RE: Expression of Interest

Engineering Services Required for the Brownton (McCord) Landslide Design

DEP14515

Gentlemen:

GAI Consultants, Inc. (GAI) welcomes the opportunity to submit our proposal in response to your Request for Expression of Interest DEP14515 to provide professional engineering services. These services will result in the development of mapping, engineering drawings, contract specifications, and other contract documents required for **Brownton (McCord) Landslide Design** project in Barbour County, West Virginia.

GAI is exceptionally well qualified to provide the State with the above referenced services offered at the most favorable terms from both a technical and cost standpoint. The work under this contract will be performed in our Charleston, West Virginia office. The Charleston office has provided the State with quality engineering services for the abatement of problems arising from abandoned mine lands since opening in 1985. We have served the State on previous West Virginia Department of Environmental Protection – Abandoned Mine Land (WVDEP-AML) openend contracts and other contracts from 1986 to the present. As a result of this long-term experience, GAI can provide the required expertise, continuity and conformance to program guidelines established by the WVDEP-AML.

GAI welcomes you to visit our facilities located at 500 Summers Street, 3rd Floor, Charleston, West Virginia 25301.

GAI has:

- on staff four West Virginia registered civil and mining engineers who will review, stamp, and sign all work and contract documents.
- available staff of civil and mining engineers, CADD operators, surveyors, geologists, and biologists with extensive experience in reclamation engineering, hydrology, and geology; and
- extensive experience in surface and underground coal mining, environmental, ecological principles, stream restoration and mitigation, and contract administration.

In summary, GAI will provide the most favorable terms as a result of:

- Exceptional qualifications/previous 20 years of in-state AML experience,
- Local, Charleston presence with excellent access to the project site and AML offices, and
- Efficient and experienced personnel.

We look forward to continuing our relationship with WVDEP-AML.

Sincerely,

GAI Consultants, Inc.

Charles F. Straley, P.E.

GENERAL TERMS & CONDITIONS REQUEST FOR QUOTATION (RFQ) AND REQUEST FOR PROPOSAL (RFP)

- 1. Awards will be made in the best interest of the State of West Virginia.
- 2. The State may accept or reject in part, or in whole, any bid.
- 3. All quotations are governed by the West Virginia Code and the Legislative Rules of the Purchasing Division.
- 4. Prior to any award, the apparent successful vendor must be properly registered with the Purchasing Division and have paid the required \$125 fee.
- 5. All services performed or goods delivered under State Purchase Order/Contracts are to be continued for the term of the Purchase Order/Contracts, contingent upon funds being appropriated by the Legislature or otherwise being made available. In the event funds are not appropriated or otherwise available for these services or goods, this Purchase Order/Contract becomes void and of no effect after June 30.
- 6. Payment may only be made after the delivery and acceptance of goods or services.
- 7. Interest may be paid for late payment in accordance with the West Virginia Code.
- 8. Vendor preference will be granted upon written request in accordance with the West Virginia Code.
- 9. The State of West Virginia is exempt from federal and state taxes and will not pay or reimburse such taxes.
- 10. The Director of Purchasing may cancel any Purchase Order/Contract upon 30 days written notice to the seller.
- 11. The laws of the State of West Virginia and the *Legislative Rules* of the Purchasing Division shall govern all rights and duties under the Contract, including without limitation the validity of this Purchase Order/Contract.
- 12. Any reference to automatic renewal is hereby deleted. The Contract may be renewed only upon mutual written agreement of the parties.
- 13. BANKRUPTCY: In the event the vendor/contractor files for bankruptcy protection, this Contract may be deemed null and void, and terminated without further order.
- 14. HIPAA BUSINESS ASSOCIATE ADDENDUM: The West Virginia State Government HIPAA Business Associate Addendum (BAA), approved by the Attorney General, and available online at the Purchasing Division's web site (http://www.state.wv.us/admin/purchase/vrc/hipaa.htm) is hereby made part of the agreement. Provided that, the Agency meets the definition of a Cover Entity (45 CFR §160.103) and will be disclosing Protected Health Information (45 CFR §160.103) to the vendor.
- 15. WEST VIRGINIA ALCOHOL & DRUG-FREE WORKPLACE ACT: If this Contract constitutes a public improvement construction contract as set forth in Article 1D, Chapter 21 of the West Virginia Code ("The West Virginia Alcohol and Drug-Free Workplace Act"), then the following language shall hereby become part of this Contract: "The contractor and its subcontractors shall implement and maintain a written drug-free workplace policy in compliance with the West Virginia Alcohol and Drug-Free Workplace Act, as set forth in Article 1D, Chapter 21 of the West Virginia Code. The contractor and its subcontractors shall provide a sworn statement in writing, under the penalties of perjury, that they maintain a valid drug-free work place policy in compliance with the West Virginia and Drug-Free Workplace Act. It is understood and agreed that this Contract shall be cancelled by the awarding authority if the Contractor: 1) Fails to implement its drug-free workplace policy; 2) Fails to provide information regarding implementation of the contractor's drug-free workplace policy at the request of the public authority; or 3) Provides to the public authority false information regarding the contractor's drug-free workplace policy."

INSTRUCTIONS TO BIDDERS

- 1. Use the quotation forms provided by the Purchasing Division.
- 2. SPECIFICATIONS: Items offered must be in compliance with the specifications. Any deviation from the specifications must be clearly indicated by the bidder. Alternates offered by the bidder as EQUAL to the specifications must be clearly defined. A bidder offering an alternate should attach complete specifications and literature to the bid. The Purchasing Division may waive minor deviations to specifications.
- 3. Complete all sections of the quotation form.
- 4. Unit prices shall prevail in case of discrepancy.
- 5. All quotations are considered F.O.B. destination unless alternate shipping terms are clearly identified in the quotation.
- 6. BID SUBMISSION: All quotations must be delivered by the bidder to the office listed below prior to the date and time of the bid opening. Failure of the bidder to deliver the quotations on time will result in bid disqualifications: Department of Administration, Purchasing Division, 2019 Washington Street East, P.O. Box 50130, Charleston, WV 25305-0130

STATE OF WEST VIRGINIA Purchasing Division

PURCHASING AFFIDAVIT

VENDOR OWING A DEBT TO THE STATE:

West Virginia Code §5A-3-10a provides that: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

PUBLIC IMPROVEMENT CONTRACTS & DRUG-FREE WORKPLACE ACT:

If this is a solicitation for a public improvement construction contract, the vendor, by its signature below, affirms that it has a written plan for a drug-free workplace policy in compliance with Article 1D, Chapter 21 of the **West Virginia Code**. The vendor **must** make said affirmation with its bid submission. Further, public improvement construction contract may not be awarded to a vendor who does not have a written plan for a drug-free workplace policy in compliance with Article 1D, Chapter 21 of the **West Virginia Code** and who has not submitted that plan to the appropriate contracting authority in timely fashion. For a vendor who is a subcontractor, compliance with Section 5, Article 1D, Chapter 21 of the **West Virginia Code** may take place before their work on the public improvement is begun.

ANTITRUST:

In submitting a bid to any agency for the state of West Virginia, the bidder offers and agrees that if the bid is accepted the bidder will convey, sell, assign or transfer to the state of West Virginia all rights, title and interest in and to all causes of action it may now or hereafter acquire under the antitrust laws of the United States and the state of West Virginia for price fixing and/or unreasonable restraints of trade relating to the particular commodities or services purchased or acquired by the state of West Virginia. Such assignment shall be made and become effective at the time the purchasing agency tenders the initial payment to the bidder.

I certify that this bid is made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership or person or entity submitting a bid for the same materials, supplies, equipment or services and is in all respects fair and without collusion or fraud. I further certify that I am authorized to sign the certification on behalf of the bidder or this bid.

LICENSING:

Vendors must be licensed and in good standing in accordance with any and all state and local laws and requirements by any state or local agency of West Virginia, including, but not limited to, the West Virginia Secretary of State's Office, the West Virginia Tax Department, West Virginia Insurance Commission, or any other state agencies or political subdivision. Furthermore, the vendor must provide all necessary releases to obtain information to enable the Director or spending unit to verify that the vendor is licensed and in good standing with the above entities.

CONFIDENTIALITY:

The vendor agrees that he or she will not disclose to anyone, directly or indirectly, any such personally identifiable information or other confidential information gained from the agency, unless the individual who is the subject of the information consents to the disclosure in writing or the disclosure is made pursuant to the agency's policies, procedures and rules. Vendor further agrees to comply with the Confidentiality Policies and Information Security Accountability Requirements, set forth in http://www.state.wv.us/admin/purchase/privacy/noticeConfidentiality.pdf.

Under penalty of law for false swearing (**West Virginia Code** §61-5-3), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.

Remediation/Mine Reclamation Engineering? Is your firm experienced in Abandoned Mine Land.

Description and Number of Projects: GAI has completed 119 projects for the WV-AML Program (18 in projects include but are not limited to design of abandoned refuse piles, abandoned portals, demolition of the last five years). GAI has completed over 150 projects for all AML Programs (WV, PA, VA, MD, OSM). facilities, design of drainage control structures, and revegetation plans.

0 N B. Is your firm experienced in Soil Analysis?

Description and Number of Projects: GAI has completed many (over 200) projects that required soil of the 119 WV-AML projects required some type of soil analysis. GAI has completed some analysis in-house and used analysis for revegetation plans, acid/base counts, foundation, stability analysis, engineering properties, etc. subconsultants at other times depending on requirements.

N N C. Is your firm experienced in hydrology and hydraulics?

event, water transmission, sediment control, etc. GAI is also experienced and trained in natural stream restoration hydrology and hydraulics including projects that were AML/mining related. Most of the 119 WV-AML projects required hydrology and hydraulic evaluations and design for drainage control structures, mine hydraulic level, mainstream Description and Number of Projects: GAI has completed numerous (300+) projects which involve and wetland mitigation.

0N

Does your firm produce its own Aerial Photography and Develop Contour Mapping?

We do not anticipate aerial photography Description and Number of Projects: GAI has produced contour mapping on most of its 119 AML We subcontract our aerial photography, if none is available. being needed to complete this project. projects.

2

Is your firm experienced in domestic waterline design? (Include any experience your firm has in evaluation of aquifer degradation as a result of mining.) r]

Description and Number of Projects: GAI has completed over 70 projects involving domestic waterline design of which 42 were for the WV-AML program. This has included aquifer degradation evaluation and waterline design, Public Service District interaction, PSC requirements, Health Department permits, etc. to include field surveys, field inspection, and public hearings and meetings. Aquifer degradation and waterline design was the primary components of these projects.

O N

F. Is your firm experienced in Acid Mine Drainage Evaluation and Abatement Design?

designs of which 25 were for the WV-AML program; however, AMD was a consideration on most of its 119 WV-AML projects. GAI is noted and published for some of its designs and projects to include grouting programs, SAP installations and Description and Number of Projects: GAI has completed over 100 AMD evaluations and abatement other innovative abatement designs.

Logan (Marcum) Drainage Emergency Project, Logan County, West Virginia The scope of work involves emergency evaluation and investigation to develop a method to collect and discharge the seepage from the coal seam and conveyance to a downstream drainage system. Construction plans and specifications were developed.	West Virginia Division of Environmental Protection, Abandoned Mine Lands Program Charleston, West Virginia	\$47 (Fee)	2006	YES
Bud/Alpoca Waterline Extension Feasibility Study, Wyoming County, West Virginia The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report.	West Virginia Division of Environmental Protection, Abandoned Mine Lands Program Charleston, West Virginia	\$32 (Fee)	2006	NA
Nuriva/Maben Waterline Extension Feasibility Study, Wyoming County, West Virginia The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report.	West Virginia Division of Environmental Protection, Abandoned Mine Lands Program Charleston, West Virginia	\$32 (Fee)	2006	NA

Herndc 'eights Waterline Extens Feasibility Study Wyoming County, West Virginia The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report.	West Virginia Division of Environmental Protection, Abandoned Mine Lands Program Charleston, West Virginia	\$32 (Fee)	2006	₹N.
Handley/Upper Creek Drainage Project, Kanawha County, West Virginia The reclamation plan included dewatering the underground impoundment(s) and creating diversion ditches to redirect the drainage around structures to the nearby stream. Regrading the areas behind the retaining wall, revegetating, and providing proper drainage for all disturbed areas is also included in the plan.	West Virginia Division of Environmental Protection, Abandoned Mine Lands Program Charleston, West Virginia	\$61 (Fee)	2005	YES
Latrobe (Gibson) Landslide Emergency Project, Logan County, West Virginia The scope of work involved emergency evaluation and investigation to develop alternatives to reduce slopes, eliminate instability, and provide for controlled drainage. Once an alternative was selected, construction plans and specifications were developed.	West Virginia Division of Environmental Protection, Abandoned Mine Lands Program Charleston, West Virginia	\$76 (Fee)	2005	YES

Ven's Maintenance Projec Harrison, County, West Virginia The scope of work involves stabilizing the slopes and provide for controlled drainage. It is GAI's initial approach to the abatement of the landslide is to provide a proposed reclamation plan that will grade the slide in place as much as practical and not conduct a total removal of material.	West Virginia Division of Environmental Protection, Abandoned Mine Lands Program Charleston, West Virginia	\$135 (Fee)	2007	NO.
Community of Preston - State Route 72 Waterline, Preston County, West Virginia The scope of work included the preparation of construction documents for a water transmission line. The total length of waterline is approximately 1.1 miles.	West Virginia Division of Environmental Protection, Abandoned Mine Lands Program Charleston, West Virginia	\$39 (Fee)	2007	YES
Kingwood 52/6 Water Supply Extension, Preston County, West Virginia The scope of work included the preparation of construction documents for a water transmission line. Included in the distribution system is a 96,000 gallon water storage and a booster pump station. The total length of waterline is approximately 13 miles.	West Virginia Division of Environmental Protection, Abandoned Mine Lands Program Charleston, West Virginia	\$121 (Fee)	2005	YES
Helen Portals, Raleigh County, West Virginia The scope of work included the preparation of construction documents for four sites, consisting of abandoned mine portals, unstable refuse piles, small impoundment, and demolition of a mining related structure. The project also included re-establishing a stream by natural stream techniques.	West Virginia Division of Environmental Protection, Abandoned Mine Lands Program Charleston, West Virginia	\$71 (Fee)	2004	YES

INTRODUCTION

GAI Consultants, Inc., (GAI) proposes to provide engineering services to the West Virginia Department of Environmental Protection, Office of Abandoned Mine Lands and Reclamation (WVDEP - AML). These services will result in the development of mapping, engineering drawings, contract specifications, and other contract documents as may be required for the letting of construction project for the **Brownton (McCord) Landslide Design** project. The project will include construction of mine seals, landslide remediation, drainage and revegetation.

This Expression of Interest is **formatted** in a clear, concise manner with the briefest description as possible conveying our expertise and knowledge. All components of the proposal follow in narrative and highlighted sections and as outlined in the AML Consultant Confidential Qualification Questionnaire (CCQQ).

The highlighted sections following are:

- Bidders Experience
- Subcontractors Discussion on:
 - Surveying and Mapping
 - Subsurface Investigation
 - Laboratory Services
- Design Engineering and Contract Document Preparation
- Qualifications of Personnel
- Corporate Specialized Experience and Demonstrated Experience
- Management Plan and Location of Facilities

GAI's Charleston, West Virginia office is exceptionally well qualified to provide the State with the above referenced services. GAI's Charleston office has a staff of **Four Professional Engineers**, **One Professional Surveyor**, and a team of geologists/hydrologists, environmental scientists, biologists, technicians, CADD operators, word processor operators, secretaries, and draftspersons. GAI's Charleston office has served the WVDEP on **previous** AML open-end and other contracts from 1986 to the present as well as several other pre-1986 AML projects. These **projects** include:

- Coal refuse pile reclamation,
- Coal refuse reprocessing evaluations,
- Stream Restoration.
- Acid mine drainage (AMD) evaluation and treatment,
- Landslide investigations and repair,
- Demolition plans,
- Mine portal reclamation,
- Burning coal refuse piles, coal seams and underground mines,
- Subsidence investigations and stabilization plans,
- Wetlands replacement and development.
- Environmental liability assessments,
- Water quality surveys and feasibility reports,

- Water supply system reviews, and
- Water supply system designs.

GAI also provides engineering services to the mining industry including:

- Stream Restoration.
- Design of coal refuse disposal piles including impoundment structures,
- Hydrologic/hydraulic design of erosion and sediment control devices,
- Soil analysis and revegetation plans,
- Coal refuse reprocessing evaluations including mining and reclamation plans,
- Construction monitoring services,
- Design of excess overburden disposal fills, both conventional and durable rock fills,
- Detailed reclamation plans.
- Detailed subsurface/geotechnical investigations for foundation, subsidence, slope stability, and reserve analysis,
- Mine closure plans/post-reclamation land use,
- Permitting for deep and surface mine applications, NPDES, U.S. Army Corps of Engineers Section 404 permits, West Virginia Public Lands permits, air pollution control permits, etc.,
- Probable hydrologic consequences (PHC) statement preparation,
- Reclamation/environmental liability assessments in conjunction with property transfers, and
- Subsidence control plans.

As a result of this experience, GAI will provide the required expertise to complete reclamation projects in a timely, economical, and efficient manner and will not require any subconsultants to be utilized on this project. Our direct knowledge of the AML program guidelines and personnel will also benefit the State.

GAI will perform the work under this contract in our Charleston, West Virginia office.

BIDDER EXPERIENCE

GAI Consultants, Inc., provides consulting services in geotechnical engineering, civil engineering, environmental engineering, mining-related design engineering, geology, hydrogeology, nvironmental science, economics, transportation systems and land-use planning, urban and site engineering, structural engineering, engineering mechanics, agronomy, anthropology and archaeology, and various related professional disciplines. The firm has experienced steady growth in both size and capabilities; and for the past fourteen years has been **rated among the top 200 engineering** and environmental firms in the nation by Engineering News Record (ENR).

GAI Consultants, Inc., is a full service civil, environmental and mining engineering firm headquartered in suburban Pittsburgh, Pennsylvania, with offices in Charleston, West Virginia; Philadelphia, Pennsylvania; Ft. Wayne, Indiana; Orlando and Jacksonville, Florida; Cincinnati, Ohio; and Richmond, Virginia. Established in 1958, GAI and its subsidiaries comprise an organization of over 500 engineers, scientists, and support personnel. With our in-house soils laboratories, surveying services and competent staff of professionals, GAI offers a comprehensive approach to engineering problems requiring a wide range of interdisciplinary skills. In the past 40+ years, we have designed and monitored the construction of numerous facilities and have conducted thousands of related geotechnical and hydrological investigations, many of which involved reclamation of abandoned mine lands. By successfully completing so many reclamation projects, GAI has obtained "expertise" status on an international basis for many type projects. For example, GAI recently completed a very large investigation into delineating the extent of the world's largest mine fire in the country of India. GAI was selected for the country of India mine fire project based upon qualifications only.

GAI's Charleston, West Virginia office opened in 1985. Since opening, our Charleston office has experienced steady growth. Currently, the Charleston office has four registered professional engineers and other experienced disciplines on staff. Clients served by the Charleston office include mining and industrial companies; federal, state, and local governmental agencies; engineers and architects; and private developers.

GAI has successfully served the WVDEP on previous AML contracts from 1986 to the present. We propose to utilize most of the same Charleston and Pittsburgh staff. See attached CCQQ.

Surveying and Mapping

To provide cost efficient and timely services for this contract, surveying services will be conducted by GAI's in-house surveyors. GAI routinely performs the following types of surveys which are relevant to the work possibly associated with this project.

- Aerial mapping control surveys including horizontal and vertical control and reference monuments.
- Topographic and planimetric surveys,
- Construction surveys including work layout staking, establishment of baselines and cross sections, profiles, etc.,
- Construction quantity measurement surveys,
- Detailed as-built documentation surveys,
- Property surveys including both surface and mineral estates, and
- Oil and gas surveying.

GAI presently operates up to three survey crews. GAI has made a commitment to provide timely surveying services.

GAI's survey crew utilizes Nikon DTM-450 and Nikon DTM-550 Total Stations. This is complimented by data collectors and Autocad workstations to generate plan views, profiles, cross sections and other engineering drawings. These CAD-generated drawings can then be utilized by GAI's CAD-drafting/design department for design.

All surveys conducted by GAI are completed under the supervision of a West Virginia licensed land surveyor. Surveying will also be performed under the general direction of a West Virginia registered professional engineer, the GAI project engineer and project manager. All surveys and mapping are completed to the standards as outlined by the National Map Standards, as well as other applicable quality standards to include AML specifications.

Subsurface Investigation

Based upon the information provided in the Expression of Interest, GAI is not proposing the use of any subsurface investigation subcontractor. If a subsurface exploration subcontractor is required, we have relationships with several drilling firms to provide an economical and available contractor to complete the project. Borrow area investigations will be conducted by GAI personnel, as has been the case in past projects.

Laboratory Services

GAI operates full-service soils and materials laboratories in our Philadelphia, Pennsylvania office.

GAI has the capability to analyze natural materials such as soil and rock, manufactured materials such as concrete and steel, and industrial waste materials. The soils and industrial waste analysis capabilities include classification tests, moisture content, grain size analysis, Atterberg limits, specific gravity, unit weight determinations, and chemical analyses. The characteristic test capabilities include relative density equipment for sample particle sizes to 3 inches in diameter; apparatus for constant- and falling-head permeability measurements in both horizontal and vertical directions, and for moisture-density relationships for both modified and standard densities. The compressibility of materials can be determined in a 2.5-inch diameter, one-dimensional consolidometer or a 2.5-inch diameter, one-dimensional Anteus consolidometer with back pressure and pore pressure capability. Also, volumetric consolidation can be determined isotropically or anisotropically. The strength parameters of soils and industrial/coal waste materials can be determined by unconfined compression, direct shear, or triaxial shear tests. The rock-testing capabilities include classification by visual inspections and petrographic analysis, unconfined compression, direct shear, and triaxial shear tests. GAI also maintains several nuclear densometer testing gauges to monitor field compaction.

Based upon the information provided in the Expression of Interest, GAI is not proposing the use of any other laboratory services.

Design Engineering and Contract Document Preparation

GAI has extensive experience in design engineering and the preparation of contract documents for AML reclamation and related projects. GAI prides itself in development of **simple**, **yet innovative**, **cost-efficient designs** that are easily implemented in the field during construction. Our experience gained on various types of West Virginia AML projects during the past 22 years will ensure this quality engineering continues.

GAI has prepared **over 80** construction packages for WVDEP-AML since 1985. Other West Virginia AML projects completed by GAI did not result in the preparation of construction drawings such as water quality surveys and feasibility reports and landslide investigations where it was determined that the problems were not mining related. GAI is completely familiar with WVDEP's guidelines for preparing construction drawings, technical specifications, and supporting documents. We are able to draw on a large collection of typical construction details contained within our computer aided drafting (CAD) library for the above types of AML projects. GAI also has various master specifications which we are able to draw from to create project specific specifications.

During the design engineering phase of our projects, GAI develops alternatives for the reclamation program and schedules meetings with WVDEP-AML to review options and select a mutually acceptable plan. We feel that this approach results in a more workable plan at an ultimately lower cost. We also perform a constructability review of each construction package by technical staff familiar with actual methods of construction. This review also expedites the overall reclamation plan.

QUALIFICATIONS OF PERSONNEL

GAI has a staff of over 500 technical support personnel. GAI's staff is particularly well suited to investigate problems associated with abandoned mine lands. We propose to utilize a staff of engineers (civil and mining), geologists, biologists, surveyors, and CADD operators to conduct the investigatory and design work backed by a group of management professionals.

- **Mr. C. Elwood Penn, IV, P.E.**, Managing Officer will serve as Contract Administrator in the Charleston office. Mr. Penn has worked with the industry and their related problems for **25 years**. Mr. Penn is very knowledgeable with WVDEP AML guidelines and project expectations. His qualifications will result in direct benefits to the State in terms of quality and cost efficient completion of the project.
- **Mr. Charles F. Straley, P.E.** will serve as a Project Manager. Mr. Straley has managed and participated in the design and development of reclamation plans and feasibility studies for over **45** abandoned mine land projects for the WVDEP, Abandoned Mine Lands and Reclamation Program. Mr. Straley has a complete understanding of WVDEP AML guidelines, specifications, and project expectations. He has a good working relationship with many of the AML staff.
- **Mr. James A. Hemme, P.E.** will serve as a Project Manager. Mr. Hemme has participated in the design and development of reclamation plans and feasibility studies for over **five (5)** abandoned mine land projects for the WVDEP, Abandoned Mine Lands and Reclamation Program. Mr. Hemme has a complete understanding of WVDEP AML guidelines, specifications, and project expectations. He has a good working relationship with many of the AML staff.
- **Mr. Mark D. Young, P.E.** will serve as a Project Engineer. Mr. Young has participated in the design and development of reclamation plans and feasibility studies for **eight (8)** abandoned mine land projects for the WVDEP, Abandoned Mine Lands and Reclamation Program. Mr. Young has a complete understanding of WVDEP AML guidelines, specifications, and project expectations.
- **Mr. Joseph A. Prine, E.I.** will serve as a Project Engineer. Mr. Prine has participated in the design and development of reclamation plans and feasibility studies for **three (3)** abandoned mine land projects for the WVDEP, Abandoned Mine Lands and Reclamation Program. Mr. Prine has a complete understanding of WVDEP AML guidelines, specifications, and project expectations.

All have relevant direct experience with mine reclamation, grading/drainage, feasibility studies, water study and design, stream restoration, and preparation of construction documents.

A team of staff engineers, geologists/hydrologists, environmental scientists, biologists, technicians, CADD operators, word processor operators, secretaries, and draftspersons will provide the expertise and manpower to complete the project. For special needs we can call on planners, land use specialists, natural resource specialists, soil scientists, archaeologists, architectural historians, and structural and material engineers.

CORPORATE SPECIALIZED EXPERIENCE AND DEMONSTRATED ABILITIES

GAI has provided a wide variety of services to governmental agencies related to the reclamation of AML problems. GAI has served the WVDEP on open-end and other contracts from 1986 to the present. We have also completed numerous projects for the Office of Surface Mining, Reclamation and Enforcement (OSMRE) and AML programs in Pennsylvania, Ohio, Maryland, and Virginia.

MANAGEMENT PLAN & LOCATION OF FACILITIES

Management Plan

GAI's proposed project management plan is presented on Figure 1. The work will be performed in **GAI's Charleston, West Virginia office** which will allow ready access to the project area. Assistance, if and when needed will be provided by staff located in the Pittsburgh, Pennsylvania office of GAI. GAI's Charleston location is also convenient with respect to the WVDEP's Charleston location.

GAI's professional, technical and support staff have extensive experience on AML and related design projects and are extremely well qualified to serve the WVDEP on this contract. GAI stands ready to commit the personnel and resources required to complete the project in a timely, technically sound and cost efficient manner.

Contract Administration will be provided by **Mr. C. Elwood Penn, IV, P.E.** as shown in Figure 1. Mr. Penn will be responsible for overall management and performance of the project. He will review the work directive, visit the site along with the WVDEP to better familiarize himself with site conditions and work requirements accompanied by Mr. Gray or other appropriate staff, and then guide the preparation of the scope of work and cost proposal by GAI staff. He will also generally supervise the work in progress and review work products at intermediate points and finally prior to submittal to the WVDEP. In addition, Mr. Fioravante will be in charge of any contractual negotiations necessary through the process of the project.

Project Management will be provided by **Mr. Charles F. Straley**, **P.E.**, **P.S. or Mr. James A. Hemme**, **P.E.** as shown in Figure 1. Mr. Straley will be responsible for the day to day management and performance of the project. He will review the work directive and prepare the scope of work and cost proposal. A written proposal including a detailed cost estimate (manhours and expenses associated with the project) will then be prepared and submitted to the WVDEP for their review. Upon WVDEP's approval of the proposal, the Project Manager will arrange for the start of the work. Included will be project staffing, arrangement and detailing of the scope of services to be provided by GAI, and review of project budget and schedule. The Project Manager will generally supervise the work in progress and review work products at intermediate points and finally prior to submittal to the WVDEP and will be responsible for maintaining liaison with the WVDEP Project Manager including project status reports, as required.

Day-to-day project activities will be performed under the direction of the Project Manager by one of the Project Engineers (Messrs. Mark D. Young, P.E. and Joseph A. Prine, E.I.) as shown in Figure 1. They will be responsible for guidance of the GAI staff. Their main activities will include development of detailed step-by-step project work plans to ensure the project activities are completed on-budget and on-time, review of the work products at intermediate points and at project completion, providing guidance and direction to project staff, as well as engineering and design work.

GAI's large experienced staff permits us to respond quickly, provides flexibility, and permits high level input to the project's staff from in house experts. However, our method of staffing projects, as evidenced by our performance on prior projects for WVDEP-AML, is to assign a small team with total responsibility for completion of the work to the clients satisfaction and budget. Where necessary the team can draw on the expertise available within GAI's large staff.

Project Budget Control

The Project Manager will be responsible for monitoring the project budget. GAI's staff submits time sheets on a weekly basis. All charges including labor hours and other project expenses to a particular project are compiled in our data center and are distributed to the Project Manager by Wednesday of the following week. In this manner, we can keep close track of our project costs.

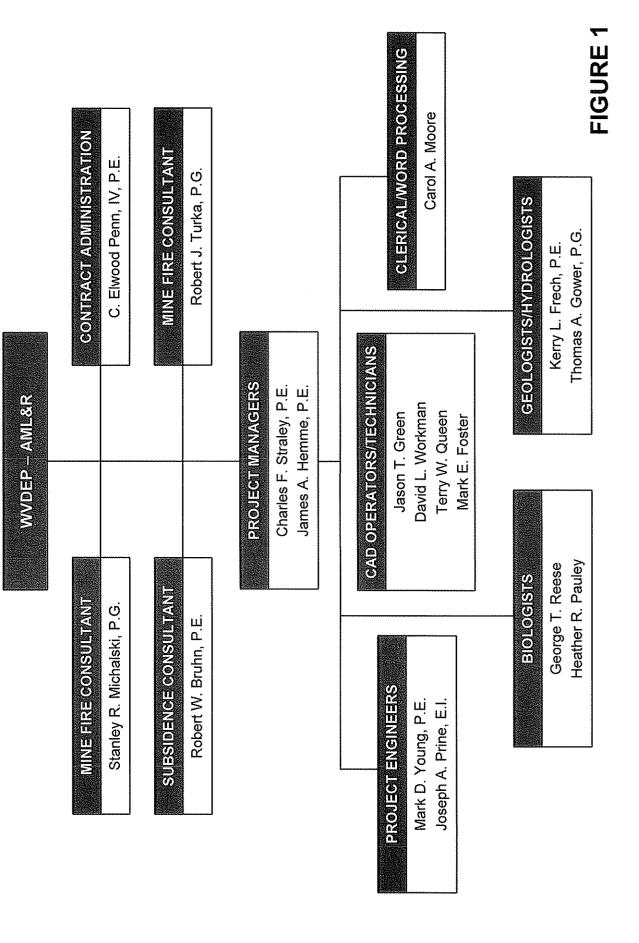

Schedule Control

Direct responsibility for schedule control lies with the Project Manager. Initially, the Project Manager will review the work directive schedule requirements to see if they can be complied with given the anticipated scope of work. As the project progresses, the Project Manager will monitor progress and compare it with the established schedule on a weekly basis. In this manner, the Project Manager can make staff adjustments to maintain the project schedule. If circumstances develop that make it impossible to maintain the project schedule, the Project Manager will contact the WVDEP Project Manager to develop a mutually acceptable adjustment to the schedule.

Location of Facilities

GAI proposes to complete work under this contract in our **Charleston**, **West Virginia office**. We feel that our close proximity to the WVDEP's Charleston office and the project area will allow the project to be completed in a timely, efficient manner.

PROJECT MANAGEMENT PLAN

AML PROJECTS WEST VIRGINIA DIVISION OF ENVIRONMENTAL PROTECTION

Project No.:

Location:

E080354.02

Title:

Wolfpen (McBurney) Landslide Kanawha County, West Virginia

Tasks:

The scope of work involves stabilizing a slope, providing seals for collapsed portals, and providing controlled drainage. Construction plans and technical

specifications were developed.

Project No.:

E08054.01

Title:

Heizer Creek (Lett-Zitselberger) Drainage

Location:

Putnam County, West Virginia

Tasks:

The scope of work involves stabilizing a slope, providing seals for collapsed portals, and providing controlled drainage. Construction plans and technical

specifications were developed.

Project No.:

E070607.00

Title:

Hominy Creek Area Waterline Extension Feasibility Study

Location:

Nicholas County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

Project No.:

E060330.10

Title:

Logan (Marcum) Drainage Emergency Project

Location:

Logan County, West Virginia

Tasks:

The scope of work involves emergency evaluation and investigation to develop a

method to collect and discharge the seepage from the coal seam and conveyance to a downstream drainage system. Construction plans and

specifications were developed.

Project No.:

E060185.10

Title:

Bud/Alpoca Waterline Extension Feasibility Study

Location:

Wyoming County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

E060184.10

Title:

Nuriva/Maben Waterline Extension Feasibility Study

Location:

Wyoming County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

Project No.:

E060183.10

Title:

Herndon Heights Waterline Extension Feasibility Study

Location:

Wyoming County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

Project No.:

E050470.10

Title:

Handley/Upper Creek Drainage Project

Location:

Kanawha County, West Virginia

Tasks:

The reclamation plan included dewatering the underground impoundment(s) and creating diversion ditches to redirect the drainage around structures to the nearby stream. Regrading the areas behind the retaining wall, revegetating, and providing proper drainage for all disturbed areas is also included in the plan.

Project No.:

E050287.10

Title:

Latrobe (Gibson) Landslide Emegency Project

Location:

Logan County, West Virginia

Tasks:

The scope of work involved emergency evaluation and investigation to develop alternatives to reduce slopes, eliminate instability, and provide for controlled

drainage. Once an alternative was selected, construction plans and

specifications were developed.

Project No.:

E050212.10

Title:

Ven's Run Maintenance Project Harrison, County, West Virginia

Location: Tasks:

The scope of work involves stabilizing the slopes and provide for controlled

drainage. It is GAI's initial approach to the abatement of the landslide is to provide a proposed reclamation plan that will grade the slide in place as much as practical and

not conduct a total removal of material.

E050126.10

Title:

War Waterline Extension Feasibility Study

Location:

McDowell County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

Project No.:

E050123.10

Title: Location: Clark's Gap Waterline Extension Feasibility Study Mercer and Wyoming Counties, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

Project No.:

2004-134-10

Title:

War (Dash) Impoundment

Location:

McDowell County, West Virginia

Tasks:

The scope of work included providing aerial mapping and ground survey for verification of two sites consisting of a small impoundment, several mine portals, and coal refuse disposal. In addition, stability analyses were performed on various scenarios for the elimination of the impoundment including subsurface

investigation.

Project No.:

2003-485-10

Title:

Whites Run Highwall and Portal Randolph County, West Virginia

Location: Tasks:

The scope of work consist of preparing construction documents for the reclamation of 6,000 linear feet of highwall, three deep mine portals, a coal refuse spoil area, and treatment of acid mine drainage (AMD). The treatment of the AMD will utilize passive treatment techniques. The project also includes reestablishment of a stream by natural stream techniques.

Project No.:

2003-439-10 Helen Portals

Title:

Raleigh County, West Virginia

Location: Tasks:

The scope of work included the preparation of construction documents for four

sites, consisting of abandoned mine portals, unstable refuse piles, small impoundment, and demolition of a mining related structure. The project also

included re-establishing a stream by natural stream techniques.

2003-174-10

Title:

Ned's Branch Impoundment (Phase II)

Location:

Mingo County, West Virginia

Tasks:

The scope of work included this preparation of construction documents for reclamation of the failed impoundment. The scope of work included regrading of refuse, eliminating impoundment capability, sealing of mine portals, stream restoration, highway relocation and construction management services for the

above activities.

Project No:

2003-154-10

Title:

Bearwallow Branch Refuse Pile McDowell County, West Virginia

Location: Tasks:

The scope of work included the preparation of construction documents for reclamation of seven sites. The various sites consist of unstable refuse piles, abandoned mine portals, small impoundments, and miscellaneous structures.

Project No.:

2002-282-10

Title:

Community of Preston - State Route 72 Waterline

Location:

Preston County, West Virginia

Tasks:

The scope of work included the preparation of construction documents for a water transmission line. The total length of waterline is approximately 1.1 miles.

Project No.:

2002-144-10

Title:

Anchor Road Waterpumping, Storage and Distribution Feasibility Study

Location:

Logan County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

Project No.:

2002-143-10

Title:

Standard, Paint Creek, Collinsdale Waterline Extension Feasibility Study

Location:

Kanawha County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

Project No.:

2002-138-10

Title: Location: McAlpin Eroding Dump - Phase II Raleigh County, West Virginia

Tasks:

The scope of work included the preparation of construction documents for eleven

sites. The sites consisted of ten coal refuse piles (one of which is burning),

numerous mine openings (both collapsed and open), old mine buildings, possible

AMD, and various mine related debris.

2001-489-10

Title: Location: McAlpin Eroding Dump - Phase I Raleigh County, West Virginia

Tasks:

The scope of work included the preparation of construction documents for six sites. The sites consisted of six coal refuse piles, numerous mine openings (both collapsed and open), old mine buildings, possible AMD, and various mine related

debris.

Project No.:

96-554-27

Title:

Kingwood 52/6 Water Supply Extension

Location:

Preston County, West Virginia

Tasks:

The scope of work included the preparation of construction documents for a water transmission line. Included in the distribution system is a 96,000 gallon water storage and a booster pump station. The total length of waterline is

approximately 13 miles.

Project No.:

96-554-26

Title:

Micajah Ridge - Herndon Heights/Itman Waterline Extension Feasibility Study

Location:

Wyoming County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

Project No.:

96-554-25

Title:

Water Feasibility Study, Glen Rogers Study Area

Location:

Wyoming County, West Virginia

Tasks:

Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the investigation in a report.

Project No.:

96-554-24

Title:

Rt. 20 / Gould Community Waterline Extension Feasibility Study

Location:

Upshur County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

96-554-23

Title:

Water Feasibility Study, Elkins/Buckhannon Study Area

Location:

Upshur County, West Virginia

Tasks:

Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the investigation in a report.

Project No.:

96-554-22

Title:

Laurel Creek Subdivision Subsidence

Location:

Raleigh County, West Virginia

Tasks:

Preparation of construction documents for the Laurel Creek Subdivision Subsidence project in Beckley, West Virginia. Project involved subsurface investigation (including borehole camera work); sampling of mine water; injection plan layout for grouting under over 40 residences; surface water drainage structure, preparation of technical specifications, drawings, and engineer's cost

estimate; and participation in pre-bid and pre-construction meetings.

Project No.:

96-554-21

Title: Location: Superior (PocaLand) Complex McDowell County, West Virginia

Tasks:

The assessment included a site reconnaissance, asbestos observations and sample analysis, lead-based paint observations and analysis, and limited surficial

soil sample analysis. The assessment was concluded in a report to aid in evaluating the existing subsurface soil quality in the area to better understand the

costs involved during reclamation efforts.

Project No.:

96-554-20

Title:

Washington Heights to Jeffrey Waterline Extension

Location:

Boone County, West Virginia

Tasks:

The project involved a technical review plans and specifications presented by the WVAWC as part of the Boone County Public Service District: Regional Water Supply System. The plans included a total of seven contracts. The scope of work was to identify areas of the contracts that were within project limits set by a Phase II Water Feasibility Study conducted for the WVDEP and to determine the

amount of the contract costs that were the responsibility of the WVDEP.

Included were field reconnaissance, review of plans, hydraulic calculations, and

cost estimating.

Project No.:

96-554-19

Title:

Water Feasibility Study, Gaymont, Edmond, and Winona Study Area

Location:

Fayette County, West Virginia

Tasks:

Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the investigation in a report.

96-554-17

Title:

Water Feasibility Study, Hominy Creek Study Area

Location:

Nicholas County, West Virginia

Tasks:

Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the investigation in a report.

Project No.:

96-554-16

Title:

Elk Creek / Verner Waterline Extension Feasibility Study

Location:

Logan County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing

the findings in a report.

Project No.:

96-554-15

Title:

Orlando Mining Facility

Location:

Gilmer County, West Virginia

Tasks:

The scope of work included preparation of a report identifying the results from an

investigation/evaluation of the facilities and equipment at the site. The

investigation included determining the value, usefulness and/or condition of the

facilities and equipment.

Project No.:

96-554-14

Title:

Scotch Hill / Miller Hill Water Supply Extension

Location:

Preston County, West Virginia

Tasks:

The scope of work included the preparation of construction documents for a water transmission line beginning at the existing hydropneumatic booster station. Included in the distribution system is 96,000 gallon water storage. The total

length of waterline is approximately 7.5 miles.

Project No.:

96-554-13

Title:

Camp Run AMD

Location:

Barbour County, West Virginia

Tasks:

The scope of work included the preparation of construction documents for two sites. The sites consisted of ten to fifteen mine portals and mine drainage seep locations, one pond (to be drained), concrete tramway abutments (and debris), coal refuse, and various areas of saturated soil from mine drainage (one of which

is sliding).

96-554-12

Title:

Mahan Tipple and Refuse Maintenance

Location:

Fayette County, West Virginia

Tasks:

The scope of work included the preparation of construction documents for the repair of a sliding reclaimed coal refuse pile. The project consisted of installing a

rock toe buttress and drainage channels

Project No.:

96-554-11

Title:

Johnsons Knob

Location:

Fayette County, West Virginia

Tasks:

The scope of work included the preparation of construction documents for four sites. The sites consisted of five coal refuse piles totaling approximately twenty acres, numerous mine openings (consisting of auger hole and portals, both collapsed and open), six old mine buildings, possible AMD, and various mine

related debris (including two old conveyors and a collapsed tipple).

Project No.:

96-554-10

Title:

Carolina Refuse

Location:

Marion County, West Virginia

Tasks:

The project consisted of two sites. The sites consisted of a refuse pile totaling approximately three acres, various non-mine related debris, and two concrete

mine shafts with some various debris.

Project No.:

96-554-09

Title:

Omega Mine Complex Project Monongalia County, West Virginia

Location: Tasks:

The project involved writing a final report to the Electric Power Research Institute to include a comparison of the pre- and post-injection water quality data, the

results of a post-construction benthic survey, and the results of an analysis of

data from injection operations.

Project No.:

96-554-08

Title:

Omega Mine Complex Completion Monongalia County, West Virginia

Location: Tasks:

The scope of work included the preparation of construction documents for a booster station upgrade as part of the Omega Mine Complex project. Hydraulic analyses were performed, new pumps were selected, and a demonstration was

made that the new pumps had higher efficiencies than the old pumps.

Construction documents for the booster station upgrade and pressure reducing

assembly were prepared.

96-554-06

Title: Location: Hutchinson Subsidence Fairmont, West Virginia

Tasks:

Preparation of construction documents for the Hutchinson Subsidence project in Fairmont, West Virginia. Project involved subsurface investigation (including borehole camera work); sampling of mine water; injection plan layout for grouting under three residences; preparation of technical specifications, drawings, and engineer's cost estimate; and participation in pre-bid and pre-construction

meetings.

Project No.:

96-554-05

Title:

Fairmont (Grandstaff) Subsidence

Location:

Fairmont, West Virginia

Tasks:

Evaluation of potential subsidence effects for the Grandstaff Subsidence project in Fairmont, West Virginia. Project involved subsurface investigation (including borehole camera work); sampling of mine water; and preparation of a report

describing the findings of the above investigations.

Project No.:

96-554-04

Title: Location: City of Summersville (Rt. 39) Nicholas County, West Virginia

Tasks:

The project included the review of another consultants water feasibility study

report and determination if the findings of the report were accurate.

Project No.:

96-554-03

Title:

Reynoldsville, Wallace, and Clarksburg Water Supply Extension Project

Location:

Harrison County, West Virginia

Tasks:

The project included a feasibility/rate analysis, design of 9,400 feet of 8-inch water line, 33,000 feet of 6-inch water line, 12,200 feet of 2-inch water line, a 96,000 gallon (nominal) water storage tank, and other appurtenances, selection, surveying, and geotechnical investigation of a water storage tank site, and

preparation of construction documents, regulatory permit applications, and an

engineer's report.

Project No.:

96-554-02

Title:

Mill Creek Regional Water Supply Extension Project

Location:

Logan County, West Virginia

Tasks:

Preparation of construction documents for the construction of water transmission lines, a water distribution system, two water storage tanks, a booster station, two hydropneumatic tanks, and a water treatment plant. The total length of water line

to be constructed was approximately 34 miles.

96-554-01

Title:

Majesty Mine Complex

Location:

Barbour County, West Virginia

Tasks:

Preparation of construction documents for the reclamation of the Majesty Mine Complex. The Majesty Mine Complex was an abandoned mine site which included old mine structures, open mine portals, unreclaimed refuse piles and an extensive highwall, existing wetlands and ponds, and numerous seeps producing

acid mine drainage (AMD).

Project No.:

93-198-25

Title:

Phase II Water Feasibility Study, Washington Heights to Jeffrey Study Area

Location:

Boone County, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the Washington Heights to Jeffrey Study Area in Boone County, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a

report. Work was completed on a "fast track" schedule.

Project No.:

93-198-24

Title:

Evaluation of Construction Documents, Gauley River Water Line Extension

Location:

Fayette and Nicholas Counties, West Virginia

Tasks:

Evaluation of construction documents for the Gauley River Water Line Extension, to be funded by AML. Evaluation included a review of technical specifications and drawings; evaluation of hydraulics; completion of letter summarizing the

evaluation; and meetings to discuss the evaluation.

Project No.:

93-198-23

Title:

Evaluation of Construction Documents, Heizer/Manila Creek Water Line

Extension

Location:

Putnam County, West Virginia

Tasks:

Evaluation of construction documents for the Heizer/Manila Creek Water Line Extension, to be funded by AML. Evaluation included a review of technical specifications and drawings; evaluation of hydraulics; completion of letter summarizing the evaluation; and meetings to discuss the evaluation.

Project No.:

93-198-22

Title:

Owings Mine Complex

Location:

Harrison County, West Virginia

Tasks:

(1) Evaluation of water quality and potential passive AMD treatment system design at the Owings Mine Complex Site. Project included identification of monitoring points (streams and AMD discharges); sampling and analysis of monitoring points for a 3-month period; preparation of a report summarizing the findings; and conceptual design of passive AMD treatment system including costs.

(2) Preparation of construction documents including subsurface investigation; surveying; refuse processing evaluation; grading and drainage design for

four refuse piles and various other refuse areas; design of seals for eighteen mine portals; and preparation of technical specifications, drawings, and engineer's cost estimate.

Project No.:

93-198-21

Title:

Omega Mine Complex

Location:

Monongalia County, West Virginia

Tasks:

Preparation of construction documents for the Omega Mine Complex project in Monongalia County, West Virginia. The project involved the injection of coal combustion byproduct grouts into mine workings to help alleviate the generation

of AMD. Work included subsurface investigation; surveying; grout mix evaluation; acid-base accounting analysis of overburden and coal; and preparation of drawings, technical specifications and engineer's cost estimate.

Project No.:

93-198-20

Title: Location: Mill Creek - Isom Community Logan County, West Virginia

Tasks:

Design of water system to service approximately 800 residents of the Mill Creek-Isom Community in Logan County, West Virginia. Work included sizing of water treatment plant, 4 water tanks, 4 booster stations, 1 pressure reducing valve, and approximately 23 miles of water line. Construction cost was estimated at

approximately \$5,500,000.

Project No.:

93-198-19

Title:

Phase II Water Feasibility Study, Weaver-Junior Study Area

Location:

Randolph and Upshur Counties, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the Weaver-Junior Study Area in Randolph and Upshur Counties, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the investigation in

a report.

Project No.:

93-198-18

Title:

Phase II Water Feasibility Study, Reynoldsville, Wallace, and Clarksburg Study

Area

Location:

Harrison County, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the Reynoldsville, Wallace, and Clarksburg Study Area in Harrison County, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of

wells that had been degraded by mining activity; and summarizing the

investigation in a report.

Project No.: 93-198-17

Title: Mainella Subsidence

Location: Marion County, West Virginia

Tasks: Preparation of construction documents for the Mainella Subsidence project in

Fairmont, West Virginia. Project involved subsurface investigation (including borehole camera work); sampling of mine water; injection plan layout for grouting under three residences; preparation of technical specifications, drawings, and engineer's cost estimate; and participation in pre-bid and pre-construction meetings. Approximately 15 injection holes were proposed at an estimated

construction cost of approximately \$138,000.

Project No.: 93-198-15

Title: Glen Morgan Subsidence Location: Raleigh County, West Virginia

Tasks: Preparation of construction documents for the Glen Morgan Subsidence project

near Beckley, West Virginia. Project included subsurface investigation (including borehole camera work); base mapping development; sampling of mine water; injection plan layout for grouting under one residence; preparation of technical specifications, drawings, and engineer's cost estimate; and participation in pre-

bid and pre-construction meetings. Estimated construction cost was

approximately \$164,000.

Project No.: 93-198-14 Title: Harris AMD

Location: Harrison County, West Virginia

Tasks: Preparation of construction documents for the Harris AMD site in Harrison

County, West Virginia. Project included subsurface investigation; surveying; sampling of mine discharges; design of channels, wet seals, and drain pipes; preparation of technical specifications, drawings and engineer's cost estimate; and participation in pre-bid and pre-construction meetings. Bid construction cost

was approximately \$65,000.

Project No.: 93-198-13

Title: Lefthand Fork (See) Burning Refuse

Location: Logan County, West Virginia

Tasks: Preparation of construction documents for Lefthand Fork (See) Burning Refuse

project. Project included subsurface investigation including temperature probe readings; surveying; refuse processing evaluation; grading and drainage design for regrading of refuse pile; delineation of burning refuse areas; design of excess material disposal site; completion of IBR for relocating existing bonded haul road; preparation of technical specifications, drawings, and engineer's cost estimate; and participation in pre-bid and pre-construction meetings. Bid construction cost

was approximately \$940,000.

Project No.: 93-198-12

Title: Madison Street/Fairview Route 218 Portals

Location: Marion County, West Virginia

Tasks: Work performed on this project was an extension of activities as described on

Project No. 88-460-21.

Project No.: 93-198-11

Title: Summerlee Refuse - Post Construction Water Quality

Location: Fayette County, West Virginia

Tasks: Water sample collection, analysis, and evaluation at the reclaimed Summerlee

Refuse site. Findings were summarized in a report.

Project No.: 93-198-10

Title: Cow Creek - Sarah Ann Water Supply Extension Project

Location: Logan County, West Virginia

Tasks: Preparation of construction documents for the Cow Creek - Sarah Ann Water

Supply Extension project in Logan County, West Virginia. Project included subsurface investigation; design of three water tanks, three booster stations, one master meter assembly, and approximately 19 miles of waterline; preparation of technical specifications, drawings, and engineer's cost estimate; and participation

in pre-bid and pre-construction meetings. Bid construction cost was

approximately \$4,800,000.

Project No.: 93-198-09

Title: Godby Branch Water Supply Extension

Location: Logan County, West Virginia

Tasks: Preparation of construction documents for the Godby Branch Water Supply

Extension project. Project included subsurface investigation; surveying; design

of water tank, booster station, and approximately 2.5 miles of water line;

preparation of technical specifications, drawings, and engineer's cost estimate; and participation in pre-bid and pre-construction meetings. Bid construction cost

was approximately \$680,000.

Project No.: 93-198-08

Title: Phase II Water Feasibility Study, New Haven Study Area

Location: Favette County, West Virginia

Tasks: Phase II water feasibility study for private water supplies in the New Haven Study

Area in Fayette County, West Virginia. Work included interviewing local

residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report. Conceptual design of water system included sizing a water treatment plant, 1 booster station, 5 water tanks, and approximately 87 miles of water line. Estimated construction

cost was approximately \$13,800,000.

93-198-07

Title:

Phase II Water Feasibility Study, Gauley River Study Area

Location:

Favette and Nicholas Counties, West Virginia

Tasks:

Fayette and Nicholas Counties, west virginia

Phase II water feasibility study for private water supplies in the Gauley River Study Area in Fayette and Nicholas Counties, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the investigation in

a report.

Project No.:

93-198-06

Title:

Phase II Water Feasibility Study, Heizer and Manila Creek Community

Location:

Putnam County, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the Heizer and Manila Creek Community in Putnam County, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been

degraded by mining activity; and summarizing the findings in a report.

Project No.:

93-198-05

Title:

Phase I Water Feasibility Study, Reynoldsville, Wallace, & Clarksburg Study

Area

Location:

Harrison County, West Virginia

Tasks:

Phase I water feasibility study of the Reynoldsville, Wallace, & Clarksburg Study Area in Harrison County, West Virginia to evaluate the potential for pre-1977 mining activity to have degraded the water supplies of residents. Work included interviews, record searches, field reconnaissance, and preparation of remedial action cost estimates. A report summarizing the findings was submitted.

Project No.:

93-198-04

Title:

Phase I Water Feasibility Study, Weaver-Junior Study Area

Location:

Randolph and Upshur Counties, West Virginia

Tasks:

Phase I water feasibility study of the Weaver-Junior Study Area in Randolph and Upshur Counties, West Virginia to evaluate the potential for pre-1977 mining activity to have degraded the water supplies of residents. Work included interviews, record searches, field reconnaissance, and preparation of remedial action cost estimates. A report summarizing the findings was submitted.

Project No.:

93-198-03

Title:

Phase I Water Feasibility Study, Matheny Hill Study Area

Location:

Harrison County, West Virginia

Tasks:

Phase I water feasibility study of the Matheny Hill Study Area in Harrison County,

West Virginia to evaluate the potential for pre-1977 mining activity to have degraded the water supplies of residents. Work included interviews, record searches, field reconnaissance, and preparation of remedial action cost

estimates. A report summarizing the findings was submitted.

93-198-02

Title: Location: Duncan Hill Subsidence No. 2 Harrison County, West Virginia

Tasks:

Completed subsidence evaluation investigation at the Duncan Hill Subsidence No. 2 project site in Clarksburg, West Virginia. Work included subsurface investigation; mapping development; surveying; records review; water sampling; and preparation of a report summarizing the findings. The report did not recommend stabilization for the structures in the project area, due to a lack of evidence that subsidence was causing problems.

Project No.:

93-198-01

Title: Location: Urso Subsidence

Fairmont, West Virginia

Tasks:

Field reconnaissance, resident interviewers, videotape surveys of existing conditions, subsurface investigation, surveying, and subsequent evaluation to determine if mine subsidence was affecting structures within a several block area of Fairmont. Ultimately, stabilization program was limited to 5.4 acre area with approximately 28 residences and businesses. Construction documents,

including drawings, technical specifications, and engineer's cost estimate were prepared. Proposed construction included approximately 140 injection holes and 18,000 cubic yards of injection material. Construction cost was estimated at

approximately \$1,200,000.

Project No.:

88-460-24

Title:

Phase I Water Feasibility Studies

Location:

Brooke County, along Gauley River in Fayette County & Nicholas Counties, and

New Haven area (around Hico) in Fayette County, West Virginia.

Tasks:

Preliminary investigation of 3 separate communities to evaluate the possibility that pre-1977 mining activity degraded water supplies. The investigation included a review of mining records, existing water quality data, and conductance of resident interviews to assess possible impacts. Separate reports were prepared for each community, documenting findings and providing a cost

estimate for extending public water supply systems.

Project No.:

88-460-23

Title: Location: Phase II Water Feasibility Study, Mill Creek Study Area Boone, Lincoln, and Logan Counties, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the Boone County Community, Lincoln County Community, and Logan County Community all encompassed in the Mill Creek Study Area. Work included interviewing local residents and government officials: collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in separate reports for each community. Estimated construction cost for extending a public water supply to residents of the Mill Creek Study Area was approximately \$15,400,000 and included 1 water treatment plant, 1 booster station, 7 water storage tanks, and

approximately 40 miles of water line.

88-460-22

Title:

Phase II Water Feasibility Study, Godby Branch Community

Location:

Logan County, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the Godby Branch Community in Logan County, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded

by mining activity; and summarizing the findings in a report.

Project No.:

88-460-21

Title:

Madison Street/Fairview Route 218 Portals

Location:

Marion County, West Virginia

Tasks:

Preparation of construction documents for the Madison Street/Fairview Route 218 Portals project. Work included subsurface investigation; surveying; design of wet mine seals and associated drains at multiple sites; preparation of technical specifications, drawings, and engineer's cost estimate; and participation in pre-

bid and pre-construction meetings.

Project No.:

Location:

88-460-20

Title:

Summerlee Refuse Project Fayette County, West Virginia

Tasks:

Preparation of construction documents for the Summerlee Refuse pile project. Project included subsurface investigation; surveying; water quality sampling; grading and drainage design for regrading and revegetation of 60 acre refuse pile, 2 impoundments, and 2 ponds; preparation of technical specifications, drawings, and engineer's cost estimate; and participation in pre-bid and pre-

construction meetings.

Project No.:

88-460-19

Title:

Putnam County Phase I Water Studies

Location:

Two communities in Putnam County, West Virginia

Tasks:

Preliminary investigation of the Manila Creek and Heizer Creek areas of Putnam County to determine the possibility of pre-1977 mining activity degrading water supplies. Study included review of historical mining records, geological data, and resident interviews to assess possible impacts. Report prepared documenting

findings and a cost estimate for extending public water supply system.

Project No.:

88-460-18

Title:

Boone County Phase I Water Studies

Location:

Various communities in Boone County, West Virginia

Tasks:

Preliminary investigation of the Greenview/Big Branch, Ramage/Six Mile Creek, Secoal/Jeffrey/Obes Branch, Hewett Creek/Missouri Fork, and Meadowfork communities of Boone County to determine the possibility of pre-1977 mining activity degrading water supplies. Study included review of historical mining records, geological data, and resident interviews to assess possible impacts. Reports prepared documenting findings and cost estimates for extending public

water supply systems.

Location:

88-460-17

Title:

Duncan Hill Subsidence Clarksburg, West Virginia

Tasks:

Field reconnaissance, resident interviews, videotape surveys of existing conditions, subsurface investigation, borehole video camera surveys, and surveying to determine whether subsidence was affecting numerous homes, water tank, and YMCA over a 16 acre area. Development of report documenting that damages to water tank and YMCA were not subsidence related. Preparation of stabilization plan including plans, specifications, etc. for residential area.

Project No.:

88-460-16

Title:

Phase II Logan Water Feasibility Study

Location:

Logan County, West Virginia

Tasks:

Investigation to determine the percentage of residents in the Cow Creek, Crooked Creek and Upper Rum Creek communities whose ground water supplies had been degraded by pre-1977 mining activity. Field reconnaissance, mine map and mine permit records search, interviews, water sampling and analysis, and classification via piper diagrams were conducted.

Project No.:

88-460-15

Title:

Cora Mine Drainage No. II Logan County, West Virginia

Location: Tasks:

Mine drainage abatement project included drilling and water analysis with

subsequent design of several mine seals with piping and channels to convey flow to the receiving stream. Project included boring and jacking pipeline under

railroad.

Project No.:

88-460-14

Title:

Covey Creek Mine

Location:

Logan County, West Virginia

Tasks:

Field reconnaissance, historical records review, and subsurface investigation to

determine extent of mine fire and to develop options for remediation.

Project No.:

88-460-13

Title: Location: Logan Phase I Water Study Logan County, West Virginia

Tasks:

Preliminary investigation of the Clothier, Cow Creek, Crooked Creek, Godby Branch, Godby Heights, Upper Rum Creek, and Whitman Creek/Holden communities to determine the possibility of pre-1977 mining activity degrading the water supplies of the communities. Field reconnaissance, interviews, and mining and water quality record searches were conducted, and a remedial cost

estimate was provided with reports summarizing the findings for each

community.

88-460-12

Title: Location: Vivian Refuse Pile Vivian, West Virginia

Tasks:

Subsurface investigation, surveying, and design for reclamation of a large coal refuse pile and two mine entries. Plans, specifications, cost estimate, coal refuse reprocessing evaluation, and supporting documents for regrading over 150,000 cubic yards of refuse, surface water control, mine seals, and riprap toe protection

were completed.

Project No.:

88-460-11

Title:

Kimball Refuse Piles Kimball, West Virginia

Location: Tasks:

Subsurface investigation, surveying and design for reclamation of 3 coal refuse piles and six mine entries. Design included replacement of a water well and related supply piping for the town of Kimball. Completed preparation of plans, specifications, cost estimate, coal refuse reprocessing report, West Virginia Department of Health permit for new well, and other supporting documents for

reclaiming this large site with over ½ million cubic yards of regrading.

Project No.:

88-460-10 & 88-460-09 Hampden (Smith) Bridge

Title: Location:

Tasks:

Mingo County, West Virginia
Design of metal arch culvert to replace a bridge to allow access to a landslide

repair project. Development of plans and specifications were on a fast-track

schedule.

Project No.:

88-460-08

Title:

Bear Run Refuse

Location:

Gilmer County, West Virginia

Tasks:

Field reconnaissance to establish project limits, develop reclamation options, and

collect water quality information to design a wetlands reclamation project.

Subsurface investigation, surveying, and development of aerial mapping for 160

acres were conducted. Plans, specifications, cost estimate, reprocessing evaluation and report, and permit application assistance to develop reclamation plan for 13 former coal refuse disposal ponds/impoundments and 3 refuse piles

were completed. Plan included developing and enhancing wetlands.

Project No.:

88-460-07

Title:

Beaver Creek Waterline Extension

Location:

Barbour and Randolph Counties, West Virginia

Tasks:

The project included design of a 1.5 mile, 6-inch diameter water line extension

including fire hydrants, stream crossings, and service to 13 residents.

Preparation of plans, specifications, cost estimate, and supporting documents

were completed.

Location:

88-460-06

Title:

Charleston (Ratcliffe) Landslide Kanawha County, West Virginia

Tasks:

The project included subsurface investigation; research of mine mapping; and

determination if the slide was due to mining.

Project No.:

88-460-05

Title:

Garrison Complex

Location:

Garrison, Boone County, West Virginia

Tasks:

Subsurface investigation, surveying, and design for the removal of a railroad embankment posing a water impounding hazard were conducted. Project also included several mine entries and surface water runoff control channels. Plans. specifications, cost estimate, and supporting documents were prepared.

Project No.:

88-460-04

Title: Location: Cassity Fork Water Supply Extension Randolph County, West Virginia

Tasks:

The project consisted of a water study to document existing water quality and impacts due to mining, subsurface investigations, surveying, and design of an 8mile waterline extension including booster station, reservoir, pressure reducing valves, and provision for fire flow. Preparation of plans, specifications, cost estimate and supporting documents, and a review of contractor submittals during

construction were conducted.

Project No.:

88-460-03

Title: Location: Mulberry Fork (Stover) Landslide Fayette County, West Virginia

Tasks:

The project included subsurface investigation and design of corrective measures

for a landslide.

Project No.:

88-460-02

Title:

Beckley (Queen Street) Subsidence

Location:

Beckley, West Virginia

Tasks:

Subsurface investigation to determine if mine subsidence was responsible for damages experienced by a home was conducted. Preparation of a report documenting that subsidence was not responsible for the observed damage was completed.

Project No.:

88-460-01

Title:

Courtright Highwall

Location:

Bridgeport, West Virginia

Tasks:

Work performed on this project was an extension of activities as described for

86-181-23.

86-181-23

Title:

Courtright Highwall

Location:

Bridgeport, West Virginia

Tasks:

The project included a subsurface investigation to determine extent of landslide and whether mining related, field surveying to establish topographic mapping and control, and subsequent design of landslide repair alternatives. Design ultimately selected included a reinforced slope using stabilizing grid. Landslide contained

400,000 cubic yards of material.

Project No.:

86-181-22

Title:

Jonben (Haga) Subsidence

Location:

Jonben, West Virginia

Tasks:

Subsidence control on an emergency basis including sinkhole backfilling and drainage control. Project included drilling to determine the extent of mining and subsidence, field surveying to develop topographic mapping, and development of

a backfilling and drainage plan.

Project No.:

86-181-21

Title:

Belle (Malcolm) Landslide

Location:

Belle, West Virginia

Tasks:

Landslide stabilization including excavation of slide mass, sealing of several mine

entries, and drainage controls. Project included drilling, sampling, and piezometer installation and monitoring to develop project plans and

specifications.

Project No.:

86-181-20

Title:

Holden (Padgett) Subsidence Whitman Junction, West Virginia

Location: Tasks:

The project included subsurface investigation to determine extent of mine

workings, development of stabilization plan including drainage channels/pipes, and mine seals. Construction documents were prepared, and participation in

pre-bid and pre-construction meetings was completed.

Project No.:

86-181-19

Title:

Minden Mine Fire

Location:

Minden, West Virginia

Tasks:

The project included subsurface investigation to determine source and extent of

underground fire.

AML PROJECTS WEST VIRGINIA DEPARTMENT OF ENERGY

Project No.:

86-181-18

Title:

Williamson (Elias) Landslide - Emergency

Location:

Williamson, West Virginia

Tasks:

Subsurface investigation and determination of whether or not a landslide

threatening 1 home was mining related with subsequent development of plans for

a retaining wall were conducted.

Project No.:

86-181-17

Title:

Kitchen/Gibson Landslide - Emergency

Location:

Boone County, West Virginia

Tasks:

Subsurface investigation and determination of whether or not a landslide

threatening 4 homes was mining related were conducted.

Project No.:

86-181-16

Title: Location: Doug Gray Subsidence Fairmont, West Virginia

Tasks:

Subsidence control by injecting grout to fill mine voids. Project included exploratory drilling and sampling including both vertical and angle borings with the subsequent development of a grouting program to support homes and

businesses in Fairmont, West Virginia.

Project No.:

86-181-15

Title:

St. John's Road Subsidence Brooke County, West Virginia

Location: Tasks:

Subsurface investigation and development of specifications and construction

drawings for remedial work on mine subsidence affecting 30 acres and 50 homes

were conducted.

Project No.:

86-181-14

Title:

High Coal Tipple

Location: Tasks: Boone County, West Virginia

The project included development of specifications and construction drawings for

remedial work on 16 mine portals and an abandoned tipple and its several

associated structures.

Project No.: 86-181-12

Title: Route 19/28 Subsidence Location: Harrison County, West Virginia

Tasks: The project included subsurface investigation and development of construction

specifications and drawings, and topographic mapping for remedial work on mine

subsidence affecting a road.

Project No.: 86-181-10

Title: Omar Refuse Piles

Location: Logan County, West Virginia

Tasks: The project included subsurface investigation and development of specifications

and construction drawings for remedial work on regrading 5 refuse piles with over 330,000 cubic yards of earthwork, and sealing 6 mine portals and a large vertical

shaft.

Project No.: 86-181-09

Title: Mt. Hope (Sawyer) Subsidence Location: Fayette County, West Virginia

Tasks: The project included subsurface investigation and development of construction

specifications and drawings, and topographic mapping for remedial work on mine

subsidence affecting 1 home.

Project No.: 86-181-08

Title: Morgantown Airport Drainage Location: Morgantown, West Virginia

Tasks: The project included subsurface investigation and development of construction

specifications and drawings, and some topographic mapping for remedial work on mine subsidence effecting a day care center and an airport access road, and

for closure of 4 mine portals below the end of a runway.

Project No.: 86-181-07

Title: Logan Drainage Project Location: Logan, West Virginia

Tasks: The project included subsurface investigation and development of construction

specifications and drawings, and some topographic mapping for remedial work on 4 mine portals, a mine seep, and 400 feet of abandoned conveyor with its

headhouse and loadout platform.

Project No.: 86-181-06

Title: Huffman Street Subsidence Location: Fairmont, West Virginia

Tasks: The project included subsurface investigation and development of construction

specifications and drawings for remedial work on mine subsidence affecting 20

homes.

86-181-05

Title:

Switzer/Adams/Robinson Drainage

Location:

Logan County, West Virginia

Tasks:

The project included subsurface investigation and development of construction

specifications, drawings, and topographic mapping for remedial work on 3 mine portals, including the design of an energy dissipator with associated piping under

railroad and state highway.

Project No.:

86-181-04

Title: Location: Follansbee (Hultsburg) Drainage Brooke County, West Virginia

Tasks:

The project included subsurface investigation and development of construction specifications and drawings for remedial work on acid mine drainage problems.

Project No.:

86-181-03

Title: Location: Fairmont East Subsidence Fairmont, West Virginia

Tasks:

The project included subsurface investigation and development of construction

specifications and drawings for remedial work on mine subsidence affecting 125

homes on 20 acres.

Project No.:

86-181-02

Title:

Fairmont IV

Location:

Fairmont, West Virginia

Tasks:

The project included subsurface investigation to determine if subsidence of 3 homes was related to mining and subsequent development of construction

specifications and drawings for remedial work on the subsidence.

Project No.:

86-181-01

Title:

Hawkins AMD

Location:

Harrison County, West Virginia

Tasks:

The project included subsurface investigation and development of construction specifications, drawings and topographic mapping for remedial work on acid mine drainage emanating from mine portals following a "blow-out" and causing a

large saturated area above 5 homes.

Project No.:

86-107

Title:

Kistler Refuse and Mine Fire Extinguishment Program

Location:

Logan County, West Virginia

Tasks:

The project included subsurface investigation and development of construction

specifications and drawings for extinguishment through grout injection, and

subsequent construction monitoring.

85-354

Title: Location: Rebrook Street Drainage Clarksburg, West Virginia

Tasks:

The project included subsurface investigation and development of construction specifications and drawings for remedial work on acid mine drainage from 2 mine portals which was effecting a house and its garage, and subsequent construction

monitoring.

Project No.:

85-289

Title:

Hurricane Fork/Five-Mile Fork Burning Coal Seams

Location:

Kanawha County, West Virginia

Tasks:

The project included subsurface investigation and development of costs which

would be associated with extinguishment.

Project No.:

84-192

Title:

Duck Creek Landslide

Location:

Gilmer County, West Virginia

Tasks:

The project included subsurface investigation, development of construction specifications and drawings, and construction monitoring for remedial work on a

landslide resulting from uncompacted strip bench spoils.

AML PROJECTS WEST VIRGINIA DEPARTMENT OF NATURAL RESOURCES

Project No.:

85-113

Title: Location: Kingmont Complex Reclamation Marion County, West Virginia

Tasks:

The project included development of specifications and construction drawings for

sealing 4 mine portals and demolishing a steel river truss and buildings

associated with an abandoned deep-mine complex.

Project No.:

84-289

Title: Location: Fairmont No. 2 Subsidence Fairmont, West Virginia

Tasks:

The project included report with recommendations after a subsurface

investigation to determine whether or not subsidence of 3 homes was mining related, and subsequent development of specifications and construction

drawings.

Project No.:

84-265 and 266

Title:

Green's Run Highwall and Marrara Spoil Area Reclamation Projects

Location:

Preston County, West Virginia

Tasks:

The project included subsurface investigation with test-pits and development of specifications and construction drawings for reclaiming 30 acres of strip mine

with 3 highwalls, 6 refuse piles, and 2 access roads.
