SCOPE OF WORK

The successful bidder shall provide appropriate equipment, materials, labor and any technical services needed for the scope of work as described in this contract. The General Performance Standards (GPS) shall apply to all items in Scope of Work.

Sludge pumping will be from treated acid mine drainage settling ponds through 6 inch diameter high density polyethylene piping, which has been permanently installed beside the pond to sludge drying cells. The pumping distance varies from site to site, but is normally less than 1000 feet. All pumps shall be in good operable condition and be readily available to be used at as many as two different locations at any given time. Some sludge removal sites will require continuous pumping from start-up to finish. Any trailer-mounted pumps specified shall meet Department of Transportation (DOT) approval for highway travel.

Snow removal shall be provided for winter access on gravel-based compacted access roads that lead to treatment sites. The DEP staff, as well as the contractor, needs winter access to these sites for AMD Treatment operations.
