**Expression of Interest** 

Design Engineering Services Proposal Cambria Portals & Drainage Project

#### Gentlemen:

CTL Engineering of West Virginia, Inc. is very pleased to present this proposal to provide geotechnical engineering and related services for the West Virginia Abandoned Mine Lands and Reclamation Program. With over 80 years in the business, we feel our firm can provide the professionals and facilities the State of West Virginia is looking for.

CTL has evolved into a recognized leader in the Abandoned Mine Lands Engineering Design and Investigation field. We offer the services necessary to provide a non-subcontract, quality product to support your program. Our capabilities include laboratory facilities, drilling rigs, surveying systems, design equipment, and a qualified staff. We have 12 Professional Engineers, five of which are registered in West Virginia and have direct AML Design Experience. Our in-house disciplines of professionals include: Civil & Mining Engineers, CAD Designers, Surveyors, Geologists, Hydrologists and Biologists. We are experienced in completing more than 50 projects annually that require aerial mapping, support surveying with GPS, and final contouring for design.

Our in-house ability reaches beyond simply being an AML design firm. We also have extensive contract administration and management experience with the procedures of the state of West Virginia. Our invoicing procedures and accounting software has been accepted, used, and audited by various state agencies.

CTL's primary staff has over 125 years of experience with mine reclamation engineering on both a national and international level. Our qualifications and facilities are unsurpassed when it comes to Abandoned Mine Reclamation Design. With offices in Charleston and Morgantown, we can effectively respond to any AML Design tasks throughout West Virginia. In addition, we have six full time design teams available to complete AML design projects. Our past experience with drainage design, mine seals and reclamation design in West Virginia extends back 20 years. Specifically, the Cambria Portals & Drainage Project is similar in scope to other AML Design projects we have successfully

completed in West Virginia, Ohio and Maryland. CTL's prior experience with this development and our proximity to the site will allow for prompt and professional response to this project. Attached to this proposal are numerous examples of mine drainage control projects in West Virginia, including 4 projects that were nominated and chosen as National AML Reclamation Award winners!

We sincerely appreciate the opportunity to submit this proposal to you for consideration. Should you have any questions or need additional information, please contact our office.

Respectfully submitted,

CTL Engineering of West Virginia, Inc.

Royden L. Loucks

RFQ No. DEP14845

# STATE OF WEST VIRGINIA Purchasing Division

# **PURCHASING AFFIDAVIT**

#### **VENDOR OWING A DEBT TO THE STATE:**

West Virginia Code §5A-3-10a provides that: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

# PUBLIC IMPROVEMENT CONTRACTS & DRUG-FREE WORKPLACE ACT:

If this is a solicitation for a public improvement construction contract, the vendor, by its signature below, affirms that it has a written plan for a drug-free workplace policy in compliance with Article 1D, Chapter 21 of the **West Virginia Code**. The vendor **must** make said affirmation with its bid submission. Further, public improvement construction contract may not be awarded to a vendor who does not have a written plan for a drug-free workplace policy in compliance with Article 1D, Chapter 21 of the **West Virginia Code** and who has not submitted that plan to the appropriate contracting authority in timely fashion. For a vendor who is a subcontractor, compliance with Section 5, Article 1D, Chapter 21 of the **West Virginia Code** may take place before their work on the public improvement is begun.

#### **ANTITRUST:**

In submitting a bid to any agency for the state of West Virginia, the bidder offers and agrees that if the bid is accepted the bidder will convey, sell, assign or transfer to the state of West Virginia all rights, title and interest in and to all causes of action it may now or hereafter acquire under the antitrust laws of the United States and the state of West Virginia for price fixing and/or unreasonable restraints of trade relating to the particular commodities or services purchased or acquired by the state of West Virginia. Such assignment shall be made and become effective at the time the purchasing agency tenders the initial payment to the bidder.

I certify that this bid is made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership or person or entity submitting a bid for the same materials, supplies, equipment or services and is in all respects fair and without collusion or fraud. I further certify that I am authorized to sign the certification on behalf of the bidder or this bid.

#### LICENSING:

Vendors must be licensed and in good standing in accordance with any and all state and local laws and requirements by any state or local agency of West Virginia, including, but not limited to, the West Virginia Secretary of State's Office, the West Virginia Tax Department, West Virginia Insurance Commission, or any other state agencies or political subdivision. Furthermore, the vendor must provide all necessary releases to obtain information to enable the Director or spending unit to verify that the vendor is licensed and in good standing with the above entities.

#### CONFIDENTIALITY:

The vendor agrees that he or she will not disclose to anyone, directly or indirectly, any such personally identifiable information or other confidential information gained from the agency, unless the individual who is the subject of the information consents to the disclosure in writing or the disclosure is made pursuant to the agency's policies, procedures and rules. Vendor further agrees to comply with the Confidentiality Policies and Information Security Accountability Requirements, set forth in http://www.state.wv.us/admin/purchase/privacy/noticeConfidentiality.pdf.

Under penalty of law for false swearing (**West Virginia Code** §61-5-3), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.

urchasing Affidavit (Revised	101/01/09/			,					

# Project Management Plan

Our approach to the Cambria Portals & Drainage Project will be similar to many other drainage control and conveyance projects we have designed. The Project Management Plan we have developed for this site is as follows:

- The project manager will be solely responsible for expedient and accurate completion of each phase of the individual projects performed under this contract. He will review the project site and discuss the specific scope of work for the project with the project representative from the WVDEP. A cost proposal will be prepared, in accordance with contract unit rates, based upon an estimate of manpower, equipment, and laboratory needs.
- CTL will then mobilize a fully equipped survey crew to set survey control and map the project site. Permanent control monuments will be established to ensure that the construction contractor can tie into the necessary baselines. The project manager will supervise the surveying tasks and provide budgetary control for this portion of the work.
- Given the close proximity to the residences involved, coordination will also involve the land and home owners to minimize disturbance of the affected areas and garner cooperation during design and construction.
- Simultaneous to the surveying, material sampling, and site investigative procedures will be
  completed in accordance with the project proposal and under the supervision of the Project
  Engineer/Geologist. Should field conditions dictate that additional work or a major
  modification is required, the project manager will contact the WVDEP representative
  immediately to confirm the changed conditions.
- An evaluation of the site underground mine mapping will be undertaken to determine the mine pool locations and elevations.
- A geotechnical investigation shall be performed to delineate the mine pool and to determine and design the optimum wet and dry seals for each of the open and collapsed portals. This investigation shall be performed with a focus on safety to insure the safety of the local inhabitants and dwellings as well as the safety of the drilling and geotechnical personnel.

- Following completion of the surveying, field investigation. and material sampling, the analytical design work will begin. The Project Manager and Engineer will review the project data, evaluate the feasible alternatives and prepare a preliminary set of construction documents. The documents will include at a minimum:
  - 1. A site map indicating existing conditions;
  - 2. A tax map overlay with the parcels identified that will be impacted by the proposed design;
  - 3. Location of all seeps relevant to project site
  - 4. Location and design of wet-seals for all portal sites.
  - 5. Reclamation and re-grading plans for total site
  - 6. Site Profiles;
  - 7. Cross Sections;
  - 8. Drainage control system and control structures compatible with AMD conveyance, with details;
  - 9. Survey control points; and
  - 10. Miscellaneous Site details.
- In addition to preparation of the above-described drawings, a complete set of specifications will be prepared and outlined to describe in detail the scope and methods of work to be accomplished. An estimate of construction costs and the design calculations will also be submitted to the WVDEP for review and future reference.
- Following the submission of the construction documents, a project design review meeting will be coordinated with the WVDEP, CTL, and appropriate individuals to review the proposed plans. Recommendations for plan revisions will be discussed and implemented, as necessary, into the final design documents. Upon completion, all final documents, drawings, plans and specifications will be forwarded to the WVDEP for bidding purposes.
- Construction observation will be provided during the construction phase of the projects
- At the request of the WVDEP, CTL will provide construction observation personnel.

Our Project Manager and/or Engineer will coordinate the pre-bid and pre-construction conferences with the WVDEP to address any questions and supply the necessary survey control data. Periodic inspections may be conducted by our Project Manager, as deemed necessary by the WVDEP, to address specific problems that arise during construction. A report will be prepared by CTL following each of these meetings detailing the findings, conclusions, recommendations, and responses to pertinent questions.

# Project Scope

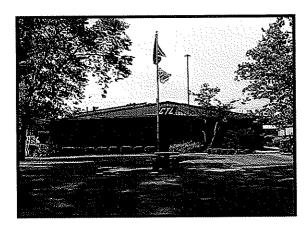

# Cambria Portals & Drainage Project

Construct access road to site from county highwall Excavate, dewater and install wet seals in at least three (3) deep mine portals Construct drainage channels to carry the water safely off-site Soil cover, condition and revegetate all disturbed areas.

CTL Engineering, Inc. (CTL Engineering) is a full service consulting engineering, testing, inspection, and analytical services company. CTL Engineering, formerly known as Columbus Testing Laboratory, was established in 1927 as an independent engineering testing laboratory serving the local community. During the early years, our expertise focused mainly on soils, foundation engineering, and construction testing and inspection services.

Business First Journal regularly lists CTL Engineering, Inc. as one of the top engineering firms in Central Ohio in terms of employees and revenues generated. The Engineering News-Record ranked CTL Engineering Inc.

among top 500 architectural and engineering firms in the nation. CTL Engineering maintains a staff of over 200 employees, including registered engineers, architects, chemists, environmental scientists, geologists, hydrologists, wetland scientists and technicians.

Today, CTL Engineering regularly performs services throughout all of West Virginia and in a majority of Mid-Atlantic and Midwestern states.

## YEARS of SERVICE

CTL Engineering Inc. has been in business since 1927 and had been providing quality consulting engineering services for nearly 75 years. CTL Engineering of West Virginia will be celebrating it's 20<sup>th</sup> anniversary this year.

CTL Engineering Inc. provides consulting engineering services, testing and inspection services and offers a full-services analytical laboratory in-house. CTL also provides Geotechnical Engineering, Environmental Engineering Civil Engineering, Mining Engineering, Construction Inspection and Testing, Nondestructive Testing and Inspection, Forensic Science, Accident Re-Construction, Roofing Consulting, Product Testing, Laboratories, Analytical Chemistry, Materials Testing, and Metallurgy Services.

# CTL Engineering of West Virginia, Inc.

An Employee Owned Company

CTL Engineering of West Virginia, Inc. (CTL of WV) is a full service consulting civil engineering, testing, inspection, and analytical services company. CTL Engineering of West Virginia, Inc. was formed in 1981 to service West Virginia, Maryland and Pennsylvania. CTL of WV is part of CTL Engineering, Inc. formerly known as Columbus Testing Laboratory, which was established in Columbus, Ohio in 1927 as an independent engineering testing laboratory serving the local community. During the early years, our expertise focused mainly on soils, foundation engineering, and construction testing and inspection services.

The Engineering News-Record ranked CTL Engineering, Inc. among top 500 architectural and engineering firms in the nation. CTL Engineering maintains a staff of over 200 employees, including registered engineers, architects, chemists, environmental scientists, geologists, hydrologists, wetland scientists and technicians.

CTL of WV provides total Civil Site Design for development projects throughout West Virginia. These designs include site layouts, utility design and interconnections, stormwater management design, parking and roadway design, permit preparation and submittal, and interaction with architects, owners and all interested parties to the projects.

CTL of WV provides all necessary surveying services required of projects including boundary and ALTA surveys, topographic surveys, aerial survey control, GPS surveys, and site construction surveys to assure proper construction and compliance with specifications of the project.

CTL of WV has become an industry leader in geotechnical design and investigations. In the past 5 years, CTL of WV has provided over 1000 geotechnical investigations including drilling, sampling and design for both the public and private sectors. CTL of WV is regularly called upon to provide unique geotechnical engineering design services for projects throughout the United States and Canada.

CTL of WV provides environmental services for developments throughout West Virginia and Maryland. Environmental Services include Phase I and II ESAs, wetland delineation and mitigation plans, State and Federal 401 and 404 Permit submittals, Ms4 Phase II storm water permitting, soil and groundwater sampling, asbestos surveys and sampling, lead based paint testing, mold testing, UST removal oversight, hazardous material identification and remedial design and other environmental services as required

CTL of WV provides construction, material and concrete testing and observation services. CTL of WV has ten field technicians providing dedicated construction observation and compliance testing. CTL's in-house material laboratory provides the much needed prompt turn-around required for projects to be successful.

Additional services provided by CTL include Nondestructive Testing and Inspection, Forensic Science, Accident Re-Construction, Roofing Consulting, Product Testing, Laboratories, Analytical Chemistry and Metallurgy Services.

# Geotechnical Engineering

The Geotechnical Engineering Department at CTL Engineering subsurface routinely performs investigations, and soil and rock We prepare engineering testing. make recommendations reports, regarding foundation and construction techniques, perform and pertinent geotechnical services, as dictated by a given project.

#### **Drilling Services**

CTL Engineering owns and operates its own fleet of drill rigs, the largest of which has a capacity to drill and take samples up to 300 feet deep. Our rigs are equipped with large diameter soil and rock core samplers, in-situ and cone meters pressure penetrometers. These rotary drilling rigs conduct standard split spoon sampling. Our drill rigs have pumps, standard wireline and coring equipment for proper and efficient execution of subsurface investigations. We can perform pressure meter tests and vane shear tests in the field, in conducting and/or to monitoring of well pumps tests.

#### **Analytical Laboratory**

Our Soils Laboratory has consolidometers, triaxial and direct sheer apparata, state-of-the-art permeability devices and normal soils classification equipment.

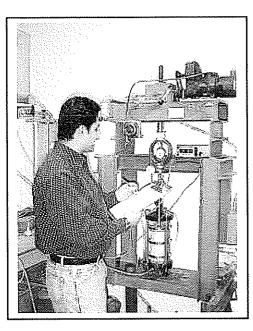

CTL Engineering provides a detailed analysis of the surface and subsurface composition and chemistry of the soils at the proposed site. For existing structures, we provide a foundation analysis. We also provide services for foundations under construction.

CTL owns and operates a fleet of ten (10) drill rigs

- Stormwater Surveillance Mapping
- Water body Sounding Studies

# **Geographical Information Systems**

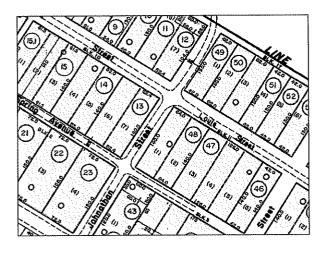

Too often sanitary and water utilities discover that paper maps and drawings are seriously outdated, incomplete, or even nonexistent. The problem is usually related to turn over of employees or engineers. The beginning of a utility database begins with the **GIS** mapping of infrastructure. Detailed base mapping can be created by scanning existing maps, CAD importing drawings, working from aerial photos, and surveying the location of infrastructure and utilities.

# CTL Engineering offers these services:

- Global Positioning Systems (GPS) Field Inventory
- Geodatabase Design
- Data Creation Services
- GIS/IT Integration

# GIS Technology can benefit these industries:

- Infrastructure
- Water, Wastewater
- Storm Water
- Oil and Gas
- Mining
- Wetlands
- Electric utility
- Transportation
- Land/Urban Planning
- Strategic Planning
- Public Safety
- Emergency Management
- Forestry
- Facilities Management
- Forensics

Every sector of a municipality can benefit from GIS CTL creates mapping. phased mapping program that will reduce staff time, decision making, improve redundant data eliminate collection, improve record keeping and allow better asset management. CTL uses the latest version of ArcMap which allows importing of all current data formats to build a comprehensive database for the future. This database can be maintained and developed enhance emergency public response when water/wastewater service is an issue. Also, planning and funding of new projects can be effectively prioritized.

CTL's GIS professionals use recent aerial photography and existing utility maps for base maps in order to direct surveying activities. We also add location specific supporting information from a

variety of sources. Over time, CTL can create precise mapping which will allow your municipality to plan accordingly for the challenges and changes you will face.

# **Supporting Services**

- Surveying/ Mapping
- Civil/ Site Design
- Environmental
- Geotechnical
- Construction Management
- Materials Testing
- Analytical Laboratory

www.ctleng.com

# CTL Engineering has experienced engineers, geologists and mining technicians to provide the expertise to insure successful mining operations. We provide abandoned mine land reclamation design and project management, mine subsidence evaluations and remediation plans, hydraulic and hydrology studies, hydrogeologic evaluations, mine permitting, and coal reserve studies.

The CTL Mining Engineering Group coordinates with our drilling services and various testing departments to provide a full scope of services to the mining industry. Our laboratories are certified to perform the water and overburden analysis prescribed by federal regulatory programs.

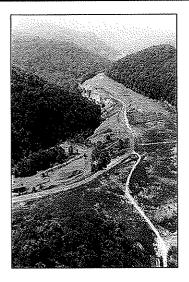

CTL Engineering provides drainage control structure design to comply with the regulatory requirements for controlling and treating site damage. Exploration equipment and remote video camera monitoring are used by CTL Engineering to prepare accurate maps for reclamation, subsidence stabilization measures and mine closures.

CTL Engineering has experienced mechanical and metallurgical engineers on staff to provide mine equipment evaluation and consultation services. CTL Engineering is a proven source for accurate and dependable technical information.

#### **CTL Mining Services Include:**

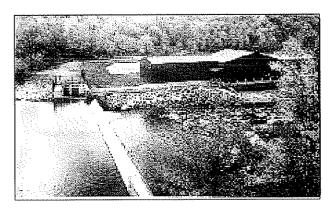

- Subsidence Investigations
- Abandoned Mine Reclamation Design
- Permit Preparation
- Mine Design Plan
- Refuse Disposal Facility
- Environmental Monitoring
- Coal, Water and Overburden Analysis
- Drainage Control Structure Design
- · Failure Analysis
- Legal Testimony
- Acid Mine Drainage

# Mining Engineering Services

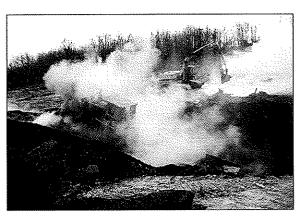

Taylor Creek Impoundment, West Virginia
Reclamation of a 120-acre burning refuse pile and dewatering
and abandonment of a 24-acre coal-related impoundment.

Blackwater River, Water Improvement Project, Davis, West Virginia

Jamison Burning Refuse Reclamation Project

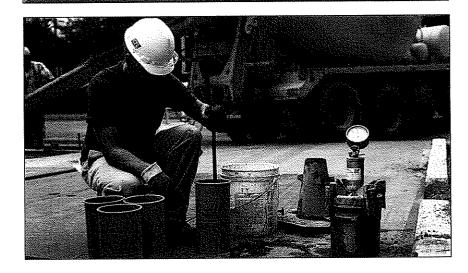

A project's construction phase requires quality control inspections and reliable testing. Building owners, architects, engineers, and contractors choose CTL Engineering for field inspections, knowing that we are accurate, dependable, and perform our services in a timely manner. Our experienced engineers and inspectors are your partners in construction. We help provide a finished quality product.

# CTL Engineering provides inspections of the following:

- Earthwork, including Embankment & Foundations
- Reinforced Concrete
- Floor Flatness
- Roofing Systems
- Structural Steel
- Masonry
- Sprayed-on Fire Proofing Installation
- Bituminous & Portland Cement Concrete Paving
- Single & Multi-Story Building Structures
- Pavement for Airport Runways, etc.
- Parking Garages & Bridges
- Water & Wastewater
   Treatment Facilities &
   Associated Piping Systems
- Highways

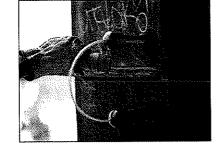

We perform quality control testing of the above materials and structures, in addition to destructive and nondestructive testing of finished pavements and structures.

# **Construction Monitoring**

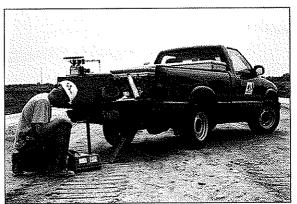

CTL Engineering examines existing structures to evaluate potential problems. Failed structures are analyzed to determine the cause and extent of damage. We evaluate structural integrity during initial construction and at regular intervals after completion. Our work includes steel reinforced concrete structures. CTL Engineering routinely evaluates metal and concrete pipes.

We perform audio/video surveys, sonic velocity testing, x-ray examinations, half-cell potential, and other destructive and nondestructive tests.

CTL Engineering's technicians maintain the following certifications and/or training:

- ACI (American Concrete Institute) Level I
- NICET Certification
- Level I, II, III or IV

- Hazardous Materials Certification
- Confined Space Entry Training
- Radiation Safety Training
- WVDOT, ODOT, and NCDOT Certification

CTL has designed 4
 projects that have
 received national
 Awards for excellence
 in AML Reclamation

# **Project Synopsis**

- Burning Refuse Piles
- Impounding Refuse Embankments
- Mine Fire xtinguishment
- Landslides
- Mine Subsidence Stabilization
- Stream Quality Enhancement
- Highway Relocation Co-Op Agreements
- Public Water
   Distribution Systems

# Corporate Specialized Experience

Relative to Abandoned Mine Land Reclamation and Geotechnical Engineering, CTL Engineering is a leader! During recent corporate history (i.e., the past 27 years), we have conducted more than 1,500 Mine Subsidence Investigations, designed more than 150 Mine Reclamation projects, performed over 5,000 Subsurface Investigations, and completed 200 Civil Engineering site designs. Our Mine Reclamation Engineering Department completed numerous projects under contracts with the West Virginia Division of Environmental Protection, Maryland Bureau of Mines, Ohio Department of Natural Resources, Pennsylvania Department of Environmental Protection, Indiana Department of Natural Resources, Colorado Division of Reclamation, US Soil Conservation Service (VA Ramp), US Office of Surface Mining, US Bureau of Mines, and US Forest Service.

Attached to this section are a few selected pictorial examples of various completed projects that CTL has designed and have been or are being constructed. Also attached is a detailed listing of design projects this office has successfully completed during the past 27 years. Finally, a schedule of project abstracts of selected AML assignments is enclosed which describes the project, identifies the location, lists the owner, telephone number and owner's address, and the scope of services provided.

CTL Engineering's history is unsurpassed in the realm of Geotechnical/Mine Reclamation Engineering. As evidenced by our project listing and resumes' of staff individuals, many other projects have been accomplished that are similar in scope to this contract but too numerous to list within this text. We would be pleased to supplement any other information that may be required.

# AML Project Experience

# MINE DRAINAGE/STREAM RESTORATION

- Aaron's Run, MD Bureau of Mines
- St. Clair Portals, WVDEP
- Deckers Creek, WVDEP
- Whiskey Run, ODNR
- Oceola Mills, Penn Mining Corp
- Georges Creek, MD Bureau of Mines
- Bell Mine Drain, ODNR
- Majestic Mine, ODNR
- Blackwater River/Beaver Creek Treatment Project

# **REFUSE PILES**

- Ocean Gob Pile, MD Bureau of Mines
- Alderson Branch, WVDEP
- Edna Refuse Piles, WVDEP
- American Bituminous Power Partners, ABPP
- Jane Lew Tipple, WVDEP
- Harrison Power Plant, Allegheny Power
- North Fork Refuse Pile, WVDEP
- Austen Highwall Refuse Pile & Portals, WVDEP
- Bull Run Restoration, ODNR

# **MINE FIRES/REFUSE FIRES**

- National Mine Fire, MD Bureau of Mines
- Frontz/Folly Mine Fire, ODNR
- Blue Pennant, WVDEP

- Blue Bell Mine, ODNR
- Red Hollow Burning Refuse, WVDEP
- Jamison Burning Refuse, WVDEP

# WATER IMPOUNDMENTS

- Taylor Creek, WVDEP
- Cypress Emerald Slurry Dam, Cypress Coal
- Amigo Smokeless Impoundment, WVDEP
- Enoch Township Impoundment, ODNR
- Pauline Mine, ODNR
- Marsh Hill, MD Bureau of Mines

# WATER SUPPLY REPLACEMENT

- Moundsville Water Plant, WVDEP
- Rohr Road, WVDEP
- Peel Tree, WVDEP
- Woodworth Road, ODNR
- Water Well Impact Study, PADEP
- New Straitsville Water Tank, Town of New Straitsville, Ohio

# **LANDSLIDES**

- Chickwan Landslide, ODNR
- Rt. 1 Landslide, ODNR
- Kitzmiller Landslide, MD Bureau of Mines
- Barton Landslide, Office of Surface Mining
- Westernport Landslide, MD Bureau of Mines
- Ohio Avenue, WVDEP
- Fink Refuse Pile Landslide, Office of Surface Mining
- Robinson Run Landslide, WVDEP

# **OPEN MINE SHAFTS**

- Witch Hazel Mine Shaft, ODNR
- Everettville Portals, WVDEP
- Kempton Mine Shaft, MD Bureau of Mines
- Wellston Mine Shaft, ODNR
- Piney Creek, WVDEP
- Degrava Mine Shaft, ODNR

# **HIGHWALLS**

- Peninsula Highwalls, WVDEP
- Camp Run Highwall, WVDEP
- Germano Highwall, ODNR
- Midlothian Highwall, MD Bureau of Mines
- Austen Highwall, WVDEP
- Sovern Run, WVDEP
- Ridgeland Highwall, ODNR

# **OPEN PITS**

- Sugar Grove, #1, #2, & #3, WVDEP
- Baldwin, Pickens & Lick Run, ODNR
- Miller Road, MD Bureau of Mines
- Rumley Highwall, ODNR
- Tunnelton Gob, WVDEP
- Matthew Run, MD Bureau of Mines

# MINE SUBSIDENCE

- Eccles
- Penninsula
- Thomas/Euclid Avenue, WVDEP
- Morgantown Airport, WVDEP
- Cambridge Walmart, Fletcher Bright
- Rock Hill Schools, Rock Hill School District
- Rt. 936 Stabilization, MD Bureau of Mines
- Northern West Virginia Community College, WV Board of Regents
- Ellesmere Avenue, ODNR
- Clarksburg Glenwood Hills, WVDEP
- Midlothian, MD Bureau of Mines

# SPECIAL PROJECTS/ENVIRONMENTAL ISSUES

- I-70 Subsidence, ODOT
- Glade Run Remediation, Allegheny Development
- Lafayette Road H-Pile Wall, ODNR
- Banff/Canmore Commercial Development, Norwest Calgary
- Blackwater River/Beaver Creek Treatment Project, WVDEP
- Dynamic Compaction of Mine Spoil, THF Realty
- Jane Lew Tipple, WVDEP
- Slab Fork Mine Dump, WVDEP
- Dickerson Slurry Pond, DTE

# Firm's Equipment

# Geotechnical Equipment

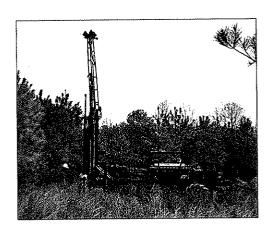

CTL Engineering Inc.'s subsurface exploration equipment is adaptable for use of barges or all terrain vehicles (ATV's). CTL can mobilize special equipment or a fleet of drilling rigs to a particular project requiring multiple units. CTL Engineering owns and operates ten (10) drill rigs with a capacity of drilling to a depth of 300 feet. Other equipment includes large diameter soil and rock core sampling equipment, in-situ pressure meters and cone penetrometers.

CTL's drill rigs are rotary drilling rigs equipped to conduct standard split-spoon sampling with the use of hollow-stem augering, casing advancer or mud rotary. The rigs are also equipped with Moyno pumps, wire-line or standard coring equipment for proper and efficient execution of a subsurface investigation program

For field and laboratory materials analysis, CTL is equipped to conduct pressure meter tests, vane shear tests and cone penetrometers tests in the field. The laboratory is equipped with consolidometers, triaxal and direct shear apparata, permeability devices and normal soils classification equipment.

CTL owns and operates a fleet of ten (10) drill rigs

CTL's ATV can drill in rough terrain

# **Chemistry Laboratory**

The chemistry laboratory at CTL is equipped with Atomic Absorption equipment, spectrophotometers and gas chromatography equipment. CTL has the capability of and regularly performs both non-hazardous and hazardous waste tests.

CTL has established a quality control/ quality assurance plan, which is based on The American Council of Independent Laboratory Standards. CTL carries professional liability insurance coverage with a limit of \$1,000,00 per occurrence and aggregate.

# Computer Resources

Operating efficiency may mean the difference between successful project completion and job overruns. At CTL Engineering, Inc., we effectively utilize computer software programs to assist in project and account management, resource allocation, data transfer, and preparation of plans and specifications. CTL's use of innovative technology sets us apart from the competition.

# **CADD** Capabilities

Project designs and specifications are produced in our Computer Aided Drafting and Design (CADD) section using all releases of ACADD, including Release 2008. AutoCAD allows the user to interact with a wide variety of support software to modify project designs or perform different modeling functions. In addition, many public documents or plans are available in digitized form allowing CTL to directly download surveyed land plots or utility drawings. Successful use of CADD-based documents and/or plans has dramatically increased CTL's project efficiency and performance.

# Geotechnical Software

CTL's Geotechnical Department utilizes a wide array of computer models to analyze deep foundation design, pavement design, slope stability, hydraulics, and flood hazard evaluation. Our experienced engineers use the following software to develop solutions:

AASHTO - Rigid and Flexible Pavement Design

APILE - Calculation of Load-Settlement

**COYLE** - Analysis of Axially Loaded Piles

**DSS** – Dimension Solution Software

ELSYM5 - Elastic Layered System Pavement Design and Analysis

GINT - Boring Logs & Lab Testing

HY8 - Culvert Analysis

HY9 - Bridge Scour Analysis

HWY - Asphalt Institute Pavement Design

LPILE - Analysis of Laterally Loaded Piles

**NEWNEG** - Analysis of Piles Subjected to Negative Skin Friction

**RETWALL** - Design of Cantilever and Gravity Retaining Walls

**SCHMERT** - Analysis of Shallow Foundations in Sand

SHAFT - Analysis of Drilled Shafts (Caissons)

STABL6 - Slope Stability Analysis

WEAP - Pile Driving Analysis

WSPRO - Water-surface Profile Computation Model

# Civil Engineering Software

Eagle Point Watershed Modeling & Water Surface Profiling DCA Civil Engineering Design Software Civilsoft Groundwater for Windows TR-55 Swamp HEC 1 and 2 Survey 3.0

# Hydrogeologic Studies

The backbone of many hydrogeologic studies is the determination of ground water properties, flow direction, and effects of local ground water pumping or injection. CTL is experienced in utilizing a wide variety of computer models to predict various properties of ground water and ground water flow to include:

MODFLOW - USGS Finite element ground water model MODPATH - USGS Particle tracker package for MODFLOW SURFER - Data contouring package CAPZONE - Semi-analytical ground water mode GWPATH - Flowpath tracker for ground water models SLUGIX - Slug test analysis software WHPA - Wellhead Protection area delineation

# Remediation Models

CTL uses the latest in remediation technologies and computer models when preparing conceptual and full-scale remediation system designs. Today's programs allow our engineers to calculate engineering parameters (e.g., stripper efficiency, total dynamic head, air emissions, etc.) in minutes instead of several hours. This allows us to evaluate multiple technology applications operating at varying parameters. Some of the models CTL uses include:

ShallowTray - low profile aerator evaluation program
Stat - low profile aerator design
HyperVentilate - soil vapor extraction emission model
SoilVent - soil vapor extraction design model
Gast Blower Selection Program

# Telemetry

CTL employees are experienced with a variety of remote data acquisition devices. These systems allow us to interface with the remediation systems and remotely operate, collect data, and troubleshoot potential operating problems. Auto dialers alert employees in the event of an emergency. Remote monitoring of the system minimizes system down time and ultimately saves the project money. CTL employees are experienced with:

Telmax II RealFlex SiteLink SiteWindows

# **Accounting Software**

CTL uses Wind2 accounting software for all of the services we provide. The project manager first constructs a budget from the information developed in the site-specific proposal. Critical pathways of construction are identified and individual tasks developed for implementing the proposed work. A project number is assigned and costs tracked to each phase, task, or subtask of the project. Monthly billing review reports are provided to the managers to control and assess the progress of the project.

# General

CTL Engineering Inc. utilizes:

Windows 95/98 based operating systems

Microsoft Office 97/2000 is used for word processing, spreadsheets creation, data processing, and presentation creation.

Alternative software including Corel Suite is available, if necessary.

12. A. Is your	r firm experienced in Abandoned Mine Lanc emediation/Mine Reclamation Engineering?
YES	Description and Number of Projects: CTL Engineering has completed more than 800 AML related
projects nationally	y and internationally. See attached "AML Past Project Experience" for some specific examples.
ON	
B. Is your	r firm experienced in Soil Analysis?
YES	Description and Number of Projects: Our in-house laboratory performs all ASTM mechanical, organic
and in-organic anal	analyses for soils. Our lab is certified by WVDOH, OEPA and US Corps of Engineers.
NO	
C. Is your	r firm experienced in hydrology and hydraulics?
YES	Description and Number of Projects: Each of our site design and AML projects require hydrology &
hydraulic evaluations	ons. We estimate that annually, we complete more than 100 projects requiring hydrology design.
NO	
D. Does yo	your firm produce its own Aerial Photography and Develop Contour Mapping?
YES	Description and Number of Projects:
NO H	However, we annually complete more than 50 projects requiring aerial photography & mapping. While we
sub-contract the	aerial photography, in-house we provide GPS, surveying and develop the contouring as needed.
E. Is your fire evaluation	r firm experienced in domestic waterline design? (Include any experience your firm has in tion of aquifer degradation as a result of mining.)
YES	Description and Number of Projects: We have completed numerous waterline design projects and our
in-house staff has	has more than 50 years of combined experience with aquifer degradation.
NO	
F. Is your	Is your firm experienced in Acid Mine Drainage Evaluation and Abatement Design?
YES	Description and Number of Projects: CTL has developed more than 20 active and passive treatment
systems for AMD.	More than 50 of our AML Design projects required some form of AMD evaluation and design.
NO

NOTE: THIS DOCUMENT WILL BECOME VOID AFTER DECEMBER 31 IN CALENDAR YEAR OF DATE HEREON.

December 1,2009

Date:

Title: President

TOK-E. Gallagher, P.E.

Pad

Signature,

Project:

Aaron's Run AMD Project

Owner:

Maryland Bureau of Mines Abandoned Mine Lands Mike Garner

Location:

Garrett County, MD

Date: 2008

CTL Project Manager:

R.J.Hovatter

# PROJECT FEATURES

CTL Engineering of West Virginia, Inc. is providing Engineering Design Services and construction documents necessary for an acid mine drainage treatment systems and physical stabilization of approximately 500 LF of stream banks. Work shall also include all necessary field meetings, plan preparation, and office work to apply for and receive approval from the Army Corp of Engineers, the MDE Wetland and Waterways Division, and the MDE Sediment and Erosion Control.

# Project:

Slab Camp #2

#### Client:

West Virginia Department of Environmental Protection

#### Location:

Preston County, West Virginia

# PROJECT FEATURES

CTL Engineering provided Engineering Design Services and construction documents necessary for the reclamation of approximately 5 acres of abandoned mine land near the small Preston County community of Bretz, WV.

The project consisted of the installation of wet mine seals in collapsed and open mine portals, reclamation of scattered coal refuse and abandoned highwall, construction of two separate limestone fine treatment sites, a collection system for numerous mine drainage seeps and installation of limestone channels to provide water treatment.

## Project:

Sovern Run Mine Drainage

#### Client:

West Virginia Department of Environmental Protection Gregg Smith (304) 457-4583

#### Location:

Preston County, West Virginia

Date: May, 2000

Built: Green Mountain

Engineer's Estimate: \$567,781.00

Design Cost: \$77,499.00

# PROJECT FEATURES

CTL Engineering of West Virginia, Inc. provided Engineering Design Services and construction documents necessary for the reclamation of 30 acres of abandoned mine land near the community of Valley Point, WV approximately 5 miles south of Bruceton Mills.

The project consists of the installation of ten mine seals in collapsed and open mine portals, reclamation of scattered coal refuse and abandoned highwall, construct a collection system for numerous mine drainage seep and installation of 2,385 linear feet of limestone channels to provide water treatment.

Project:

Morgantown Airport Terminal Mine Subsidence Stabilization Project

Client:

West Virginia Department of Environmental Protection

Location:

Morgantown, West Virginia

CTL Project Manager:

Patrick E. Gallagher

Date: 1992

Engineer's Estimate: \$750,000.00

# PROJECT FEATURES

CTL Engineering completed an extensive subsurface investigation and final design documents for the grout stabilization program beneath the airport terminal. The terminal was approximately 60 feet above an abandoned deep mine complex in the Pittsburgh Coal Seam that historically caused structural damage to the airport buildings.

Project:

Majestic Mine Stabilization

Owner:

Ohio Dept. of Natural Resources

Location:

Nelsonville, Ohio

# PROJECT FEATURES

CTL Engineering provided engineering investigation and consulting design services for the stabilization of The Majestic Mine complex. Undermining of a tributary of Monday Creek was causing the loss of stream flow via subsidence related fracturing of the streambed. The lost stream flow was introduced into an acid producing mine pool and causing the deep mine to discharge seeps of 4.0 pH mine water. Design of a geosythetic liner system enabled the stream to retain its base flow, substantially reducing the mine discharge and acid load, and allowing reclamation of a major sludge site. Design was done to allow the maximum naturalization to the stream channel to occur while creating a new impervious streambed.

## Project:

Blackwater River/Beaver Creek Treatment Project

#### Client:

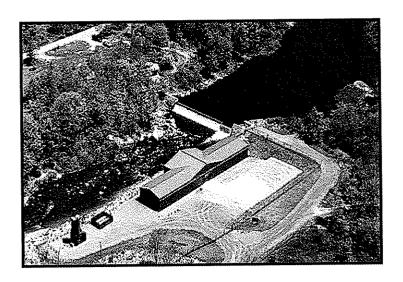

West Virginia Department of Environmental Protection Gregg Smith (304) 457-4583

#### Location:

Tucker County, West Virginia

CTL Project Manager:

Patrick Gallagher

Date: June, 1993 Built: 120 days

Engineer's Estimate:

\$741,815.00

Actual Cost: \$703,765.00

## PROJECT FEATURES

CTL Engineering of West Virginia, Inc. provided Engineering Design Services and construction documents to rehabilitate an existing concrete dam and install a rotating drum and limestone slurry treatment facility on the Blackwater River. This project was a cooperative project with West Virginia Department of Environmental Protection and West Virginia Division of Natural Resources.

This project has been recognized by "Trout Unlimited" and was mentioned in the February 1993 issue of "Outdoor Life". The Blackwater River/Beaver Creek Treatment Project has successfully transformed a formally dead section of the Blackwater River into a high quality trout fishery and was recognized by the US Dept of Interior, Office of Surface Mining, as the 1999 Appalachian Region Award Winner.

#### Expertise

Mr. Gallagher serves as President of CTL Engineering of West Virginia, Inc. Projects successfully completed by Mr. Gallagher include: Geotechnical Investigations, Foundation Design Investigations, Dam Stability Analyses, Mine Subsidence Evaluations, Mineral Reserve Studies, Landslide Investigations, Mine Reclamation Designs, Failure Investigations, and Mining Permits.

Prior to joining CTL Engineering, Mr. Gallagher was the chief of the Abandoned Mine Reclamation Program for the State of Maryland, Department of Natural Resources, and Bureau of Mines. In addition, he was also responsible for the deep mine permit program and overall engineering/geologic support to the Maryland Bureau of Mines Program.

#### Education

B.S., Civil Engineering

Virginia Polytechnic Institute and State University, Blacksburg, Virginia, 1975

B.S., Equivalent, Geology

Virginia Polytechnic Institute and State University, Blacksburg, Virginia, 1975

#### Professional Registration / Certifications

Registered Professional Engineer, Ohio, # 48459; Maryland, # 13256; West Virginia, # 9297; Pennsylvania, # PG-044930-R; Wyoming, # 11033; North Carolina, #0 32503; Kentucky, # 24988

Certified Professional Geological Scientist, # 6575

Professional Surveyor, WV

26 Years Experience with CTL Engineering, Inc.

32 Years of Direct Mine Reclamation Design Experience

#### Experience

A partial listing of Mr. Gallagher's relevant project experience includes:

# Abandoned Mine Lands and Reclamation Projects

Project manager overseeing the design of various abandoned mine lands and reclamation projects for the West Virginia Department of Environmental Protection. These projects include coal refuse pile stabilization, burning refuse extinguishment and stabilization, acid mine drainage abatement plans, storm water management plans, mine permits, slope stability analysis and hydraulic analysis.

American Bituminous Power Partners, LLP

Project manager for services involving permitting and environmental issues. Conducted ongoing inspections and certifications of the impounding refuse facilities and all drainage/sediment control structures for all permitted facilities.

Ohio Valley Plaza, St. Clairsville, Ohio

Project manager for the engineering design services for the dynamic compactions of surface mine spoil for this project. This site was in need of major overhaul; no building could take place without the deep dynamic compaction activities, which made this site fit for construction, while reducing site development costs.

Newpointe Center, Clarksburg, West Virginia

Project Manager for geotechnical engineering, materials testing, and observation services and surveying services for this project. CTL is currently performing materials testing and observation for Phase II of this development.

Ohio Department of Natural Resources (ODNR)

Project manager overseeing mine subsidence investigations throughout the state of Ohio. These projects include hydrology/hydraulic evaluations, floodplain designs, wetland delineations, slope stability designs, surface and deep mine permitting, refuse pile analysis/certification, earthwork calculations, storm water management design, pressure grout abatement, and numerous emergency projects under the ODNR-AML Emergency Program.

#### Expertise

Mr. Darrah is presently responsible for department management for civil site design and surveying projects including topographic, property and construction layout. Mr. Darrah also serves as project engineer on various types of civil engineering projects including residential and commercial developments, and reclamation design projects. Office work includes site designs, hydrology calculations, quantity calculations, and various other forms of engineering related duties.

#### Education

B.S. Civil Engineering Technology Fairmont State College, Fairmont, West Virginia, 1988

#### Certifications

West Virginia Dept. of Highways Compaction Technician

West Virginia Department of Highways Concrete Technician

17 Years Experience with CTL Engineering, Inc.

#### Experience

A partial listing of Mr. Darrah's relevant project experience includes:

Chaplin Hill Business Park, Morgantown, West Virginia

Project Manager responsible for conceptual layout and initial site design for the Monongalia County Economic Development Authority.

Lock & Dam Rehabilitation Project in Point Marion, Pennsylvania

Responsible for all Second Order, Class I Surveying for this \$45 million Corps of Engineers project.

West Virginia Department of Environmental Protection, Division of Abandoned Mined Lands and Reclamation

Performed the survey and design on abandoned mined lands on numerous projects for this state agency.

Glenmark Centre, Morgantown, West Virginia

Project manager responsible for civil site design and ALTA surveys at this facility for the following Glenmark businesses including: Lowes Home Improvement Warehouse, Outback Steakhouse, Wendy's, Bob Evans, Holiday Inn Express, and Ruby Tuesday's.

Sterling Ridge Student Apartments, Morgantown, West Virginia

Project Manager for the civil site design for this student-housing complex. CTL also provided surveying design and inspection services.

Harrison Power Station for a \$900 Million SO<sub>2</sub> Removal Project in Shinnston, West Virginia Survey crew chief responsible for construction stakeout and surveying.

## TIMOTHY A. DARRAH

Adelphia Cable Company, Various Locales

Project manager responsible for WVDOH and Railroad Crossings permits.

Monongalia County Board of Education

Project surveyor responsible for various surveying services for new school development and additions to existing schools.

Guardian Food Corporation, Various Locales, WV, PA, OH

Project manager that provided ALTA surveys for 34 Hardees Restaurants throughout Ohio, Pennsylvania and West Virginia.

West Virginia University Hospital, Morgantown, West Virginia

Project manager responsible for the design and permitting of a 500 foot turning lane in conjunction with the WVDOH.

EA Morgantown, LLC, Morgantown, West Virginia

Project manager responsible for the civil site design of a 900 bedroom student housing complex. Submitted permits to the WVDOH for a turning lane and entrances. Prepared sediment and erosion permits for the WVDEP. Also, prepared stream crossing permits and performed a 100 year Flood Study.

Suncrest Executive Plaza, Morgantown, West Virginia

Project manager responsible for the civil site design of this project. Duties included the preparation of storm water detention plans, grading, pavement, turning lane and permits for the WVDOH, and sediment and erosion permits.

Aerial Photography, Various Locales

Project manager in charge of establishing GPS control for the aerial mapping of numerous projects throughout West Virginia.

# Expertise & Work History

1 Years Experience with CTL Engineering of WV, Inc.

17 Years Experience with other Engineering Consultants.

#### Liaison

Mr. Huffman serves as Branch Manager and Geotechnical Department Manager of CTL Engineering of West Virginia, Inc.'s Charleston office. Mr. Huffman currently directs all aspects of design and inspection for a staff of 13 professionals. His administration and management responsibilities include marketing, proposal preparation, scheduling, budget control and supervision of office personnel.

Projects successfully completed under Mr. Huffman's direction include: Foundation Design, Roadway & Parking Area Design, Geotechnical Investigations & Design, Slope Stability Analyses, and Failure Investigations. Mr. Huffman has 18 years experience in Geotechnical Engineering and has served as Senior Geotechnical Engineer, Technical Director of Laboratory Services and Technical Superintendent with other Engineering Consultants.

Mr. Huffman currently serves as Adjunct Professor of Civil Engineering at Marshall University teaching courses in Soil Mechanics, Soil Testing Laboratory and Foundation Design.

#### Education

M. S. Civil Engineering (Geotechnical) Virginia Polytechnic Institute and State University (Virginia Tech), Blacksburg, Virginia, 1990

B.S. Civil Engineering Virginia Polytechnic Institute and State University (Virginia Tech), Blacksburg, Virginia, 1988

## Professional Registration / Certifications

Registered Professional Engineer: Pennsylvania, 1994, No. PE45671E; West Virginia, 2005, No. 016403; Ohio, 2007, No. 72131; Kentucky, 2007, No. 25185; North Carolina, 2008, No. 034520; NCEES Registered, 2007, No. 30346.

# Listing of Mr. Huffman's experience includes:

*Project Permitting, Susquehanna County, PA – Cabot Oil & Gas Company.*Project Manager for permitting aspects of a 50+ gas well play and collection line system.

# Branch Manager & Geotechnical Dept. Manager

Expert Witness Testimony - Private Clients & Insurance Companies.

Expert testimony for binding and non-binding arbitration cases concerning building foundation and slope failures.

Geotechnical Design Recommendations – Ohio Department of Transportation, West Virginia Department of Highway, Pennsylvania Department of Transportation .

Project Manager for geotechnical engineering phases of transportation projects including bridge structures, roadways, embankment fills and soil & rock cut slopes.

Commercial Structures in North Carolina, Ohio, Virginia, and West Virginia.

Project Manager or Project Engineer for numerous commercial structures; including multi-story buildings and large scale warehouses. Directed subsurface explorations, provided geotechnical recommendations and prepared geotechnical reports.

Dams – Water Supply and Flood Control.

Project Engineer involved construction of numerous earth and roller-compacted concrete (RCC) Dams. Directed strength testing of in-situ soil & rock, borrow materials and RCC. Functioned as Assistant Resident Engineer during construction. Assisted in the geotechnical design, drawing and specification preparation. Involved the design of storm water detention ponds over Karst topography.

Research & Development on Polypropylene Fiber Reinforcement of Soils.

Technical Director over research and development activities including development of design methodologies, installation techniques, field and laboratory testing methodologies, and manufacturing methods.

Adjunct Professor of Civil Engineering at Marshall University, Huntington, West Virginia. Professor teaching courses on Soil Mechanics, Soil Testing Laboratory and Foundation Design.

# Professional Affiliations

American Society of Civil Engineers

American Council of Engineering Companies

International Society for Soil Mechanics and Foundation Engineers

Society of American Military Engineers

#### Expertise

Mr. Hovatter is responsible for topography, Construction layout, Reclamation Design, Natural Stream Restoration and Channel Design, Drafting Hydrology, Quantity Calculations, Stability Analysis, Residential Development, Benthic Studies, Electroshock Fish Studies, Valley Fill Foot Printing, Surveying, Subsidence Surveys, Pre-Blast Surveys, Acid Base Accounts, Groundwater Inventory. PC Software includes Surv CADD, Excel, Haestad Methods, Word, AutoCAD Land, Quattro, Access, Hydraulic and Hydrological calculations for channel design utilizing TR-55, HEC-RAS, and TR-20 software.

#### Education

B.S., Civil Engineering Technology Fairmont State College, Fairmont, West Virginia, 2002

## Professional Registrations/ Certifications

Certified Engineer Intern ROSGEN – Level 1 & Level 2 Natural Stream Design HEC-RAS Certification

#### 4 Years with CTL Engineering Inc.

#### Experience

ODNR - Emergency Program

Staff Engineer responsible for evaluation and design for 14 ODNR Emergency Projects, 1 ODNR AML Project and 2 ODNR Reclamation Projects.

Avery Church, Morgantown, West Virginia

Responsible for the design of sediment and erosion structures and storm water collection structures, including ditches, ponds and outlet controls. Prepared the watershed delineation and storm water runoff calculations along with sediment and erosion control methods.

# EA Morgantown, LLC, Morgantown, West Virginia

Utilized HEC-RAS to calculate the flood plain elevation of the project site.

Pineview Place, Morgantown, West Virginia

Performed the watershed delineation and storm water calculations. Also prepared the design of an underground storm water storage unit.

Merkel Landslide, Rayland, Ohio

Prepared designs for a diversion ditch, sediment and erosion control and highwall minimization, including the regrade of a slip area. Performed a watershed analysis and storm water runoff calculations for the project site.

Chaplin Hill Business Park, Morgantown, West Virginia

Prepared the design of a storm water collection structure, including a pond. Performed the watershed analysis and storm water runoff calculations.

Craig Edmond Housing Development, Reedsville, West Virginia

Prepared the design of a storm water collection structure, including a pond, outlet sizing, and placement. Performed the watershed analysis and storm water runoff calculations.

Spruce Hollow, Maryland

Utilized HEC-RAS software to calculate floodplain elevations.

Blue Sky Realty, Morgantown, West Virginia

Utilized HEC-RAS software to calculate floodplain elevations.

# Expertise & Work History

2009 - Present, Civil Department Manager, CTL Engineering, S. Charleston WV

1999 – 2009, Owner/Manager, Alliance Consulting Engineers & Surveyors, Arvada/Longmont, Colorado

1991 – 1999, Vice President, Jehn Engineering, Arvada, Colorado

1986 - 1991, Associate, Kidde Consultants, Baltimore, Maryland

1983 - 1986, Vice President, Haese Corporation, Boulder, Colorado

1981 - 1983, Research Assistant, University Of Colorado, Boulder, Colorado

1976 – 1981 Civil Engineer, Fluor-Daniel Inc., Irvine, California

Mr. Moore has thirty years experience in design and construction in the fields of planning, civil engineering, structural engineering, general contracting, expert testimony, land development, surveying, landscape architecture, project and business management.

During his thirty years of experience he has designed and constructed numerous dams, ponds, irrigation lakes, storm water management ponds, sediment and erosion control ponds. He has designed ponds and lakes for residential, commercial, and industrial projects as well as golf courses combining water features, irrigation, storm water management and water quality into aesthetically pleasing amenities.

# Education

B.S., Civil Engineering West Virginia University Institute of Technology, Montgomery WV 1974-1978

M.S., Civil Engineering Colorado University, Boulder CO 1981-1983

# **Professional Registration**

Registered Professional Engineer, Maryland, # 15100; Nevada, # 19250; West Virginia; Wyoming, # 11010; Colorado # 22495; Alberta Canada # 98121

# Listing of Mr. Moore's relevant project experience includes:

# Storm Water Retention and Detention Ponds

Mr. Moore has prepared construction documents for hundreds of ponds facilitating the storm water management requirements for development of residential, commercial, industrial and municipal projects involving hydrology, hydraulic and drainage calculations.

# Church Ditch Raw Water Irrigation Ponds and Pump Station

Mr. Moore designed the Church Ditch Raw Water Irrigation Ponds and Pump Station for the City of Arvada. This project took water from the Church Ditch, removed the sediment, stored the water and then pumped the water to a public drinking water reservoir.

## Westwoods Ranch Golf Course

Mr. Moore performed the design and construction administration on a 27 hole golf course encompassing ten ponds and lakes for golf course water features, irrigation, storm water management, flood plain management, and water quality.

# Bath County Pumped Storage Project

Mr. Moore was project civil/construction engineer on the 1.3 billion dollar Bath County Pumped Storage project for Virginia Electric and Power Company (VEPCO) and in Bath County, Virginia. This project involved two earthen dams of which one was the tallest earth fill dam in the world at that time, design and construction of the powerhouse, tunnels and related appurtenances.

# Water Resources and Drainage Projects

Mr. Moore designed and performed construction administration on water resources and drainage projects for developers, builders, and municipalities, ditch companies and water districts. Practically every project requires a drainage report and plan encompassing storm water management, flood studies, Letters of Map Revisions (LOMAR's or CLOMAR's) or storm drain design. Several notable projects include the Ralston Creek/Croke Canal overpass, Church Ditch flow limiter, Farmers Highline Canal realignment, and various flood studies on creeks and rivers.

# Utility Projects and Pump Stations

Preparation of utility reports and design and construction of water and sewer transmission lines, holding ponds, buildings and pump station facilities for raw water, potable water and sewer for developers, utility districts and municipalities. Projects include the regional sewer pump station for the Clear View project in Johnstown, CO; the raw water reservoirs and pump station for the City of Arvada Church Ditch takeout project in Arvada, CO.

- B.S., Civil Engineering (Geotechnical & Structural), 1996

Adirondack Community College; Queensbury, NY

- A.S., Engineering Science, 1994
- A.A.S., Mechanical Technology Design & Drafting, 1991

#### **REGISTRATIONS:**

Engineer Intern (EI): New York, 1996

#### CERTIFICATIONS & TRAINING:

Pennsylvania Dept of Transportation Level II Drilling Inspector, 1999

#### **EXPERIENCE**

CTL Engineering of WV, Inc., Morgantown, WV (2007)

#### Responsibilities:

Mr. Selfridge has been employed by CTL Engineering for nearly one (1) year. Annually manages 100+ various geotechnical projects; including transportation, commercial development, public schools, and a variety of public and private clients. Directs all aspects of the geotechnical engineering for CTL WV. This includes the management of field drilling activities, field classification of soil, rock, field and laboratory safety procedures, the assignment of a laboratory testing program, and performing geotechnical evaluations. Engineering evaluations include foundation recommendations, settlement analysis, slope stability analysis, earth pressure coefficients and report preparation.

Gannett Fleming, Inc., Morgantown, WV (2000-2006) Valley Forge, PA (1999-2000)

#### Projects:

US Route 35 Little Fivemile Creek to Coast Guard Station, Mason County, WV, R. D. Zande / West Virginia Department of Transportation, Division of Highways. Geotechnical Engineer responsible for the site reconnaissance, core boring program bid documents, geotechnical site investigation program, laboratory testing program

**Dolls Run Bridge Replacement, Monongalia County, WV,** West Virginia Department of Transportation, Division of Highways. Geotechnical Engineer responsible for the site reconnaissance, geotechnical site investigation program, core boring bid documents, laboratory testing program, geotechnical analysis and prepared recommendations, prepared Geotechnical Engineering Report.

## Geotechnical Engineer

King's Covered Bridge Rehabilitation, Somerset County, PA, Simone Jaffe Collins (SJC) / Pennsylvania Department of Transportation, District 9-0. Engineer responsible for the inspection and documentation of the current conditions and details of historic wood timber covered bridge. Evaluated and modified the existing stone and mortar abutments and wingwalls.

WV 705 Connector Alternative Study, Monongalia County, WV, West Virginia Department of Transportation, Division of Highways. Geotechnical Engineer responsible for performing site reconnaissance of the project area and evaluated the existing site conditions as they may pertain to the design of different proposed alternatives.

King Coal Highway (US Route 52) with WV Route 65 Relocation, Mingo County, WV, Nicewonder Contracting, Inc. | West Virginia Department of Transportation, Division of Highways. Geotechnical Engineer responsible for geologic reconnaissance, geotechnical site investigation program, site mining issues, cut slope analysis and design, very large embankment fills analysis and design, and other geotechnical design and analysis. Special issues:

- Preformed onsite inspection and monitoring and control of Dynamic Compaction Test Program to compare the reaction of different valley fill types. Prepared the Geotechnical Engineers Recommendation Report.
- Mine spoil fire site analysis and recommendations.

S.R. 0040, Section 06M, Youghiogheny Bridge Replacement over the Youghiogheny Reservoir, Fayette and Somerset Counties, PA, WAGMAN, Inc. / Pennsylvania Department of Transportation, District 12-0. Geotechnical Engineer responsible for conducting on-site geotechnical investigation and analyses of subsurface information for a proposed alternate replacement bridge structure over the Youghiogheny Reservoir.

S.R. 885, Section A03, Boulevard of the Allies Bridge Replacement over Forbes Avenue, Pittsburgh, PA, Pennsylvania Department of Transportation, District 11-0. Geotechnical Engineer responsible for conducting on-site geotechnical investigation and performed analyses of the subsurface investigation information for use in the design and analysis of two replacement bridge structures, new roadways and six retaining walls.

Osage Mine Complex Reclamation, Monongalia County, WV, West Virginia Department of Environmental Protection. Geotechnical Engineer responsible for assisting with preliminary field and office site reconnaissance for the preparation of construction plans and specifications for the reclamation of five abandoned mining sites under the Abandoned Mine Lands and Reclamation Program.

Martins Ferry Water System Improvement Project, Belmont County, OH, City of Martins Ferry. Geotechnical Engineer responsible for the geotechnical site investigation, subsurface investigation program, mine subsidence investigation, cut-and-fill slope stability review and analysis, embankment settlement analysis, and geotechnical design and analysis.

Thompson Run Road Bridge No. 2, Allegheny County, PA, Allegheny County. Geotechnical Engineer responsible for conducting the inspection of the subsurface investigation program.

S.R. 0028, Galleria Mall Interchange, Allegheny County, PA, Mills Corporation. Geotechnical Engineer responsible for conducting on-site inspection and analyses of a subsurface investigation for a new interchange on S.R. 0028. Reviewed and prepared quantities for the drainage structures and E&S control.

Ambridge-Aliquippa Bridge Replacement, Beaver County, PA, Pennsylvania Department of Transportation, District 11-0.

Midway Sewerage Treatment Plant, Washington County, PA, Midway Sewerage Authority. Geotechnical Engineer responsible for drilling inspection, subsurface analyses, and foundation analyses for the design and construction of a proposed sewerage treatment plant at an alternate site

King Coal Highway, Mingo County, WV, West Virginia Department of Transportation, Division of Highways. Geotechnical Engineer responsible for geotechnical site investigation, boring layout, drilling program, mine subsidence investigation, cut-and-fill slope stability review and analysis, embankment settlement analysis, and geotechnical design and analysis.

Sharon Heights Connector, Mingo County, WV, West Virginia Department of Transportation, Division of Highways. Geotechnical Engineer responsible for geotechnical site investigation, boring layout, drilling program, mine subsidence investigation, slope stability.

Southern Beltway, Findlay Connector, PA Route 60 to U.S. Route 22, Allegheny and Washington Counties, PA, Pennsylvania Turnpike Commission. Geotechnical Engineer responsible for reviewing boring logs and profiles, along with the proposed designed alignment geotechnical cross sections, plan views, and profiles for correctness and completeness.

Stage II Light Rail Transit System, Pittsburgh, PA, Port Authority of Allegheny County. Geotechnical Quality Control Inspector on the Construction Management Team assisting in monitoring geotechnical field activities of tieback anchor installations and load testing in soldier pile and lagging walls.

Source Water Assessment and Protection (SWAP) Program, Beckley District, WV, West Virginia Department of Health & Human Resources, Bureau for Public Health. Engineer responsible for performing wellhead delineation and assisting in preparing reports for 44 public water systems.

S.R. 2040, Curry Hollow Road Realignment, Allegheny County, PA, Pennsylvania Department of Transportation, District 11-0. Geotechnical Engineer responsible for conducting on-site inspection and analyses of the subsurface investigation for the proposed widening and realignment of approximately one mile of a four-lane roadway, including the replacement of a deteriorated bridge

S.R. 3016, Section B02, Green Garden Road Bridge Replacement and Green Garden Road Realignment, Beaver County, PA, Pennsylvania Department of Transportation, District 11-0. Geotechnical Engineer responsible for slope stability analyses of embankment fill slopes and retaining walls, and for a settlement analysis of embankment fill into wetlands, as part of a roadway alignment and bridge replacement project.

S.R. 3088, Section A01, Hookstown Grade Road Bridge, Allegheny County, PA, Pennsylvania Department of Transportation, District 11-0. Geotechnical Engineer assisting with the technical preparation of a final geotechnical engineering report (GER) of a ten-meter-long single-span adjacent box beam bridge to replace a deteriorated single-span bridge.

Structural Stabilization and Rehabilitation Grouting Program, United States Postal Service Eastpointe Facility, Clarksburg, WV, United States Postal Service (USPS)/Advanced Construction Techniques, Ltd. (ACT). Resident Quality Control Engineer responsible for inspecting and monitoring on-site construction activities for a single-story structure used as a mail transfer facility and post office

Sinkhole Remediation, Bridgeport Wastewater Treatment Plant, Bridgeport, PA, Borough of Bridgeport. Geotechnical Engineer responsible for inspecting the drilling and installation of four new groundwater monitoring wells, and for assisting with the investigation of the causes of sinkhole formation at a wastewater treatment plant.

## Rensselaer Polytechnic Institute, Troy, NY (1997-1998)

Prepared and demonstrated common geotechnical tests. Graded assignments, assisted students, and managed the grades

Smith Dairy Farm, Gansevoort, NY (1986-1997)

Maintained and operated farm machinery and equipment. Assisted with the daily operations of the dairy farm

Finch, Pruyn and Co., Inc., Glens Falls, NY (1989-1996)

Safety-inspection during paper machine rebuilds and maintenance work, bleach plant lab technician and performed various other technical and non-technical duties in various department in the mill.

#### Expertise

As the Construction Services Manager for CTL Engineering of West Virginia Inc., Mr. Gowarty is responsible for supervising field and laboratory technicians. He is also responsible for report writing for field and laboratory testing, project management, client contact, estimating, proposals and invoicing for Construction Services Department. Mr. Gowarty's experience also includes surveying, pre-mining and pre-blast surveys, field supervision of drilling crews, Phase I Environmental Audits and radiation safety officer and branch safety officer. In addition, Mr. Gowarty is the Construction Materials Testing Supervisor, providing concrete, compaction, and aggregate testing and has over six years of experience with Nuclear Gauge Operation.

#### Education

B.S., Civil Engineering Technology Fairmont State College; Fairmont, West Virginia, 1990

A.S., Mechanical Engineering Technology Fairmont State College; Fairmont, West Virginia, 1990

# Professional Registrations/ Certifications

West Virginia Department of Highways Certified Compaction Technician

West Virginia Department of Highways Certified Bituminous Concrete Technician

State of Maryland Certified Water Sampler

WVDOT Aggregate Sampler

NICET Level III Asphalt & Concrete

NICET Level II Soils

Certified Dipfloor Profiler Operator

16 Years of Experience with CTL Engineering, Inc.

## Experience

A partial listing of Mr. Gowarty's relevant project experience includes:

Warrior Run Company, Generation Plant, Geotechnical Studies Cumberland, Maryland

CTL Engineering performed Construction Observation and Structural Steel Inspection Services for this project.

WVU Student Recreation Facility; Project Manager/Engineer overseeing performed for the construction of the \$34 M dollar recreational facility located on WVU campus.

Beckley Federal Courthouse, Beckley, WV

Project Manager responsible for performing and overseeing all construction materials and testing inspection services to include compaction, concrete, structural steel, pre-pour inspections and fireproofing during the construction of this project.

Fayette Energy Facility, Masontown, PA

Project Manager responsible for performing and overseeing the concrete, soils, aggregates, asphalt and bolted connections for the project site. CTL has provided specialty-testing including: soil resistivity testing, and Windsor Pin testing.

Harrison Power Station, Haywood, West Virginia

CTL Engineering performed numerous types of testing for this facility including: Concrete and compaction testing and compaction testing for the CO2 liner system at this facility. This project boasted \$100 million dollars in construction costs and CTL Engineering was responsible for over \$80,000 worth of testing and various consulting engineering services.

Allegheny Power Systems (open-ended contract for transmission distribution and power station projects)

Project Manager responsible for construction testing and observation, material testing, structural steel and surveying for various projects under this contract.

American Electric Power, John Amos Power Plant, Nitro, West Virginia

Project inspector providing inspection and testing for coal silo relining project at the power station. Mr. Gowarty also witnessed sandblasting, gunnite applications and workmanship for the project.

Grant Town Power Plant, Marion County, West Virginia

Senior Civil Engineer for the construction observation and materials testing and inspection for this facility.

Glenmark Centre, Morgantown, West Virginia

Project Manager responsible for construction testing and inspection services for this 10 + acre site. Other services provided were storm water management, "ALTA" surveys, construction stake-out and observation and sanitary treatment facilities.

Newpointe Center, Clarksburg, West Virginia

Project Manager providing construction testing and inspection services for this project. CTL also provided surveying and civil site design, geotechnical engineering, dynamic compaction, and observation services for the installation of sanitary, water and storm sewer pipe for this project.

Cheat Lake Waste Water Treatment Plant Expansion, Morgantown, West Virginia

Project Manager responsible for providing oversight of the construction inspection services for this project. The project included increasing the capacity from 250,000 gallons/day to 750,000 gallons/day.

Chaplin Hill Sewer and Water System Expansion, Morgantown, West Virginia

Project Manager responsible for overseeing construction testing and inspection services for the line expansion and construction methods for this project.

WVU Wise Library; Project Manager/Engineer overseeing construction testing and inspection services for the construction of a new six (6) story library, which included the design of an extensive tie-back/soldier pile wall system.

WVU Life Sciences Building; Project Manager/Engineer providing overseeing construction testing and inspection services being performed of the Life Sciences Building.

Suncrest Junior High School Construction Project, Morgantown, West Virginia Project engineer responsible for daily excavation work.

National Airport, Washington D.C.

Project engineer dipstick floor profile testing for the layout of floor test sections and testing of random traffic floors.

CDC, Morgantown, West Virginia

Project engineer dipstick floor profile testing for the layout of floor test sections and testing of random traffic floors.

Kroger, St. Clairsville, Ohio

Project engineer dipstick floor profile testing for the layout of floor test sections and testing of random traffic floors.

The Greene County State Correctional Institution, Waynesburg, Pennsylvania

Project engineer for dipstick floor profile testing for the layout of floor test sections and testing of random traffic floors.

Federal Highway Administration, Raleigh, North Carolina

Laboratory technician who preformed on-site testing of bituminous materials and aggregates for extraction, specific gravity, rice theoretical, stability and flow, gradation, aggregate angularity, material sampling, marshall and gyratory specimens at project locations.

Federal Highway Administration, Gainesville, Florida

Laboratory technician who preformed on-site testing of bituminous materials and aggregates for extraction, specific gravity, rice theoretical, stability and flow, gradation, aggregate angularity, material sampling, marshall and gyratory specimens at project locations.
