Surface Mounted Flexible Tubular Markers

SCOPE OF CONTRACT

The scope of this Contract is to provide the West Virginia DOH with complete Surface Mounted Tubular Markers and replacement components as needed.

GENERAL DESCRIPTION OF CONTRACT

Three categories of surface mounted tubular markers may be awarded as part of this Contract. The first category shall be for "Standard Duty" markers intended for low to moderate expected impact installations. All products, with exceptions as noted herein, currently shown on the WVDOH Approved Products List (APL) for Surface Mounted Tubular Markers shall be eligible for award under this category.

The second category shall be for "Heavy Duty" markers intended for moderate to high frequency expected impact installations. The qualification of markers under this category shall be based on the performance of the marker under independent durability testing, such as the AASHTO NTPEP test deck, the performance of the marker as part of WVDOH testing, and, if applicable, the historical performance of the marker as part of actual permanent installations by WVDOH Contractors or internal maintenance forces. Markers eligible for award under this category are listed herein.

This Contract shall also include a "Safe-Hit Replacement Post" category to insure the availability of replacement Safe-Hit tubular marker posts for use with existing bases already installed in the field.

BID SCHEDULE AND PRODUCT COMPLIANCE FORM

The Vendor shall complete the bid schedule and product compliance checklist form included as part of this Contract in their entirety. Bids with these items uncompleted will be rejected. This requirement does not apply to the Bid Schedule for categories that the vendor chooses to not bid, and as allowed for as noted on the Product Compliance Checklist Form.

TUBULAR MARKER MANUFACTURER SHEETING APPLICATION CERTIFICATION

The marker manufacturer will be required to submit a copy of a letter, specific to this Contract, stating that the marker manufacturer has been certified by 3M to apply the series sheeting specified in this Contract to the model marker(s) to be supplied (as specified by the vendor in the product compliance checklist form). This letter shall be addressed from the sheeting manufacturer to the marker manufacturer, should reference this Contract number, and should be included with the vendor's bid package. This Contract shall not be awarded without receipt of this letter.

NCHRP-350 CERTIFICATION

The vendor will be required to submit a copy of a certification letter originating from the marker manufacturer specifying the products being bid under this Contract, and certifying that these products meet the crashworthiness requirements of NCHRP-350 as a Category I device at test levels I, II, and III. This letter should be included with the vendor's bid package. This Contract shall not be awarded without receipt of this letter.

SPECIFICATIONS

All markers supplied under this Contract shall be designed to extend above the road level 36" (+/- 3") after installation. All markers shall be designed to have the ability to accommodate a 6" band of Type ASTM-III sheeting, of the color specified, to be wrapped completely around the post, and with the bottom edge of the sheeting no less than 28" from the bottom of the post. All markers shall be designed for 360 degree visibility. Round markers shall have a minimum outside diameter of 2" along their entire length. Non-round markers shall have a min. dimension of 2" from side to side along their entire length when viewed from any direction. The marker shall have a consistent cross sectional shape along the 6" length where the sheeting is applied. The base portion of the assembly shall be made of a black colored, hard, non-flexible plastic designed to be resistant to impacts and deterioration. The base shall be a maximum of 2" in height, a maximum of 10" diameter if round, a maximum of 10" x 10" if square, and shall be designed to be easily mountable by a vehicle tire. The base shall be textured or profiled on the bottom to insure good adhesion with the adhesive material used to attach it to the road. The base shall be designed to be adhered with a hot-laid bituminous, epoxy, or thermoplastic material such as Super Bundy pads, manufactured by Flint Trading of Thomasville, NC. All bases supplied shall be designed for optional installation with mechanical fasteners. Base anchoring hardware will not be required to be supplied as part of this Contract, however, the vendor shall specify the number of anchors required to anchor each base, the diameter anchors that the base is designed to accommodate, and the grip length of the anchors (thickness of base material between the anchor head or nut and the road surface after installation). Any hardware required for securing the marker to the base shall be supplied with complete assemblies (marker and base), and with replacement markers (post only). The marker may be designed to be secured to the base using standard hardware, a twist-lock or similar type system designed to not require hardware, or pins that are driven horizontally through pre-existing holes in the base after the post is inserted. Hardware or other metal components shall be of the size and length recommended and supplied by the manufacturer and shall be manufactured of stainless, zinc plated, or galvanized steel.

APPROVED PRODUCTS

The current WVDOT APL for "Flexible Plastic Delineators" is included as an attachment to this Contract. All markers listed under the "Surface Mounted Flexible Tubular Marker" category are approved for bidding under the "Standard Duty" section of this Contract with the exception of the Carsonite Channelizer SDC20. The following markers are approved for bidding under the "Heavy Duty" section of this Contract:

MANUFACTURER	PRODUCT	MODEL NUMBER
Safe-Hit	Durapost	730102 or 730102Y
Impact Recovery Systems	Delineator Post	TP-36F with 101-NS base
Filtrona Extrusion	Flexi-Guide FG300	FG300UR
Filtrona Extrusion	Flexi-Guide FG300	FG300EFX

APPROVED SHEETINGS

The following retroreflective sign sheetings are approved for application to the markers to be supplied under this Contract, provided that the marker manufacturer has been certified by the sheeting manufacturer as described herein:

MANUFACTURER	PRODUCT
3M	381 I

BID ITEMS

Surface Mounted Flexible Tubular Markers shall be bid complete. Complete units are to include post, retroreflective sheeting (applied), base, and all associated hardware necessary to secure the post to the base. Posts and bases shall also be available for purchase separately as part of this contract. An order for the post only, in white or yellow, will always require the post to have a minimum of one, like color, 6" band of Type ASTM-III High Intensity Grade sheeting, and all necessary hardware to secure the post to the base.

Note, if the Safe-Hit Durapost is the low bid product under the "Standard Duty" category, the "Safe-Hit Replacement Posts" category of the Contract will not be awarded.

Note, the WVDOH will attempt to award this Contract in its' entirety to the minimal number of vendors possible. The WVDOH will split the award of this Contract among two vendors if the overall savings to the WVDOH, based on the estimated quantities, is equal to or greater than 10% of the total cost based on awarding to one vendor. The WVDOH will split the award of this Contract among three vendors if the overall savings to the WVDOH, based on the estimated quantities, is equal to or greater than 10% of the total cost based on awarding to two vendors, or one vendor if awarding to two vendors is not possible. Individual categories, as defined herein, will not be split among different vendors. The Vendor must submit a bid for all line items within a particular category to be considered for award.

MINIMUM ORDER

A minimum order shall consist of no less than 25 units per item number to a particular destination.

DELIVERY

All prices bid shall be FOB destination in accordance with the list of delivery destinations made a part of this contract. All orders shall be shipped complete within forty-five (45) days A.R.O. Late delivery charges against the vendor may be assessed at a rate of \$50.00 per calendar day after forty-five (45) days ARO. Notification of shipment from vendor shall be received a minimum of 48 hours before delivery of material at the location indicated on the release.

The following estimated quantities are for bid purposes only. Actual quantities will be determined by needs of the West Virginia Division of Highways and may be increased or decreased.
