- The system must utilize a web-based interface providing real-time access with no administrative burden of additional software on DEP workstations, an unlimited amount of usernames and/or groups security access capabilities, including, but not limited to agency authorization levels with regard to records and allow the sharing of capture documents across the Division with no annual licensing fees per user.
- The system shall support both local and remote access, allowing document sharing on-site or off-site.
- The system shall have a primary storage capacity of 200GB, and a secondary storage capacity of 120GB with 30GB for document cache. The internal HDD cache should be capable of storing up to 1,600,000 images. Up to 25 million images should be available online.
- The input sources of the system software are most connected next generation copiers, networked or PC connected scanners, internet fax devices, SMTP mail systems and PCs.
- The system security is to be username/password protected and allow for document-level read/write access settings by individual, group, or all users.
- The file system must be capable of storing images on media that meets legal governance regarding evidence in a court of law.
- The system must provide a backup mechanism for both data and indexes along with no administrative burden.
- The system must have redundancy features (i.e., disk mirroring, RAID technology) included in the form of external Snap Servers (320GB minimum) that will allow the external RAID technology to be stored in a separate location for redundancy. Disaster recovery functionality is required.
- The WV DEP will provide the input devices for document capture.
- One year on site warranty with phone support during the hours from 8:00AM to 5PM Monday through Friday.

# PURCHASING AFFIDAVIT

**West Virginia Code §5A-3-10a states:** No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate

**DEFINITIONS:**

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

**EXCEPTION:** The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

**LICENSING:** Vendors must be licensed and in good standing in accordance with any and all state and local laws and requirements by any state or local agency of West Virginia, including, but not limited to, the West Virginia Secretary of State's Office, the West Virginia Tax Department, West Virginia Insurance Commission, or any other state agencies or political subdivision. Furthermore, the vendor must provide all necessary releases to obtain information to enable the Director or spending unit to verify that the vendor is licensed and in good standing with the above entities.

**CONFIDENTIALITY:** The vendor agrees that he or she will not disclose to anyone, directly or indirectly, any such personally identifiable information or other confidential information gained from the agency, unless the individual who is the subject of the information consents to the disclosure in writing or the disclosure is made pursuant to the agency's policies, procedures and rules. Vendors should visit [www.state.wv.us/admin/purchase/privacy](http://www.state.wv.us/admin/purchase/privacy) for the Notice of Agency Confidentiality Policies.

Under penalty of law for false swearing (West Virginia Code, §61-5-3), it is hereby certified that the vendor acknowledges the information in this said affidavit and are in compliance with the requirements as stated.

## Documentum ApplicationXtender 5

### A Content Management Solution that is Easy to Deploy, Easy to Administer

*Business is fueled by information—yet in today's challenging environment, business professionals struggle constantly with how to manage and protect their critical documents and business information assets. Greater control over that information means greater control of the entire business. That's the value of content management—and with Documentum ApplicationXtender, content management is easier than ever to implement.*

#### Highlights

- Rapid deployment and easy administration for fixed content management solutions
- High-speed content imaging and enterprise report management processing, indexing, and archival (COLD)
- Support for Windows Server 2003 and Microsoft .NET framework for creating high-performance, easy-to-deploy packaged content applications
- Easy integration with existing business applications—without programming
- Direct access to stored documents, reports, and information from virtually any desktop business application

#### Fixed Content Imaging and Report Management on Windows

With its out-of-the-box capabilities, Documentum ApplicationXtender 5 allows you to quickly create an “electronic file cabinet” for information, enabling the capture, organization, and delivery of fixed content images, documents, reports, and other business-critical information. Built on a central repository, ApplicationXtender provides specific capabilities for high-speed image capture and storage and is designed for quick deployment. With ApplicationXtender, you quickly access information from a universal desktop interface, enabling greater control over business documents, enhancing the quality of decisions, increasing customer service levels, and improving employee productivity.

And ApplicationXtender is easy to administer. You can quickly deploy content management without programming or extensive customization, saving a substantial amount of time and money for your organization. Using a Web-based tool, XAdmin, administrators can centrally configure and manage application resources such as application templates and repository parameters, storage devices, and business rules. Remote application management and monitoring services offer a central view of the application environment, enabling proactive management of application services and related resources.

#### Optimized for Microsoft Windows

With an enhanced Web architecture built on the Microsoft .NET framework, Documentum ApplicationXtender offers simplified Web deployment and advanced functionality for managing content such as invoices, statements, account records, customer and patient files, and other business information. ApplicationXtender

provides users with full access to the central repository and content services through a browser-based interface. With its support for Windows Server 2003, ApplicationXtender takes full advantage of Windows NT and Active Directory Services, offering access control, secure communications, verifiable transactions, and support for digital signatures.

#### High-Speed Content Imaging and Report Management

Documents and images can be quickly scanned, stored, searched, and shared to automate paper-based processes, improve customer service, increase productivity, and streamline business processes. For geographically distributed organizations, ApplicationXtender enables Web-based remote scanning and distributed capture. The enhanced report management services of Documentum ApplicationXtender deliver high-speed computer output to laser disk (COLD) processing, indexing, and archival for computer-generated output such as text-based print files and advanced print stream formats for management of enterprise reports.

#### Quick Integration with Existing Business Applications

Documentum ApplicationXtender delivers a revolutionary new technology for providing end-user access to relevant business documents from within existing applications. ApplicationXtender Integration Module (AXIM), an add-on module for ApplicationXtender, allows companies to quickly "image-enable" virtually any application without programming. Users can then request and retrieve stored document images and information from within whatever business application they are using. For example, customer call center employees can retrieve all documents relevant to a specific customer, account, or transaction from within the primary application interface. AXIM also provides the ability to leverage voice commands to initiate retrieval.

#### About Documentum

Documentum, a division of EMC, provides enterprise content management solutions that enable organizations to unite teams, content, and associated business processes. Documentum's integrated set of content, compliance, and collaboration solutions support the way people work, from initial discussion and planning through design, production, marketing, sales, service, and corporate administration. With a single platform, Documentum enables people to collaboratively create, manage, deliver, and archive the content that drives business operations, from documents and discussions to e-mail, Web pages, records, and rich media. The Documentum platform makes it possible for companies to distribute all of this content in multiple languages, across internal and external systems, applications, and user communities. As a result, Documentum customers, which include thousands of the world's most successful organizations, harness corporate knowledge, accelerate time to market, increase customer satisfaction, enhance supply chain efficiencies, and reduce operating costs, improving their overall competitive advantage.

For more information about Documentum, visit [www.documentum.com](http://www.documentum.com) or call 800.607.9546 (outside the U.S.: +1.925.600.6754).

# WebXtender 5

## LEGATOsolutions

No matter how much data you have stored or how good it may be, it is not useful as business information unless users can readily find, retrieve and apply it as needed. The Internet and other new technologies are inundating organizations with far greater quantities and varieties of data than ever before. The need for 24x7 access to information has become essential in allowing globally-distributed work forces to collaborate on documents from remote locations.

## Browser Client Access for ApplicationXtender 5

**W**ebXtender<sup>®</sup> (WX) provides immediate access to stored data via the Internet, corporate Intranet or Extranet, using a standard Web browser. WebXtender provides both interactive and read-only web clients for ApplicationXtender<sup>®</sup> 5, allowing organizations to provide distributed access for e-collaboration, as well as enabling e-business and e-commerce activities.

### Leverage the Web for Delivery of Content

- Enables collaboration and sharing of information with remote employees, business partners and suppliers in e-business applications, as well as enabling e-commerce activities.
- Provides electronic presentation of information including scanned images, reports, forms, word processing documents, spreadsheets and many other types of data.
- Configurable screen view for regular or expert users, as well as customizable pages to design the WX environment to meet the specific needs of your enterprise.
- Printer-friendly viewing for read-only or interactive client.

### Comprehensive Content Display, Retrieval and Processing

- Actively involve remote users in collaboration and management of mission-critical business information.
- View and manage documents and other content through a standard web browser, just as you would on traditional workstations.
- Provides a full range of content search and display capabilities including index searches, wildcard and range searches, full-text search and cross-application queries and document property searching.
- Allows annotation and redaction of content to provide and/or hide information, complete check-in/check-out capability and revision history tracking.

### Secured Access, Easy Deployment

- WebXtender's server-based architecture eliminates the need to deploy software on user desktops.
- Contains an extensive security model that provides access to the system, specific content and the ability to perform specific functions based on authorized user privileges.

**WebXtender™ (WX)**  
**provides immediate**  
**access to stored data**  
**via the Internet, corporate**  
**Intranet or Extranet, using**  
**a standard Web browser.**

- Security can be integrated with Microsoft Active Directory Services for single sign-on and ease of administration
- Scalable to thousands of users across multiple WX servers

WebXtender provides your global enterprise with access to its mission-critical data through standard browser interfaces. It helps you share and leverage your corporate data assets, giving users and business partners the ability to retrieve and use data whenever they need it most. WebXtender is an integral part of LEGATO's ApplicationXtender family of content management solutions.

### Specifications:

#### Server Requirements

- Pentium 4 - 2 GHz or higher
- 500MB RAM
- Microsoft Windows 2000 Server or Windows 2003 server)
- Microsoft IIS

#### Client Features

- User name and content level security
- Search using index terms, partial index terms, wildcards, full text, range, list of values, etc.
- Document thumbnail display
- View and insert annotations and redactions

- Rotate and scale images
- Modify index values (Java-based)

#### Language Support (Localized)

- Japanese
- Spanish
- Brazilian Portuguese

#### Interactive Client Features

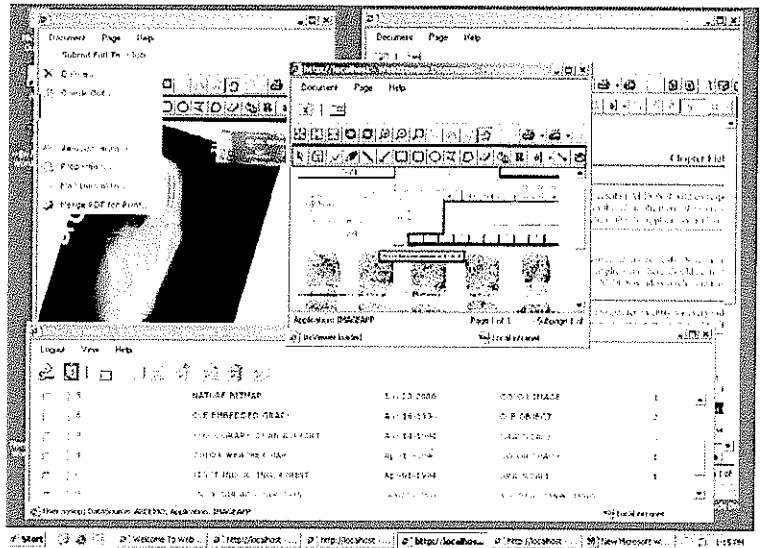

- ActiveX plug-in for extended functionality (annotation, insert documents, ODMA)
- Automatic download of ActiveX plug-in
- Wintel based

#### Read-Only Client Requirements

- Microsoft Internet Explorer
- Netscape Navigator

#### Interactive Client

- Microsoft Internet Explorer
- Netscape Navigator
- Uses Interactive Client Viewer plug-in

# ApplicationXtender<sup>®</sup> Integration Module (AXIM)<sup>™</sup>

## LEGATO solutions

Having timely access to critical business documents and information enables an organization to improve the quality of their business decisions and their customer service levels. AXIM allows users to quickly and easily access documents and other information directly from any business application running on their desktop.

## Image-enable business applications without programming

**A**pplicationXtender Integration Module (AXIM) from LEGATO delivers an unsurpassed image-enabling technology that allows virtually any business application to be easily and seamlessly integrated with the ApplicationXtender Content Management solution – without programming. With this innovative solution, knowledge workers can retrieve business documents and information from the ApplicationXtender repository without having to leave their desktop business systems.

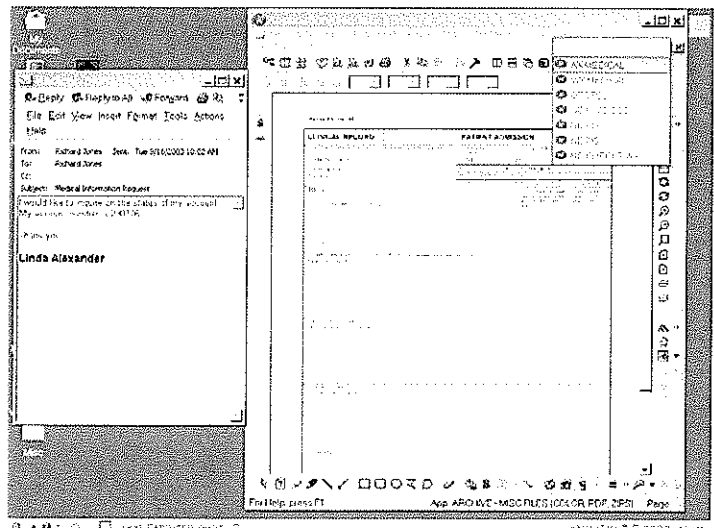

The revolutionary technology delivered by AXIM maximizes the investments in existing line-of-business applications. Since employees can access information quickly and easily, they can use the information to empower their decisions and customer service related activities – allowing them to deliver higher levels of quality and service than ever before.

AXIM's unique approach to image enabling delivers a number of end-user access capabilities and options including:

- Traditional "hot-key" activation of the retrieval/look-up request
- Innovative floating icon 'drop target' requests
- Leading-edge voice activated requests

These options provide a broad set of image-enabling capabilities beyond traditional text or windows-based screens. The Floating Icon Drop Target enables a user to capture any value, even from within a web-browser displayed page - and use that value to retrieve relevant or "linked" information from the ApplicationXtender information repository.

AXIM does not require initial or on-going programming and maintenance to integrate applications to the ApplicationXtender repository. Even a basic desktop user can setup AXIM to function with all of their individual business applications including Microsoft Office products, mainframe terminal emulators, as well as web browser-based applications.
