RE: Expression of Interest
Engineering Services Required for the
South Charleston Landfill
Kanawha County, West Virginia
DEP14619

To Whom It May Concern:

GAI Consultants, Inc. (GAI) welcomes the opportunity to submit our qualifications in response to your Request for Expression of Interest DEP14619 to provide professional engineering services. These services will result in the development of a site characterization study, leachate management and closure cap design, and construction quality control/quality assurance required for closure of the South Charleston Landfill in Kanawha County, West Virginia.

GAI is exceptionally well qualified to provide the State with the above referenced services offered at the most favorable terms from both a technical and value standpoint. The work under this contract will be performed in our Charleston, West Virginia office. The Charleston office has provided the State with quality engineering services for the landfill closure program since 1993. We have served the State on previous West Virginia Department of Environmental Protection – Landfill Closure Assistance Program (WVDEP-LCAP) open-end contracts and projects present. As a result of this long-term experience, GAI can provide the required expertise, continuity and conformance to program guidelines established by the WVDEP-LCAP.

GAI welcomes you to visit our facilities and meet our staff located at 500 Summers Street, 3rd Floor, Charleston, West Virginia 25301.

GAI has:

- on staff four local and fifteen total West Virginia registered professional civil engineers with a combined experience of over 70 years on projects throughout West Virginia. These professionals are available to sign work contract documents and supervise personnel to provide the daily quality assurance and quality control services;
- large diverse staff of civil engineers, CADD operators, surveyors, geologists, estimators, designers, and biologists with extensive experience in landfill engineering, hydrology, and geology;
- substantial experience in providing immediate response to questions from the field and in handling situations as they arise between the contractor and WVDEP-LCAP; and

- extensive experience in landfills, environmental remediation, ecological principles, and contract administration.

In summary, GAI will provide the most favorable terms as a result of:

- Exceptional qualifications (15 years of in-state LCAP experience most recently at Berkeley County Landfill),
- Local, Charleston presence with excellent access to the project site, LCAP offices and the South Charleston Landfill, and
- Efficient and experienced personnel who are familiar with WVDEP-LCAP requirements and staff.

We look forward to continuing our relationship with WVDEP-LCAP.

Sincerely,
GAI Consultants, Inc.

James A. Hemme, P.E.
Project Manager

WHEN RESPONDING TO RFQ, INSERT NAME AND ADDRESS IN SPACE ABOVE LABELED 'VENDOR'

STATE OF WEST VIRGINIA
Purchasing Division**PURCHASING AFFIDAVIT****VENDOR OWING A DEBT TO THE STATE:**

West Virginia Code §5A-3-10a provides that: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

PUBLIC IMPROVEMENT CONTRACTS & DRUG-FREE WORKPLACE ACT:

If this is a solicitation for a public improvement construction contract, the vendor, by its signature below, affirms that it has a written plan for a drug-free workplace policy in compliance with Article 1D, Chapter 21 of the **West Virginia Code**. The vendor **must** make said affirmation with its bid submission. Further, public improvement construction contract may not be awarded to a vendor who does not have a written plan for a drug-free workplace policy in compliance with Article 1D, Chapter 21 of the **West Virginia Code** and who has not submitted that plan to the appropriate contracting authority in timely fashion. For a vendor who is a subcontractor, compliance with Section 5, Article 1D, Chapter 21 of the **West Virginia Code** may take place before their work on the public improvement is begun.

ANTITRUST:

In submitting a bid to any agency for the state of West Virginia, the bidder offers and agrees that if the bid is accepted the bidder will convey, sell, assign or transfer to the state of West Virginia all rights, title and interest in and to all causes of action it may now or hereafter acquire under the antitrust laws of the United States and the state of West Virginia for price fixing and/or unreasonable restraints of trade relating to the particular commodities or services purchased or acquired by the state of West Virginia. Such assignment shall be made and become effective at the time the purchasing agency tenders the initial payment to the bidder.

I certify that this bid is made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership or person or entity submitting a bid for the same materials, supplies, equipment or services and is in all respects fair and without collusion or fraud. I further certify that I am authorized to sign the certification on behalf of the bidder or this bid.

LICENSING:

Vendors must be licensed and in good standing in accordance with any and all state and local laws and requirements by any state or local agency of West Virginia, including, but not limited to, the West Virginia Secretary of State's Office, the West Virginia Tax Department, West Virginia Insurance Commission, or any other state agencies or political subdivision. Furthermore, the vendor must provide all necessary releases to obtain information to enable the Director or spending unit to verify that the vendor is licensed and in good standing with the above entities.

CONFIDENTIALITY:

The vendor agrees that he or she will not disclose to anyone, directly or indirectly, any such personally identifiable information or other confidential information gained from the agency, unless the individual who is the subject of the information consents to the disclosure in writing or the disclosure is made pursuant to the agency's policies, procedures and rules. Vendor further agrees to comply with the Confidentiality Policies and Information Security Accountability Requirements, set forth in <http://www.state.wv.us/admin/purchase/privacy/noticeConfidentiality.pdf>.

Under penalty of law for false swearing (**West Virginia Code** §61-5-3), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.

12. ***Note: Personnel refers to those who will be working directly on the project:

A. Are your firm's personnel experienced in Solid Waste Landfill Closure Design?

YES Description and Number of Projects: *GAI has completed projects for nine landfills and four State Wide projects at all 29 landfills within the WVDEP-LCAP Program. GAI designed the closure for Kanawha Western, Central, Mingo, Fayette County, Berkeley County, and other landfills within the LCAP system. GAI has completed numerous projects for several commercial and industrial landfills. These projects include but are not limited to siting, environmental assessments, designs, geotechnical, hydrogeologic, water quality, ground water, quality assurance/quality control and closures.*

The proposed project manager for this work has personally been involved in the closure design of the Moundsville Landfill, Fleming Landfill, Wyoming County Landfill and Jackson County Landfill under the LCAP program. In addition, he has prepared closure plans and designs for at least 12 other landfills in West Virginia.

NO

B. Are your firm's personnel experienced in Solid Waste landfill site characterization assessment and evaluation?

YES Description and Number of Projects: *GAI has completed site characterizations for the five WVDEP-LCAP landfills which we completed the closure designs. This included Berkeley County Landfill, Kanawha Western Landfill, Mingo County Landfill, Central West Virginia Refuse and Fayette County Landfill. GAI has completed site characterizations for numerous other landfills in the process of siting, expanding or developing closure plans. We have evaluated ground water, surface water and waste types at numerous sites for landfills and other projects.*

The proposed project manager for this work was personally involved in the site characterization for the Fleming and Wyoming County Landfills under the LCAP program. In addition, he was extensively involved in a multitude of site characterizations where abutment/expansions to existing landfills were being proposed including City of Charleston Landfill, Scyamore Landfill, and Nicholas County Landfill locally. He was also the project manager and lead remediation designer for the Marshall University Clinical Education and outreach center site design that was constructed over a 1920's era landfill.

NO

C. Are your firm's personnel experienced in landfill closure construction inspection?

YES Description and Number of Projects: *GAI has performed construction inspection for the five WVDEP-LCAP closures as described above and for multiple commercial and industrial clients for new landfills, expansions and closure of landfills. We have personnel trained in field testing for landfill closures (e.g. soil tests, concrete tests, synthetic liners, etc.) The proposed project manager and senior engineer have combined work on over 70 solid waste facilities including 9 LCAP projects. The proposed inspector(s) for the project recently completed a two construction monitoring assignment for American Electric Power that involved more than 20 acres of geosynthetic installation, hundreds of thousands of cubic yards in earthwork and an extensive drainage and leachate collection system.*

NO

D. Is your firm experienced in Aerial Photography and the Development of Contour Mapping?

YES Description and Number of Projects: *GAI has produced or evaluated contour mapping on our WVDEP-LCAP projects discussed in the above responses. We have in-house surveying services with exceptional capabilities in development of contours and base map models. We have used our surveying services to locate facilities for many of the miscellaneous LCAP projects. We routinely run control to sites, perform property surveys and generate topographic mapping. We subcontract our aerial photography, if none is available. We do not anticipate aerial photography services being needed to complete this project.*

GAI has not only successfully and promptly performed these services for the LCAP program but has coordinated, surveyed and mapped thousands of acres for the WVDEP Abandoned Mine Land program over the past two decades including recent projects with the Vens Run Landslide, Duck Creek Landslide, and Rt. 60 (Smithers) drainage design.

NO

E. Are your firm's personnel experienced in evaluating ground water contamination, such as may be associated with landfills?

YES Description and Number of Projects: *GAI has evaluated the ground water at each of the five WVDEP-LCAP landfills which we completed closure designs. GAI evaluated the ground water monitoring wells at all 29 of the WVDEP-LCAP facilities. GAI developed the ground water monitoring plan at Fleming, Big Bear, and Kingwood landfills in the WVDEP-LCAP program. Ground water quality and monitoring plans have been developed and evaluated on multiple private landfills and other projects. We are highly experienced in developing sampling and testing programs to determine contaminants of concern*

The proposed project manager for the work has been responsible for establishing and maintaining multiple ground water monitoring programs at numerous local landfills including Sycamore, Disposal Service, and City of Charleston. Groundwater, wells sampling, and analysis have been involved in a majority of the 50+ solid waste facilities he has been involved with. He is also a Licensed Remediation Specialist registered with the WVDEP.

NO

F. Are your firm's personnel experienced in Landfill Closure cost estimating?

YES Description and Number of Projects: *GAI has developed construction cost estimates for hundreds of projects including the five WVDEP-LCAP landfills which we complete closure designs. In addition, GAI completed the WVDEP-LCAP Update in 2000 which developed budgetary estimates for closure and post closure for all 29 of the WVDEP-LCAP Landfills. GAI has also stayed current with the explosion in material prices related to steel, hydraulic cement, fuel, etc. These increases have been seen in all of our projects since 2005 and are being accounted for in on-going projects.*

Data (including historic unit prices) pricing trends are maintained by GAI to make sure budgets are met. The project manager, lead engineer and engineer intern have all been responsible for projecting budgets and establishing construction estimates for landfill closure costs.

NO

13. PERSONAL HISTORY STATEMENT OF PRINCIPALS AND ASSOCIATES RESPONSIBLE FOR LANDFILL CLOSURE DESIGN & QA/QC			
NAME & TITLE (Last, first, Middle Int.)	YEARS OR EXPERIENCE		
	YEARS OF LANDFILL CLOSURE DESIGN EXPERIENCE: 0	YEARS OF LCAP EXPERIENCE: 0	YEARS OF QA/QC EXPERIENCE: 21
NAME & TITLE (Last, first, Middle Int.) <i>Penn, IV, C. Elwood Assistant Vice President/ Managing Officer</i>			
Brief Explanation of Responsibilities: <i>Mr. C. Elwood Penn, IV, P.E., Managing Officer, will serve as Contract Administrator. He will be responsible for the overall management and performance of the project. He will review the work directive, visit the site with GAI's project team and the WVDEP to better familiarize himself with site conditions and work requirements, and then guide the preparation of the scope of work and cost proposal by GAI staff. A written proposal including a detailed cost estimate (manhours and expenses associated with the project) will then be prepared and submitted to the WVDEP for their review. Upon WVDEP's approval of the proposal, Mr. Penn will arrange for the start of the work. Included will be project staffing, arrangement and detailing of the scope of services to be provided by GAI's subcontractors, and review of project budget and schedule. Mr. Penn will generally supervise the work in progress and review work products at intermediate points and finally prior to submittal to the WVDEP and will be responsible for maintaining liaison with the WVDEP Project Manager.</i>

19. Use this space to provide any additional information or description of resources supporting your firm's qualifications to perform work for the WV Department of Environmental Protection.

In summary:

- *GAI's staff for the project is located less than 15 minutes from the South Charleston site.*
- *GAI's extensive landfill experience in the Kanawha Valley gives us unique knowledge of the geology and soils in the area.*
- *The proximity of the site to the WVDEP Headquarters, GAI's office and the largest urban area in West Virginia presents a tremendous opportunity for a demonstration project. GAI has several ideas on how the WVDEP could utilize this project for public outreach and education and as a test area for innovative technologies.*
- *GAI's listed staff are available to start on this work immediately.*

Please see attached "Brief Firm History and Experience" for more details of qualifications.

20. The foregoing is a statement of facts

BRIEF FIRM HISTORY AND EXPERIENCE

INTRODUCTION

GAI Consultants, Inc., (GAI) proposes to provide engineering services to the West Virginia Department of Environmental Protection, Landfill Closure Assistance Program (WVDEP - LCAP). These services will result in the development of mapping, engineering drawings, contract specifications, and other contract documents for the leachate management and closure cap as may be required for the letting of construction project, and providing quality assurance and quality control during construction for the South Charleston Landfill.

The highlighted sections following are:

- Bidders Experience
 - Surveying and Mapping
 - Subsurface Investigation
 - Laboratory Services
 - Site Characterization, Design Engineering and Contract Document Preparation
 - Quality Assurance and Quality Control
- Qualifications of Personnel
- Corporate Specialized Experience and Demonstrated Experience
- Management Plan and Location of Facilities

GAI's Charleston, West Virginia office is exceptionally well qualified to provide the State with the above referenced services. GAI's Charleston office has a staff of **four Professional Engineers, one Professional Surveyor**, and a team of geologists/hydrologists, environmental scientists, biologists, technicians, CADD designers, estimators, surveyors, secretaries, and field technicians. GAI's Charleston office has served the WVDEP on previous LCAP open-end contracts from 1993 to the present. These projects have included:

- Leachate analysis;
- Ground water investigations;
- Surface water investigations and analyses;
- Site characterizations;
- Gas monitoring plans;
- LCAP-2000 system update;
- Leachate collection, treatment and disposal systems;
- Cap (clay and synthetic) designs;
- Storm water control; and
- Quality assurance and quality control.

GAI provided site characterization, closure design and QA/QC services for the Kanawha Western, Central West Virginia Refuse, Fayette County, Mingo County, and Berkeley County Landfills for the LCAP program.

GAI also provides engineering services to the landfill industry including:

- Siting and Feasibility Studies;
- Environmental Assessments;
- Permit Applications;
- Detailed Facility Design;
- Plans and Specifications;
- Geotechnical, Hydrogeologic, and Water-Quality Investigations;
- Water-Quality Statistical Analyses;
- Ground Water Sampling and Analyses;
- Wetland and Ecological Studies;
- Develop Recycling Programs;
- By-product Marketing Studies;
- Construction Monitoring and Certifications;
- Community Relations; and
- Government Liaison.

As a result of this experience, GAI will provide the required expertise to complete landfill closure projects in a timely, economical, and efficient manner and will only require minimal subconsultants to be utilized on this project. Our direct knowledge of the LCAP program guidelines and personnel will also benefit the State.

GAI will perform the work under this contract in our **Charleston, West Virginia** office.

BIDDER EXPERIENCE

GAI Consultants, Inc., provides consulting services in geotechnical engineering, civil engineering, environmental engineering, mining-related design engineering, geology, hydrogeology, environmental science, economics, transportation systems and land-use planning, urban and site engineering, structural engineering, engineering mechanics, agronomy, anthropology and archaeology, and various related professional disciplines. The firm has experienced steady growth in both size and capabilities; and for the past twelve years has been **rated among the top 500 engineering** and environmental firms in the nation by Engineering News Record (ENR). In 2006 and 2007, GAI reached the top 250. GAI reached 177 in 2008.

GAI Consultants, Inc., is a full service civil, environmental engineering firm headquartered in suburban Pittsburgh, Pennsylvania, with offices in Charleston, West Virginia; Philadelphia, Pennsylvania; Cincinnati, Ohio, Ft. Wayne, Indiana; Orlando and Jacksonville, Florida; and Richmond, Virginia. Established in 1958, GAI and its subsidiaries comprise an organization of over 600 engineers, scientists, and support personnel. With our surveying services and competent staff of professionals, GAI offers a comprehensive approach to engineering problems requiring a wide range of interdisciplinary skills. In the past 50 years, we have designed and monitored the construction of numerous facilities and have conducted thousands of related geotechnical and hydrological investigations, many of which involved siting, design, and closure of landfills. By successfully completing so many reclamation projects, GAI has obtained "expertise" status on an international basis for many types of projects.

GAI's Charleston, West Virginia office opened in 1985. Since opening, our Charleston office has experienced steady growth. Currently, the Charleston office has four registered professional engineers and other experienced disciplines on staff. Clients served by the

Charleston office include solid waste authorities; mining and industrial companies; federal, state, and local governmental agencies; engineers and architects; and private developers.

GAI has successfully served the WVDEP on previous LCAP contracts from 1993 to the present. We propose to utilize most of the same Charleston and Pittsburgh staff. See attached CCQQ.

Surveying and Mapping

To provide cost efficient and timely services for this contract, surveying services will be conducted by GAI's in-house surveyors. GAI routinely performs the following types of surveys which are relevant to the work associated with this type of project.

- Aerial mapping control surveys including horizontal and vertical control and reference monuments,
- Topographic and planimetric surveys,
- Construction surveys including work layout staking, establishment of baselines and cross sections, profiles, etc.,
- Construction quantity measurement surveys,
- Detailed as-built documentation surveys,
- Property surveys including both surface and mineral estates,
- Oil and gas surveying, and
- ALTA Surveys.

GAI presently operates up to three survey crews. GAI has made a commitment to provide timely surveying services.

GAI's survey crew utilizes Nikon DTM-450 and Nikon DTM-550 Total Stations. This is complimented by data collectors and Autocad workstations to generate plan views, profiles, cross sections and other engineering drawings. These CAD-generated drawings can then be utilized by GAI's CAD-drafting/design department for design.

All surveys conducted by GAI are completed under the supervision of a West Virginia licensed land surveyor. Surveying will also be performed under the general direction of a West Virginia registered professional engineer, the GAI project engineer and project manager. All surveys and mapping are completed to the standards as outlined by the National Map Standards, as well as other applicable quality standards to include LCAP specifications.

Subsurface Investigation

Subsurface investigations will be required to obtain information for site characterization (e.g. waste limits, potential borrow areas, etc.) and closure design, installation of monitoring wells, and foundations for a leachate tank. These services will be subcontracted to Pennsylvania Drilling Company (PennDrill) of McKees Rocks, Pennsylvania. We have successfully and satisfactorily worked with PennDrill throughout West Virginia for several years. The excavation of test pits and trenches will be subcontracted to a local excavation firm.

Laboratory Services

GAI operates a soils and materials laboratory in our Philadelphia, Pennsylvania office. We also utilize local soils laboratories for a small quantity testing.

We have the capability to analyze natural materials such as soil and rock, manufactured materials such as concrete and steel, and industrial waste materials. The soils and industrial waste analysis capabilities include classification tests, moisture content, grain size analysis, Atterberg limits, specific gravity, unit weight determinations, and chemical analyses. The characteristic test capabilities include relative density equipment for sample particle sizes to 3 inches in diameter; apparatus for constant- and falling-head permeability measurements in both horizontal and vertical directions, and for moisture-density relationships for both modified and standard densities. The compressibility of materials can be determined in a 2.5-inch diameter, one-dimensional consolidometer or a 2.5-inch diameter, one-dimensional Anteus consolidometer with back pressure and pore pressure capability. Also, volumetric consolidation can be determined isotropically or anisotropically. The strength parameters of soils and industrial waste materials can be determined by unconfined compression, direct shear, or triaxial shear tests. The rock-testing capabilities include classification by visual inspections and petrographic analysis, unconfined compression, direct shear, and triaxial shear tests. GAI also maintains several nuclear densometer testing gauges and appropriate NRC licensure to monitor field compaction.

Site Characterization, Design Engineering and Contract Document Preparation

GAI has extensive experience in site characterization, design engineering and the preparation of contract documents for landfill closures. GAI prides itself in development of **simple, yet innovative, cost-efficient designs** that are easily implemented in the field during construction. Our experience gained on various types of West Virginia LCAP projects during the past 16 years will ensure this quality engineering continues.

GAI has prepared construction packages for WVDEP-LCAP since 1993. GAI is completely familiar with WVDEP's guidelines for preparing construction drawings, technical specifications, and supporting documents. We are able to draw on a large collection of typical construction details contained within our computer aided drafting (CAD) library for the above types of LCAP projects. GAI also has various master specifications which we are able to draw from to create project specific specifications.

During the design engineering phase of our projects, GAI develops alternatives for the landfill closures and schedules meetings with WVDEP-LCAP to review options and select a mutually acceptable plan. We feel that this approach results in a more workable plan at an ultimately lower cost. We also perform a constructability review of each construction package by technical staff familiar with proposed methods of construction. This review also expedites the overall reclamation plan.

Quality Assurance and Quality Control

GAI has extensive experience in providing quality assurance and quality control services for landfill closures and other construction projects. GAI has performed these services on five WVDEP-LCAP landfills (Kanawha Western, Central West Virginia, Fayette County, Mingo County, and Berkeley County) since 1993.

We have the necessary equipment to perform field testing for soil compaction and collecting geosynthetic, soil, rock and concrete samples. We complete daily and weekly reports on the construction activities and final certifications for landfill closures.

We have also provided construction management services for the WVDEP-LCAP landfills. These services included review of contractor submittals, answering questions from the field, performing field modifications to handle unusual subsurface conditions, and process contractor invoices. The reviews are followed by providing recommendations to the LCAP project manager.

QUALIFICATIONS OF PERSONNEL

GAI has a staff of over 600 engineering, environmental and technical support personnel. GAI's staff is particularly well suited to investigate problems associated with landfill closures. We propose to utilize a staff of engineers, geologists, biologists, surveyors, estimator, designers, and CADD operators to conduct the investigatory and design work backed by a group of management professionals. The primary team anticipated for this work includes;

Mr. C. Elwood Penn, IV, P.E., Managing Officer will serve as Contract Administrator in the Charleston office. Mr. Penn has worked with industry and their related problems for **25 years**. Mr. Penn is very knowledgeable with a variety of WVDEP guidelines and project expectations. His qualifications will result in direct benefits to the State in terms of quality and cost efficient completion of the project.

Mr. James A. Hemme, P.E., L.R.S. will serve as a Project Manager. Mr. Hemme has participated in the design and permitting of over 50 solid waste facilities. This has included engineering work on four LCAP projects (Wyoming County Landfill, Jackson County Landfill, Moundsville Landfill and Flemming Landfill) and design, permitting and construction of over 20 other landfills and solid waste facilities throughout West Virginia.

Mr. Charles F. Straley, P.E., P.S. will serve as Lead Engineer. Mr. Straley has managed and participated in the design and development of landfill design and studies for over 10 projects for the WVDEP, LCAP Program. Mr. Straley has a complete understanding of WVDEP - LCAP guidelines, specifications, and project expectations.

Mr. Joseph A. Prine, E.I. will serve as a Project Engineer. Mr. Prine has 6 years of engineering experience which has included the design, permitting and full time construction monitoring of landfill expansions and the placement of capping systems in West Virginia.

Mr. Brian Clauto will serve as project biologist and environmental scientist. Mr. Clauto has 5 years experience with GAI and assisted in the cursory assessment of all facilities in the LCAP program and performing research and QA/QC on Berkeley County Closure.

Mr. Terry W. Queen will serve as the primary QA/QC personnel. Mr. Queen has provided QA/QC services on five LCAP projects and performed fieldwork on several other LCAP projects. Mr. Queen has a complete understanding of WVDEP-LCAP guidelines, specifications, and project expectations. He has a good working relationship with LCAP staff. Mr. Queen recently completed a QA/QC on a 20+ acre landfill.

All have relevant direct experience with site characterizations, grading/drainage, leachate management, surface and ground water issues, and preparation of construction documents.

A team of staff engineers, geologists/hydrologists, environmental scientists, biologists, technicians, CADD operators, word processor operators, secretaries, and designers will provide

the expertise and manpower to complete the project. For special needs we can call on planners, land use specialists, natural resource specialists, soil scientists, archaeologists, architectural historians, and structural and material engineers.

CORPORATE SPECIALIZED EXPERIENCE AND DEMONSTRATED ABILITIES

GAI has provided a wide variety of services to governmental agencies and industry related to landfill design and closure.

In addition we have performed similar services for other agencies and sections of the WVDEP and other state and federal agencies including;

- Open End and Specific Contracts for design of Abandoned Mine Lands (AML) Reclamation and Acid Mine Drainage (AMD) sites throughout West Virginia,
- Numerous projects for the Office of Surface Mining, and Reclamation and Enforcement (ASMRE) throughout Kentucky and Pennsylvania,
- Numerous projects for Ohio Division of Natural Resources,
- Multiple landfill sites for electric generation companies for disposal of fly ash and gypsum. This has included assessment, design and permitting in West Virginia and other states.

MANAGEMENT PLAN & LOCATION OF FACILITIES

Management Plan

GAI's proposed project management plan is presented on Figure 1. The work will be performed in **GAI's Charleston, West Virginia office** which will allow ready access to the project area. Assistance, if and when needed will be provided by staff located in the Pittsburgh, Pennsylvania office of GAI. GAI's Charleston location is also less than 6 miles from the WVDEP's Charleston Headquarters.

GAI's professional, technical and support staff have extensive experience on LCAP and related design projects and are extremely well qualified to serve the WVDEP on this contract. GAI stands ready to commit the personnel and resources required to complete the project in a timely, technically sound and cost efficient manner.

Contract Administration will be provided by **Mr. C. Elwood Penn, IV, P.E.** as shown in Figure 1. Mr. Penn will be responsible for setting up the initial project and assist in developing the scope of work and establishing the contract with WVDEP. He will also generally supervise the work in progress and perform progress reviews at intermediate points and finally prior to submittal to the WVDEP. In addition, Mr. Penn will be in charge of any contractual negotiations necessary through the process of the project.

Project Management will be provided by **Mr. James A. Hemme, P.E.** as shown in Figure 1. Mr. Hemme will be responsible for the day to day management and performance of the project. He will review the work directive and spreadsheet preparation of the scope of work and cost proposal. A written proposal including a detailed cost estimate (manhours and expenses associated with the project) will then be prepared and submitted to the WVDEP for their review. Upon WVDEP's approval of the proposal, the Project Manager will arrange for the start of the work. Included will be project staffing, arrangement and detailing of the scope of services to be provided by GAI, and review of project budget and schedule. The Project Manager will on a daily basis supervise the work in progress and review work products of others at regular intervals and finally prior to submittal to the WVDEP. He will be responsible for maintaining liaison with the WVDEP Project Manager including project status reports, as required. He will be responsible for adherence to the project schedule and budget.

Day-to-day project activities will be performed under the direction of the Project Manager by one of the project engineering (i.e. **Charles Straley, P.E., P.S., Joseph Prine, E.I.**), surveying or environmental staff as shown in Figure 1.

GAI's large experienced staff permits us to respond quickly, provides flexibility, and permits high level input to the project's staff from in house experts. However, our method of staffing projects, as evidenced by our performance on prior projects for WVDEP-LCAP, is to assign qualified team with a core group of 3 to 5 individuals with total responsibility for completion of the work to the clients satisfaction and budget. Where necessary the core group can draw on the expertise available within GAI's large and experienced staff.

Project Budget Control

The Project Manager will be responsible for monitoring the project budget. GAI's staff submits electronic time sheets on a weekly basis. All charges including labor hours and other project expenses to a particular project are compiled in our data center. Through our DELTEK accounting system, project managers can review charges to date by Wednesday the following week. In this manner, we can keep close track of our project costs.

Schedule Control

Direct responsibility for schedule control lies with the Project Manager. Initially, the Project Manager will review the work directive schedule requirements to see if they can be complied with given the anticipated scope of work. As the project progresses, the Project Manager will monitor progress and compare it with the established schedule on a weekly basis. In this manner, the Project Manager can make staff adjustments to maintain the project schedule. If circumstances develop that make it impossible to maintain the project schedule, the Project Manager will contact the WVDEP Project Manager to develop a mutually acceptable adjustment to the schedule.

Location of Facilities

GAI proposes to complete work under this contract in our **Charleston, West Virginia office**. We feel that our close proximity to the WVDEP's Charleston office and the project area will allow the project to be completed in a timely, efficient manner.
