Our Mission

Total Client Satisfaction – Delivering cost effective projects within the schedule utilizing *Engineering Excellence, Advanced Technology, and Innovative Designs.*

Corporate History

RPM Engineers was formed in Charleston, WV in 2004. We have put together a dynamic group of professionals who are committed to quality, timeliness, and controlling costs. We started out with only two employees in 2004. Since then, we have grown to a total of thirty-one employees. We feel that our growth is mainly attributed to our mission of Total Client Satisfaction.

What People are Saying About Us

Our mission to achieve ‘Total Client Satisfaction’ has been demonstrated by the feedback that we receive from our clients. Here are some of our most recent client testimonials.

➤ We performed several bridge designs for the West Virginia Department of Transportation, Division of Highways District 5 in 2007 and 2008. These projects were completed on a very fast track schedule. This was our first job working directly for WVDOH, District 5. After completion, RPM received some of the highest compliments that we have ever received.

The District Bridge Engineer told us that in his 35 year career, that working with RPM was *one of the biggest successes* that he has experienced. He also wrote that “*RPM did these jobs for us, and did very commendable work. Working with the folks at their firm has been a rewarding experience for us here in District 5*”- Gary Klavuhn, District Bridge Engineer, WVDOH District 5, March 2008.

➤ We performed a bridge design for the Ohio Department of Transportation, District 7 in 2007. This was our first job for ODOT. After completion, RPM received the highest consultant rating for design services in modern ODOT history.

ODOT's Project Manager wrote in the consultant evaluation that *"This was a pilot LRFD project for ODOT...RPM was always ahead of the game, and provided guidance on decisions about the bridge design...we were pleased with the work of the subconsultants, and never had to provide any direction to them...RPM turned in exceptional plans more than 30 days ahead of schedule... every submission was early, complete and of good quality."* - Amy L. Schmidt, Project Manager, ODOT District 7 Contract Section, September 2007.

➤ We performed a construction inspection in early 2008 for one of our clients in South Carolina. The client told us that it was the *"was the smoothest overhead inspection I have ever had"*. In addition, he stated that *"I must also include you and your team at RPM for all of your hard work in making for the successful Overhead Inspection Tuesday at NPES! Thanks for all you guys do. It is very much appreciated!"* - Steven Howie, Project Manager, M. B. Kahn Construction Co., Inc., March 2008

These examples are only a few of many positive remarks that we have received from our clients. This feedback reinforces our commitment to customer service. We pledge that if we are fortunate to be awarded a project for the West Virginia Department of Environmental Protection, Office of Abandoned Mine Lands & Reclamation, that we will deliver 'Total Client Satisfaction'.

PART 2

OPERATING ENVIRONMENT

2.1 **Location:**

Directions to the Mullens Portals:

From Route US-19, near Beckley, WV, merge onto I-64E/I-77S. Take Exit 42 towards Mabscott. Merge onto WV-16S, towards Sophia/Mullens. Continue on WV-16S to Mullens. See attached map for project site locations.

Location Map is attached (Attachment A1).

2.2 Background:

Firms are to be licensed Architectural/Engineering Firms (A/E) and should be familiar with, and have a successful track record of design of similar projects.

The anticipated contract will be for "full-service" A/E design. Aspects of the design are to include, but not be limited to, Civil, Structural, Geological and Hydrological.

The successful A/E will be responsible for Design of the following:

Mullens Portals:

Within the residential area of Mullens, mining in the Poca 3 and Poca 6 seams, has left extensive mine workings with numerous collapsed entries at various locations. Several of these sites emit mine drainage year round. Several complaints were received from the citizens and local government during the year 2001 (specifically during the months of May, and then after the July flood). According to available mine maps, the Poca coal seams generally dip North West, away from the town of Mullens, however, local areas within the mines are shown to pool water. This would account for the year round mine drainage experienced by the residents.

One particular resident, Jack Menego (PO Box 624, Mullens, WV 25882 (304-294-5770) has been bothered by 3-seam mine drainage, but no collapsed entry has been found adjacent to his home. Laboratory water analysis during the complaint investigation confirmed that the water was mining related. The following is an account of the Menego complaint investigation. During the heavy flooding of July 8, 2001, water flooded the Menego basement and circumvented a drainage system installed under the house. The uncontrolled water then flowed across the surface into his neighbor's basement. The Menego residence, constructed in 1924, sits in a small hollow on a steep slope at an elevation of 1,560'. The drainage system appears to consist of very old terracotta tile pipe originating from an undisclosed location and follows an undetermined route. During the flood, the water erupted from underneath into the subsurface basement entrance. Mr. Menego removed the concrete slab and used grout to force the water back into the pipe. At the time of inspection the flow was estimated at 10 gpm. There were no visible mine openings or surface drainage in the hollow. The home above Menego had a fill installed across the hollow, for a driveway to the house. According to available mining information, the Poca 3 seam elevation is near the same elevation as the Menego house. It was surmised that this water is a mixture of drainage off the coal seam and natural subsurface hollow drainage.

Mrs. Betty Sue Crotty, 938 Poplar Street, Mullens, WV 25882 (304-294-4707), has three of the collapsed portals above her residence and a rental home that she owns.

The attached map also outlines the Harrison Goad Site. Three collapsed portals exist at the site. The drainage periodically flows over his driveway and beneath his home.

Additional AML related sites located during a recent site investigation are also included and are shown on the attached map.

DPE – The Kevin Grogg residence located in Lost Branch, is being negatively affected and endangered by a small abandoned refuse pile located upstream. During the July 2001 flood event, runoff from the Lost Branch eroded the toe, washing refuse into the stream channel, which then plugged highway culverts, and was deposited in yards and blocked roads. The WVDOT has since cleaned the culvert and reopened the road. However, the significant erosion has left the refuse pile in an unstable configuration. (Kevin Grogg, 1230 Poplar Street, Mullens, WV 25882).

Three open portals are located in the Bill's Branch area of Mullens. The portals are subject to unauthorized entry by local residents.

Preliminary design documents will be due 90 days from the issuance of the Purchase Order.

If changes to the original contract become necessary, a formal contract change order will be required. Prior to any work being performed, the change must be negotiated and approved by the State, the Agency and the firm. An approved contract change order is defined as one approved by the Purchasing Division and approved as to form by the West Virginia Attorney General's Office prior to the effective date of such amendment. **NO CHANGE SHALL BE IMPLEMENTED BY THE FIRM UNTIL THE FIRM RECEIVES AN APPROVED WRITTEN CHANGE ORDER.**

3.4.14 *Invoices, Progress Payments, & Retainage:*

The Firm shall submit invoices, in arrears, to the Agency at the address on the face of the purchase order labeled "Invoice To" pursuant to the terms of the contract. Progress payments may be made at the option of the Agency based on percentage of work completed if so defined in the final contract. Any provision for progress payments must also include language for a minimum 10% retainage until the final deliverable is accepted.

If progress payments are permitted, firm is required to identify points in the work plan at which compensation would be appropriate. Progress reports must be submitted to Agency with the invoice detailing progress completed or any deliverables identified. Payment will be made only upon approval of acceptable progress or deliverables as documented in the firm's report. Invoices may not be submitted more than once monthly and State law forbids payment of invoices prior to receipt of services.

The firm will invoice for completed work on an approved WVDEP form. If the purchase order has more than one project, a separate invoice must be provided for each project.

3.4.15 *Liquidated Damages:*

According to West Virginia State Code §5A-3-4(8), firm agrees that liquidated damages shall be imposed at the rate of N/A per workday, for failure to provide deliverables at the agreed upon date identified in the final contract. PART 4 EVALUATION & AWARD

4.1 Evaluation and Award Process:

- a) Expressions of Interest will be evaluated and awarded in accordance with **§5G-1-3 "Contracts for architectural and engineering services; selection process where total project costs are estimated to cost two hundred fifty thousand dollars or more."**

"In the procurement of architectural and engineering services for projects estimated to cost two hundred and fifty thousand dollars or more the director of purchasing shall encourage such firms engaged in the lawful practice of the profession to submit an expression of interest, which shall include a statement of qualifications, and performance data and may include anticipated concepts and proposed methods of approach to the project. All such jobs shall be announced by public notice published as a Class II legal advertisement in compliance with the provisions of article three [§59-3-1et seq.] A committee comprised of three to five representatives of the agency initiating the request shall evaluate the statements of qualifications and performance data and other material submitted by the interested firms and select three firms which in their opinion are the best qualified to perform the desired service. Interviews with each firm selected shall be conducted and the committee shall

The committee shall then rank in order of preference no less than three professional firms deemed to be the most highly qualified to provide the services required, and shall commence scope of service and price negotiations with the highest qualified professional firm for architectural or engineering services or both. Should the agency be unable to negotiate a satisfactory contract with the professional firm considered to be the most qualified, at a fee determined to be fair and reasonable, price negotiations with the firm of second choice shall commence. Failing accord with the second most qualified professional firm, the committee shall undertake price negotiations with the third most qualified professional firm.
