**Re: Expression of Interest  
Environmental Security Design  
PRS07037**

Dear Selection Committee:

**Chapman Technical Group**, together with **The Onyx Group**, a firm with specialized environmental security design experience, is pleased to submit our Expression of Interest for the Capitol Environmental Security Design project.

Chapman Technical Group is a St. Albans-based multi-discipline firm with a history of developing successful projects for many State agencies, including several projects now underway at the Capitol Complex. We have full surveying capabilities for base map development, landscape architects and civil engineers to address specific site design issues, and architects who are familiar with the historic aspects of the Capitol complex, which may be important in the design of elements of the site security design.

The Onyx Group is a firm with national prominence providing services to Federal, State, and local governments throughout the country. The Onyx team includes security and intelligence specialists, engineers, planners and architects that are recognized experts with domestic and international proficiency in the broad range of skills required to address all hazards mitigation and security needs.

Chapman Technical Group would take the lead role in your project and would be the day-to-day point of contact. The Onyx Group would serve as a consultant to Chapman Technical Group and the two firms would work together to provide the environmental security design and documentation required for competitive bidding. Chapman Technical Group would also take the lead in providing any construction phase services that may be required.

Detailed information for both firms can be found elsewhere in this submittal. I have also included under Tab 1, all the specific elements required for this Expression of Interest.

We would very much appreciate the opportunity to present our project team to your selection committee. This would also give us the opportunity to address any specific issues that may be associated with the project. Meanwhile, if you have any questions or need additional information, please contact me.

Sincerely,

**CHAPMAN TECHNICAL GROUP**
