WV PURCHASING  
DIVISION

Dear Mr. Whittaker:

GAI Consultants, Inc. (GAI) is pleased to submit an original and two copies of our expression of interest for professional engineering and related services for the West Virginia Division of Natural Resources, Parks and Recreation's project. GAI offers its clients a broad scope of engineering services including civil and environmental projects. In particular, this submission presents our capabilities in the area of planning, design, preparation of construction and bid documents, environmental regulations and permitting, and cultural resources.

GAI is a full-service multi disciplinary engineering consulting firm devoted to serving the needs of our clients. Our staff consists of over 700 technically skilled engineers, scientists, biologists, archaeologists, technicians, designers, and administrators. We offer an outstanding combination of design and engineering expertise, including transportation, geotechnical, hydraulic, and environmental engineering design; archaeological studies; and construction monitoring.

The engineering services for this project will be performed by our Charleston office. Mr. Mark D. Young, P.E., has been assigned as Project Manager, and he will be the main contact between GAI and the West Virginia Division of Natural Resources, Parks and Recreation. Mr. Young will be assisted by Mr. David Gilmore and Mr. James Hemme who provided planning, construction documents, and construction management for the existing Stonewall Jackson Resort State Park and Facilities.

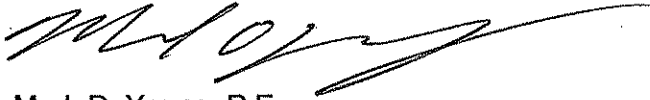

GAI is currently designing multiple civil and environmental engineering projects including pedestrian bridges and permitting, be it for developers, state and federal government, utilities, and local governments. We have the ability to assign dedicated project engineers to the West Virginia Division of Natural Resources, Parks and Recreation's project. As you will see, our design staff is particularly well qualified to perform these engineering services for you.
