Addendum to DEP 13007 Coal X Pre-bid Conference Questions & Answers

004

The following questions were asked during the Pre-bid conference held on October 17, 2007, @ 10:00 am. The responses to these questions are also provided.

- 1) Q. Are 'as built' required when construction is complete?  
A. Yes, as per the technical specifications under "Construction Stakeout.
- 2) Q. Do you have any wingwalls on this job?  
A. Yes, as per the typical drawings provided in the bid package.
- 3) Q. Do we build wingwalls to pipe size?  
A. Wingwalls are to be built according to the typical drawings provided in the bid package.
- 4) Q. Where does the berm go? Does it go on the outside? (As it pertains to the Site 1 Hatfield / McCoy trail regrade.)  
A. Yes, as it is shown on the typical drawing in the bid package.
- 5) Q. Do you anticipate having to hammer rock to obtain grade? (As it pertains to Site 1 Hatfield / McCoy trail regrade.)  
A. No, the trail surface is to be regraded with existing material to drain water away from the mine site. Filter fabric and stone will be placed on trail surface according to detail shown in bid package.
- 6) Q. Do we have to add stone to road? (Pertaining to the main access road that runs by sites 1 & 2.)  
A. No, the old permit road has a rock base and only needs to be maintained so that equipment and supplies can get into work areas.
- 7) Q. What is the estimate for this job?  
A. Just under \$590,000.
- 8) Q. Do we place the (drop inlet) box in front of mine seal? (Pertaining to site 1 at the mine seal.)  
A. Yes, and extend the mine seal pipe directly into the box as it is shown in typical drawing.
- 9) Q. Does the road (access road to mine seal) get stone?  
A. Yes, as listed in the scope of work and shown in typical drawings.
- 10) Q. Is the stone for the road (access road to mine seal) a bid item?  
A. Yes, it is included in bid item for access road.
- 11) Q. Does line (6" HDPE DR17 pipe) go across the hollow? (Pertaining to Site 1 where the mine water conveyance pipe will be placed at intersection with trapezoidal channel #1.)  
A. Yes, the line will be laid under the grouted riprap trapezoidal channel and across the hollow prior to turning down the hollow as it is shown on the drawings included in your bid package.

- 12) Q. Is there a 90° connection in the pipe (6" HDPE DR 17) or does it sweep around the curve? (Pertaining to the same location as in question 11.)  
A. We prefer that the pipe sweep around the curve as shown in the typical drawing enclosed in your bid package.
- 13) Q. Are we standing at the head of Pond 4? (Site2 treatment site)  
A. Yes, as shown on the typical drawings provided.
- 14) Q. About clearing this site (Site 2 treatment site), what do we do with trees and stumps? Do we wind row or burn them?  
A. As of the last meeting with the property owner, he did not want the timber, but in case he changes his mind, we will wind row the trees where there would be easy access in case he wants to sell the trees. The stumps will be disposed of properly.
- 15) Q. Do you anticipate filling area of pond(s)? (Site 2 treatment site)  
A. Yes, raw water pond area will require some fill and excavation of other ponds should provide fill material as well as other possible borrow area adjacent to site. Construction stakeout is critical on this area to assure proper flow through treatment system.
- 16) Q. Do you have elevations for starting and ending points? (Site 2 treatment site)  
A. Yes, we ran elevations for our design to confirm that we could make the system work, but these elevations are in our field notes only and started from an assumed elevation. You will be required to complete the construction stakeout prior to and during construction to ensure proper system functioning. That is why we require construction stakeout and why we feel that it is important.
- 17) Q. Did you core drill for depth of rock? (Site 2 treatment site)  
A. No, we did not have that capability.
- 18) Q. Can we "shoot" on this site if we need to? (Site 2 treatment site)  
A. Yes, if needed.
- 19) Q. The (4100 linear feet of 6" HDPE DR17) pipe gets buried or laid on top of the ground?  
A. It gets buried to 24" as shown in the typical drawings.
- 20) Q. Do you have a size on the pond? (Site 3 wetlands area)  
A. No, the wetland will be constructed to the size of the pre-existing wetland area as you see here on the ground.
