***RE: Expression of Interest – Thomas (Sunrise) Sanitation
Requisition # DEP14171***

To Whom It May Concern:

Thrasher Engineering, Inc. is pleased to have the opportunity to submit this expression of interest and qualifications to provide engineering mapping and design services for the Thomas (Sunrise) Sanitation Project. Our qualifications as West Virginia's largest full service civil engineering firm will provide the Department of Environmental Protection's Office of Abandoned Mine Lands and Reclamation with quality service in a timely and cost efficient manner.

The qualifications that the selection of Thrasher Engineering for this project will bring to the DEP and the Office of Abandoned Mine Lands include:

Successful Project Experience with AML: In 2005, we were selected by the DEP to provide engineering design and mapping services for the Amherstdale and Ragland Road AML water line projects in Mingo and Logan Counties. As you are aware, each of these projects was completed on time and are currently at the DEP awaiting final steps prior to construction bid. Additionally we have extensive experience with water line projects in areas that are partially affected by AML; we currently are providing engineering services for two partial AML projects for the Town of Masontown in Preston County.

Experience to Meet the Scope of Services: Thrasher Engineering offers expertise in infrastructure development including site development. Within those projects, we have mapped and designed numerous open channel drainage systems, and provided stream bank protection. As demonstrated in our qualifications, Thrasher Engineering has surveyed, mapped, designed and provided construction management services for more site projects than any other West Virginia engineering firm

Project Team: The qualifications of professionals on the team we have assembled to provide mapping and design services for this project are unmatched for this type of

work. We have 25 engineers on staff, 14 of who are Registered Professional Engineers. Additionally, Thrasher Engineering offers 10 fully staffed survey crews with experience in mining survey including pre and post subsidence and acid mine drainage.

Location and Area Knowledge: For 25 years, Thrasher Engineering, Inc. has provided top quality engineering services throughout West Virginia, including numerous clients in Tucker County. Most recently, we were selected as the engineering firm to provide full services to the newly formed Canaan Valley Public Service District to provide sanitary sewer service throughout the valley. Because of our current work in the area, we will be able to provide immediate response to your needs for this project.

With our experience with AML and drainage projects, our qualified personnel and our expertise, Thrasher Engineering is the right choice for this AML project

Following the instructions outlined in the RFQ, this proposal contains information regarding Thrasher Engineering's history, qualifications and management and staffing capabilities along with the required DEP /AML Consultant's Confidential Qualifications Questionnaire, and an affidavit stating Thrasher Engineering has no debt owed to the State of West Virginia.

We thank you for your consideration of our qualifications and look forward to the opportunity to present our qualifications and project methodology to you in person.

Sincerely,

THRASHER ENGINEERING, INC.
