## Addendum #1

To answer technical question:

- 1 The question is concerning the pricing for the connecting bands for the above mentioned contract. In the spreadsheet, it states connecting band pricing is included in linear foot unit pricing. Bands are normally priced the same as a foot and a half of pipe or the same as 2 feet of pipe. I don't know how I can include the band price in the linear foot pricing without knowing what length the pipe will be shipped in. The standard length is 20', but we can ship lengths up to 50'.

### RESPONSE:

- 1 For bidding purposes only, standard pipe length for the WV Division of Highways is 20'; however, the WV Division of Highways does not want to limit our requests to 20'. We reserve the right to purchase longer pipe when necessary.

NOTE: Qualified vendors who submit a valid low bid will be awarded a contract for those items for which their bid is lowest for Corrugated Metal Culvert Pipe as well as all stocking Dealers submitting quotes for F. O. B. Dealer's Storage Site – see items 1a, 3a, and 5a listed on the Price Sheet. The State of West Virginia reserves the right to make multiple awards on this contract when it is in the best interest of the State.

Dealers, stocking culvert pipe from the list of approved fabricators/producers (see Acceptance Item), are encouraged to submit bids for the types and sizes of corrugated metal culvert pipe stocked at their sites. Dealer's quotes shall be F.O.B. Dealer's Storage Site. The exact location(s) of Dealer's storage sites shall be identified with the Dealer's quotes.

Dealers submitting quotes for F.O.B. Dealer's Storage Site (approved pipe) will be awarded that portion of the contract. The bid price F.O.B. Dealer's Storage Site shall include the loading of Division of Highways' trucks by Dealer.

Bidders are requested to type bids. Please enter all information requested.

#### SPECIFICATIONS:

This contract shall be administered in accordance with the WV Division of Highways standard specifications roads and bridges, adopted in 2010, and supplement dated January 1, 2011.

The requirements of the West Virginia Department of Transportation, Division of Highways Standard Specification Roads and Bridges, Section 109.20, Price Adjustment for Load Limit Violations apply to all material delivered under this contract.

#### ACCEPTANCE:

Acceptance and handling of materials shall be in accordance with the West Virginia Department of Transportation, Division of Highways, Materials Control, Soils and Testing Division Materials Procedure 713.01.50 available at <http://www.transportation.wv.gov/highways/mcst> (procedure for the quality assurance of corrugated metal pipe). This procedure includes requirements for qualifying for the approved fabricators list. For more information, contact Materials Control at the address and/or phone number below.

Acceptance of material will be from the fabricated source (sales office or intermediate suppliers' location not acceptable.) A list of approved fabricators/producers may be obtained from:

If one of the sources used for determining the index goes out of business the index in the proposal  $I_b$  and the index at the time of placement  $I_p$  will be based on the average of the remaining sources. Thus,  $I_b$  could be based on an average of 6 sources and the  $I_p$  on the average of 5 sources or vice versa. If a source that goes out of business reopens at a later date the index determined will once again be based on 6 sources as per the previous paragraph.

The posted price for each source will be compared to the average of all sources. If the difference between the average and the individual price is greater than 25 % of the average, that individual source will be excluded from the calculation of the average price  $I_b$  or  $I_p$  and a new average will be calculated using the remaining sources.

When the ratio of the price index at placement ( $I_p$ ) divided by the price index at bidding ( $I_b$ ) is less than 0.90 or greater than 1.10, the portion of the contract unit price which reflects the cost of the specified material will be adjusted for the change in accordance with the following formula.

$$Pa = [(I_p / I_b) - 1.00] \times Q \times \text{Applicable "C" Factor (C, C}_1 \text{ or C}_2)$$

where:

Pa	=	Price Adjustment
$I_p$	=	Price Index at Time of Placement
$I_b$	=	Price Index for Bidding
C, C <sub>1</sub> , C <sub>2</sub>	=	Adjustable Material Cost per Unit of Contract Item Bid
Q	=	"As Constructed" Quantity

The price index for determining price adjustments for all work performed after the contract completion date, as revised by approved time extensions, will be determined as follows: The price index ( $I_p$ ) shall be for the month in which the contract completion date (as extended) falls, or the price index for the month in which the work was performed, whichever is less.

**109.11 THROUGH 109.19-BLANK****109.20-PRICE ADJUSTMENT FOR LOAD LIMIT VIOLATIONS:**

The Allowable Gross Weight for any vehicle being used to haul materials on publicly maintained highways under the terms of this contract shall be as follows unless otherwise vested by law.

109.20

Vehicle Type	Allowable Gross Weight
Two - Axle Truck	34,000 LBS (15.42 Mg)
Three - Axle Truck (Tandem Axle in Rear)	54,000 LBS (24.49 Mg)
Four - Axle Truck (Tri - Axle in Rear)	63,000 LBS (28.58 Mg)
Five - Axle Truck (Quad - Axle in Rear)	70,000 LBS (31.74 Mg)
Five or More Axles (Combination Vehicle)	80,000 LBS (36.29 Mg)

The Allowable Gross Weight shown above is the maximum gross weight that the majority of vehicles of that type can legally haul. Any vehicle that can legally have a gross weight different from that specified above may be inspected by the Division of Highways, Weight Enforcement Section and receive a certificate showing the maximum legal gross weight for that vehicle which shall be used in lieu of the Allowable Gross Weight from this provision.

All materials from a commercial source or a batch plant are subject to a price adjustment for load limit violations. The Division of Highways is not enforcing the West Virginia Motor Vehicle Laws with this provision, however, it is enforcing a contractual requirement that makes reference only to the provisions that are described. Nothing in this provision relieves any party from compliance with the State Law on load limits or any fines which may be assessed for violation of said law.

Material moved by the Division of Highways Special Permit for excess size or weight pursuant to West Virginia Code 17C-17-11 is exempt from this provision.

A weigh ticket shall be required with each load of material from a commercial source which would normally have truck scales. This includes, but is not limited to, all asphalt paving materials and all aggregates regardless of the contract pay unit. The weigh ticket shall include gross, tare, and net weights, time and date of loading, Item Number or Description of Materials, Contract Number or Project Number, number of axles on haul unit, license number of haul unit, and signature of the weigher certifying that all information on the ticket is correct. The weigh ticket shall be used to determine the Allowable Gross Weight and the Actual Gross Weight for each load of material delivered by that haul unit.

For material from a commercial source or a batch plant, which would not normally have truck scales, a weigh ticket documenting the tare weight, number of axles on the haul unit, license number of haul unit, date weighed, location of scales, and signature of the weigher certifying that all information on the ticket

**109.20**

is correct, may be supplied for each haul unit as an alternate to the ticket required in the previous paragraph. The tare weight ticket shall be supplied for each contract on a yearly basis and when modifications are made to the vehicle or combination of vehicles. In this situation the Allowable Gross Weight shall be determined from the weight ticket information. The Actual Gross Weight shall be determined by adding the tare weight of the haul unit to the weight of the material delivered. The weight of the material delivered shall be calculated and furnished by the vendor/supplier shipping the material to the project site or DOH facility. This includes, but is not limited to, concrete, structural steel, piling, reinforcing steel and all prepackaged material of known weight, such as cement, grout, fertilizer, lime, abrasives, etc.

If the haul unit is a combination of vehicles, the license number shall be supplied for each component. The tare weight shall be for the complete haul unit.

All weighing shall be done on scales approved and sealed by the West Virginia Division of Labor, Bureau of Weights and Measures. If the scales are moved or upon the request of the Engineer, the scales shall be reapproved and sealed. The Engineer shall be notified of any scale malfunctions. The Division of Highways may, at its option, accept inspection and sealing by out of state agencies when the material is being loaded outside West Virginia.

A price reduction shall be assessed for each load of material where the actual gross weight exceeds the allowable gross weight. The amount of the price reduction shall be twenty-five Dollars (\$25.00) per ton for each ton (twenty-eight Dollars (\$28.00) per megagram for each megagram), or portion thereof, in excess of the allowable gross weight except that no reduction shall be assessed if the amount in excess of the allowable gross weight is less than 500 lbs (225 kg). This amount shall be deducted as a price adjustment for load limit violations.

Any material, covered by this provision, which is delivered without the proper weigh ticket shall not be accepted by the Division of Highways.
