PROCUREMENT SPECIFICATIONS
NO. 591-2-M

OPEN END CONTRACT
DOUBLE DRUM VIBRATORY ROLLER/COMPACTOR

1.0 PURPOSE

It is the purpose of these specifications to describe a Double Drum Vibratory Roller/Compactor (hereinafter referred to as a "roller" or a "unit") to be purchased for use by the West Virginia Division of Highways (DOH) on an Open End Contract basis.

2.0 BIDDING PROCEDURES

The current purchasing procedures regarding bidding as established by the Department of Administration, Purchasing Division, shall apply. Failure to submit the "Request for Quotation" forms, complete in its entirety and according to directions indicated, may subject the bidder to disqualification. Each bid submitted shall also be accompanied by a Bidder's Evaluation Report completed in detail. Addendums in order, along with exception sheets, should be with Bidder's Evaluation Report. FAILURE TO SUBMIT THE BIDDER'S EVALUATION REPORT, COMPLETE IN ITS ENTIRETY, SHALL RESULT IN AUTOMATIC DISQUALIFICATION.

3.0 SPECIFICATIONS

The specifications named herein, mandatory and non-mandatory, establish the acceptable level of quality only and are not intended to reflect a preference or favor any particular brand or vendor.

3.1 EXCEPTIONS TO NON-MANDATORY SPECIFICATIONS

Exception to a non-mandatory unit specification may be made by the bidder, providing the exception is not available from the manufacturer. **Any such exception must be noted on the bidder's evaluation report and should be accompanied by supporting documentation/literature from the manufacturer. Any exception must be indicated on a separate attachment to the bidder's evaluation report and labeled as "Exception to Specifications".** The state reserves the right to determine whether the stated exception does or does not reduce the quality and performance of the unit. Failure to provide information for any exceptions may be grounds for rejection of the bid. The state reserves the right to waive minor irregularities in bids or specifications in accordance with §148-1-4(f) of the WV Legislative Rules and Regulations.

3.2 MANDATORY SPECIFICATIONS

All specifications preceded by "shall, will, and/or must" or are stated as a "minimum and/or maximum" are mandatory as stated in Purchasing Divisions Policies and Procedures. Any bid failing to meet any mandatory item shall be immediately disqualified. Failure to respond in the appropriate evaluation section may also be grounds for immediate disqualification at the discretion of the State.

A mandatory pre-bid conference is scheduled for this equipment purchase as stated in the RFQ. Vendors having products with variations or exceptions in specified mandatory items are expected to address any such variations or exceptions during the pre-bid conference. **The State shall review and consider any such variation or exception, and may at its sole discretion, issue an addendum to change mandatory specifications deemed to be in the State's best interest. Bids from any vendor failing to attend the mandatory pre-bid shall be disqualified. Bids containing any variation or exception to a mandatory specification that was not addressed during the pre-bid conference and accepted by the issuance of an Addendum shall be disqualified.**

4.0 REPRESENTATIVE UNIT FOR TEST

The successful vendor must (if specified) provide DOH one (1) completed representative unit to be observed and evaluated on each order to insure compliance with specification. If requested, the time period for testing and evaluation shall be seven (7) working days following receipt of the unit. DOH will incur no obligation for deterioration of surfaces, finishes, seals, and mechanical or electrical parts on the unit resulting from operation and testing within the limits of these specifications; nor will DOH incur obligation for damage to the unit resulting from failure to meet specifications when due care and attention is given by DOH and testing is done within the limits of these specifications. Failure of the pilot unit to satisfactorily meet specifications as bid shall be cause for cancellation of the purchase order, and return of the delivered unit along with all associated equipment to the vendor at the vendor's expense.

4.1 CONDITION OF UNIT(S) UPON DELIVERY

All units must arrive at the prescribed delivery point having been completely preserviced with oil, lubricants, and coolant. All prescribed precautions pertaining to first operations and break-in of the unit are to be posted conspicuously on the unit for ready observance by the operator.

4.2 DELIVERY

Delivery point of the completely assembled representative unit will be the DOH, Equipment Division, Route 33 at Brushy Fork Road, Buckhannon, West Virginia (26201).

The vendor is responsible for guaranteeing delivery of the completed units within the time specified and agreed to by the State. Delivery is preferred within 120 days after

receipt of purchase agreement. The vendor is responsible for establishing and coordinating delivery terms with allied manufacturers or suppliers. **Delivery terms shall be stated in the bid and the State reserves the right to accept or negotiate such terms.** Failure to reach an agreement may result in rejection of the bid. **The successful bidder shall provide their manufacturer's confirmation of the order to the WVDOH contact person within seven (7) working days after receiving the approved purchase order.**

A completed pilot model for inspection must be provided within 45 calendar days after receipt of the purchase agreement by the successful vendor.

Delivery is an integral part of this specification and failure to comply will be cause to initiate a D.O.T. Administrative Form WV-82, Vendor Performance Form. The WV-82 Form will provide a means of officially notifying the Purchasing Division and the vendor of unsatisfactory performance; such as late deliveries, poor service, inadequate parts supplies, etc.

The decision to initiate subject Form will be at the sole discretion of the D.O.H. Commissioner's established Equipment Review Board.

Issuance of the WV-82 Vendor Complaint Form on unsatisfactory delivery against any vendor will be cause to refuse to consider similar items from those vendors on future Request For Quotations.

(NOTE: Delivery time could be altered due to labor strikes, severe inclement weather conditions, etc.)

5.0 AWARD CRITERIA

- 5.1 DOH will recommend the award in accordance with the RFQ evaluation criteria described in the requisition. **The award shall be made to the lowest unit cost vendor that meets or exceeds the specifications.** DOH reserves the right to place multiple orders in any quantity.

6.0 SPECIFICATIONS AND GUIDELINES - GENERAL

Note: Repeat number of passes over the same area is required to achieve specified compaction efficiency/density. Successive passes over same area results in reduced area coverage and productivity. Rolling speed selected provides impact spacing of a minimum 10 impacts per foot at high vibration frequency setting. Actual compaction efficiency is determined by job conditions.

BW120AD-4

Dash 4 Series – Setting the standard for excellence...

The next generation BW120AD-4, establishes the "benchmark" for all other competitive rollers to measure up to. Combining compact size and high maneuverability with heavy tandem roller features the new BW120AD-4 delivers outstanding performance.

This new model from BOMAG features more performance, increased productivity, improved safety details and unsurpassed operator comfort. Slanted drum support legs with high curb clearance, afford unobstructed view of the drum edges, minimal lateral

offset and the ability to work closely to obstructions and in confined areas.

The two (2) position throttle detail offers dual vibration frequencies, providing maximum compaction results on a wide range of applications and material types.

Applications:

- Granular sub-base compaction
- Walkways, bicycle and cart paths
- Driveways and Parking lots
- Road rehabilitation and patching

BW120AD-4 shown with optional folding ROPS.

Ergonomically engineered operator's platform providing optimum comfort and maximum productivity.

Handling is Easier & Safer:

- New, slanted drum support legs provide improved visibility of the drum edges, minimizing the possibility of damage when working in confined areas. High curb clearance allows working close to obstructions.
- Central, lifting point, makes strategic handling and loading of the BW120AD-4 easier with little risk of body damage.
- The standard sliding seat arrangement provides improved drum edge and overall side visibility for safer and more comfortable operation.
- The travel control lever and two (2) position throttle control are positioned for easy access and safe operation.
- Fully hydrostatic travel design offers smooth yet responsive control.
- Standard FOPS/ROPS with safety seat belts offer additional operator safety.

Light duty tandem models provide maximum versatility and productivity

Achieve Maximum Productivity:

- The BW120AD-4 has two (2) vibration frequencies for optimized compaction on a wider range of material types.
- Vibration can be selectively shut-off on the rear drum to prevent over compaction and material damage to sensitive material types and thin lift applications.
- Large diameter drums minimize pushing and cracking of mat surface, delivering a high quality finish.
- High curb clearance and minimal lateral overhang allow for working close to obstructions, minimizing handwork.
- Standard dual drum scrapers (2 per drum) ensure clean drums in either forward or reverse travel direction.
- Drum amplitude and frequency are optimized to provide high performance and maximum productivity on a wide range of applications.
- Water spray system automatically cancels in neutral travel position, extending tank life.

Less Service & Maintenance:

The purchase price is always important, But more importantly are the operating costs.

Check these features:

- Drum vibration bearings and travel system SAHR brakes are maintenance free.
- Drum shell wrapper thickness and head plates are designed to provide maximum strength for long life and durability.
- Bolt-on oscillating, articulation joint provides long life and simplifies repairs.
- Wide opening, lockable, composite engine cover provides easy service access and minimizes possible underhood vandalism.
- The BOMAG hydraulic oil filtration system extends servicing intervals to 2000 hours.
- Daily maintenance check points are quickly completed with easy access, visual indicators for hydraulic oil level, oil filter and air filter.
- Hydraulic test ports are easily accessible for simplified troubleshooting.
- Vandal protected instrument panel insures against on-site electrical problems.
- Water spray pump and filter are easily accessed in a centralized location and sprinkler nozzles are quick disconnect design for easy cleaning when required.

Featuring...

Wind protected, quick-disconnect spray nozzles with dual scrapers per drum.

Bolt-on, maintenance free, center-joint with standard crab steer off-set, provides long life and ease of repair.

Easy access to engine and drive components for simplified servicing

Best for **COMPACTION**

With these features and many more, it's easy to see why this model maintains a high residual value while delivering lower lifetime operating costs.
