March 25, 2010

Purchasing Division 2019 Washington Street, East Charleston, West Virginia 25305

**RE:** Expression of Interest

Engineering Services Required for the Earling Refuse Pile Design

Logan County, West Virginia

**DEP14950** 

# Gentlemen:

GAI Consultants, Inc. (GAI) welcomes the opportunity to submit our proposal in response to your Request for Expression of Interest DEP14950 to provide professional engineering services. These services will result in the development of mapping, engineering drawings, contract specifications, and other contract documents required for **Earling Refuse Pile Design** project in Logan County, West Virginia.

GAI is exceptionally well qualified to provide the State with the above referenced services offered at the most favorable terms, from both a technical and cost standpoint. The work under this contract will be performed in our Charleston, West Virginia office. The Charleston office has provided the State with quality engineering services for the abatement of problems arising from abandoned mine lands since opening in 1985. We have served the State on previous West Virginia Department of Environmental Protection – Abandoned Mine Land (WVDEP-AML) open-end contracts and other contracts from 1986 to the present. As a result of this long-term experience, GAI can provide the required expertise, continuity and conformance to program guidelines established by the WVDEP-AML.

GAI welcomes you to visit our facilities located at 500 Summers Street, 3<sup>rd</sup> Floor, Charleston, West Virginia 25301.

# GAI has:

- on staff five West Virginia registered civil and mining engineers who will review, stamp, and sign all work and contract documents.
- available staff of civil and mining engineers, CADD operators, surveyors, geologists, and biologists with extensive experience in reclamation engineering, hydrology, and geology; and
- extensive experience in surface and underground coal mining, environmental, ecological principles, stream restoration and mitigation, and contract administration.

Charleston Office 500 Summers Street, 3rd Floor Charleston, WV 25301 T 304.926.8100 F 304.926.8180 www.gaiconsultants.com

In summary, GAI will provide the most favorable terms as a result of:

- Exceptional qualifications/previous 20 years of in-state AML experience,
- Local, Charleston presence with excellent access to the project site and AML offices, and
- Efficient and experienced personnel.

We look forward to continuing our relationship with WVDEP-AML.

Sincerely,

GAI Consultants, Inc.

Charles F. Straley, P.E.

**Engineering Manager** 

C. Elwood Penn, IV, P.E. Assistant Vice President,

Managing Officer

# STATE OF WEST VIRGINIA Purchasing Division

# **PURCHASING AFFIDAVIT**

West Virginia Code §5A-3-10a states: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

#### **DEFINITIONS:**

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

**EXCEPTION:** The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

Under penalty of law for false swearing (**West Virginia Code** §61-5-3), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.

Are your firm's personnel experienced in Abandoned Mine Lands Remediation/Mine Reclamation Engineering? Ċ

<u>~</u>

**YES** Description and Number of Projects: GAI has completed <u>119</u> projects for the WV-AML Program (<u>18</u> in the last five years). GAI has completed over 150 projects for all AML Programs (WV, PA, VA, MD, OSM). These projects include but are not limited to design of abandoned refuse piles, abandoned portals, demolition of facilities, design of drainage control structures, and revegetation plans.

9

Are your firm's personnel experienced in Soil Analysis? മ്

some type of soil analysis. GAI has completed some analysis in-house and used subconsultants at other times depending on requirements. revegetation plans, acid/base counts, foundation, stability analysis, engineering properties, etc. Most of the 119 WV-AML projects required Description and Number of Projects: GAI has completed many (over 200) projects that required soil analysis for YES

9

Are your firm's personnel experienced in hydrology and hydraulics?  $\vec{o}$ 

hydraulics including projects that were AML/mining related. Most of the 119 WV-AML projects required hydrology and hydraulic evaluations and Description and Number of Projects: GAI has completed numerous (300+) projects which involve hydrology and design for drainage control structures, mine hydraulic level, mainstream event, water transmission, sediment control, etc. GAI is also experienced and trained in natural stream restoration and wetland mitigation.

Does your firm produce its own Aerial Photography and Develop Contour Mapping? ď

subcontract our aerial photography, if none is available. We do not anticipate aerial photography being needed to complete this project. Description and Number of Projects: GAI has produced contour mapping on most of its 119 AML projects. We YES

2

Are your firm's personnel experienced in domestic waterline design? (Include any experience in evaluation of aquifer degradation as a result of mining.) ші

Description and Number of Projects: GAI has completed over 70 projects involving domestic waterline design of which 42 were for the WV-AML program. This has included aquifer degradation evaluation and waterline design, Public Service District interaction, PSC requirements, Health Department permits, etc. to include field surveys, field inspection, and public hearings and meetings. Aquifer degradation and waterline design was the primary components of these projects.

Are your firm's personnel experienced in Acid Mine Drainage Evaluation and Abatement Design?

were for the WV-AML program; however, AMD was a consideration on most of its 119 WV-AML projects. GAI is noted and published for some Description and Number of Projects: GAI has completed over 100 AMD evaluations and abatement designs of which 25 of its designs and projects to include grouting programs, SAP installations and other innovative abatement designs.

# INTRODUCTION

GAI Consultants, Inc., (GAI) proposes to provide engineering services to the West Virginia Department of Environmental Protection, Office of Abandoned Mine Lands and Reclamation (WVDEP - AML). These services will result in the development of mapping, engineering drawings, contract specifications, and other contract documents as may be required for the letting of construction project for the *Earling Refuse Pile Design* project. The project will include creating diversion channels; ditches and/or under drains to transport drainage; regrading refuse areas; installing wet seals and/or bat gates; dispose of garbage, debris, and structures; provide for stream bank protection; and reclaim and re-vegetate all areas disturbed during construction.

This Expression of Interest is **formatted** in a clear, concise manner with the briefest description as possible conveying our expertise and knowledge. All components of the proposal follow in narrative and highlighted sections and as outlined in the AML Consultant Confidential Qualification Questionnaire (CCQQ).

The highlighted sections following are:

- Bidders Experience
- Subcontractors Discussion on:
  - Surveying and Mapping
  - Subsurface Investigation
  - Laboratory Services
- Design Engineering and Contract Document Preparation
- Qualifications of Personnel
- Corporate Specialized Experience and Demonstrated Experience
- Management Plan and Location of Facilities

GAI's Charleston, West Virginia office is exceptionally well qualified to provide the State with the above referenced services. GAI's Charleston office has a staff of **Five Professional Engineers**, **One Professional Surveyor**, and a team of geologists/hydrologists, environmental scientists, biologists, technicians, CADD operators, word processor operators, secretaries, and draftspersons. GAI's Charleston office has served the WVDEP on **previous** AML open-end and other contracts from 1986 to the present as well as several other pre-1986 AML projects. These **projects** include:

- Coal refuse pile reclamation,
- Coal refuse reprocessing evaluations,
- Stream Restoration,
- Acid mine drainage (AMD) evaluation and treatment,
- Landslide investigations and repair,
- Demolition plans,
- Mine portal reclamation,
- Burning coal refuse piles, coal seams and underground mines.
- Subsidence investigations and stabilization plans.
- Wetlands replacement and development,

- Environmental liability assessments,
- Water quality surveys and feasibility reports,
- Water supply system reviews, and
- Water supply system designs.

GAI also provides engineering services to the mining industry including:

- Stream Restoration,
- Design of coal refuse disposal piles including impoundment structures,
- Hydrologic/hydraulic design of erosion and sediment control devices,
- Soil analysis and revegetation plans,
- Coal refuse reprocessing evaluations including mining and reclamation plans,
- Construction monitoring services,
- Design of excess overburden disposal fills, both conventional and durable rock fills,
- Detailed reclamation plans,
- Detailed subsurface/geotechnical investigations for foundation, subsidence, slope stability, and reserve analysis,
- Mine closure plans/post-reclamation land use,
- Permitting for deep and surface mine applications, NPDES, U.S. Army Corps of Engineers Section 404 permits, West Virginia Public Lands permits, air pollution control permits, etc.,
- Probable hydrologic consequences (PHC) statement preparation,
- Reclamation/environmental liability assessments in conjunction with property transfers, and
- Subsidence control plans.

As a result of this experience, GAI will provide the required expertise to complete reclamation projects in a timely, economical, and efficient manner and will not require any subconsultants to be utilized on this project. Our direct knowledge of the AML program guidelines and personnel will also benefit the State.

GAI will perform the work under this contract in our Charleston, West Virginia office.

## **BIDDER EXPERIENCE**

GAI Consultants, Inc. provides consulting services in geotechnical engineering, civil engineering, environmental engineering, mining-related design engineering, geology, hydrogeology, nvironmental science, economics, transportation systems and land-use planning, urban and site engineering, structural engineering, engineering mechanics, agronomy, anthropology and archaeology, and various related professional disciplines. The firm has experienced steady growth in both size and capabilities; and for the past fifteen years has been rated among the top 200 engineering and environmental firms in the nation by Engineering News Record (ENR).

GAI Consultants, Inc., is a full service civil, environmental and mining engineering firm headquartered in suburban Pittsburgh, Pennsylvania, with offices in Charleston, West Virginia; Philadelphia, Pennsylvania; Ft. Wayne, Indiana; Orlando and Jacksonville, Florida; Cincinnati, Ohio; and Richmond, Virginia. Established in 1958, GAI and its subsidiaries comprise an organization of over 500 engineers, scientists, and support personnel. With our in-house soils laboratories, surveying services and competent staff of professionals, GAI offers a comprehensive approach to engineering problems requiring a wide range of interdisciplinary skills. In the past 40+ years, we have designed and monitored the construction of numerous facilities and have conducted thousands of related geotechnical and hydrological investigations, many of which involved reclamation of abandoned mine lands. By successfully completing so many reclamation projects, GAI has obtained "expertise" status on an international basis for many type projects. For example, GAI recently completed a very large investigation into delineating the extent of the world's largest mine fire in the country of India. GAI was selected for the country of India mine fire project based upon qualifications only.

GAI's Charleston, West Virginia office opened in 1985. Since opening, our Charleston office has experienced steady growth. Currently, the Charleston office has four registered professional engineers and other experienced disciplines on staff. Clients served by the Charleston office include mining and industrial companies; federal, state, and local governmental agencies; engineers and architects; and private developers.

GAI has successfully served the WVDEP on previous AML contracts from 1986 to the present. We propose to utilize most of the same Charleston and Pittsburgh staff. See attached CCQQ.

# Surveying and Mapping

To provide cost efficient and timely services for this contract, surveying services will be conducted by GAI's in-house surveyors. GAI routinely performs the following types of surveys which are relevant to the work possibly associated with this project.

- Aerial mapping control surveys including horizontal and vertical control and reference monuments.
- Topographic and planimetric surveys.
- Construction surveys including work layout staking, establishment of baselines and cross sections, profiles, etc.,
- Construction quantity measurement surveys,
- Detailed as-built documentation surveys,
- Property surveys including both surface and mineral estates, and
- Oil and gas surveying.

GAI presently operates up to three survey crews. GAI has made a commitment to provide timely surveying services.

GAI's survey crew utilizes Nikon DTM-450 and Nikon DTM-550 Total Stations. This is complimented by data collectors and Autocad workstations to generate plan views, profiles, cross sections and other engineering drawings. These CAD-generated drawings can then be utilized by GAI's CAD-drafting/design department for design.

All surveys conducted by GAI are completed under the supervision of a West Virginia licensed land surveyor. Surveying will also be performed under the general direction of a West Virginia registered professional engineer, the GAI project engineer and project manager. All surveys and mapping are completed to the standards as outlined by the National Map Standards, as well as other applicable quality standards to include AML specifications.

# **Subsurface Investigation**

Based upon the information provided in the Expression of Interest, GAI is not proposing the use of any subsurface investigation subcontractor. If a subsurface exploration subcontractor is required, we have relationships with several drilling firms to provide an economical and available contractor to complete the project. Borrow area investigations will be conducted by GAI personnel, as has been the case in past projects.

# **Laboratory Services**

GAI operates full-service soils and materials laboratories in our Philadelphia, Pennsylvania office.

GAI has the capability to analyze natural materials such as soil and rock, manufactured materials such as concrete and steel, and industrial waste materials. The soils and industrial waste analysis capabilities include classification tests, moisture content, grain size analysis, Atterberg limits, specific gravity, unit weight determinations, and chemical analyses. The characteristic test capabilities include relative density equipment for sample particle sizes to 3 inches in diameter; apparatus for constant- and falling-head permeability measurements in both horizontal and vertical directions, and for moisture-density relationships for both modified and standard densities. The compressibility of materials can be determined in a 2.5-inch diameter, one-dimensional consolidometer or a 2.5-inch diameter, one-dimensional Anteus consolidometer with back pressure and pore pressure capability. Also, volumetric consolidation can be determined isotropically or anisotropically. The strength parameters of soils and industrial/coal waste materials can be determined by unconfined compression, direct shear, or triaxial shear tests. The rock-testing capabilities include classification by visual inspections and petrographic analysis, unconfined compression, direct shear, and triaxial shear tests. GAI also maintains several nuclear densometer testing gauges to monitor field compaction.

Based upon the information provided in the Expression of Interest, GAI is not proposing the use of any other laboratory services.

# **Design Engineering and Contract Document Preparation**

GAI has extensive experience in design engineering and the preparation of contract documents for AML reclamation and related projects. GAI prides itself in development of **simple**, **yet innovative**, **cost-efficient designs** that are easily implemented in the field during construction. Our experience gained on various types of West Virginia AML projects during the past 22 years will ensure this quality engineering continues.

GAI has prepared **over 80** construction packages for WVDEP-AML since 1985. Other West Virginia AML projects completed by GAI did not result in the preparation of construction drawings such as water quality surveys and feasibility reports and landslide investigations where it was determined that the problems were not mining related. GAI is completely familiar with WVDEP's guidelines for preparing construction drawings, technical specifications, and supporting documents. We are able to draw on a large collection of typical construction details contained within our computer aided drafting (CAD) library for the above types of AML projects. GAI also has various master specifications which we are able to draw from to create project specific specifications.

During the design engineering phase of our projects, GAI develops alternatives for the reclamation program and schedules meetings with WVDEP-AML to review options and select a mutually acceptable plan. We feel that this approach results in a more workable plan at an ultimately lower cost. We also perform a constructability review of each construction package by technical staff familiar with actual methods of construction. This review also expedites the overall reclamation plan.

## **QUALIFICATIONS OF PERSONNEL**

GAI has a staff of over 500 technical support personnel. GAI's staff is particularly well suited to investigate problems associated with abandoned mine lands. We propose to utilize a staff of engineers (civil and mining), geologists, biologists, surveyors, and CADD operators to conduct the investigatory and design work backed by a group of management professionals.

- **Mr. C. Elwood Penn, IV, P.E.**, Managing Officer will serve as Contract Administrator in the Charleston office. Mr. Penn has worked with the industry and their related problems for **25 years**. Mr. Penn is very knowledgeable with WVDEP AML guidelines and project expectations. His qualifications will result in direct benefits to the State in terms of quality and cost efficient completion of the project.
- **Mr. Charles F. Straley, P.E., P.S.** will serve as a Project Manager. Mr. Straley has managed and participated in the design and development of reclamation plans and feasibility studies for over **45** abandoned mine land projects for the WVDEP, Abandoned Mine Lands and Reclamation Program. Mr. Straley has a complete understanding of WVDEP AML guidelines, specifications, and project expectations. He has a good working relationship with many of the AML staff.
- **Mr. James A. Hemme, P.E., L.R.S.** will serve as a Project Manager. Mr. Hemme has participated in the design and development of reclamation plans and feasibility studies for over **five (5)** abandoned mine land projects for the WVDEP, Abandoned Mine Lands and Reclamation Program. Mr. Hemme has a complete understanding of WVDEP AML guidelines, specifications, and project expectations. He has a good working relationship with many of the AML staff.
- **Mr. Mark D. Young, P.E.** will serve as a Project Engineer. Mr. Young has participated in the design and development of reclamation plans and feasibility studies for **eight (8)** abandoned mine land projects for the WVDEP, Abandoned Mine Lands and Reclamation Program. Mr. Young has a complete understanding of WVDEP AML guidelines, specifications, and project expectations.
- **Mr. Joseph A. Prine, E.I.** will serve as a Project Engineer. Mr. Prine has participated in the design and development of reclamation plans and feasibility studies for **three (3)** abandoned mine land projects for the WVDEP, Abandoned Mine Lands and Reclamation Program. Mr. Prine has a complete understanding of WVDEP AML guidelines, specifications, and project expectations.

All have relevant direct experience with mine reclamation, grading/drainage, feasibility studies, water study and design, stream restoration, and preparation of construction documents.

A team of staff engineers, geologists/hydrologists, environmental scientists, biologists, technicians, CADD operators, word processor operators, secretaries, and draftspersons will provide the expertise and manpower to complete the project. For special needs we can call on planners, land use specialists, natural resource specialists, soil scientists, archaeologists, architectural historians, and structural and material engineers.

# CORPORATE SPECIALIZED EXPERIENCE AND DEMONSTRATED ABILITIES

GAI has provided a wide variety of services to governmental agencies related to the reclamation of AML problems. GAI has served the WVDEP on open-end and other contracts from 1986 to the present. We have also completed numerous projects for the Office of Surface Mining, Reclamation and Enforcement (OSMRE) and AML programs in Pennsylvania, Ohio, Maryland, and Virginia.

### **MANAGEMENT PLAN & LOCATION OF FACILITIES**

### Management Plan

GAI's proposed project management plan is presented on Figure 1. The work will be performed in **GAI's Charleston, West Virginia office** which will allow ready access to the project area. Assistance, if and when needed will be provided by staff located in the Pittsburgh, Pennsylvania office of GAI. GAI's Charleston location is also convenient with respect to the WVDEP's Charleston location.

GAI's professional, technical and support staff have extensive experience on AML and related design projects and are extremely well qualified to serve the WVDEP on this contract. GAI stands ready to commit the personnel and resources required to complete the project in a timely, technically sound and cost efficient manner.

Contract Administration will be provided by **Mr. C. Elwood Penn, IV, P.E.** as shown in Figure 1. Mr. Penn will be responsible for overall management and performance of the project. He will review the work directive, visit the site along with the WVDEP to better familiarize himself with site conditions and work requirements accompanied by Mr. Gray or other appropriate staff, and then guide the preparation of the scope of work and cost proposal by GAI staff. He will also generally supervise the work in progress and review work products at intermediate points and finally prior to submittal to the WVDEP. In addition, Mr. Fioravante will be in charge of any contractual negotiations necessary through the process of the project.

Project Management will be provided by **Mr. Charles F. Straley**, **P.E., P.S. or Mr. James A. Hemme**, **P.E., L.R.S.** as shown in Figure 1. Mr. Straley will be responsible for the day to day management and performance of the project. He will review the work directive and prepare the scope of work and cost proposal. A written proposal including a detailed cost estimate (manhours and expenses associated with the project) will then be prepared and submitted to the WVDEP for their review. Upon WVDEP's approval of the proposal, the Project Manager will arrange for the start of the work. Included will be project staffing, arrangement and detailing of the scope of services to be provided by GAI, and review of project budget and schedule. The Project Manager will generally supervise the work in progress and review work products at intermediate points and finally prior to submittal to the WVDEP and will be responsible for maintaining liaison with the WVDEP Project Manager including project status reports, as required.

Day-to-day project activities will be performed under the direction of the Project Manager by one of the **Project Engineers (Messrs. Mark D. Young, P.E. and Joseph A. Prine, E.I.)** as shown in Figure 1. They will be responsible for guidance of the GAI staff. Their main activities will include development of detailed step-by-step project work plans to ensure the project activities are completed on-budget and on-time, review of the work products at intermediate points and at project completion, providing guidance and direction to project staff, as well as engineering and design work.

GAI's large experienced staff permits us to respond quickly, provides flexibility, and permits high level input to the project's staff from in house experts. However, our method of staffing projects, as evidenced by our performance on prior projects for WVDEP-AML, is to assign a small team with total responsibility for completion of the work to the client's satisfaction and budget. Where necessary the team can draw on the expertise available within GAI's large staff.

### **Project Budget Control**

The Project Manager will be responsible for monitoring the project budget. GAI's staff submits time sheets on a weekly basis. All charges including labor hours and other project expenses to a particular project are compiled in our data center and are distributed to the Project Manager by Wednesday of the following week. In this manner, we can keep close track of our project costs.

## **Schedule Control**

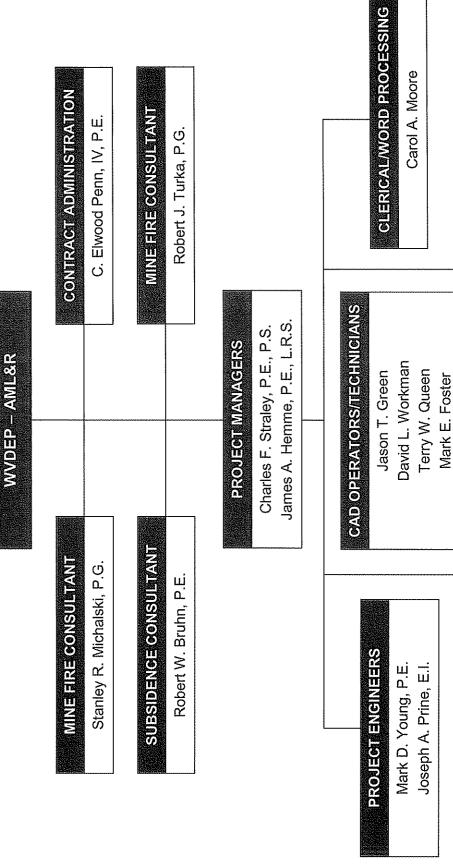

Direct responsibility for schedule control lies with the Project Manager. Initially, the Project Manager will review the work directive schedule requirements to see if they can be complied with given the anticipated scope of work. As the project progresses, the Project Manager will monitor progress and compare it with the established schedule on a weekly basis. In this manner, the Project Manager can make staff adjustments to maintain the project schedule. If circumstances develop that make it impossible to maintain the project schedule, the Project Manager will contact the WVDEP Project Manager to develop a mutually acceptable adjustment to the schedule.

### **Location of Facilities**

GAI proposes to complete work under this contract in our **Charleston**, **West Virginia office**. We feel that our close proximity to the WVDEP's Charleston office and the project area will allow the project to be completed in a timely, efficient manner.

FIGURE 1

# ABANDONED MINE LAND PROJECTS WEST VIRGINIA DIVISION OF ENVIRONMENTAL PROTECTION

Project No.: E08194.00

Title: Route 60 Drainage

Location: Fayette County, West Virginia

Tasks: The scope of work involves providing seals for the collapsed portals, design of controlled

drainage, and design of a pneumatic concrete wall for a rock highwall. Construction plans

and technical specifications were developed.

Project No.: E081338.00

Title: Lynch Run Highwall #6
Location: Harrison County, West Virginia

Tasks: The scope of work involves providing seals for the collapsed portals, backfilling the

highwalls, reclamation of the refuse pile, and providing proper controlled drainage including natural stream design. Construction plans and technical specifications were

developed.

Project No.: E081094.00

Title: Mallory Refuse Pile

Location: Logan County, West Virginia

Tasks: The scope of work involves regarding the refuse pile, sealing the mine portal(s), and

design of drainage control measures. Construction plans and technical specifications

were developed.

Project No.: E080494.00

Title: Duck Creek (Jenkins) Landslide
Location: Logan County, West Virginia

Tasks: The scope of work involves the design of stabilization measures for the slide and design

of seepage and stormwater drainage controls. Construction plans and technical

specifications were developed.

Project No.: E080354.02

Title: Wolfpen (McBurney) Landslide Location: Kanawha County, West Virginia

Tasks: The scope of work involves stabilizing a slope, providing seals for collapsed portals, and

providing controlled drainage. Construction plans and technical specifications were

developed.

Project No.: E08054.01

Title: Heizer Creek (Lett-Zitselberger) Drainage

Location: Putnam County, West Virginia

Tasks: The scope of work involves stabilizing a slope, providing seals for collapsed portals, and

providing controlled drainage. Construction plans and technical specifications were

developed.

E050470.10

Title:

Handley/Upper Creek Drainage Project

Location:

Kanawha County, West Virginia

Tasks:

The reclamation plan included dewatering the underground impoundment(s) and creating diversion ditches to redirect the drainage around structures to the nearby stream. Regrading the areas behind the retaining wall, revegetating, and providing proper

drainage for all disturbed areas is also included in the plan.

Project No.:

E050287.10

Title:

Latrobe (Gibson) Landslide Emergency Project

Location:

Logan County, West Virginia

Tasks:

The scope of work involved emergency evaluation and investigation to develop

alternatives to reduce slopes, eliminate instability, and provide for controlled drainage. Once an alternative was selected, construction plans and specifications were developed.

Project No.:

E050212.10

Title: Location: Ven's Run Maintenance Project Harrison, County, West Virginia

Tasks:

The scope of work involves stabilizing the slopes and provide for controlled drainage. It is GAI's initial approach to the abatement of the landslide is to provide a proposed reclamation plan that will grade the slide in place as much as practical and not conduct a total removal of

material.

Project No.:

E050126.10

Title:

War Waterline Extension Feasibility Study

Location:

McDowell County, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report.

Proiect No.:

E050123.10

Title:

Clark's Gap Waterline Extension Feasibility Study

Location:

Mercer and Wyoming Counties, West Virginia

Tasks:

The scope of work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report.

Project No.:

2004-134-10

Title:

War (Dash) Impoundment

Location:

McDowell County, West Virginia

Tasks:

The scope of work included providing aerial mapping and ground survey for verification of two sites consisting of a small impoundment, several mine portals, and coal refuse

disposal. In addition, stability analyses were performed on various scenarios for the

elimination of the impoundment including subsurface investigation.

Project No.: 2002-143-10

Title: Standard, Paint Creek, Collinsdale Waterline Extension Feasibility Study

Location: Kanawha County, West Virginia

Tasks: The scope of work included interviewing local residents and government officials;

collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report.

Project No.: 2002-138-10

Title: McAlpin Eroding Dump - Phase II Location: Raleigh County, West Virginia

Tasks: The scope of work included the preparation of construction documents for eleven sites.

The sites consisted of ten coal refuse piles (one of which is burning), numerous mine openings (both collapsed and open), old mine buildings, possible AMD, and various mine

related debris.

Project No.: 2001-489-10

Title: McAlpin Eroding Dump - Phase I Location: Raleigh County, West Virginia

Tasks: The scope of work included the preparation of construction documents for six sites. The

sites consisted of six coal refuse piles, numerous mine openings (both collapsed and

open), old mine buildings, possible AMD, and various mine related debris.

Project No.: 96-554-27

Title: Kingwood 52/6 Water Supply Extension

Location: Preston County, West Virginia

Tasks: The scope of work included the preparation of construction documents for a water

transmission line. Included in the distribution system are a 96,000 gallon water storage and a booster pump station. The total length of waterline is approximately 13 miles.

Project No.: 96-554-26

Title: Micajah Ridge - Herndon Heights/Itman Waterline Extension Feasibility Study

Location: Wyoming County, West Virginia

Tasks: The scope of work included interviewing local residents and government officials;

collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report.

Project No.: 96-554-25

Title: Water Feasibility Study, Glen Rogers Study Area

Location: Wyoming County, West Virginia

Tasks: Work included interviewing local residents and government officials; collecting and

analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had

been degraded by mining activity; and summarizing the investigation in a report.

Project No.: 96-554-19

Title: Water Feasibility Study, Gaymont, Edmond, and Winona Study Area

Location: Fayette County, West Virginia

Tasks: Work included interviewing local residents and government officials; collecting and

analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had

been degraded by mining activity; and summarizing the investigation in a report.

Project No.: 96-554-17

Title: Water Feasibility Study, Hominy Creek Study Area

Location: Nicholas County, West Virginia

Tasks: Work included interviewing local residents and government officials; collecting and

analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had

been degraded by mining activity; and summarizing the investigation in a report.

Project No.: 96-554-16

Title: Elk Creek / Verner Waterline Extension Feasibility Study

Location: Logan County, West Virginia

Tasks: The scope of work included interviewing local residents and government officials;

collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report.

Project No.: 96-554-15

Title: Orlando Mining Facility
Location: Gilmer County, West Virginia

Tasks: The scope of work included preparation of a report identifying the results from an

investigation/evaluation of the facilities and equipment at the site. The investigation included determining the value, usefulness and/or condition of the facilities and

equipment.

Project No.: 96-554-14

Title: Scotch Hill / Miller Hill Water Supply Extension

Location: Preston County, West Virginia

Tasks: The scope of work included the preparation of construction documents for a water

transmission line beginning at the existing hydropneumatic booster station. Included in the distribution system is 96,000 gallon water storage. The total length of waterline is

approximately 7.5 miles.

Project No.: 96-554-13

Title: Camp Run AMD

Location: Barbour County, West Virginia

Tasks: The scope of work included the preparation of construction documents for two sites. The

sites consisted of ten to fifteen mine portals and mine drainage seep locations, one pond (to be drained), concrete tramway abutments (and debris), coal refuse, and various areas

of saturated soil from mine drainage (one of which is sliding).

Project No.: 96-554-05

Title: Fairmont (Grandstaff) Subsidence

Location: Fairmont, West Virginia

Tasks: Evaluation of potential subsidence effects for the Grandstaff Subsidence project in

Fairmont, West Virginia. Project involved subsurface investigation (including borehole camera work); sampling of mine water; and preparation of a report describing the findings

of the above investigations.

Project No.: 96-554-04

Title: City of Summersville (Rt. 39)
Location: Nicholas County, West Virginia

Tasks: The project included the review of another consultants water feasibility study report and

determination if the findings of the report were accurate.

Project No.: 96-554-03

Title: Reynoldsville, Wallace, and Clarksburg Water Supply Extension Project

Location: Harrison County, West Virginia

Tasks: The project included a feasibility/rate analysis, design of 9,400 feet of 8-inch water line,

33,000 feet of 6-inch water line, 12,200 feet of 2-inch water line, a 96,000 gallon (nominal) water storage tank, and other appurtenances, selection, surveying, and geotechnical investigation of a water storage tank site, and preparation of construction documents,

regulatory permit applications, and an engineer's report.

Project No.: 96-554-02

Title: Mill Creek Regional Water Supply Extension Project

Location: Logan County, West Virginia

Tasks: Preparation of construction documents for the construction of water transmission lines, a

water distribution system, two water storage tanks, a booster station, two hydropneumatic tanks, and a water treatment plant. The total length of water line to be constructed was

approximately 34 miles.

Project No.: 96-554-01

Title: Majesty Mine Complex
Location: Barbour County, West Virginia

Tasks: Preparation of construction documents for the reclamation of the Majesty Mine Complex.

The Majesty Mine Complex was an abandoned mine site which included old mine structures, open mine portals, unreclaimed refuse piles and an extensive highwall,

existing wetlands and ponds, and numerous seeps producing acid mine drainage (AMD).

Project No.: 93-198-25

Title: Phase II Water Feasibility Study, Washington Heights to Jeffrey Study Area

Location: Boone County, West Virginia

Tasks: Phase II water feasibility study for private water supplies in the Washington Heights to

Jeffrey Study Area in Boone County, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial

Project No.: 93-198-20

Title: Mill Creek - Isom Community
Location: Logan County, West Virginia

Tasks: Design of water system to service approximately 800 residents of the Mill Creek-Isom

Community in Logan County, West Virginia. Work included sizing of water treatment plant, 4 water tanks, 4 booster stations, 1 pressure reducing valve, and approximately 23

miles of water line. Construction cost was estimated at approximately \$5,500,000.

Project No.: 93-198-19

Title: Phase II Water Feasibility Study, Weaver-Junior Study Area

Location: Randolph and Upshur Counties, West Virginia

Tasks: Phase II water feasibility study for private water supplies in the Weaver-Junior Study Area

in Randolph and Upshur Counties, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity;

and summarizing the investigation in a report.

Project No.: 93-198-18

Title: Phase II Water Feasibility Study, Reynoldsville, Wallace, and

Clarksburg Study Area

Location: Harrison County, West Virginia

Tasks: Phase II water feasibility study for private water supplies in the Reynoldsville, Wallace,

and Clarksburg Study Area in Harrison County, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity;

and summarizing the investigation in a report.

Project No.: 93-198-17

Title: **Mainella Subsidence**Location: Marion County, West Virginia

Tasks: Preparation of construction documents for the Mainella Subsidence project in Fairmont.

West Virginia. Project involved subsurface investigation (including borehole camera work); sampling of mine water; injection plan layout for grouting under three residences; preparation of technical specifications, drawings, and engineer's cost estimate; and participation in pre-bid and pre-construction meetings. Approximately 15 injection holes

were proposed at an estimated construction cost of approximately \$138,000.

Project No.: 93-198-15

Title: Glen Morgan Subsidence
Location: Raleigh County, West Virginia

Tasks: Preparation of construction documents for the Glen Morgan Subsidence project near

Beckley, West Virginia. Project included subsurface investigation (including borehole camera work); base mapping development; sampling of mine water; injection plan layout for grouting under one residence; preparation of technical specifications, drawings, and engineer's cost estimate; and participation in pre-bid and pre-construction meetings.

Estimated construction cost was approximately \$164,000.

specifications, drawings, and engineer's cost estimate; and participation in pre-bid and pre-construction meetings. Bid construction cost was approximately \$680,000.

Project No.:

93-198-08

Title:

Phase II Water Feasibility Study, New Haven Study Area

Location:

Fayette County, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the New Haven Study Area in

Fayette County, West Virginia. Work included interviewing local residents and

government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report. Conceptual design of water system included sizing a water treatment

plant, 1 booster station, 5 water tanks, and approximately 87 miles of water line.

Estimated construction cost was approximately \$13,800,000.

Project No.:

93-198-07

Title:

Phase II Water Feasibility Study, Gauley River Study Area

Location:

Fayette and Nicholas Counties, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the Gauley River Study Area in Fayette and Nicholas Counties, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and

summarizing the investigation in a report.

Project No.:

93-198-06

Title:

Phase II Water Feasibility Study, Heizer and Manila Creek Community

Location:

Putnam County, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the Heizer and Manila Creek Community in Putnam County, West Virginia. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in a report.

Project No.:

93-198-05

Title:

Phase I Water Feasibility Study, Reynoldsville, Wallace,

& Clarksburg Study Area

Location:

Harrison County, West Virginia

Tasks:

Phase I water feasibility study of the Reynoldsville, Wallace, & Clarksburg Study Area in Harrison County, West Virginia to evaluate the potential for pre-1977 mining activity to

Harrison County, West Virginia to evaluate the potential for pre-1977 mining activity to have degraded the water supplies of residents. Work included interviews, record searches, field reconnaissance, and preparation of remedial action cost estimates. A

report summarizing the findings was submitted.

documenting findings and providing a cost estimate for extending public water supply systems.

Project No.:

88-460-23

Title:

Phase II Water Feasibility Study, Mill Creek Study Area

Location:

Boone, Lincoln, and Logan Counties, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the Boone County Community, Lincoln County Community, and Logan County Community all encompassed in the Mill Creek Study Area. Work included interviewing local residents and government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the findings in separate reports for each community. Estimated construction cost for extending a public water supply to residents of the Mill Creek Study Area was approximately \$15,400,000 and included 1 water treatment plant, 1 booster station, 7 water storage tanks, and

approximately 40 miles of water line.

Project No.:

88-460-22

Title:

Phase II Water Feasibility Study, Godby Branch Community

Location:

Logan County, West Virginia

Tasks:

Phase II water feasibility study for private water supplies in the Godby Branch Community

in Logan County, West Virginia. Work included interviewing local residents and

government officials; collecting and analyzing surface and private water supply samples; researching water quality records; designing and costing remedial measures; calculating the percentage of wells that had been degraded by mining activity; and summarizing the

findings in a report.

Project No.:

88-460-21

Title:

Madison Street/Fairview Route 218 Portals

Location:

Marion County. West Virginia

Tasks:

Preparation of construction documents for the Madison Street/Fairview Route 218 Portals project. Work included subsurface investigation; surveying; design of wet mine seals and associated drains at multiple sites; preparation of technical specifications, drawings, and

engineer's cost estimate; and participation in pre-bid and pre-construction meetings.

Project No.:

88-460-20

Title:

**Summerlee Refuse Project** 

Location:

Favette County, West Virginia

Tasks:

Preparation of construction documents for the Summerlee Refuse pile project. Project included subsurface investigation; surveying; water quality sampling; grading and drainage design for regrading and revegetation of 60 acre refuse pile, 2 impoundments, and 2 ponds; preparation of technical specifications, drawings, and engineer's cost

estimate; and participation in pre-bid and pre-construction meetings.

Project No.: 88-460-14

Title: Covey Creek Mine

Location: Logan County, West Virginia

Tasks: Field reconnaissance, historical records review, and subsurface investigation to determine

extent of mine fire and to develop options for remediation.

Project No.: 88-460-13

Title: Logan Phase I Water Study Location: Logan County, West Virginia

Tasks: Preliminary investigation of the Clothier, Cow Creek, Crooked Creek, Godby Branch,

Godby Heights, Upper Rum Creek, and Whitman Creek/Holden communities to determine

the possibility of pre-1977 mining activity degrading the water supplies of the

communities. Field reconnaissance, interviews, and mining and water quality record searches were conducted, and a remedial cost estimate was provided with reports

summarizing the findings for each community.

Project No.: 88-460-12

Title: **Vivian Refuse Pile**Location: Vivian, West Virginia

Tasks: Subsurface investigation, surveying, and design for reclamation of a large coal refuse pile

and two mine entries. Plans, specifications, cost estimate, coal refuse reprocessing evaluation, and supporting documents for regrading over 150,000 cubic yards of refuse,

surface water control, mine seals, and riprap toe protection were completed.

Project No.: 88-460-11

Title: Kimball Refuse Piles Location: Kimball, West Virginia

Tasks: Subsurface investigation, surveying and design for reclamation of 3 coal refuse piles and

six mine entries. Design included replacement of a water well and related supply piping for the town of Kimball. Completed preparation of plans, specifications, cost estimate, coal refuse reprocessing report, West Virginia Department of Health permit for new well, and other supporting documents for reclaiming this large site with over ½ million cubic

yards of regrading.

Project No.: 88-460-10 & 88-460-09
Title: Hampden (Smith) Bridge
Location: Mingo County, West Virginia

Tasks: Design of metal arch culvert to replace a bridge to allow access to a landslide repair

project. Development of plans and specifications were on a fast-track schedule.

Project No.: 88-460-08

Title: Bear Run Refuse

Location: Gilmer County, West Virginia

Tasks: Field reconnaissance to establish project limits, develop reclamation options, and collect

water quality information to design a wetlands reclamation project. Subsurface investigation, surveying, and development of aerial mapping for 160 acres were

conducted. Plans, specifications, cost estimate, reprocessing evaluation and report, and

permit application assistance to develop reclamation plan for 13 former coal refuse

88-460-01

Title: Location: Courtright Highwall
Bridgeport, West Virginia

Tasks:

Work performed on this project was an extension of activities as described for 86-181-23.

Project No.:

Location:

86-181-23

Title:

Courtright Highwall
Bridgeport, West Virginia

Tasks:

The project included a subsurface investigation to determine extent of landslide and whether mining related, field surveying to establish topographic mapping and control, and subsequent design of landslide repair alternatives. Design ultimately selected included a reinforced slope using stabilizing grid. Landslide contained 400,000 cubic yards of

material.

Project No.:

86-181-22

Title:

Jonben (Haga) Subsidence

Location:

Jonben, West Virginia

Tasks:

Subsidence control on an emergency basis including sinkhole backfilling and drainage control. Project included drilling to determine the extent of mining and subsidence, field surveying to develop topographic mapping, and development of a backfilling and drainage

plan.

Project No.:

86-181-21

Title:

Belle (Malcolm) Landslide

Location:

Belle, West Virginia

Tasks:

Landslide stabilization including excavation of slide mass, sealing of several mine entries, and drainage controls. Project included drilling, sampling, and piezometer installation and

monitoring to develop project plans and specifications.

Project No.:

86-181-20

Title: Location: Holden (Padgett) Subsidence Whitman Junction, West Virginia

Tasks:

The project included subsurface investigation to determine extent of mine workings, development of stabilization plan including drainage channels/pipes, and mine seals. Construction documents were prepared, and participation in pre-bid and pre-construction

meetings was completed.

Project No.:

86-181-19

Title:

Minden Mine Fire Minden, West Virginia

Location: Tasks:

The project included subsurface investigation to determine source and extent of

underground fire.

86-181-10

Title:

**Omar Refuse Piles** 

Location:

Logan County, West Virginia

Tasks:

The project included subsurface investigation and development of specifications and construction drawings for remedial work on regrading 5 refuse piles with over 330,000

cubic yards of earthwork, and sealing 6 mine portals and a large vertical shaft.

Project No.:

86-181-09

Title: Location: Mt. Hope (Sawyer) Subsidence Fayette County, West Virginia

Tasks:

The project included subsurface investigation and development of construction specifications and drawings, and topographic mapping for remedial work on mine

subsidence affecting 1 home.

Project No.:

86-181-08

Title:

Morgantown Airport Drainage

Location:

Morgantown, West Virginia

Tasks:

The project included subsurface investigation and development of construction

specifications and drawings, and some topographic mapping for remedial work on mine subsidence effecting a day care center and an airport access road, and for closure of 4

mine portals below the end of a runway.

Project No.:

86-181-07

Title:

**Logan Drainage Project** 

Location:

Logan, West Virginia

Tasks:

The project included subsurface investigation and development of construction

specifications and drawings, and some topographic mapping for remedial work on 4 mine portals, a mine seep, and 400 feet of abandoned conveyor with its headhouse and loadout

platform.

Project No.:

86-181-06

Title:

**Huffman Street Subsidence** 

Location:

Fairmont, West Virginia

Tasks:

The project included subsurface investigation and development of construction specifications and drawings for remedial work on mine subsidence affecting 20 homes.

Project No.:

86-181-05

Title:

Switzer/Adams/Robinson Drainage

Location:

Logan County, West Virginia

Tasks:

The project included subsurface investigation and development of construction

specifications, drawings, and topographic mapping for remedial work on 3 mine portals. including the design of an energy dissipator with associated piping under railroad and

state highway.

85-289

Title:

**Hurricane Fork/Five-Mile Fork Burning Coal Seams** 

Location:

Kanawha County, West Virginia

Tasks:

The project included subsurface investigation and development of costs which would be

associated with extinguishment.

Project No.:

84-192

Title:

**Duck Creek Landslide** 

Location:

Gilmer County, West Virginia

Tasks:

The project included subsurface investigation, development of construction specifications

and drawings, and construction monitoring for remedial work on a landslide resulting from

uncompacted strip bench spoils.
