PURCHASING DIVISION  
STATE OF WV

Dear Selection Committee,

Alpha Associates, Incorporated wants to be the firm you select for the engineering services for the unimproved road serving Camp Dawson. Alpha has successfully been providing engineering design services for the State of West Virginia for many years. We are currently completing the design of the Access Road that will serve the new Morgantown Armory located near the Morgantown Municipal Airport.

Alpha has been involved in numerous civil engineering projects since 1969. We have a deep passion integrating our roadway projects into the natural environment, promoting functional designs with good stewardship. Alpha has completed many projects that are similar in nature to the roadway serving Camp Dawson. We recently completed a new Runway Safety Area for the Morgantown Municipal Airport. As with the unimproved road serving Camp Dawson an assessment was to be done to determine the long-term plan. Alpha then designed the project in three phases to include significant amounts of earthwork, relocation of roadways, design of new embankment, and much more. Alpha also recently completed the design and construction for the West Virginia University Research Park. This project included roadway design, demolition of structures, mass grading, and installation of erosion and sediment control features all while maintaining access and services to the existing buildings on the site. This project was completed for West Virginia University, but required close coordination with the West Virginia Division of Highways.

Working together with the WV Army National Guard, Alpha will meet all of the project requirements in a manner that is both timely and cost effective. We will strive to complete your project in a way that is considerate of the available resources and budgets.

### **Services**

Alpha anticipates being able to provide the services for this project in-house including:

- Civil Engineering and Roadway Design
- Structural Engineering
- Drainage Design
- Erosion and Sediment Control
- Construction Administration
- Surveying
- Landscape Design

Alpha's engineers will work side by side with you to produce a seamless project that is managed from a single point of contact. What does this mean for you? As an owner of the project, you are interested in a team that will produce a high quality, yet cost effective outcome. By having a single point of contact and an in-house design team, these goals will be achieved.

### **The Team**

Alpha possesses a team of professionals that will surpass the expectations of the WV Army National Guard. Alpha's team of professionals has a high success rate with completing projects in a timely manner. As specified in the resumes section of our proposal, Alpha has a selection of licensed professional engineers, architects and surveyors, along with other highly qualified support staff that will be dedicated to the success of your project.

### **Summary**

Alpha will provide you with a competent, dependable team committed to the success of your project. Alpha's design staff is ready to begin work immediately. We look forward to sharing our ideas with you.

Sincerely,  
Alpha Associates, Incorporated
