Re: Expression of Interest RFQ #GSD086424

Dear Ms. Ferrell:

CMA Engineering is pleased to submit, for your consideration, our qualifications and experience in providing engineering services for the proposed toilet renovations located in Building #1 at the State Capitol Complex in Charleston, WV.

CMA has provided engineering services for over 2,400 projects since its incorporation in 1986. Projects have included both new construction and renovations and include the new West Virginia Department of Environmental Protection Consolidated Office Building, renovations to Tax Building #22, fire alarm/fire sprinkler upgrades for the WV Cultural Museum, plumbing upgrades for West Virginia University's Boreman Dormitory and toilet renovations for Horace Mann Middle School, South Charleston Middle School and Nitro High School.

CMA is currently providing HVAC design services for renovations to the Senate Chamber in Building #1. We are aware of the importance of preserving the historical integrity of the State Capitol Complex as these restroom renovations are implemented. We are including the profile and references for the noted historical architect, Ralph Pedersen, in our submittal.

CMA Engineering and Ralph Pedersen Architect have successfully collaborated on numerous projects during the last twenty years. Projects of historical facilities include the Doddridge County Courthouse, the Harrison County Courthouse and the Kimball War Memorial. The Kimball War Memorial won the 2006 Honor Award for Excellence from the West Virginia chapter of American Institute of Architects.

We appreciate your consideration of our firms and look forward to presenting a more comprehensive statement of our qualifications in a personal interview.

Sincerely,  
CMA Engineering

Timothy L. Cox, P.E.  
Principal
