Once you have made the decision to own an IVX System, a detailed implementation program is initiated. The primary importance of the plan is the assignment of responsibilities and target dates for completion. With the plan, everyone is aware of what needs to be done, when it needs to be done, and who need to complete what task.

We have trained technicians and support personnel available to ensure the timely installation and smooth cut-over of your proposed system.

Upon your order, COMMLINK SYSTEMS will process and coordinate your order to final acceptance and ensure that critical schedules are properly met.

The following outlines the primary activities involved in the implementation of your system:

- A Customer Service Representative is assigned to the project
- An internal meeting is held among the Installation Supervisor, Sales Representative, and the Customer Service Representative to discuss the system design, and unique needs, and to plan the installation schedule
- The Customer Service Representative meets with your firm (system size dependant) to review programming options, discuss any system changes necessary, and establish a training program.
- The final system configuration is reviewed and approved to ensure proper system installation.
