**ATTN: Mr. Chuck Bowman, Buyer**

**RE: Expression of Interest – Engineering Design and Construction Monitoring Services  
DEP15066 – Dotson Tipple Design Project  
Triad Proposal #01-10-8166**

Mr. Bowman and the WVDEP,

Triad Engineering, Incorporated (TRIAD) is pleased to submit the attached "Consultant Confidential Qualification Questionnaire (CCQQ)" and "Related Project Experience Matrix (RPEM)" in response to the Department of Environmental Protection Office of Abandoned Mine Lands & Reclamation's (DEP - AML&R's) need for engineering design, construction monitoring and other support services for the Dotson Tipple Design project. TRIAD's primary point of contact for this project will be Mr. Harold W. "Chip" Chambers. Mr. Chambers can be reached at (304) 296-2562 or [cchambers@triadeng.com](mailto:cchambers@triadeng.com).

TRIAD is extremely proud of our performance under past contracts, including contracts we have held with the DEP. As of this date, over 400 AML&R projects have been undertaken by TRIAD. The vast majority of these projects have been successfully completed on time and within the proposed estimated cost.

As always, TRIAD will commit the necessary resources to meet the needs of this project. TRIAD continues to maintain and invest in staff and equipment necessary to provide comprehensive services for the successful completion of this project. We firmly believe the in-house resources available provide the State with the most favorable terms from a technical and cost standpoint. Our proximity to the project location is also beneficial, as our personnel can be at the project site in Monongalia County within approximately 10 minutes. We highly value our working relationship with AML&R personnel, and will continue to strive for excellence in all we do.

We appreciate the opportunity to offer our services to you and hope we will be able to work together on this important project. Please do not hesitate to contact us should you have any questions regarding this submission or our firm's services.

Sincerely,  
**Triad Engineering, Inc.**

Lydia M. Work, LRS  
Branch Manager

Harold W. "Chip" Chambers  
Project Manager / Surveying Manager

WHEN RESPONDING TO RFQ, INSERT NAME AND ADDRESS IN SPACE ABOVE LABELED 'VENDOR'

## GENERAL TERMS & CONDITIONS REQUEST FOR QUOTATION (RFQ) AND REQUEST FOR PROPOSAL (RFP)

1. Awards will be made in the best interest of the State of West Virginia.
2. The State may accept or reject in part, or in whole, any bid.
3. Prior to any award, the apparent successful vendor must be properly registered with the Purchasing Division and have paid the required \$125 fee.
4. All services performed or goods delivered under State Purchase Order/Contracts are to be continued for the term of the Purchase Order/Contracts, contingent upon funds being appropriated by the Legislature or otherwise being made available. In the event funds are not appropriated or otherwise available for these services or goods this Purchase Order/Contract becomes void and of no effect after June 30.
5. Payment may only be made after the delivery and acceptance of goods or services.
6. Interest may be paid for late payment in accordance with the *West Virginia Code*.
7. Vendor preference will be granted upon written request in accordance with the *West Virginia Code*.
8. The State of West Virginia is exempt from federal and state taxes and will not pay or reimburse such taxes.
9. The Director of Purchasing may cancel any Purchase Order/Contract upon 30 days written notice to the seller.
10. The laws of the State of West Virginia and the *Legislative Rules* of the Purchasing Division shall govern the purchasing process.
11. Any reference to automatic renewal is hereby deleted. The Contract may be renewed only upon mutual written agreement of the parties.
12. **BANKRUPTCY:** In the event the vendor/contractor files for bankruptcy protection, the State may deem this contract null and void, and terminate such contract without further order.
13. **HIPAA BUSINESS ASSOCIATE ADDENDUM:** The West Virginia State Government HIPAA Business Associate Addendum (BAA), approved by the Attorney General, is available online at [www.state.wv.us/admin/purchase/vrc/hipaa.htm](http://www.state.wv.us/admin/purchase/vrc/hipaa.htm) and is hereby made part of the agreement. Provided that the Agency meets the definition of a Cover Entity (45 CFR §160.103) and will be disclosing Protected Health Information (45 CFR §160.103) to the vendor.
14. **CONFIDENTIALITY:** The vendor agrees that he or she will not disclose to anyone, directly or indirectly, any such personally identifiable information or other confidential information gained from the agency, unless the individual who is the subject of the information consents to the disclosure in writing or the disclosure is made pursuant to the agency's policies, procedures, and rules. Vendor further agrees to comply with the Confidentiality Policies and Information Security Accountability Requirements, set forth in <http://www.state.wv.us/admin/purchase/privacy/noticeConfidentiality.pdf>.
15. **LICENSING:** Vendors must be licensed and in good standing in accordance with any and all state and local laws and requirements by any state or local agency of West Virginia, including, but not limited to, the West Virginia Secretary of State's Office, the West Virginia Tax Department, and the West Virginia Insurance Commission. The vendor must provide all necessary releases to obtain information to enable the director or spending unit to verify that the vendor is licensed and in good standing with the above entities.
16. **ANTITRUST:** In submitting a bid to any agency for the State of West Virginia, the bidder offers and agrees that if the bid is accepted the bidder will convey, sell, assign or transfer to the State of West Virginia all rights, title and interest in and to all causes of action it may now or hereafter acquire under the antitrust laws of the United States and the State of West Virginia for price fixing and/or unreasonable restraints of trade relating to the particular commodities or services purchased or acquired by the State of West Virginia. Such assignment shall be made and become effective at the time the purchasing agency tenders the initial payment to the bidder.

I certify that this bid is made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership, or person or entity submitting a bid for the same material, supplies, equipment or services and is in all respects fair and without collusion or Fraud. I further certify that I am authorized to sign the certification on behalf of the bidder or this bid.

### INSTRUCTIONS TO BIDDERS

1. Use the quotation forms provided by the Purchasing Division. Complete all sections of the quotation form.
2. Items offered must be in compliance with the specifications. Any deviation from the specifications must be clearly indicated by the bidder. Alternates offered by the bidder as **EQUAL** to the specifications must be clearly defined. A bidder offering an alternate should attach complete specifications and literature to the bid. The Purchasing Division may waive minor deviations to specifications.
3. Unit prices shall prevail in case of discrepancy. All quotations are considered F.O.B. destination unless alternate shipping terms are clearly identified in the quotation.
4. All quotations must be delivered by the bidder to the office listed below prior to the date and time of the bid opening. Failure of the bidder to deliver the quotations on time will result in bid disqualifications: Department of Administration, Purchasing Division, 2019 Washington Street East, P.O. Box 50130, Charleston, WV 25305-0130
5. Communication during the solicitation, bid, evaluation or award periods, except through the Purchasing Division, is strictly prohibited (W.Va. C.S.R. §148-1-6.6).

Revised July 28, 2009

## **EXPRESSION OF INTEREST**

DOTSON TIPPLE  
Requisition DEP15066

### **Part 1**

### **GENERAL INFORMATION**

#### **1.1 Purpose:**

The Acquisition and Contract Administration Section of the Purchasing Division "State" is soliciting Expression(s) of Interest (EOI) for the West Virginia Department of Environmental Protection (WVDEP), Office of Abandoned Mine Lands & Reclamation (AML), from qualified firms to provide architectural/engineering services as defined in section two (2) and three (3) and construction monitoring services during the construction phase of the project as defined by the **Scope of Work**. Construction Inspection by the firm will be at the option of WVDEP/AML.

#### **1.2 Project:**

The mission or purpose of the project described in sections 2 & 3 is to provide design services for the following:

#### **DOTSON TIPPLE:**

Prepare site by clearing & grubbing.

Upgrade 2000' of access road

Demolish & dispose of tipples and coal load-out remains. Remove & dispose of trash found on the site.

Backfill the highwalls & regrade the refuse to original contour.

Install wet seals and bat gates.

Construct channel to allow water to flow safely from site.

Condition and revegetate all disturbed areas.

#### **1.3 Format:**

All responses should be submitted in a loose-leaf, three ring binder. The response should be presented in concise format which defines the corporation history and the experience, qualifications, and performance data of the firm's staff as requested by the AML Consultant Qualification Questionnaire (CQQ),

Attachment "B" and the AML and Related Project Experience Matrix (RPEM). Attachment "C".

**Electronic copies of the above referenced documents Attachment "B" and Attachment "C" are available online for registered vendors at:**  
**<http://www.state.wv.us/admin/purchase/newbul.htm>**

**1.4 Inquiries:**

Additional information inquiries regarding this EOI must be submitted in writing to the State Buyer with the exception of questions regarding proposal submission, which may be oral. The deadline for written inquiries is identified in the Schedule of Events, Section 1.16. All inquiries of specification clarification must be addressed to:

Chuck Bowman, Buyer Supervisor  
 Purchasing Division  
 P.O. Box 50130  
 Charleston, WV 25305-0130  
 Fax: (304) 558-4115  
 Email: charles.a.bowmanjr@wv.gov

**The firm, or anyone on the firm's behalf, is not permitted to make any contact whatsoever with any member of the evaluation committee.** Violation may result in rejection of the EOI. The State Buyer named above is the sole contact for any and all inquiries after this EOI has been released.

**1.5 Vendor Registration:**

Firms participating in this process should complete and file a **Vendor Registration and Disclosure Statement** (Form WV-1) and remit the registration fee. Firm is not required to be a registered vendor in order to submit an EOI, but the **successful firm must register and pay the fee prior to the issuance of an actual contract.**

**1.6 Oral Statements and Commitments:**

Firm must clearly understand that any verbal representations made or assumed to be made during any oral discussions held between firm's representatives and any State personnel are **not binding**. Only the information issued in writing and added to the Expression of Interest specifications file by an official written addendum is binding.

**1.7 Economy of Preparation:**

EOI's should be prepared simply and economically, providing a straightforward, concise description of firm's abilities to satisfy the requirements of the EOI. Emphasis should be placed on completeness and clarity of content. Example

projects referred to in a firm's EOI's submittal should address projects that are similar in scope to that of the EOI. **Firms must complete the CQQ and RPEM as included in Section 4.2 of this EOI. (Proposals must be no more than 100 pages).**

1.8 **Labeling of the Sections:** The response sections should be labeled for ease of evaluation.

1.9 **Submission:**

1.9.1 State law requires that the original expression shall be submitted to the Purchasing Division. All copies to the Purchasing Division must be submitted **prior** to the date and time stipulated as the opening date. All expressions will be date and time stamped on the Purchasing Division official time clock to verify time and date of receipt.

1.9.2 Firms mailing expressions should allow sufficient time for mail delivery to ensure timely arrival. The Purchasing Division **CANNOT** waive or excuse late receipt of an expression which is delayed and late for any reason according West Virginia State Code §5A-3-11. Any EOI received after the bid opening time and date will be immediately disqualified in accordance with State law and the Legislative Rule 148-CSR-1.

**Submit:**

One original plus one convenience copy and one copy on CD to:

Purchasing Division  
2019 Washington Street, East  
P.O. Box 50130  
Charleston, WV 25305-0130

The outside of the envelope or package(s) should be clearly marked:

Buyer: CB-23  
Req #: DEP15066  
Opening Date: 06/30/2010  
Opening Time: 1:30 pm

1.10 **Rejection of Expressions:**

The State shall select the best value solution according to §5G-1-3 of the West Virginia State Code. However, the State reserves the right to accept or reject any or all expressions and to reserve the right to withdraw this Expression of Interest at any time and for any reason. Submission of, or receipt by the State of Expressions confers no rights upon the firm nor obligates the State in any manner.

**1.11 Incurring Costs:**

The State and any of its employees or officers shall not be held liable for any expenses incurred by any firm responding to this EOI for expenses to prepare, deliver, or to attend the short-list interviews.

**1.12 Addenda:**

If it becomes necessary to revise any part of this EOI, an official written addendum will be issued by the State to all potential firms of record.

**1.13 Independent Price Determination:**

A contract will not be considered for award if the negotiated price was not arrived at independently without collusion, consultation, communication, or agreement as to any matter relating to prices with any competitor.

**1.14 Price Quotations:** No "price" or "fee" quotation is requested or permitted in the response.

**1.15 Public Record:**

*1.15.1 Submissions are Public Record.*

All documents submitted to the State Purchasing Division related to purchase orders/contracts are considered public records. All EOI's submitted by firms shall become public information and are available for inspection during normal official business hours in the Purchasing Division Records and Distribution center after the expressions have been opened.

*1.15.2 Written Release of Information.*

All public information may be released with or without a Freedom of Information request, however, only a written request will be acted upon with duplication fees paid in advance. Duplication fees shall apply to all requests for copies of any document. Currently the fees are \$0.50/page, or a minimum of \$10.00 per request, whichever is greater.

*1.15.3 Risk of Disclosure.*

The only exemptions to disclosure of information are listed in West Virginia Code §29B-1-4. Primarily, only trade secrets as submitted by a firm are the only exemption to public disclosure. The submission of any information to the State by a firm puts the risk of disclosure on the firm. The submission of any information to the State by a vendor puts the risk of disclosure on the vendor. The State does not guarantee non-disclosure of any information to the public.

- 1.16 **Schedule of Events:**  
 Release of EOI.....05/20/2010  
 EOI Opening Date.....06/30/2010

1.17 **Mandatory Pre-bid Conference:** NA

1.18 **Bond Requirements:** N/A

1.19 **Purchasing Affidavit:**  
 West Virginia State Code §5A-3-10a (3) (d) requires that all firms submit an Affidavit regarding any debt owed to the State and licensing and confidentiality certifications. The Affidavit **must** be signed and submitted prior to award. It is preferred that the Affidavit be submitted with the EOI.

**PART 2 OPERATING ENVIRONMENT**

2.1 **Location:**

**Directions to Dotson Tipple:**

**Site #1:** From Philippi proceed along 79 N to 68 E. Follow 68 E. to Exit 7 (Pierpont Exit). Exit and turn left following 857 / 119 N for 3.7 miles to Bakerstown Road. Turn left on Bakerstown Road and Travel 0.3 miles to University High School on the right. Once in front of the school turn to the left and follow the parking lot to the rear of the school. Located at the far back left corner of the school is a gas well road. Proceed ~400 along the gas well road to the site.

**Site #2:** Turn left on Bakers Ridge Road and travel 0.4 miles to gas well road on the right (Just past the entrance to University High School). Turn right on the gas well road and travel 0.1 miles to the site. To access southern end of site follow Bakers Ridge Road an additional 0.5 miles to driveway on the right (green mail box, 410, Wilson). Follow driveway for 350 feet and turn right and travel 0.1 miles to fork in road and site is on the right.

2.2 **Background:**

Firms are to be licensed Architectural/Engineering Firms (A/E) and should be familiar with, and have a successful track record of design of similar projects. The anticipated contract will be for "full-service" A/E design. Aspects of the design are to include, but not be limited to, Civil, Structural, Geological and Hydrological.

The successful A/E will be responsible for **Design** of the following:

Site 1 includes two tipples and remains of a load out, four portals, three sections of highwall, five acres of refuse, two small strip ponds, and a trash dump site. The tipples are in a dilapidated state and have started to collapse. The Western most tipple is located less than 50' from the Rails to Trails and can easily be seen from the trail. This tipple is 40'L X 30' W x 40'H. The tipple is collapsing and looks to be half the original height. The Eastern most tipple is located near the top of the hill above the Western most tipple. This tipple is 200' L X 30' W X 75'H. The tipple is mostly intact but has portions that have collapsed. Both tipples are constructed from wood and metal with concrete pylon support structures. Located between the tipples is ~5 acres of refuse. The refuse is sparsely vegetated, very steep and unstable. The majority of the refuse is located at the base of and down slope from the Eastern most tipple. Additionally, the remains a mine car was found on the refuse. On top of the hill above the tipples are three sections of highwall. The Shortest section is ~350 feet long and ~20' high. This section encircles the top of the ridge where the two remaining sections come together. The face is mostly vertical with large fractured rocks. The longest section is ~1180' long and averages 20' high. This section of highwall ranges from vertical with overhanging rocks to sloughed in and vegetated. This section of highwall has 1 open portal and two collapsed portals. The open portal is 1'H X 2"W with drainage and is located at the Northern most end of the highwall. Two collapsed portals have AMD seeping out of them into 2 strip ponds. The Eastern most pond is ~80' long and 20' wide. The Western most pond is ~30' wide and 50' long. The pH of the AMD was 3.3 with a combined flow of 10gpm. The bench and the western most pond have a large amount of trash that has been dumped near them. The remains of a coal load out were found which included 6 wooden beams ~8'H fixed vertically in the ground. The remaining section of highwall is ~950' long and averages ~20' high. This section of highwall ranges from vertical with overhanging rocks to sloughed in and vegetated. One open portal was located on this section of highwall. This portal had standing water in front of it but it was not flowing. The opening was 10'W X 4'H and collapsed inside the mine workings. A gas well road travels between the two longest sections of highwall and navigates to within 10' from the edge of the highwall. This same gas well road originates behind the new University High School and continues to within 20' of the Eastern most tipple. Additionally, the site is located less than 500 feet from the High School, which is scheduled to open, fall 2008.

Site 2 includes two highwalls and 6 portals. Highwall 1 is located at the Northern end of the site and runs East to West. This highwall is ~ 320' long and averages 20' high. The face ranges from vertical with overhanging rocks in sections to sloughed in and vegetated in others. University High School is located less than 500' north from the top of the highwall. The USGS topo showed two mine

entrances located in the highwall but they have since collapsed or been backfilled. Highwall 2 is located 300' East of Highwall 1 and parallels Bakers Ridge Road (within 100' of Bakers Ridge Road in sections). This highwall is ~2,200' long and averages 30' high. The face ranges from vertical with overhanging rocks to sloughed in and vertical. Five portals were found along the highwall. From North to South along the highwall: The first portal is collapsed with a small amount of water pooled in front of the portal. The second portal is 4'X4" with a depth that could not be ascertained due to breakdown. The third portal is 2'X2' and 10 feet deep, ending due to breakdown. The fourth portal is 2'X5' and slopes down into the mine workings. The fifth portal is nearly a vertical opening with a very steep slope traveling into the mine workings. From the entrance to the bottom of the opening the distance is ~ 15 feet. If a person were to fall into the opening it would be very difficult to egress due to the slope and unstable fractured rock on the sides of the entrance. During site investigation moist air was felt venting from this opening and all the snow around the opening had melted. Two homes are located within 500 feet from the southern end of the highwall. Trash, tires, footprints, vehicle, and ATV tracks found on and around the bench indicated visitation.

Preliminary design documents will be due 90 days from the issuance of the Purchase Order.

### **PART 3                   PROCUREMENT SPECIFICATIONS**

#### **3.1    General Requirements:**

Firm must submit a completed CQQ (Attachment "B") and RPEM (Attachment "C") as per Section 4.2

#### **3.2    Project Description:**

##### **Scope of Work – Dotson Tipple:**

Prepare site by clearing & grubbing.

Upgrade 2000' of access road

Demolish & dispose of tipples and coal load-out remains. Remove & dispose of trash found on the site.

Backfill the highwalls & regrade the refuse to original contour.

Install wet seals and bat gates.

Construct channel to allow water to flow safely from site.

Condition and revegetate all disturbed areas.

### 3.3 **Special Terms and Conditions:**

3.3.1 *Bid and Performance Bonds:* N/A

3.3.2 *Insurance Requirements:* \$1,000,000 Professional Liability per Occurrence  
 \$1,000,000 Aggregate  
 \$1,000,000 Automobile Liability  
 \$1,000,000 Professional Liability  
 Workers Compensation Certificate Upon Award  
 West Virginia Statutory requirements including  
 West Virginia Code §23-4-2 (Mandolidis)  
 DEP15066 must be listed on Insurance Certificates

### 3.4 **General Terms and Conditions:**

By signing and submitting the EOI, the successful firm agrees to be bound by all the terms contained in Section Three (3) of this EOI.

#### 3.4.1 *Conflict of Interest:*

Firm affirms that it, its officers or members or employees presently have no interest and shall not acquire any interest, direct or indirect which would conflict or compromise in any manner or degree with the performance or its services hereunder. The firm further covenants that in the performance of the contract, the firm shall periodically inquire of its officers, members and employees concerning such interests. Any such interests discovered shall be promptly presented in detail to the Agency.

#### 3.4.2 *Prohibition Against Gratuities:*

Firm warrants that it has not employed any company or person other than a bona fide employee working solely for the firm or a company regularly employed as its marketing agent to solicit or secure the contract and that it has not paid or agreed to pay any company or person any fee, commission, percentage, brokerage fee, gifts or any other consideration contingent upon or resulting from the award of the contract. For breach or violation of this warranty, the State shall have the right to annul this contract without liability at its discretion, and/or to pursue any other remedies available under this contract or by law.

#### 3.4.3 *Certifications Related to Lobbying:*

Firm certifies that no federal appropriated funds have been paid or will be paid, by or on behalf of the company or an employee thereof, to any person for purposes of influencing or attempting to influence an officer or employee of any Federal entity, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any

Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment or modification of any Federal contract, grant, loan, or cooperative agreement.

If any funds other than federally appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee or any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the firm shall complete and submit a disclosure form to report the lobbying.

Firm agrees that this language of certification shall be included in the award documents for all sub-awards at all tiers (including subcontracts, sub-grants, and contracts under grants, loans, and cooperative agreements) and that all sub recipients shall certify and disclose accordingly. This certification is a material representation of fact upon which reliance was placed when this contract was made and entered into.

#### **3.4.4 Vendor Relationship:**

The relationship of the firm to the State shall be that of an independent contractor and no principal-agent relationship or employer-employee relationship is contemplated or created by the parties to this contract. The firm as an independent contractor is solely liable for the acts and omissions of its employees and agents.

Firm shall be responsible for selecting, supervising and compensating all individuals employed pursuant to the terms of this EOI and resulting contract. Neither the firm nor any employees or contractors of the firm shall be deemed to be employees of the State for any purposes whatsoever.

The Firm shall be exclusively responsible for payment of employees and contractors for all wages and salaries, taxes, withholding payments, penalties, fees, fringe benefits, professional liability insurance premiums, contributions to insurance and pension or other deferred compensation plans, including but not limited to Workers' Compensation and Social Security obligations, and licensing fees, etc. and the filing of all necessary documents, forms and returns pertinent to all of the foregoing.

The Firm shall hold harmless the State, and shall provide the State and Agency with a defense against all claims including but not limited to the foregoing payments, withholdings, contributions, taxes, social security taxes and employer income tax returns.

The firm shall not assign, convey, transfer or delegate any of its responsibilities and obligations under this contract to any person, corporation, partnership, association or entity without expressed written consent of the Agency.

**3.4.5 Indemnification:**

The firm agrees to indemnify, defend and hold harmless the State and the Agency, their officers, and employees from and against: (1) Any claims or losses for services rendered by any subcontractor, person or firm performing or supplying services, materials or supplies in connection with the performance of the contract; (2) Any claims or losses resulting to any person or entity injured or damaged by the firm, its officers, employees, or subcontractors by the publication, translation, reproduction, delivery, performance, use or disposition of any data used under the contract in a manner not authorized by the contract, or by Federal or State statutes or regulations; (3) Any failure of the firm, its officers, employees or subcontractors to observe State and Federal laws, including but not limited to labor and wage laws.

**3.4.6 Contract Provisions:**

After the most qualified firm is identified, and fee negotiations are concluded, a formal contract document will be executed between the State and the firm. The order of precedence is the contract, the EOI and the firm's response to the EOI.

**3.4.7 Governing Law:**

This contract shall be governed by the laws of the State of West Virginia. The firm further agrees to comply with the Civil Rights Act of 1964 and all other applicable laws (Federal, State or Local Government) regulations.

**3.4.8 Compliance with Laws and Regulations:**

The firm shall procure all necessary permits and licenses to comply with all applicable laws, Federal, State or municipal, along with all regulations, and ordinances of any regulating body.

The firm shall pay any applicable sales, use, or personal property taxes arising out of this contract and the transactions contemplated thereby. Any other taxes levied upon this contract, the transaction, or the equipment, or services delivered pursuant here to shall be borne by the contractor. It is clearly understood that the State of West Virginia is exempt from any taxes regarding performance of the scope of work of this contract.

**3.4.9 Subcontracts/Joint Ventures:**

The State will consider the firm to be the sole point of contact with regard to all contractual matters. The firm may, with the prior written consent of the State, enter into written subcontracts for performance of work under this contract; however, the firm is totally responsible for payment of all subcontractors.

#### 3.4.10 *Term of Contract:*

This contract will be effective (date set upon award) and shall extend until the scope of work is complete or for one (1) consecutive twelve (12) month period. The contract may be renewed upon mutual consent for two (2) consecutive years one (1) year periods or until such reasonable time as may be necessary to obtain a new contract or to complete work.

#### 3.4.11 *Non-Appropriation of Funds:*

If the Agency is not allotted funds in any succeeding fiscal year for the continued use of the service covered by this contract by the West Virginia Legislature, the Agency may terminate the contract at the end of the affected current fiscal period without further charge or penalty. The Agency shall give the firm written notice of such non-allocation of funds as soon as possible after the Agency receives notice. No penalty shall accrue to the Agency in the event this provision is exercised.

#### 3.4.12 *Contract Termination:*

The State may terminate any contract resulting from this EOI immediately at any time the firm fails to carry out its responsibilities or to make substantial progress under the terms of this EOI and resulting contract. The State shall provide the firm with advance notice of performance conditions, which are endangering the contract's continuation. If after such notice the firm fails to remedy the conditions contained in the notice, within the time contained in the notice, the State shall issue the firm an order to cease and desist all work immediately.

The State shall be obligated only for services rendered and accepted prior to the date of the notice of termination. The contract may also be terminated upon mutual agreement of the parties with thirty (30) days prior notice.

#### 3.4.13 *Changes:*

If changes to the original contract become necessary, a formal contract change order will be required. Prior to any work being performed, the change must be negotiated and approved by the State, the Agency and the firm. An approved contract change order is defined as one approved by the Purchasing Division and approved as to form by the West Virginia Attorney General's Office prior to the effective date of such amendment. **NO CHANGE SHALL BE IMPLEMENTED BY THE FIRM UNTIL THE FIRM RECEIVES AN APPROVED WRITTEN CHANGE ORDER.**

#### 3.4.14 *Invoices, Progress Payments, & Retainage:*

The Firm shall submit invoices, in arrears, to the Agency at the address on the face of the purchase order labeled "Invoice To" pursuant to the terms of the contract. Progress payments may be made at the option of the Agency based on

percentage of work completed if so defined in the final contract. Any provision for progress payments must also include language for a minimum 10% retainage until the final deliverable is accepted.

If progress payments are permitted, firm is required to identify points in the work plan at which compensation would be appropriate. Progress reports must be submitted to Agency with the invoice detailing progress completed or any deliverables identified. Payment will be made only upon approval of acceptable progress or deliverables as documented in the firm's report. Invoices may not be submitted more than once monthly and State law forbids payment of invoices prior to receipt of services.

*The firm will invoice for completed work on an approved WVDEP form.*

#### 3.4.15 *Liquidated Damages:*

According to West Virginia State Code §5A-3-4(8), firm agrees that liquidated damages shall be imposed at the rate of **N/A** per workday, for failure to provide deliverables at the agreed upon date identified in the final contract. This clause shall in no way be considered exclusive and shall not limit the State or Agency's right to pursue to any other additional remedy to which the State or Agency may have legal cause for action including further damages against the firm.

#### 3.4.16 *Record Retention (Access & Confidentiality):*

Firm shall comply with all applicable Federal and State of West Virginia rules and regulations, and requirements governing the maintenance of documentation to verify any cost of services or commodities rendered under this contract by the firm. The firm shall maintain such records a minimum of five (5) years and make available all records to Agency personnel at firm's location during normal business hours upon written request by Agency within 10 days after receipt of the request.

Firm shall have access to private and confidential data maintained by Agency to the extent required for firm to carry out the duties and responsibilities defined in this contract. Firm agrees to maintain confidentiality and security of the data made available and shall indemnify and hold harmless the State and Agency against any and all claims brought by any party attributed to actions of breach of confidentiality by the firm, subcontractors, or individuals permitted access by the firm.

## PART 4 EVALUATION & AWARD

### 4.1 Evaluation and Award Process:

- a) Expressions of Interest will be evaluated and awarded in accordance with **§5G-1-3 "Contracts for architectural and engineering services; selection process where total project costs are estimated to cost two hundred fifty thousand dollars or more."**

"In the procurement of architectural and engineering services for projects estimated to cost two hundred and fifty thousand dollars or more the director of purchasing shall encourage such firms engaged in the lawful practice of the profession to submit an expression of interest, which shall include a statement of qualifications, and performance data and may include anticipated concepts and proposed methods of approach to the project. All such jobs shall be announced by public notice published as a Class II legal advertisement in compliance with the provisions of article three [§59-3-1et seq.] A committee comprised of three to five representatives of the agency initiating the request shall evaluate the statements of qualifications and performance data and other material submitted by the interested firms and select three firms which in their opinion are the best qualified to perform the desired service. Interviews with each firm selected shall be conducted and the committee shall conduct discussions regarding anticipated concepts and the proposed methods of approach to the assignment. The committee shall then rank in order of preference no less than three professional firms deemed to be the most highly qualified to provide the services required, and shall commence scope of service and price negotiations with the highest qualified professional firm for architectural or engineering services or both. Should the agency be unable to negotiate a satisfactory contract with the professional firm considered to be the most qualified, at a fee determined to be fair and reasonable, price negotiations with the firm of second choice shall commence. Failing accord with the second most qualified professional firm, the committee shall undertake price negotiations with the third most qualified professional firm. Should the agency be unable to negotiate a satisfactory contract with any of the selected professional firms, it shall select additional professional firms in order of their competence and qualifications and it shall continue negotiations in accordance with this section until an agreement is reached."

b) The evaluation criteria and assigned point values are as follows:

- |  |           |
|--|-----------|
| A. WV Registered Professional Engineers (Civil or Mining)<br>In the Primary Office:  | 20 points |
| B. Reclamation Engineering design experience of the Primary<br>Office's WVRPE as it relates to the specific project problem<br>Areas:  | 25 points |
| C. Available WV-AML Design Teams within the Primary office<br>(A Design team should consist of one Project Engineer (Civil<br>or Mining), one CAD person and availability of other support<br>personnel a required by the particular project): | 20 points |
| D. The Oral Interview (See Section 4.3 of this EOI):   | 35 points |

4.2 (a) AML Consultant Qualification Questionnaire (CQQ) must be completed to be eligible (See Attachment "B").

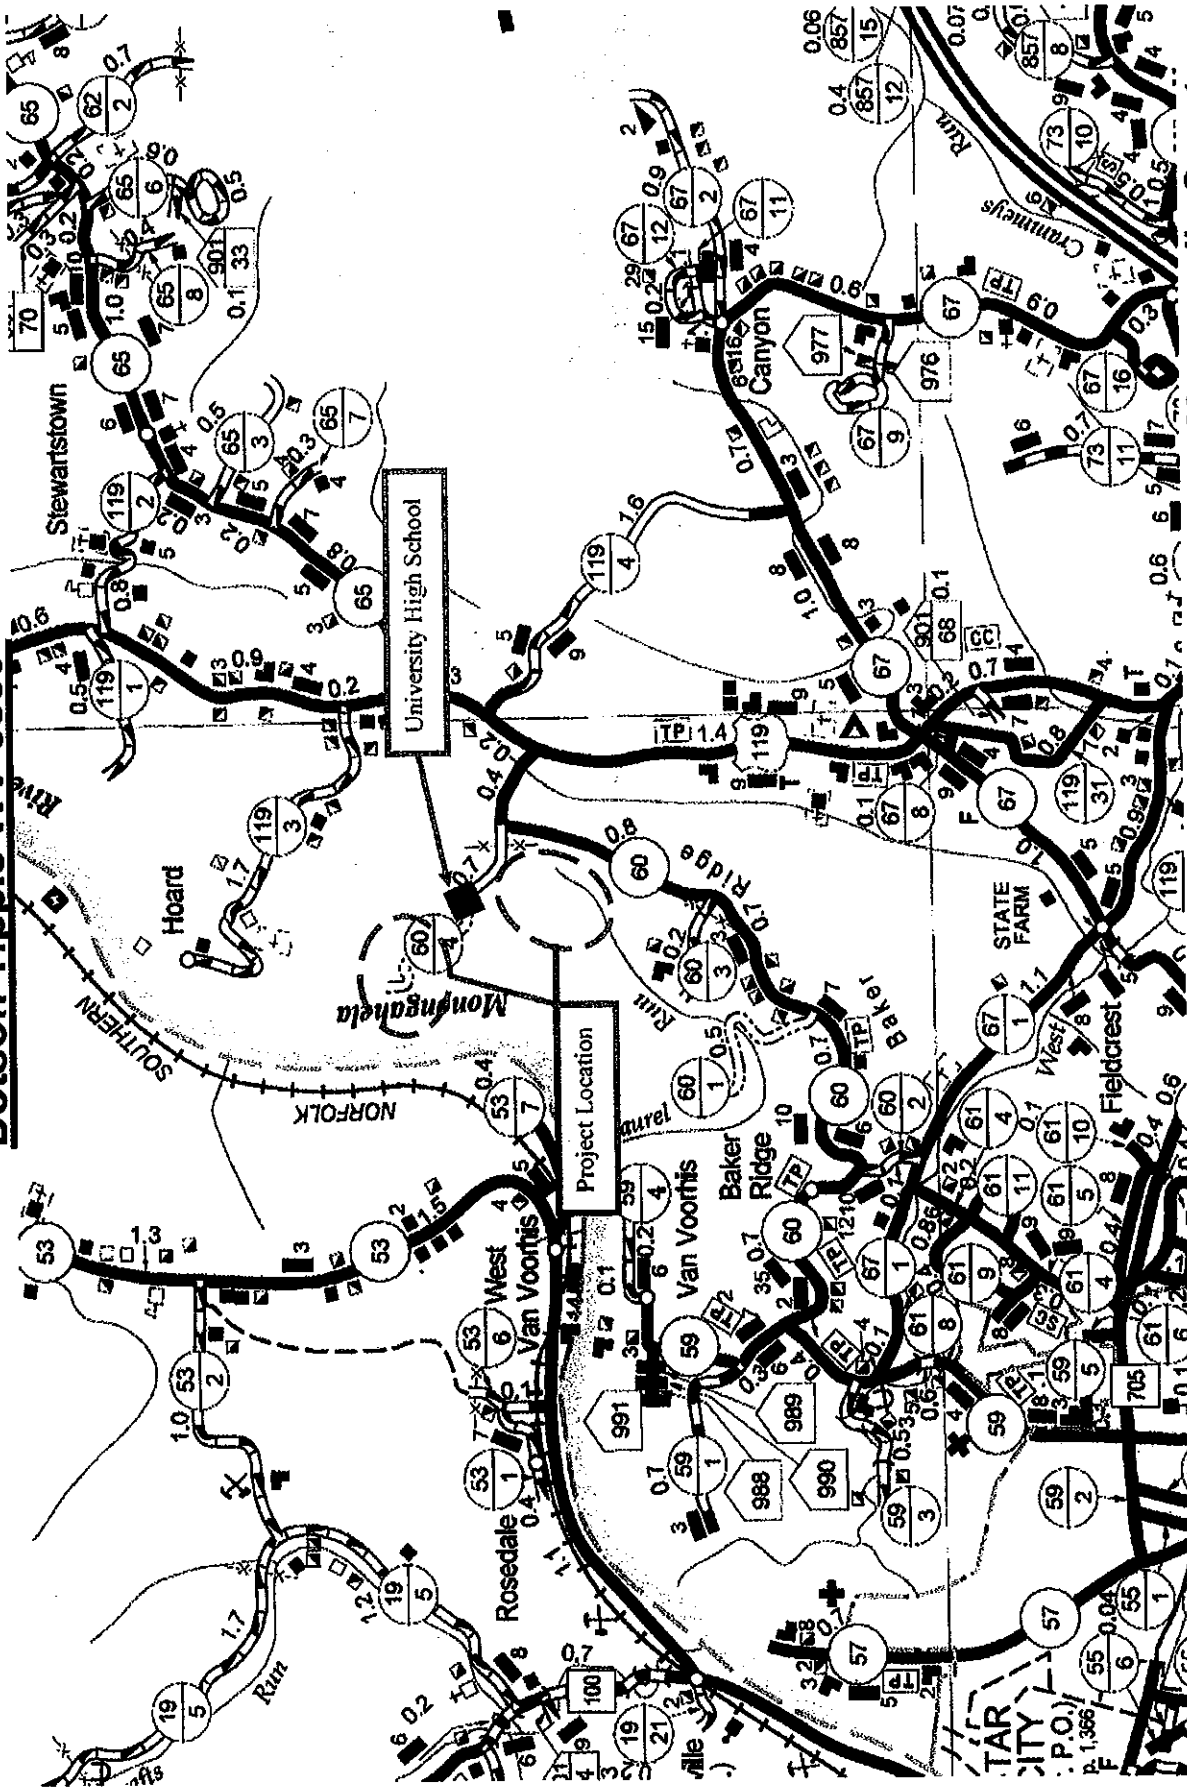

(b) AML and Related Project Experience Matrix (RPEM) must also be completed to be eligible (See Attachment "C").

4.3 Interviews as stated in 4.1 "Evaluation and Award Process" will be conducted with the three firms selected as the most qualified by the WVDEP Selection Committee. The Committee will schedule the interviews.

The format for the interviews will be a 15-30 minute PowerPoint presentation consisting, at a minimum, of the following:

- Corporate/personnel experience as it relates to the project or projects
- Proposed project management plan
- Key personnel available for the proposed work
- Proposed subcontractors (mapping, geotechnical, etc.)
- Product quality control
- Project cost control

STATE OF WEST VIRGINIA  
Purchasing Division

**PURCHASING AFFIDAVIT**

West Virginia Code §5A-3-10a states: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owned is an amount greater than one thousand dollars in the aggregate

**DEFINITIONS:**

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, Limited Liability Company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

**EXCEPTION:** The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

Under penalty of law for false swearing (*West Virginia Code §61-5-3*), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.

12. A. Is your firm experienced in Abandoned Mine Lands Remediation / Mine Reclamation Engineering?

**YES Description and Number of Projects:** Triad has performed this work on hundreds of projects for the WVDEP/AML. In addition, we have performed numerous similar projects for other governmental agencies and private entities since our inception in 1975.

NO

B. Is your firm experienced in Soil Analysis?

**YES Description and Number of Projects:** Triad has completed thousands of projects involving soil analysis throughout our years of service, and our geotechnical materials testing labs are certified by the WVDOT/DOH.

NO

C. Is your firm experienced in hydrology and hydraulics?

**YES Description and Number of Projects:** Triad has completed hundreds of projects in the areas of hydrology and hydraulics since our inception, with customers including the WVDEP, U.S. Army Corps of Engineers, and the WVDNR.

NO

D. Does your firm produce its own Aerial Photography and Develop Contour Mapping?

**YES Description and Number of Projects:** Triad typically subcontracts the aerial photography. However, Triad lays out the targets in the field and conducts the survey for establishment of horizontal and vertical control used to develop the final contour mapping. It is estimated that we have completed several hundred of these types of mapping projects since the inception of the firm in 1975.

NO

E. Is your firm experienced in domestic waterline design? (Include any experience your firm has in evaluation of aquifer degradation as a result of mining.)

**YES Description and Number of Projects:** Triad has completed a total of 10 waterline design projects including: Norton Harding Jimtown, Alkol Phase 1 and 2, 14 Mile, 10 Mile, 9 Mile, 6 Mile, Gatlin Coal Waterline Extension, Mason Phase 1 and 2, and Moorefield. Numerous Phase I and Phase II waterline feasibility studies have also been conducted.

NO

E. Is your firm experienced in Acid Mine Drainage Evaluation and Abatement Design?

**YES Description and Number of Projects:** Triad has performed hundreds of AMD evaluations and abatement designs and is qualified to support this project.

13. PERSONAL HISTORY STATEMENT OF PRINCIPALS AND ASSOCIATES RESPONSIBLE FOR AML PROJECT DESIGN (Furnish complete data but keep to essentials)

NAME & TITLE (Last, First, Middle Int.)	YEARS OF EXPERIENCE	
	YEARS OF AML DESIGN EXPERIENCE:	YEARS OF AML RELATED DESIGN EXPERIENCE:
Chambers, Harold W. (Chip) Project Manager / Survey Department Manager / Project Engineer	17	26
Brief Explanation of Responsibilities: Mr. Chambers has performed engineering, surveying and management services for numerous civil design, mine development, commercial, industrial, transportation and mine reclamation projects. Mr. Chambers office duties associated with AML reclamation projects involve mine map review and the planning, coordination, supervision, survey data processing and cost estimation for surveying services on design and mapping projects.

NAME & TITLE (Last, First, Middle Int.) Simar, Roger A. Field Services / Laboratory Services Manager	YEARS OF EXPERIENCE		YEARS OF DOMESTIC WATERLINE DESIGN EXPERIENCE: 0
	YEARS OF AML DESIGN EXPERIENCE: 0	YEARS OF AML RELATED DESIGN EXPERIENCE: 32	

Brief Explanation of Responsibilities: Mr. Simar has over 30 years of experience performing and providing QA/QC inspection, and laboratory testing services for Triad Engineering, Inc. He has 20 years of experience as Triad's laboratory / Field Services Coordinator. Mr. Simar is experienced in most phases of earthwork, asphalt, and concrete construction. He is also knowledgeable in most basic laboratory test procedures for soil, concrete, aggregate and asphalt materials. Mr. Simar schedules field testing projects and personnel, reviews and submits field reports, provides problem solving and client consulting, writes reports, and prepares invoices. He also schedules and prioritizes all laboratory tests that are conducted, and reviews, approves and writes laboratory test reports. Additionally, Mr. Simar is the Radiation Safety Officer for Triad. He is responsible for inventory, leak testing, maintenance, and calibration of the company nuclear-density gauges. He is also responsible of the safety training and record keeping requirements in order to comply with NRC regulations.

---

### Drilling Tools:

- Hollow Stem Augers (2 ¼" I.D., 3 ¼" I.D., 4 ¼" I.D., 6 ¼" I.D.)
- Continuous Flight Augers
- NQ Core Equipment
- AW Core Equipment
- Pressure Testing Equipment
- Water Pumps, Trucks and Tanks
- Shelby-Tube Samplers (2", 3" and 5" Diameter)
- Split-Spoon Samplers (2" and 3" Diameter)
- CME Continuous 5.0' Length Samplers
- Longyear Casing Advancer (HQ)
- Downhole Hammer

### Laboratory Equipment:

- Triaxial Compression Machine
- Manual Proctor Devices (standard and modified)
- Automatic Proctor Hammer
- Turbidimeter
- Hydrometer
- pH Tester (soil & water)
- Electronic Scales
- Unconfined Compression Machine
- Atterberg Limits Devices
- California Bearing Ratio Devices
- Electrical Resistivity Devices
- Specific Gravity Devices (soils & aggregates)
- 2000 Degree Fahrenheit Oven
- Permeability Cells & Panels
- Consolidometers

## Equipment Listing

---

- Electronic Manometers
- Concrete Compressive Strength Equipment
- Aggregate Shakers
- Sieve Shakers
- Sample Splitters
- Unit Weight Buckets
- Slake Durability Machine
- Gradation Sieves
- L.A. Abrasion Test Equipment
- Soiltest Loading Devices
- Sodium Sulfate Soundness Test Equipment
- Asphalt Test Equipment
- Relative Density Determination Device

### Field Testing Equipment:

#### Soil

- Nuclear Moisture/Density Gauges
- Sand Cone Equipment
- Support Compaction Testing Equipment
- Digitilt Slope Indicator
- Pocket Penetrometers
- Hand Augers
- Static Cone Penetrometers

# Equipment Listing

---

## Concrete

- Air Meters (pressure & volumetric)
- Slump Cones & Accessories
- Windsor Probes
- Rebound Hammers
- Concrete Core Drills & Accessories
- Concrete Slab Profiler

## Water

- Pressure Transducer / Data Logger & Associated Software
- pH Meters
- Turbidity Meters
- Iron Test Kits
- Dissolved Oxygen Meter
- Water Test Kits

## Structural Steel, Bolt, and Paint

- Torque Wrenches
- Magnetice Gauges
- Tooke Gauges
- Wet File Gauges
- Sling Psychrometers
- Dye Test Kits

## **Equipment Listing**

---

### **Environmental Testing**

- OVA Meters (Trace Gas Analyzer by Flame Ionization)
- HNU Meters (Trace Gas Analyzer by Photoionization)
- Air-Stripping Unit for Water Treatment
- LEL/Oxygen Meter
- Draeger Pump and Assorted Tubes
- pH/ Conductivity/ Temperature Meters
- Hammer Drill and Associated Sampling Equipment

### **Field Laboratory Trailer**

- Equipped as Required for Specific Projects

### **Surveying and Mapping Equipment**

- Total Station Survey Instruments (Topcon, Lietz, Hewlett Packard, various models, 25 total)
- Wild T2 Precise Theodolite
- 2 Trimble 4000ssi Total Station GPS Recievers  
L1/ L2 dual frequency capability  
OTF (On The Fly) Initialization  
1.0MB static memory
- 2 Compact L1/ L2 frequency GPS Antenna w/ detachable geodetic groundplane
- 1 Pacific Crest 35w Data Transmitter
- 1 Pacific Crest 2w Data Reciever
- Trimble GPSurvey Software (v2.30b)
- Trimble TRIMNET Software (v92.11c)
- Dell Dimension XPS-D333 Computer w/ Dell Trinitron Monitor

19. Use this space to provide any additional information or description of resources supporting your firm's qualifications to perform work for the West Virginia Abandoned Mine Lands Program.

Triad Engineering, Incorporated (TRIAD) is a full service engineering firm specializing in the areas of geotechnical, civil and mining engineering and design, environmental assessment, surveying and mapping, construction monitoring, subsurface exploration, and laboratory testing, among other earth science disciplines. Our current work force includes civil, geotechnical and mining engineers, environmental scientists, geologists, hydrologists, chemists, surveyors, trained Computer Aided Design Drafting (CADD) draftsmen, field and laboratory technicians, drillers and support personnel.

TRIAD was founded in Morgantown, West Virginia (WV) in 1975 by three principals who molded the firm based on their belief that if the highest standards were maintained throughout all aspects of the company, they would earn their clients' respect, therefore ensuring the firm's continued growth. Today, TRIAD has a staff of over 200 full-time employees and six office locations in WV, Pennsylvania, Maryland and Virginia. By providing an array of competent services, using modern equipment, and maintaining a well-trained professional staff, TRIAD has maintained the founders' philosophies and proven that customer satisfaction results in good relationships and repeat business.

Furthermore, TRIAD is an employee-owned company with an active Board of Directors. Current Officers and Board Members are:

- Chief Executive Officer (CEO) – Randy Moulton, PE
- Senior Vice President – John Meeks, PG, LRS
- Chief Financial Officer (CFO) – Tina McPhail
- Chief Operations Officer (COO) – John Kent, PE
- William Gardner
- Robert Holstead, PE
- Parviz Jalali, PE
- David Moore
- Brad Reynolds, PE
- Roger Simar

TRIAD has successfully performed thousands of projects utilizing its professional expertise. TRIAD employees pride themselves on their ability to provide the firm's clients with top-quality work that is on schedule and within budget. Our company is small enough to be responsive to the needs of our customers and large enough to remain at the forefront of scientific solutions.

We are extremely proud of our performance under past contracts, including those we have held with the WVDEP. As of this date, more than 400 AML&R projects have been undertaken by TRIAD. The vast majority of these projects have been successfully completed on time and within the proposed cost estimate. As always, TRIAD will commit the necessary resources to meet the needs of this project.

20. The foregoing is a statement of facts.

## I. INTRODUCTION

---

TRIAD ENGINEERING, INC., (TRIAD) proposes to perform engineering design and related services, including surveying and construction monitoring, for the Dotson Tipple Design project in Monongalia County, West Virginia. Factors that make TRIAD a strong candidate for consideration include:

- Past experience & complete familiarity with AML&R projects
- In-house capabilities
- Experienced professional and support personnel
- 100% employee owned and operated West Virginia firm
- Strong geotechnical background
- Outstanding laboratory facilities
- Expeditious & economical mobilization of drilling rigs, equipment and personnel
- Experience in major design projects

TRIAD has completed over 400 projects for the WVDEP. Each project has involved various areas of expertise and problem types. In addition to WVDEP projects, TRIAD has successfully completed major design projects for other government agencies, large coal mining concerns, chemical manufacturers, developers and numerous other clients. TRIAD's responsibilities on these projects have included, but were not limited to:

- Design Development and Drawings
- Geotechnical Investigations and Analyses
- Permit Applications
- Surveying and Mapping
- Hydrology and Hydraulics
- Construction Bid Packages
- Construction Specifications
- Construction Bid Packages
- Construction Observation and Monitoring
- Construction Management

## II. GENERAL EXPERIENCE AND CAPABILITIES

---

### General Information

TRIAD is an engineering firm providing professional services in the areas of civil, environmental, mining, geotechnical and chemical engineering; environmental consulting; site assessment; land planning and landscape architecture; geology and hydrogeology; surveying and mapping; construction inspection and materials testing; and other related earth-science disciplines. Our firm has provided services on many thousands of projects of varying size and complexity since beginning operations in 1975. Clients include mining and industrial companies, federal, state and local governmental agencies, contractors, architects, engineers, developers, owners and commercial organizations.

TRIAD was founded in 1975 in Morgantown, West Virginia (WV) by three civil engineers from West Virginia University. A second office was opened in Charleston, WV in 1979 and later relocated to our present St. Albans, WV location. TRIAD expanded into the northern Virginia (VA) area in 1989 with offices in Winchester and Harrisonburg, VA, and began operations in Pennsylvania in 1990 with a full-service office in Greensburg. Most recently, TRIAD has opened offices in Hagerstown, Maryland and Ashburn, Virginia.

Facilities and equipment available to support our staff have grown substantially during the past 35 years. Each of our offices contains secure computer networks utilized for hydrogeologic evaluations, risk assessment, stability analyses, survey data reduction, mapping and site design. Our computer-based drafting and reproduction facilities are used to develop detailed site plans (monochrome or color), construction details, and other graphic documentation as required for our projects. TRIAD's fleet of drilling rigs and support vehicles are based in our WV offices and are maintained in-house to meet the needs of our engineering and site assessment projects. Well equipped, modern state-of-the-art materials testing laboratories are also maintained at our offices to support our engineering and construction-related projects. Standard 35-mm photography and digital cameras are used to document the stages of our projects.

TRIAD currently employs a staff of more than 200 professionals in its six office locations. Our personnel include chemical, civil, environmental, geotechnical and mining engineers, as well as geologists and hydrogeologists, biologists, chemists, environmental scientists, planners, landscape architects, natural resource specialists, regulatory compliance specialists, permitting engineers, risk assessors and health and safety specialists. Our technical support staff includes designers, draftsmen, surveyors, technicians, drillers, construction inspectors, and other corporate and clerical personnel. Most of our professional and technical staff has been with the company for many years - we pride ourselves on a very low turnover rate, which adds to continuity and enhances the level of productivity and experience afforded by TRIAD.

### Surveying and Mapping

TRIAD has completed numerous mapping projects since our inception in 1975. These projects have included performing ground control for aerial mapping, field mapping of specific sites and/or obscured areas, and field mapping of in-stream topography. TRIAD has performed topographic surveying and mapping and construction layout for large development projects as well as for major bridge/roadway projects under construction for the West Virginia Department of Transportation. TRIAD utilizes state-of-the-art tools and equipment including Global Positioning system base station and portable GPS HF radio receivers, as well as total station theodolites with electronic data collectors. Maps and plats are developed in either AutoCADD or Microstation format.

TRIAD maintains quality control by adherence to our Standard Operating Procedures Manual for Surveying. The document is continuously updated to stay abreast of new survey innovations and accuracy standards. All topographic map development is completed to the standards set forth by the National Map Accuracy Standards or other appropriate quality standards. MSHA and OSHA HAZWOPER-trained crews are also available for hazardous work environments.

As can be seen on Block 14 of the WVDEP/AML Consultant Confidential Qualification Questionnaire (CCQQ), TRIAD possess the most modern equipment available to perform surveying services to support the engineering design required for this project.

### Subsurface Investigation

TRIAD currently maintains fifteen rotary drill rigs outfitted for geotechnical and environmental investigation work. All rigs and support trucks are outfitted for services which may be required on any project. Drilling equipment includes samplers, casing, drill rods, coring bits, piping, pumps and various drilling tools. Most of our rigs are mounted on ATV, tracked and 4WD carriers. Skid mounted rigs are also available to permit gaining access to difficult locations without the need for dozer assistance. Air purifying and supplied air respirators are maintained in-house for drilling programs involving burning refuse where concentrated levels of carbon monoxide may be encountered. Our drill crews, field geologists and support personnel have received OSHA and MSHA safety training for work on hazardous sites, and are certified monitoring well drillers. TRIAD employs a full time corporate safety officer responsible for ensuring the safety of our employees. TRIAD has performed drilling activities on an AML&R project where levels of CO were in excess of 1900 parts per million. Our drilling personnel are experienced in all phases of exploration work which may be required on this project.

Typical types of projects for which we have provided drilling services include:

- Highways, bridges and haulroads
- Railways and sidings
- Refuse piles
- Burning refuse investigations
- Dams and impoundments
- Valley fills
- Landslides
- Subsidence investigations
- Mine-related investigations
- Coal preparation plants
- Commercial and Residential structures
- Pavement design and evaluations
- Instrumental installation - groundwater monitoring wells & piezometers
- Leaking underground storage tanks
- Landfills
- Hazardous waste investigations

## Laboratory Services

Geotechnical testing and analysis has been a major discipline of TRIAD since our inception. In addition, we have facilities and equipment to perform various chemical and analytical testing. Fully-equipped geotechnical testing laboratories are maintained in both our Morgantown and St. Albans, WV offices. An outline of our in-house laboratory and field testing capabilities is as follows:

Geotechnical and Materials Testing services include:

- Moisture content determinations
- Grain size analyses
- Plastic limit determinations
- Liquid limit determinations
- Shrinkage limit
- Slake durability testing
- Shear strength determinations
- Consolidation characteristics
- Permeability testing
- Compaction testing
- Soundness testing
- Specific gravity determinations
- CBR determinations
- Unit weight determinations
- Chemical and Analytical Testing:
  - Soil Analysis
    - pH (field)
    - pH (lab)
  - Water Analysis
    - Temperature
    - pH
    - Specific Conductance
    - Flow
    - Iron Content

### Design Engineering and Contract Document Preparation

TRIAD has extensive experience in design engineering and preparation of construction contract drawings on projects for the WVDEP / AML&R, as well as similar projects for private concerns.

TRIAD professionals execute practical engineering and scientific solutions that balance science, aesthetics and jurisdictional requirements. With in-house staff providing related services aligned to project milestones, TRIAD can support a project from original survey through construction inspection. Our Professional Engineers are well-versed in the areas of civil design and stormwater management, as well as other disciplines, and are licensed in the states of West Virginia, Pennsylvania, Maryland, Virginia and Ohio, among others.

Design Engineering services provided by TRIAD include:

- Abandoned Mine Lands Reclamation
- Roadway Improvement Plans
- Commercial and Residential Site Development Plans
- Rezoning and Master Development Plans
- Construction Specifications
- Stormwater Management Best Management Practices
- Water Distribution System Design
- Storm Drainage System Design
- Sanitary Sewer Design
- Hydrologic Studies
- Land Use and Planning
- NPDES Plans and Permitting
- Residential Subdivision Development Plans

### Construction Monitoring and Inspection

Construction monitoring services provided by TRIAD include soil, concrete, aggregate, asphalt, steel, welding and paint. TRIAD maintains a staff of engineering technicians who are certified by state-specific highway and materials departments, ACI, FAA, and others. Senior level technicians are skilled in interpreting design drawings as well as typical construction inspection and testing. Services provided on these projects have included: testing of compacted fill with a nuclear moisture density gauge, documentation of construction personnel hours and equipment utilized, quantity determinations, submittal of daily and weekly reports, interpretation of technical specifications, inspection of liner installation, and construction recommendations. TRIAD also routinely provides technicians with OSHA and/or MSHA certifications.

Construction Monitoring and Inspection services include:

- Quantity Estimates and Verification
- Inspection of Deep Foundations, including Driven Piles, Caissons and Auger Cast Piles
- Footing Inspection and Bearing Capacity Evaluation
- Field Concrete Testing and Sampling, including Coring, Windsor Probe and Rebound Hammer Testing
- Batch Plant Inspection
- Steel Inspection, including Bolt Torque
- Visual Weld Inspection, and Dye Testing
- Penetrant Testing
- Paint Thickness (Wet and Dry Film)
- Water Testing, including pH, Iron, and Turbidity
- Fireproofing Inspection
- Floor Flatness Testing
- In-place Density Testing
- Grade Checking
- Nuclear Moisture Density Gauge Testing

### **III. CORPORATE SPECIALIZED EXPERIENCE**

---

TRIAD has provided a wide range of services on mining and coal-related projects since the firm began operations more than thirty years ago. With this extensive experience in geotechnical, civil and design engineering and contract document preparation, we are expertly qualified to provide these services for the abatement of problems arising from abandoned mine lands. We maintain in-house expertise and capabilities for all phases of the abandoned mine lands program which require services in geotechnical and design engineering, surveying and mapping, subsurface investigation, drilling, testing, construction drawings and specifications, contract document preparation, and other related technical and administrative duties associated with the successful completion of a design / construction project.

### **IV. MANAGEMENT PLAN, LOCATION OF FACILITIES & WORK LOAD**

---

#### **MANAGEMENT PLAN**

##### **Resource Allocation & Location of Facilities:**

As indicated in other sections of this response, TRIAD has the staff, equipment and other resources to complete most AML&R projects totally in-house. The location of our offices and laboratories in Morgantown and St. Albans gives us ready access to both the northern and southern coalfields of WV. Our professional staff have extensive experience on AML&R, or similar design projects, and is well-qualified to perform the work. If awarded this project, we are committed to allocating the personnel and resources required to complete the work in a timely, competent and cost-effective manner.

##### **Management and Project Team Organization:**

TRIAD's Project Manager (PM), Mr. Harold W. "Chip" Chambers, will be responsible for the overall management of the project. Upon award, Mr. Chambers will schedule a site visit with the AML&R Project Manager to review the work requirements and prepare a work plan for review. Our PM will also meet with AML&R personnel, as required, to develop a complete understanding of the work directive and to answer any questions concerning the proposed work approach. The PM will review the project requirements and assign team members and allocate resources needed for timely completion of the project.

Upon receipt of authorization to proceed with a project, Mr. Chambers will be responsible for daily execution and coordination of all phases of the project, including the supervision of other staff members working on the project and coordination of all field and laboratory activities. Mr. Chambers will also be responsible for maintaining liaison with AML&R personnel and, when required, issue periodic progress reports.

As the project progresses, our PM will periodically meet with the AML&R personnel to review progress, discuss any problems, and evaluate various corrective alternatives as needed. Input from AML&R personnel will be actively solicited on each phase of the project.

Schedule and Budget Control:

TRIAD's PM will be responsible for monitoring and controlling project schedules and budget. As the work progresses, Mr. Chambers will evaluate progress on a weekly basis and compare the progress to the established work schedule. If these reviews indicate a schedule problem is developing, he will meet with our personnel to discuss the problem and explore options for correcting the situation. If circumstances develop that will make it impossible to maintain the original schedule, AML&R personnel will be immediately informed and a mutually satisfactory schedule adjustment will be made.

Personnel time and expense charges are maintained and allocated to projects on a weekly basis using our automated desktop accounting and project management software (Axium). Using this data with knowledge of exploration, testing and subcontractor costs, Mr. Chambers will review project budget status on a weekly basis. The percentage of work completed will be compared to the percent of costs incurred in order to quickly identify any budget problems which may develop. If potential budget problems are identified, they will be evaluated by the PM. If measures to eliminate potential cost overruns cannot be eliminated, AML&R personnel will be immediately informed of the problems and causes. A mutually agreeable budget will be prepared or the scope of work will be revised to conform to the original budget, based on the nature of the problem.

## **WORK APPROACH**

### **Work Directive and Initial Planning:**

Upon notice to proceed, Mr. Chambers will review the work directive, discuss the project with AML&R personnel, and visit the site to become familiar with the project and work requirements. Available site information and data, such as results of previous borings, geologic reports or old mine maps will be reviewed. Based on this information, the PM will plan the scope of work including the subsurface investigation, surveying, engineering design and plan / specification development.

### **Surveying and Mapping:**

Prior to undertaking any surveying, Mr. Chambers will work with our surveying staff to determine the extent and required accuracy of the work involved. We will then determine if existing mapping such as U.S.G.S., Corps of Engineers, Highway Department, or other utility mapping is available for the area. Should satisfactory existing mapping be available, we will utilize this (along with such location or "fill-in" surveys as are necessary) in order to minimize the project cost.

### **Subsurface Investigation:**

Mr. Chambers will work with our drilling manager, Mr. Bill Gardner, to determine the best-suited equipment, personnel, and access routes for drilling so that work can begin as quickly as possible. The results and progress of the drilling work will be monitored on a continuing basis by the PM to determine that the needed information is being obtained. When necessary, the drilling program will be revised as it progresses to account for unanticipated conditions. In addition, needs for specialized drilling procedures, observation wells, slope inclinometers, piezometers, angle borings, hand sampling techniques, etc. will be evaluated by Mr. Chambers and Mr. Gardner.

### **Laboratory Testing:**

Testing requirements for the project will be developed by our PM or a designated member of the project team. Since practically all of the testing will be performed in-house, the results can and will be evaluated on an on-going basis. This will permit us to eliminate unneeded tests before they are performed and to revise the testing program to better provide data which will be useful for project evaluation and design.

### Design Development Report:

After the field and laboratory investigations are complete, an engineering report will be prepared and submitted to the WVDEP for review and comment. The report will contain:

1. Project description
2. Boring location plan and topographic mapping
3. Boring logs
4. Description of subsurface conditions including soil, bedrock and groundwater
5. Laboratory test results
6. Recommended alternative(s)
7. Special recommendations such as potential environmental effects of the design, damage to adjacent property , loss of use, and future effects.

After review and approval, TRIAD will proceed with preparation of all necessary construction documents including Drawings, Specifications and a Detailed Cost Estimate.

### Design Drawings and Specifications:

Design drawings and specifications will be prepared to meet the site-specific criteria for the project. The drawings will accurately reflect the site conditions and depict the proposed work in a clear and understandable manner. The drawing packages will, as a minimum, include site plans, cross sections and details as necessary to define the scope of work. Detailed technical specifications will be prepared for general working conditions as well as each work item. The specifications will be the contractor's guide to the work and will set the guidelines for quality and materials to be used in the construction. All work will be reviewed and certified by Mr. Robert M. Hare, P.E., or one of our other WV-registered Professional Engineers (P.E.).

### Construction Cost Estimate:

Upon completion of the final construction plans and specifications, the expected cost of the work will again be evaluated. This cost evaluation will be made using unit cost data from various sources (i.e. previous bids on similar projects, information solicited from contractors, Department of Highways, construction cost data, etc.). The final cost estimate will be discussed with AML&R personnel and, whenever necessary, revisions to the plans and specifications will be made to bring the estimated costs in line with the project budget. We expect to coordinate our efforts with the WVDEP throughout the project so that the need for final revisions will be minimized.

)

Project Meetings:

Our PM and engineers will meet with AML&R representatives on an as-needed basis during the planning and design phases of the project to assure an understanding of the work scope for that project and to keep the WVDEP informed of our progress and results. Upon completion of the design phase, our personnel will be available to attend pre-bid and pre-construction meetings to answer questions concerning the design and clarify the intent of the drawings and specifications.

QA/QC Construction Monitoring

Project team personnel will also be available to make periodic inspections during construction and to make a final inspection upon completion of construction. Summary reports of our inspections will be prepared and submitted to the WVDEP. These reports will summarize our observations of construction activities and progress and will indicate any problems which are observed. If construction problems or deficiencies are observed, recommended solutions will be presented in the inspection reports.

	Jimtown Tipple	Harrison Co.	Subsurface Investigation, Slide Repair
	Ven Runs Landslide Maintenance	Lewis Co.	Subsurface Investigation, Slide Repair

**West Virginia Department of Environmental Protection  
Office of Abandoned Mine Lands and Reclamation  
Completed Projects – 1992 to Present**

**Triad Engineering  
St. Albans and Morgantown, West Virginia  
Page 20**

<b>YEAR</b>	<b>PROJECT NAME</b>	<b>LOCATION</b>	<b>SERVICES PROVIDED</b>
<b>2 0 0 5 THRU 2 0 0 9</b>	Blankenship Subsidence	Beckley	Drilling & Sampling, Subsidence Investigation
	Mabscott (Houck) Subsidence	Mabscott	Drilling & Sampling, Subsidence Investigation
	Spicer Subsidence	Maidsville	Drilling & Sampling, Subsidence Investigation
	Everettsville Burning Refuse	Monongalia Co.	Drilling, Geotechnical Investigation
	Union Prong (Carpenter) LS Project	Kanawha Co.	Drilling & Sampling, Piezometer Installation, Well Abandonment
	Rawl (Pigman) Portals	Mingo Co.	Drilling & Sampling, Piezometer Installation
	Whitman (Williams) Drainage	Logan Co.	Drilling & Sampling, Piezometer Installation
	Varney (Justice) Drainage	Mingo Co.	Drilling & Sampling, Piezometer Installation
	Brounland (Holstein) Drainage	Kanawha Co.	Drilling & Sampling, Piezometer Installation
	Musick (Brewer) Subsidence	Mingo Co.	Drilling & Sampling, Subsidence Investigation
	Elk Creek Portals	Mingo Co.	Design, Surveying & Mapping, Portals, Re-grade, Section 404 Permit, Demolition of Structures
	Chapmanville (Henry) Portals/Lake (Winkler) LS/Stone Branch (Adkins) LS 1/Mud Fork (Baisden)	Logan Co.	Drilling & Sampling, Piezometer Installation
	Rumble (Stevens) Refuse & Portals	Boone Co.	Design, Surveying & Mapping, Portals, Re-grade, Section 404 Permit, Demolition of Structures
	Campbells Creek (Miller) Drainage	Kanawha Co.	Drilling & Sampling, Piezometer Installation
	Rich Fork (Spells) Portals	Kanawha Co.	Drilling & Sampling, Piezometer Installation
	Mullens Portals	Wyoming Co.	Design, Drilling & Sampling, Piezometer Installation, Surveying & Mapping, Portals, Re-grade, Dewatering
	Belington Portals & Drainage	Barbour Co.	Design, Drilling & Sampling, Piezometer Installation, Surveying & Mapping, Portals, Re-grade, Dewatering
	Beckley (St. John's) Subsidence	Raleigh Co.	Drilling & Sampling, Mining Determination
