Section 1. Introduction

The West Virginia Addressing and Mapping Board (WVSAMB or Board) is requesting bid quotations for the procurement of a minimum of sixty (60) hand-held mapping grade Global Positioning System (GPS) receivers.

The Board is soliciting bids for integrated hand-held Global Positioning System (GPS) receivers and related equipment on behalf of West Virginia county 9-1-1 offices. The GPS equipment will be used by county 9-1-1 offices for base-map maintenance related to Enhanced 9-1-1 dispatch services in the counties. The requested GPS equipment will also allow the counties to perform work necessary to accelerate completion of the project, such as conducting spatially accurate on-site mapping of streets, landmarks, structures, and other features for input into the statewide addressing system in an easy-to-use, rapid method.

The Board, upon the technical recommendation of the Board's Project Management (PM) team, has procured a statewide, unlimited use license of Acquis ADE Mobile mapping software for use in data collection and web-based data input into the statewide database management system. The vendor **must** confirm in writing that the requested GPS unit is fully compatible, integrated and tested for use with the Acquis ADE Mobile software. The PM Team will install copies of the Acquis ADE Mobile software onto the requested GPS units.

NOTE: The successful GPS vendor is not responsible for installation of the Acquis ADE software onto the requested GPS units.

The requested GPS equipment **must** be compatible with the existing Oracle-based Statewide Addressing and Mapping System (SAMS) and **must** be able to use the Acquis ADE Mobile software that is being implemented for the long-term maintenance of the statewide addressing and mapping system.

NOTE: Prior to award, the lowest responsible bidder may be required to demonstrate the GPS unit, verifying all mandatory requirements have been met, at a meeting in the Charleston area. Time and place shall be determined by the Board.

Section 2. Technical Specifications

AFFIDAVIT

West Virginia Code §5A-3-10a states:

No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owned is an amount greater than one thousand dollars in the aggregate

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

EXCEPTION:

The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

LICENSING:

The fully integrated 14-channel GPS receiver offers sub-meter accurate data positioning in real-time. Achieve sub-foot accuracy in post-processing with the embedded GPS Differential™ Module.

Precisely navigate to a point of interest, create line functions or calculate area surface with capabilities far beyond PDAs and other non-GPS devices which simply cannot perform these operations.

MobileMapper CE GPS technology maintains high-precision in challenging environments with multipath mitigation, optimized to perform in urban canyons and dense foliage.

Maximum Flexibility In The Field

MobileMapper CE is the most flexible GPS / GIS system available, offering multiple operating modes and configurations.

MobileMapper CE delivers real-time sub-meter accurate GPS positioning using SBAS or Beacon corrections. It offers the added flexibility of NTRIP and Direct IP network communication for RTCM real-time corrections.

Seamlessly add the power of post processing to virtually any mobile GIS software application with the GPSDifferential Module software. Sub-meter and sub-foot mapping is easy to achieve, even where real-time corrections are not available or in difficult environments such as forestry and urban development.

MobileMapper CE easily adapts to your task and any mapping conditions, consistently delivering high accuracy and enhanced performance for all your GIS needs.

Extremely Rugged And Waterproof

The rugged design of MobileMapper CE defeats harsh environments where consumer-grade pocket computing devices such as PDAs and other GPS receivers are easily damaged.

Built to withstand a drop to concrete and remain waterproof even when immersed, the MobileMapper CE is perfect for use in public safety, civilian and federal agencies, utilities, environmental monitoring, natural resources and a host of other industries where management and mapping of field assets is critical and otherwise difficult.
