Building 15  
Charleston, WV 25305-0130

Re: Expression of Interest RFQ#GSD076410

Dear Ms. Ferrell:

CMA Engineering is pleased to submit, for your consideration, our qualifications and experience in providing engineering services for the proposed upgrades of the HVAC system serving the Senate President located in the main Capitol Building at the State Capitol Complex in Charleston, WV.

CMA Engineering has provided engineering services for over 2,400 projects since its incorporation in 1986. Projects that have involved the mechanical and electrical design of HVAC systems are the new north plant expansion at Mylan Pharmaceuticals in Morgantown, the new DEP Consolidated Office Building in Charleston, upgrades to Boreman Hall Dormitory at West Virginia University and renovations to Shady Springs High School in Raleigh County.

CMA realizes the importance of preserving the historical integrity of the State Capitol Complex as these HVAC modifications are implemented. We have provided engineering services for such historical buildings as the General Lewis Inn (Lewisburg), Davis Memorial Presbyterian Church (Elkins), the Goff Building (Clarksburg) and the Kanawha County Courthouse (Charleston).

If architectural services are required, we have included the firm profile and resumes of the key professionals from N Visions Architects in our submittal. CMA and N Visions have successfully collaborated on numerous projects during the last twenty years. Projects include an Open-End contract with the United States Postal Service, numerous HVAC renovations and new construction for Kanawha County Schools and the new parking facility, student union and bed-suite housing at Fairmont State University.

We appreciate your consideration of our firms and look forward to presenting a more comprehensive statement of our qualifications in a personal interview.

Sincerely,  
CMA Engineering
