ADDENDUM NO. 2
AGR1012

Responses to Written Questions

- Q. 1. Can post spacing be 8' o.c. instead of 10' o.c. for enclosed east side eave wall?
A. 1. Yes, but only for the enclosed sides
- Q. 2. Do all post need to be full-length pressure treated columns or just ones that are exposed?
A. 2. No, only the exposed side posts must be full-length pressure treated. Others must pressure treated on areas below grade and at grade
- Q. 3. Can 2X4 roof purlins be placed on top of trusses instead of being placed in between? This would also remove the need for 20 gauge saddle hangers.
A.3. Yes, roof purlins will be allowed above the truss without saddle hangers as long as the provisions listed under sections IA and IB are adhered to.
- Q. 4. Is a poured concrete pad required for the entire 24' x 80' building, or are we just pouring concrete for the mobile labs and sidewalks
A. 4. The concrete is for the lab pads and sidewalks only.
- Q. 5. What is the total length of the sidewalk that will need to be quoted? The drawings show they will be 5' wide but the total length is not provided.
A. 5. The length is approximately 20' and is replacing damaged sidewalk that has been removed. The bidder is responsible for the actual measurement.
- Q. 6. How level is the building itself? Is the pad would need to be brought up to grade, who will be responsible?
A. 6. The site was leveled in the fall of 2009. The trailer pads will match the finish elevation and are close to current elevation. We will set a grade stake for the finish elevation for pre-bid evaluation. Finish gravel work inside will be done by others.
- Q. 7. Is the contractor responsible for obtaining the building permit? Will other permits be required?
A. 7. The contractor is responsible for obtaining all permits. The only known permit is a building permit from the city of Moorefield.
- Q. 8. Can you provide the correct site for prevailing wage rates?
A. 8. www.sos.wv.gov/administration-law/wagerates/documents/2010-Building-Wage-Rates/hardy.pdf

Q. 9. Due to the site having 3' of fill dirt the mobile lab pads will have to be deeper depth than 24". If they would be done at the stated size in the bid document it is my fear they would sink after the mobile lab is placed on top of them. It was stated in the meeting that the fill had not been compacted, if it has been compacted then the mobile lab pads could be done to bid specs. My recommendation would be to drill a 24" diameter hole 4' deep, place a sono tube into the hole. Then place rebar as recommended and backfill the entire hole with wet-pour concrete. This would obviously not be as large as the 30" X 30" specified in the bid documents, but I feel that it would be more than sufficient after seeing the mobile lab.

A. 9. The new changes are addressed in the addendum which calls for 36" x 36" x 36" pad with three tier of rebar.

Q. 10. Can the two (2) inch R6 PFSK faced fiberglass insulation be replaced with 1" R-Max (4 X 8 solid sheet insulation board) if it has the same R-Value? Another concern is that with the other building on site the walls are enclosed, this building they are not. In an open structure, birds and insects can get into the fiberglass insulation and cause a mess. With solid board type insulation this concern would be eliminated.

A. 10. Do not use fiberglass insulation. Use no less than R6 solid sheet insulation board. Sheets must be solid white or reflective with no lettering or numbers exposed.

Q. 11. Are certified payrolls to be furnished to the owner?

A. 11. Yes

Q. 12. Being a wood frame structure are all workers to be classified as carpenters per the Department of Labor?

A.12. This is a prevailing wage job and the standards set by the Department of Labor for job classification are to be followed. You will need to contact the Department of Labor.

Q. 13. In the general conditions I, the bid submittal states, "Submit a letter from the building manufacturer certifying that the building design will meet the criteria of the 2006 IBC and other applicable codes required for the State of WV." This statement means that the building is a system designed by a "Building Manufacturer" not a building that is put together with components by a contractor. Is this correct?

A. 13. This is correct. We are requiring a "Building Manufacturer's" certification as written. Location and site specific information must be supplied to the "Building Manufacturer" by the contractor for proper design calculations.

Q. 14. Under III, Warranty Structural Design – 50 years: "The manufacturer shall warrant that the building will not experience an occurrence of structural failure of damage due to improper design." Will you accept a 50 year warranty from a contractor or does this warranty have to be written by a "Third Party Building Manufacturer"?

A. 14. The "Structural Design" warranty should come from a "Third Party Building Manufacturer".

Q. 15. Does the letter from the building manufacture certifying the design criteria need to be stamped and signed by a professional engineer?

A. 15. Only the drawings require an engineer's stamp.

Q. 16. Along with stamped and signed shop drawings are stamped and sealed design calculations required for the entire building system?

A. 16. Only the drawings require an engineer's stamp.

PURCHASING AFFIDAVIT

West Virginia Code §5A-3-10a states: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

EXCEPTION: The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

Under penalty of law for false swearing (*West Virginia Code* §61-5-3), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.
