavy duty canvas console cover

60-Horsepower Evinrude outboard motor or equal, E-TEC direct fuel injection with stratified low RPM

combustion mode; power trim and tilt; complete mounting to include right-side mounted throttle and gearshift controls; system gage package and hour meter; 20-inch shaft.

2007 model year

Tandem axle galvanized trailer for a 3,600 pound payload including high-density polyethylene bunk sleeves; bunk load side guides; swing lock tongue jack, "locking tire carrier", heavy duty tie-down; non-pressurized bearing lubrication system; non-corrosive spare wheel and tire; custom bow receiver; standard tongue; standard fender steps; single-gear winch; surge brakes

# AFFIDAVIT

**West Virginia Code §5A-3-10a states:**

No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owned is an amount greater than one thousand dollars in the aggregate

**DEFINITIONS:**

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

**EXCEPTION:**

The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

**LICENSING:**

Vendors must be licensed and in good standing in accordance with any and all state and local laws and requirements by any state or local agency of West Virginia, including, but not limited to, the West Virginia Secretary of State's Office, the West Virginia Tax Department, West Virginia Insurance Commission, or any other state agencies or political subdivision. Furthermore, the vendor must provide all necessary releases to obtain information to enable the Director or spending unit to verify that the vendor is licensed and in good standing with the above entities.

**CONFIDENTIALITY:**

The vendor agrees that he or she will not disclose to anyone, directly or indirectly, any such personally identifiable information or other confidential information gained from the agency, unless the individual who is the subject of the information consents to the disclosure in writing or the disclosure is made pursuant to the agency's policies, procedures and rules. Vendors should visit [www.state.wv.us/admin/purchase/privacy](http://www.state.wv.us/admin/purchase/privacy) for the Notice of Agency Confidentiality Policies.

Under penalty of law for false swearing (West Virginia Code, §61-5-3), it is hereby certified that the vendor acknowledges the information in this said affidavit and are in compliance with the requirements as stated.

Vendor's Name: Smith-Root, Inc.

Authorized Signature:  Date: 03/09/07

## BOATS

SR-20EH shown.

*Smith-Root, Inc.'s line of reliable, field-proven electrofishing work boats are designed to provide safe and stable working conditions. Equipped with the latest electrofishing technology, they provide the fisheries researcher with the utmost in electrofishing efficiency and equipment reliability.*

**SMITH-ROOT, INC.**  
Technology For Fisheries Conservation

# ELECTROFISHER BOATS

Smith-Root H and EH model boats are heavy-duty electrofishing work boats designed to provide the fisheries researcher with the outmost in electrofishing efficiency and equipment reliability.

H model boats feature a sled-style hull, available from 14' to 18' in length, perfect for shallow water fishing operations. For rough water conditions, our EH models offer our rugged modified "V" hull available in 18' to 21' lengths.

All models include the standard equipment listed here. Custom equipment is also available to meet individual needs.

## Hull And Transom

Hulls are constructed of rugged aluminum that gives superior impact strength and excellent resistance to water and weather corrosion. The fabrication features all-welded seams with hard machine-rivets at all critical rib support points. Seams are double welded at the bottom-to-gunwale sections and are overlaid with a formed chine.

H-models feature a minimal 6°V" for shallow water work, while EH-models have a modest 20°V". All models feature superior handling abilities at high running speeds. The bow is a modified "V" design, giving good lift and wave splitting action in rough water.

All Smith-Root boats come equipped with an extra heavy-duty transom built with a double H-frame-style reinforcing. This transom is highly resistant to damage that can happen on or off the trailer.

## GPP Electrofisher with Kohler Powered Generator

Kohler generator is custom-wound with insulated high voltage windings able to deliver maximum power into the water. Additional heavy-duty windings provide 12 volt power for battery charging and auxiliary lighting. Engine features:

- Meets Coast Guard safety standards for electrical systems and gasoline fuel systems
- One side serviceability of fuel filter, cooling system and lubrication system
- Heat exchanger
- High water and high exhaust temperature cutouts
- Flywheel guard
- Disposable oil filter
- Oil drain valve
- Full-pressure lube
- Electronic fuel pump
- Anti-dieseling solenoid
- Solid-state ignition
- Attached overflow bottle
- Automatic choke
- Emission compliant

For more information about GPP Electrofishers see catalog page 6.

## Generator Engine Housing

Housing is lined with heat reflective and sound deadening material. A large cooling fan circulates airflow through the housing. The top lid hinges back and a 12 volt night light is provided. When closed, the lid serves as a seat mount. The adjustable seat is swivel mounted and vinyl covered, with a back-rest.

## Fish Holding Tank

Constructed of rugged aluminum with all welded seams. The sides have full length stiffeners and inside corners are angled for easy fish removal. Hinged lids fold down and lay flush along sides. The lids have formed bracing so they can be sat or walked on. Tank lights are provided at each corner for night operations. Tank is filled by a high volume pump. Fresh water is constantly circulated through tank. Additional aeration is provided by a secondary pump and water circulating system with a aerating dome. This feature allows transporting fish when the boat is out of water and can be used to add extra oxygen to the tank when high fish-density occurs.

## Steering & Control Console

GPP Electrofisher and boat operator controls are integrated into a center console. The console also contains a patch panel allowing complete selection of anode/cathode boom configurations. Console hinges forward to provide easy access to all steering controls, switches, circuit breakers, and wiring terminals for the entire electrical system. All wiring terminals are clearly labeled for easy identification and servicing. A schematic diagram is provided which shows all wiring and terminal designations for the entire boat.

## Automatic Bilge Pump

A console mounted switch allows manual operation of the pump. The pump is rated for an open flow of 1,500 gallons per hour.

# ELECTROFISHER BOATS

## Lights

Complete system of lights for navigation and safety.

Featuring:

- Halogen head lights
- Navigation lights
- Work lights
- Deck lights
- Stern flood lights

## Flotation

Full-length flotation along both sides, with ample flotation placed below the deck line. This extra flotation is provided so that a fully equipped electrofishing boat will float approximately level in the unlikely event of flooding.

## Work Deck

Provides a roomy and safe working area for electrofishing. The deck is below the gunwale top to give a low center of gravity and make it easier to reach fish. The work area is large enough for several people to work comfortably. The work surface is a dri-deck® matt for stable footing. A sturdy 42" railing, with integrated net holders, surrounds the work deck on three sides. Foot switches used to control electrofisher output are built into the work deck. A two-position switch is provided at the steering and control console to select single or dual operation. An additional built-in foot switch is provided for the boat operator. A receptacle is provided for additional foot switches to accommodate extra crew. A large compartment (not available on SR-14H), with locking marine doors, below the work deck provides a secure dry storage area. Wiring at the work deck is contained in safe junction areas and all high voltage to the platform is in separate conduits. Meets all OSHA suggested safety guidelines.

## Cathode Array

Provides better loading in low conductivity water and a less intense field at each electrode.

## Electrofisher Booms

Standard Boat Booms are mounted at each corner of the bow on clutches. These clutches allow the booms to be swung from 0 to 180 degrees for the most effective spread for the waterway being fished. The clutches also allow horizontal slippage in the event of impact. Booms are elevated by adjustable support chains attached to the safety railing.

## Electrode Arrays

All Smith-Root electrofishing boats include a pair of SAA-6 electrode arrays. These medium-duty arrays features six stainless steel dropper cables that expand from twelve inches to thirty-six inches in diameter. The droppers are submersible to three feet of water and are complete with a brass quick connect fitting and safety line. AUA-6 Adjustable Umbrella Arrays are also available as an upgrade.

## Battery Compartment and Charging System

Provides space for two Group-24 marine batteries. A 40A charging system is included which utilizes power from the GPP generator. Additional charging from the outboard motor is incorporated in the charging system. A battery isolator helps protect the system from damage. Storage space above batteries provide room for a fire extinguisher and other small items.

SR-18H shown.

## On-Board Fuel Tanks

Built-in tank provides gas for both the outboard and the GPP generator. The tank is foam-lined to minimize condensation. It also has a marine water separator/filter with a replaceable cartridge and shut-off valves. Fittings at the fuel filter facilitate using standard 6 gallon marine gas tanks to supplement the main fuel tanks.

- SAA-6 Electrode Arrays
- Cathode Array
- Light Package with:
  - Pre-aimed Work Lights
  - Adjustable Head Lights
  - Deck Lights
  - Navigation Lights
  - Stern Flood Lights
- Fish Holding Tank
- Dual Batteries
- Battery Charging System
- On-board Fuel Tank
- Steering & Control Console with:
  - Wheel Steering
  - Side Mounted Outboard Controls
  - Fuel Gauge
  - Tachometer
  - 12 VDC Acc. Power Plugs
  - Outboard Stall Indicator
  - Outboard Hour Meter
  - Generator Hour Meter
  - Safety Lights
  - Dual Electric Horns
  - Shatterproof Windshield
  - Depth Finder
  - Voltmeter
  - Battery switch
  - Heavy-duty canvas cover
- Automatic Bilge Pump
- Generator Engine Housing
- Fire Extinguisher

Boat motor and trailer sold separately. Throttle and gearshift controls are supplied with the outboard motor. Motor and controls must be installed at the time of manufacture to allow under-deck routing of wiring harness, steering and motor control cables and to be able to fully test and guarantee the completed boat before shipment. Motors installed at no additional charge. Additional options and accessories listed on page 19.

# ELECTROFISHER BOATS

## BOAT MOTORS AND TRAILERS

Correct trailer and motor selection are crucial to ensuring the long-life and proper operation of your electrofishing boat. Smith-Root's experienced sales staff can help you select the right trailer and motor for your new boat.

We proudly offer trailers from King, EZ Loader and ShoreLand'r.

**ShoreLand'r**

**EZ LOADER**  
BOAT TRAILERS

For qualifying customers, factory direct government pricing is available for Johnson/Evenrude and Mercury motors. Government pricing for Yamaha, Honda and Suzuki is also available.

**EVNRUDE**

Contact Smith-Root sales for trailer and motor pricing and specifications.

## OPTIONAL EQUIPMENT

### Auxiliary Lighting Kit

Six inch diameter "headlight" type light mounted in a tough rubber housing. Comes with mounting hardware. Lights are 12V, can be used with either AC or DC power and are approximately 60 watts output.

**Headlight..... 06528**

**Floodlight..... 05845**

### Light Box

All of the larger Smith-Root electrofishing boats can be equipped with these lights. The high powered diffused lighting system is designed to be mounted on the bow and on the sides of your boat. Cathode droppers may be added to shield hull from effects of electrolysis. Each box has 6 high power lights. Bolts easily to most boats. Most boats will accept four light boxes, two on bow, one port, one starboard.

Standard dimensions are 35 1/4"Lx3 3/4"Wx4 1/4"H Custom sizes are available for specific applications. All mounting hardware is included.

**Order Number (each)..... 05181**

### Hand-held Spot Light

Rugged design and corrosion-resistant construction make this 12V spotlight with 400,000 candlepower ideal for marine environments. Eliminates reflective glare and protects against night blindness. 170-watt sealed bulb with intense beam can penetrate fog, snow, windshields, and water. Comes with 10-ft. coil cord and plugs into any 12-Volt source.

**Order Number..... 03617**

### Extra High Transom Adapters

This adaptor is welded to the top of the transom to alter the transom to a 27" height for a jet drive engine. This adaptor can be removed later if you wish to go to a 20" shaft engine. Available for H Model boats only.

**Order Number..... 03318**

### Boat Cover

Provides complete weather protection for the complete boat hull during storage. The Sunbrella® material is lightweight, UV resistant and has reinforced abrasion points, elastic draw rope, and spaced eyelets.

**H Model Boats..... 03892**

**EH Model Boats..... 03319**

### Foot Switches

With 15' of neoprene cable. Fitted with a mating plug to match the connector at the console.

**Single Foot Switch ..... 03309**

**Dual Foot Switches ..... 03310**

### Cathode Arrays

Cathode array featuring thirty-two 38" droppers provides better loading in low conductivity water and a less intense field at each electrode. Can be added to any boat. Set of four (two on bow, one port, one starboard side) bolts easily to most boats.

**Order Number..... 05266**

### Replacement Droppers

38" replacement dropper cables for cathode arrays. Fits all non-isolated arrays. Sold individually.

**Order Number..... 05183**

### Isolated Cathode Array

This is required in California. It mounts across the bow with evenly spaced droppers reaching into the water.

**Order Number..... 06799**

### Locking Side Storage

Locking keyed doors installed in side compartments. Priced per compartment door. Available on EH Model boats only.

**Order Number..... 06012**

# NUMERIC PRICE LIST

## PRICES ARE IN U.S. DOLLARS.

All prices are listed numerically according to Smith-Root order number.

### Payment Terms

Smith-Root accepts VISA, MasterCard, American Express, cashiers check, money order, electronic wire transfer, company check or pre-approved purchase order as valid forms of payment. Buyer's credit card will not be charged until products are shipped. Payment of all applicable taxes, assessments, or duties which may be imposed upon the shipment or sale of the products covered by these Terms will be Buyer's sole responsibility and will be paid by Buyer. Smith-Root built boat orders require 50% down payment, balance on delivery (BOD) including shipping charges. 2% discount for 100% down.

### Refunds & Returns

Customers returning equipment in new condition within 30 days of accepting delivery of Smith-Root, Inc. merchandise will be given a refund within five days from the date of the return. Valid equipment returns include, but are not limited to, ordering incorrect equipment, funding deficits, and defective equipment returned for reimbursement. A completed Equipment Return Form (<http://www.smith-root.com/support/forms/>) must accompany all returns. All returns are subject to a restocking fee and applicable shipping charges. The restocking fee is figured at 10% of the purchase price but not less than \$20.00. Customers receiving equipment in damaged condition will be referred to the shipping company for insurance reimbursement.

### Patent Notice

Smith-Root, Inc. Electrical Field Fish Barrier systems are protected by patent. Ideas, arrangements, drawings, and specifications are the sole property of Smith-Root, Inc. and are intended for this specific catalog and shall not be used for any other purpose, without written consent of Smith-Root, Inc. U.S. - 4,750,451 Canada - 1,304,442

### Warranty

Smith-Root, Inc. built boats are covered by a two year warranty. All other Smith-Root, Inc. manufactured products are covered by a one year warranty. Items manufactured by companies other than Smith-Root, Inc. carry the original manufactures warranty. Please contact product manufacturer for return instructions.

Prices are subject to change without notice. SRI reserves the right to make changes of products at anytime without notice.
