REQUEST FOR QUOTATION
BCF90128

PART 1 GENERAL

1.1 Request for Quotation to provide all labor, material and anything incidental to the acquisition and installation of a fully complete lockable Kardex Kompakt or equal, manual, lateral, high density filing system as defined herein for the Marion County office location of the Department of Health & Human Resources. The system must be manually operated and accommodate the approximate stated amount of linear filing inches as specified for 8 1/2" x 11" documents. All work will be in compliance with Fire Marshall regulations and all other building codes and industry standards. The award will be made to the overall low bid that complies with the specifications.

1.2 The following is the location where the file system is to be installed and the approximate size of the system. This is a Mall building currently under renovation and the builder estimates the building will be ready for the file system to be installed on or about May 1, 2009. Bidders - Please note: Your bid can be for more linear file inches than what is requested but bids with less linear file inches will be disqualified.

1.2.1 MARION COUNTY DHHR 27,000 linear filing inches
 9395 Middletown Mall
 White Hall, WV 26554

1.2.2 The space plan allows the file system to have a footprint of 30'w x 20'd in order to fit in the room. A floor plan is attached showing the file system in the center with the wording: "Clerical Pool Record Room." This area is the actual file system footprint and the plan allows for the actual size of 30'- 10" w x 20' d.

1.3 It is the bidder's responsibility to verify all field conditions and building weight limitations prior to bidding. It is also the bidder's responsibility to notify the West Virginia Department of Health & Human Resources in writing, of conditions detrimental to proper and timely completion of the installation. Do not proceed until nonconforming conditions have been corrected.

1.4 The intent of this Request for Quotation is to provide the using office with a high quality, mobile lateral filing system. The foregoing specifications are to be considered nominal and approximate. Minor deviations from the stated specifications are acceptable to facilitate a competitive bid atmosphere provided the intent of the Request for Quotation or the effectiveness of the system is not compromised. No deviation is permitted on the space or configuration requirements. **ALL VENDORS PLEASE NOTE: This system is to be 100% complete. All braces, dividers or any other component necessary to properly utilize the filing system will be included with the initial installation at the offered price. This is not negotiable and payment will not be made to the vendor if they should fail in any way to meet this requirement.**

PART 2 TECHNICAL SPECIFICATIONS

2.1 TRACKS: Each modular track assembly will consist of two 14 gauge formed steel rails capable of carrying a minimum load of 1000 pounds per linear foot. The rail assembly will be welded to a minimum of 4 corresponding 14 gauge steel support channels. Track assemblies are leveled by adjusting built-in leveling glides found in the support channel located every 12 inches on center. End stops are installed at each end of the rail assemble to provide a safe, cushioned stop for the mobile carriage. All track assemblies will include a stainless steel decorative cap. This cap will be attached to the front of the track assembly giving it a finished profile.

2.2 CARRIAGES: Carriages consist of sections of "U" shaped formed cold roll steel 13 gauge and 14 gauge stringers and cross members, all electrically welded to form a strong and durable frame. **Each seam will be fully welded. Occasional spot welds that allow the sheet metal surface to bow between welds are unacceptable.**

2.3 WHEELS: Carriage wheels will be double-flanged and 5" in diameter with each wheel having heavy-duty, double sealed, permanently lubricated, ball bearings. There are a total of four wheel assemblies per carriage.

2.4 FINISH: All steel parts are thoroughly cleaned in a three stage iron phosphate washer. Each steel component is then coated with an epoxy powder coat finish using an electrostatic paint system. This paint system ensures a long lasting and durable finish. The end user will make color choice.

2.5 DECKING: Decking will be installed so the tracks will be level with the floor surface. The decking will be as recommended by the filing system manufacturer and will be covered with a finish flooring material. If the filing system manufacturer does not provide a covering, the decking will be covered consistent with surrounding flooring.

2.6 WORKING HEIGHT: The maximum height of the top shelf shall not be higher than what can be accessed by a 5' 2" person. Total installed height not to exceed 76" and that is nonnegotiable.

2.7 REFERENCE SHELF: There shall be one retractable reference shelf located approximately 38" above the floor surface on each side of each aisle at a point towards the aisle center. The shelf should be capable of holding ten pounds of weight at a fully open position.

2.8 INSTALLATION LOCATION: The system shall be installed in the location known as the Clerical Pool Record room. The room was constructed to accommodate a file system measuring approximately 30'w x 20'd and the proposed system cannot exceed the size limitations of the room including properly sized walk ways and the aisles as required in section 2.10.

2.9 UNDERCARRIAGE ANTI-TIP: For safe operation of the system, an undercarriage anti-tip device shall be provided and bolted to the carriage that has a lip riding in the

flange on each rail, (2 per wheel). Anti-tip angles must be constructed of no less than 11 gauge steel and must have a bottom flange (interlocking with rail) of no less than 7/8" wide. Overhead mounted products are unacceptable.

2.10 AISLES: Aisle requirements are minimum distances from a fully open position. The system will be configured to provide two 36" aisles.

2.11 SHELF DIVIDERS: A minimum of three shelf dividers shall be provided with each shelf opening.

2.12 CONTROLS: The system shall be designed so that the entire file system can be closed by turning the handle on the last shelf unit. The last shelf unit will push all open shelf units to a closed position. The system will be capable of being locked in the closed position.

2.13 WARRANTY AND RESPONSE TIME: Please state the warranty period of the system bid and the response time for warranted and non-warranted repairs. As a mandatory minimum, a response time of 48 hours is requested and nothing less than a one year warranty is acceptable.

PART 3 SPECIAL CONDITIONS

3.1 The contractor shall coordinate all site activities with a designated representative from the physical location.

3.2 The contractor shall be adequately bonded and insured to fully indemnify and hold harmless the property owner and/or the Department of Health & Human Resources from and against any and all claims arising from the performance of this contract.

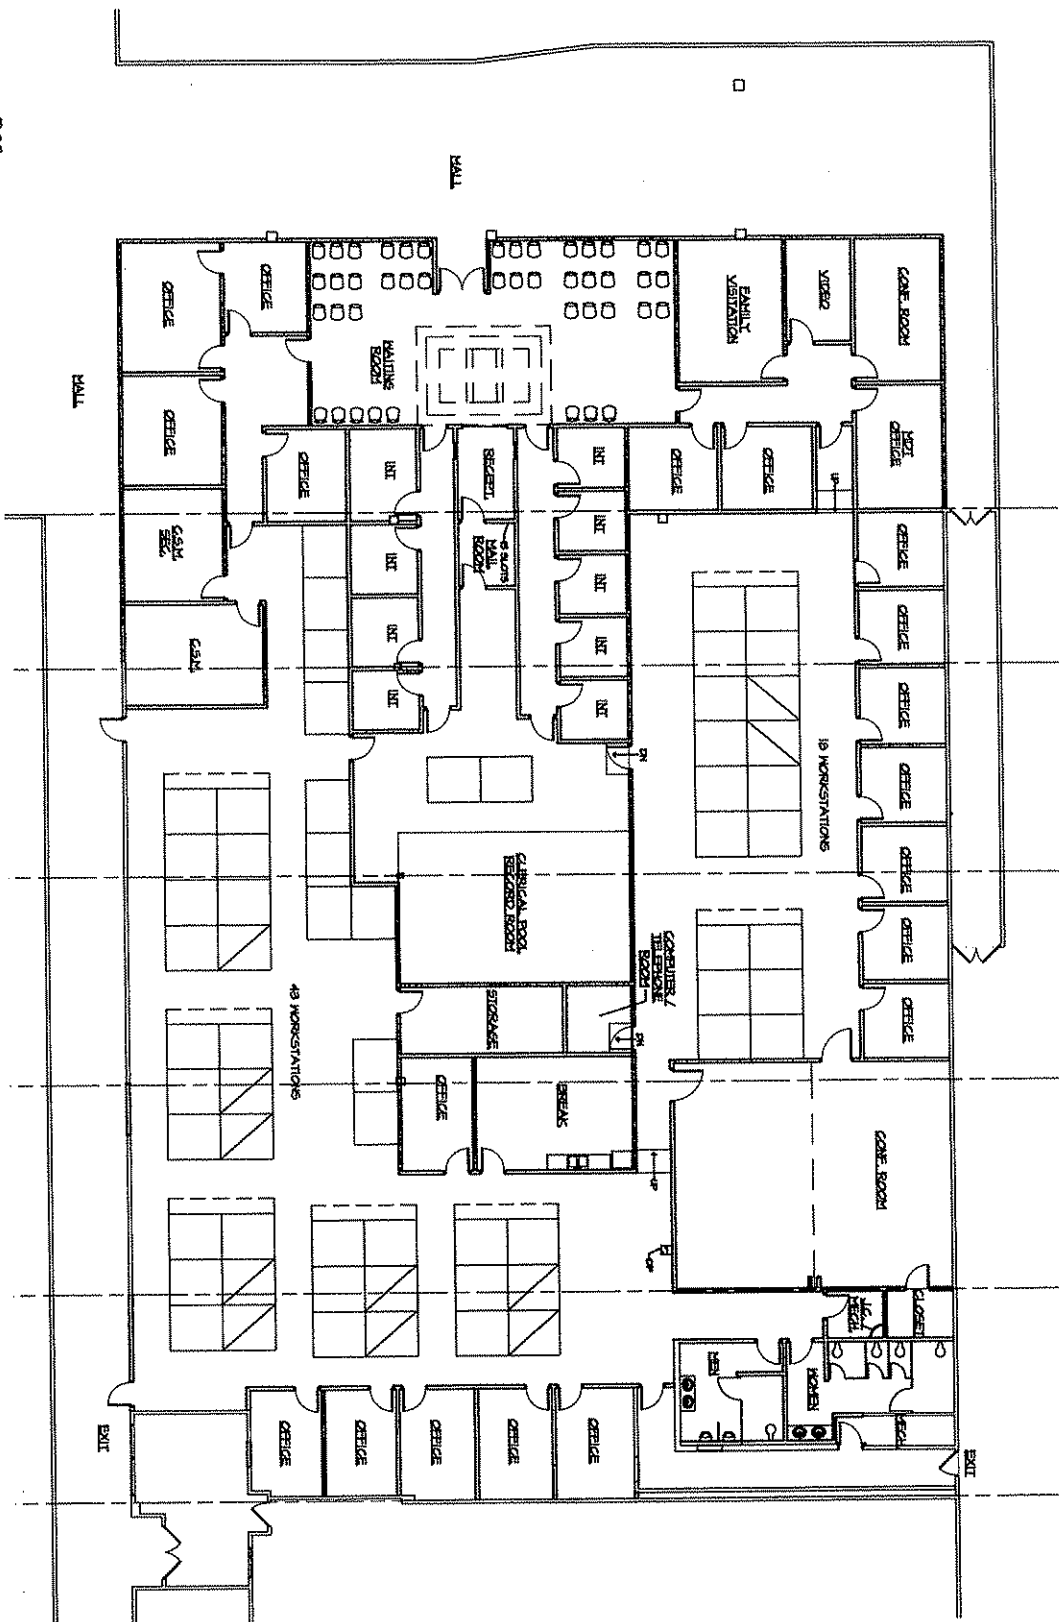

3.3 The contractor shall complete all work within 90 calendar days after receiving the notice to proceed.

3.4 One payment shall be made at 100% completion pending acceptance by the Department of Health and Human Resources. The Department of Health & Human Resources reserves the right to withhold payment if the installed system is not in compliance with the specifications.

3.5 The contractor shall pay the higher of the U.S Department of Labor minimum wage rates for all labor performed on site as established for Marion County pursuant to West Virginia Code 21-5-1, et. seq.

3.6 Bidders shall submit one lump-sum base bid for all work and equipment under all the terms and conditions as described herein.

Addendum 1 to RFQ BCF90128

Response to Vendor Questions:

Question: 1) section 1.1 requests a MANUAL system. Should we assume that it is Mechanically operated with a 3 spoked handle control, (a chain turns a sprocket that turns the wheels)? Also, should the single sided Movable lockable unit be Mechanically operated?

Response: We refer to a manual system as one the operator turns a 3 spoked handle and the carriages move either left or right. The system is designed to close and lock so one single sided carriage should move and the other should be fixed.

Question: 2) section 1.3, will this equipment be installed on any other floor besides, the ground floor?

Response: No.

Question: 3) Is the existing floor concrete?

Response: Yes.

Question: 4) section 2.1, do you want the rails to be anchored to the floor, leveled and then grouted?

Response: Yes.

Question: 5) section 2.5, should we provide carpet that will be close in color to what is existing?

Response: Yes, the carpet is available locally so you should be able to make an exact match.

Question: 6) section 2.6, Are you stating that the shelving height may not exceed 76" high? Should we assume that you are requesting 7 openings plus a top?

Response: No, 6 openings.

Bidder understands if the Secretary of Revenue determines that a Bidder receiving preference has failed to continue to meet the requirements for such preference, the Secretary may order the Director of Purchasing to: (a) reject the bid; or (b) assess a penalty against such Bidder in an amount not to exceed 5% of the bid amount and that such penalty will be paid to the contracting agency or deducted from any unpaid balance on the contract or purchase order.

ALTERNATE CONFIGURATION

Based on the space that is available in the area where the file system is to be installed, we would like to propose an alternate configuration.

We propose that there is the space available to increase the rail length from 27' to 30'10" and thus open a 3rd working aisle in this Kardex High Density File System of at least 36". We further propose that there is enough space to convert the single faced stationary carriage to a double faced moveable carriage and increase the system file capacity by 1,368 LFI while also maintaining 3 – 36" working aisles.

We offer this Alternate Configuration, that meets or exceeds all of the specifications set forth for the TOTAL COST OF: **\$45,997.00**
